The other major domestic carrier, Australian Airlines, also said half of its normal 180 flights had been cancelled and the situation was expected to deteriorate throughout the day.

Both airlines have said the year-long pilots' strike cost them about 150 million dollars (124.28 million U.S.) each and they had only recently recovered to pre-strike passenger levels.

International airlines, including the Australian carrier Qantas, are not seriously affected because of their ability to refuel overseas.

Meanwhile efforts were being made in the West Coast city of Perth where the dispute started to arbitrate a settlement although the Transport Workers Union (TWU), which represents the striking aircraft refuellers, said the stoppage would last at least until Friday when another meeting is planned.

The main issue in the strike appeared to be the decision of Esso Australia Ltd to reduce the number of oil tankers from two to one at its Perth terminal.

However, a senior TWU official Ken McGrath said the walkout on Tuesday night was triggered by rumours that oil companies including Esso were planning to cut back staffing levels.

He said that under their proposals the current refuelling crews of two would be cut to a single operator, which he said would jeopardise airport safety.

KUALA LUMPUR (SEPT. 26) - Malaysia will raise U.S. tin stockpile disposals at the Association of Tin Producing Countries (ATPC) ministerial conference in Cochabamba, Bolivia, next week, a senior official said Wednesday.

Deputy Primary Industries Minister Alias Ali, who is leading the Malaysia delegation to the meeting, said Malaysia was concerned that sale of tin from the U.S. Defense Logistic Agency (DLA) stockpile had upset market fundamentals.

The DLA, which resumed sales of tin for cash in July after several years, plans to sell 7,000 tons of tin in fiscal 1990.

"Malaysia intends to have serious discussions with other ATPC members on this and plans to send a memorandum to the United States to postpone its sales until the price of tin recovers," Bernama news agency quoted Mr. Alias as saying.

The ATPC is trying to reduce tin stocks overhanging the market by imposing export quotas on its members -- Australia, Bolivia, Indonesia, Malaysia, Nigeria, Thailand and Zaire.

The ATPC ministers will have to decide whether to extend the quotas currently pegging total exports at 84,233 tons for 10 months from March when they expire at the end of the year.

Mr. Alias said that the tin market would be helped out of its doldrums if Brazil, the world's largest producer, joined the ATPC.

Analysts said tin prices have been depressed to their lowest levels in 44 months as a result of high stocks, which stood at 43,200 tons at the end of February, and the DLA sales.

KABUL (SEPT. 26) - Armoured carriers and tanks took up positions in front of vital government complexes in the Afghan capital as a blast near Kabul TV station rocked the diplomatic area, witnesses here said.

Armoured personnel carriers packed with soldiers in battle gear raced through the streets in downtown Kabul and troops carrying bazookas and machineguns fanned out in the city, standing guard at ministries, government offices and the buildings housing Kabul radio and TV.

The reason for the unusual activity was not immediately known but a foreign ministry spokesman said it was probably a military exercise for the defence of the city.

The spokesman added that Kabul garrison commander Gerneral Nabi Azimi would brief the press later on the day and that civilians were free to move.

The deployment came one night after the government extended the night curfew by one hour and triggered panic in the bazaars (markets). Civilians were seen hurrying home.

Special troops from Kabul Garrison in jeeps raced around the Wazir Akbar Khan diplomatic enclave and troops with raised weapons were seen guarding roads in the district where several government offices are also located.

Some soldiers said all routes to the home ministry were cut and one warned a motorist not to go there.

"Big trouble' he said in halting English.

Diplomats when contacted said they too were monitoring the military movement which began between 9.30 a.m. and 10.30 a.m. (0500 and 0600 GMT), but added that they were in the dark regarding both the blast and the troop deployment.

GENEVA (SEPT. 26) - The Swissair airline is believed to be about to choose a European, rather than U.S., manufacturer to supply about 50 airliners worth about 1.54 billion dollars, Swiss radio reported on Wednesday.

Swissair was preparing to place orders and options for about 50 European Airbus A-320 aircraft to replace its ageing fleet of short-range and medium-range DC9 aircraft in about 1995, the report said, while noting a possibility that a decision might be delayed because the airline was facing financial difficulties.

No comment was available from Swissair. The company's board was due to meet on Friday to decide on the deal which would be worth two billion Swiss francs (1.54 billion dollars).

The Airbus aircraft has been in competition with the U.S. McDonnell-Douglas MD-90 aircraft to win the contract.

The order would be the biggest ever placed by Swissair and it would be the first time that the airline had decided against buying medium-range and long-range aircraft from McDonnell-Douglas.

The report said that the board realised that any delay in taking a decision would delay delivery and could cause a severe commercial handicap.

Since the end of last year, Swissair, and three other European airlines, Scandinavian Airline System (SAS), Finnair and Austrian Airlines, have been negotiating with McDonnell-Douglas and Airbus Industries for the purchase of about 239 aircraft.

SAS wanted to buy 126 airliners, Swissair 52, Finnair 35 and Austrian Airlines 26.

The radio report said that Swissair was close to deciding, even though the other companies had not taken their decisions.

Informed sources said that Finnair in particular wanted to delay its decision, while SAS could do likewise for financial reasons. But Austrian Airlines was thought likely to act with Swissair.

The Swiss airline is experiencing difficulties. In the first quarter of 1990 it reported a loss of 99 million Swiss francs (about 70 million dollars) compared with a profit of 94.7 million francs (66 million dollars) in 1989.

In recent months it has introduced economy measures, halting recruitment and planning a two-year restructuring programme.

FRANKFURT (SEPT. 26) - The West German central Bundesbank on Wednesday made available 11 billion Deutschemarks to the banking system at rates ranging from eight percent to 8.3 percent through a 28-day repurchase arrangement.

The bank injected a net sum of one billion marks since an expiring facility totalled 10 billion marks.

On Tuesday banks had sought 43.6 billion marks, and the central bank satisfied these to the extent of 25 percent.

It accepted 80 percent of the bids at the lowest rate of eight percent.

The previous week the bank had made available 23.4 billion marks for 28 days and for 56 days, at rates ranging from 7.95 percent to 8.20 percent.

SUVA (SEPT. 26) - Australia and Japan will team up from next year to jointly fund tourism, health and education projects in Fiji and Papua New Guinea, Australia's aid counsellor here, Grahame Nicholls, said Wednesday.

A joint Australia-Japan mission will visit the two countries early next year to discuss aid offers, Mr. Nicholls said.

The Australian initiative to merge projects with Japan is the first experimetn of its kind and Australia would be "happy to coordinate with anyone -- New Zealand, British or French -- in this region," Mr. Nicholls said.

He denied claims by Fiji's deposed National Federation-Fiji Labour Party coalition that Australian aid money was being abused by the caretaker government installed after two army coups in 1987.

"Corruption as far as aid projects (are concerned) is nil," Mr. Nicholls said. "We take precautions not to give big cheques."

TOKYO (SEPT. 26) - Sales at large department stores and supermarkets in Japan rose 7.9 percent in August from a year earlier to 1,525.4 billion yen (11.1 billion dollars), official statistics released Wednesday said.

The Ministry of International Trade and Industry said the brisk sales in large

retail stores, a major indicator of consumer spending, were due to strong sales of summer clothes and other seasonsal products.

The August increase compared with a nine percent rise in July.

Sales at department stores were up 8.7 percent after 10.6 percent in July to 737.4 billion yen (5.4 billion dollars), while supermarkets sold 788.0 billion yen (5.7 billion dollars) worth of goods last month, up 7.1 percent from a year earlier.

The rise in supermarket sales followed increases of 8.9 percent in June and 6.7 percent in July.

BOURGES, central France (SEPT. 26) - About 70 French farmers forced the driver of a lorry carrying Scottish sheep to submit to an examination of his papers when he stopped at a motorway toll point overnight Tuesday, officials said.

The president of the local sheep farmers union Dominique Meunier said that the driver's papers were contradictory since some indicated that the sheep were destined for slaughter in France, and others that they were destined for Italy.

He said that at "first sight, the animals are in a bad condition".

They took the lorry to a local administrative centre, and in tense discussions with the regional prefect (governmental administrator) demanded that the cargo be checked.

They then took the lorry to a local abattoir where the sheep were due to be examined by official veterinary surgeons later on Wednesday, the farmers said.

#90269d4100 09/26/1990 ~French/German News Agency

Paris (SEPT. 26) - The board of governors of the International Energy Agency will meet Friday to review oil market developments, marked by the surge in petroleum prices, the Iea said Wednesday.

It will be the agency's third meeting since the outbreak of the Gulf crisis.

At the previous two sessions the Iea determined that the market was well-supplied with oil so that there was no need to recommend any course of action for the agency's members, the western industrialised nations.

An Iea spokeswoman said that if the agency were to recommend that demand for

oil products be reduced, it would be up to the individual members to decide on concrete measures.

#90269d4220 09/26/1990 ~French/German News Agency

HONG KONG (SEPT. 26) - The value of Hong Kong's domestic exports suffered a fall in August, but re-exports, mostly goods originating in China, picked up handsomely, the government said Wednesday.

Locally-made goods shipped overseas in August were worth about 21 billion Hong Kong dollars (2.7 billion U.S.), down 0.5 percent from a year earlier while the value of re-exports jumped 20 percent to 38.3 billion dollars (4.9 billion U.S.)

Imports grew 16 percent to 55.7 billion (7.1 billion U.S.), leaving a total trade surplus of 3.7 billion dollars (474 million U.S.) for the month.

A government spokesman said the Gulf crisis would have a negative impact, "but probably not immediately," on the British colony's trade.

Economists here have said that as local manfuacturers had already got their order books filled until Christmas before the crisis broke, any effects would only be seen early next year when an economic slowdown in the colony's largest market, the United States, became more obvious.

#90269d4230 09/26/1990 ~French/German News Agency

SYDNEY (SEPT. 26) - Australia and New Zealand Banking Group (ANZ) signed an agreement with the government of Western Samoa on Wednesday to buy 25 percent of the Bank of Western Samoa, taking its total holding to 75 per cent.

ANZ had already agreed to buy the Pacific islands operations of Bank of New Zealand, which include 50 percent of the Bank of Western Samoa.

ANZ said that settlement of both shareholdings in Bank of Western Samoa would be completed on Monday.

The agreement was signed in Washington by the Finance Minister of Western Samoa, Tuilaepa Sailele Malielegaoi, and ANZ deputy chairman Will Bailey.

"Expansion in the Pacific islands is a key part of ANZ's Asia-Pacific strategy which is built around the trade flows between Australia, New Zealand and the Pacific," Mr. Bailey said in a statement issued here.

Bank of Western Samoa, with about 75 percent of the country's banking operations, had assets of about 46 million U.S. dollars in December.

#90269d4250 09/26/1990 ~French/German News Agency
WELLINGTON (SEPT. 26) - Quotas for several heavily-fished commercial species off New Zealand's coast were ordered cut Wednesday by Fisheries Minister Ken Shirley.

The cuts, effective from Monday, followed strong criticism from environmentalists that current quotas were wiping out stocks. It was the second quota cut in three months.

In a statement Mr. Shirley said most inshore species had shown marked recovery since quotas were introduced four years ago but refinements were necessary.

"These cuts should not come as a suprise to the industry," Mr. Shirley said,

adding: "Stock assessment is not a precise science which is why reviews are such an essential part of the management process.

"Biological sustainability must be the driving philosophy of fisheries management," he said.

Species affected by the cuts are hoki, orange roughey, squid, blue warehou and red cod.

Greenpeace fisheries campaigner Mike Hagler said the cuts were not enough and ignored the advice of government fisheries scientists.

"It's an irresponsible choice that's been made by the minister -- like rolling the dice on the future of a fish species," Mr. Hagler said in a statement.

Orange roughey was still in grave danger, he said, and there was a "high risk of stock collapse."

#90269d4430 09/26/1990 ~French/German News Agency
BRUSSELS (SEPT. 26) - Belgium has decided to increase its military role in the Gulf region by deploying a frigate and four C-I30 transporter aircraft to bolster its forces already there, Prime Minister Wilfried Martens announced Wednesday.

The frigate, which will join three other Belgian warships in the region, will take part in patrols to enforce the United Nations embargo against Iraq, he told parliament.

The four C-130 planes will join two others Belgium has already sent, and will

be put at the disposal of the Western European Union - the only existing west European defence body - Mr. Martens said.

The decision to expand Belgian's taskforce in the Gulf has split the centre-left Belgian government made up of five political parties. The Flemish Socialist Party (SP) and Flemish Nationalist Volksunie strongly opposed a move to send F-16 fighters to the Gulf.

Foreign Minister Mark Eyskens, a Christian-Socialist, had spoken out in public in favour of sending the F-16s, provoking the ire of Socialist Defence Minister Guy Coeme.

Mr. Martens said Belgian aid to countries directly affected by the United Nations embargo against Iraq would come to 800 million Belgian francs (25 million dollars) in 1991. He said the aid was separate from the Belgian contribution to the EEC aid budget for these countries.

#90269d4500 09/26/1990 ~French/German News Agency

Frankfurt (SEPT. 26) - West German oil imports in August reached 6.2 million tons, up 3.8 percent from August 1989 levels, while rising prices pushed the import bill up 16 per higher to 1.7 billion marks (1.08 billion dollars), authorities said here Wednesday.

The Federal Office of Industry said that for the first eight months of 1990, West German oil imports totalled 48.3 million tons, up 13.7 percent over imports of the corresponding period last year.

The eight-month oil import bill reached 11.3 billion marks, up 481 million marks, or 4.4 percent, from the first eight months of 1989, the office said.

Amid the embargo on Iraqi and Kuwaiti oil, these two countries have now vanished from the list of West Germany's suppliers, the office said.

For the first eight months, Britain was the top oil supplier with some 10.4 million tons, up from 8.32 million tons in the same period last year.

Libya came next with 7.99 million tons, up from 7.29 million, with Saudi Arabia the third biggest supplier at 4.26 million tons, up from 2.98 million in the first eight months of 1989.

In August, West German oil imports averaged 274.39 marks per ton, 11.8 percent higher than August 1989 prices.

Istanbul (SEPT. 26) - Hiram Abas, the retired deputy undersecretary of Turkey's National Intelligence Organisation (Mit) or secret police, was murdered close to his home by two unknown gunmen here Wednesday, the police said.

Abas, a career intelligence official and protege of President Turgut Ozal, was forced to retire as the top civilian official of Mit two years ago after the leak of a report alleging corruption or crime links for top military or police officials.

Following the scandal, the prime minister's office was sentenced to pay damages to General Necdet Uerug, the retired chief of general staff.

Despite his disgrace, Abas was reputed to be at the centre of Ozal's plans to ''civilianise'' the Mit, traditionally led by a general.

After the murder, Istanbul Police Chief Hamdi Ardali said the witnesses' description of the gunmen indicated that at least one was sought for an earlier murder and he was hopeful that the killers would be captured soon.

Police sources said they believed the murder to be the work of the illegal Dev-Sol (Revolutionary Left) organisation.

DHAKA (SEPT. 26) - Two persons were killed and 30 injured as militant students threw a grenade into an express train in southern Bangladesh, police and eyewitnesses said Wednesday.

The students were protesting the death of one of their compatriots who was gunned down by unidentified assailants at a technical college in the southern port city of Chittagong earlier this week.

Police said a grenade was thrown at a passenger car near the port city by student supporters of the Jatiyotabadi Chhatra Dal which had called a strike Tuesday.

A man was killed instantaneously and another child died later in hospital.

At least 12 people died in the past week in student violence, police said.

#90269d4670 09/26/1990 ~French/German News Agency

BUDAPEST (SEPT. 26) - The Hungarian government sees the passage to a market economy as its priority for the next three years, along with social measures to cushion the effects of the change, a 200-page national renewal programme

says.

Extracts from the programme published in newspapers Wednesday stressed the conservative government's willingness to continue privatising the economy, reducing the state sector's share from 90 percent to less than 50 percent.

Some 20 state enterprises have already been put up for auction and other privatisations are expected.

But government experts have warned they are expecting to see feeble growth in the next few years, with a new take-off for the economy not expected until the end of 1993, when exports paid for in hard currency are expected to be 30 percent higher than this year.

The government's plan avoids shock therapy for the Hungarian economy, opting instead for a phased programme which will see the focus in the first stage until the end of next year on stabilising the balance of payments, controlling the inflationary spiral and cutting red tape which is strangling the administration.

It also reaffirms a commitment to encourage foreign investment and participation in privatised enterprises.

The forint is expected to move to limited convertibility in the next three years.

But at the same time the government plans to take social measures to protect the country's poorest from the effects of the changes, and has reaffirmed that all citizens have the right to a decent standard of living.

#90269d4750 09/26/1990 ~French/German News Agency

MANILA (SEPT. 26) - The Philippines has told the United States it wants joint use of Clark air base by January and American troops completely withdrawn from the base in 12 months, a top negotiator on the issue said Wednesday.

Manila wants to convert Clark into a "civil aviation complex" when the U.S. lease on military bases in the Philippines runs out on September 16, 1991, Health Secretary Alfredo Bengzon told reporters here.

But he said Manila would be willing to consider the handling of American military cargo at Clark "on a commercial basis," adding that Soviet cargo would also be allowed.

Mr. Bengzon is vice-chairman of the Philippine panel involved in negotiations with the United States on the future of Clark and Subic naval base, the two largest overseas American military facilities.

He is also considered to be a close advisor to President Corazon Aquino.

A second round of talks on the bases issue ended last week. Talks are to resume next month.

Philippine negotiators had demanded that Manila regain full control over Clark and agreed to discuss U.S. proposals for a gradual "phasedown" of U.S. forces and commercialization of certain facilities at Subic.

Transportation Secretary Oscar Orbos recently went to the United States and talked with officials of Boeing and other groups "with the end ... of getting them interested in participating" in the planned aviation complex, Mr. Bengzon said.

"We have proposed that starting January 1991, our own air force starts to make use of Clark facilities," Mr. Bengzon said.

He added that Foreign Secretary Raul Manglapus had proposed that Clark "be handled perhaps on a commercial basis," and that Manila "would not like any more foreign combat troops after September 1991."

Mr. Bengzon said the Philippine constitution states that foreign troops should not be allowed in the country after 1991, except under a new treaty.

He added: "Maybe it's time for you to think of key words as we move towards taking over. Those two key words are 'Philippinized' and 'civilianized'."

He added that in the event of the Philippine takeover of Clark, the facility would be used to handle "air cargo needs just like Cathay Pacific, Boeing."

#90269d4770 09/26/1990 ~French/German News Agency

BANGKOK (SEPT. 26) - The United Nations Wednesday warned that the urban population of Asia could soar to 1.15 billion by 2000 and called for a sweeping reversal in the flow from villages and small towns to "mega cities."

The recommendation was made by the U.N.'s Bangkok-based Economic and Social Commission for Asia and the Pacific (ESCAP) in a position paper released ahead of a regional ministerial conference on environment and development to take place here October 10-16.

According to ESCAP, the region's urban population is expected to rocket to 1.15 billion people in the year 2000 "if present patterns continue unchecked."

The figure would represent "an astonishing increase" of more than 400 million in the 15 years since 1985.

"The root cause of most of the region's urban environmental problems lies in rural to urban migration," the ESCAP paper said.

"Unless life in villages, small towns and intermediate cities can be improved to the extent that migration to mega cities eases, thus giving embattled municipalities much-needed relief, city woes can only increase," it said.

ESCAP underlined the predicament of cities such as Bombay, Calcutta, Dhaka and Manila with their permanent populations of "street people." Water supply and sanitation have proven unable to keep pace with urban growth, it said.

The study outlined "the consequent growing health risks," which it said were intensified by often severe air pollution from factories and clogged traffic.

WASHINGTON (SEPT. 26) - Brazilian President Fernando Collor de Mello said his government was re-evaluating Brazil's nuclear program and pledged: "We are not going to enter into any nuclear adventure in Brazil."

The Brazilian leader made the comments in an interview published by The Washington Post Wednesday after he addressed the U.N. General Assembly calling for a ban on test nuclear explosions in Latin America and the Caribbean, even for peaceful purporses.

Brazil is not a signatory of the 1967 Tlatelolco Treaty banning nuclear weapons in Latin America and has raised concerns that it may be developing its own nuclear weapons capability.

Mr. Collor last week closed a 300 meter (1000 feet) deep shaft in the Amazon, an act that he said was intended to lay to rest reports that Brazil was secretly building a nuclear bomb, the Post said.

The shaft, which appeared to be a nuclear test site, was reported to have been drilled by the military before 1985 when civilian rule was restored here.

"It's very difficult to know when, how, who was responsible" for drilling the shaft, Mr. Collor was quoted as saying. "It is a very sensitive issue ... Times have changed. The important thing is that the shaft is being covered up with concrete and that we are not going to enter into any nuclear adventure in Brazil. We are embarked on a profound reevaluation of the entire nuclear program," he said.

ROME (SEPT. 26) - Alberto Moravia, who towered over Italian literary life over the past half-century, died suddenly on Wednesday in Rome, apparently of a stroke or a heart attack, his doctor said. He was 83.

He was Italy's best-known writer overseas, with translations in 35 languages.

Mr. Moravia was 22, fighting tuberculosis in an Alpine spa, when his first novel, "Gli Indifferenti" (The Indifferent), a scathing disection of bourgeois society that ignored the current fashion of Fascist bombast, propelled him to instant fame in 1929.

He went on to write a dozen novels, six plays, 14 collections of short stories three travel books and a number of journalistic and topical essays.

He was also elected in 1983 to the European parliament as an independent on the Communist Party list.

In 1941, He married another prominent Italian writer, Elsa Morante, author of "La Storia," who died in 1985. After living for many years with another writer Dacia Maraini, he married in 1986 a young Spanish Catalan writer, Carmen Llera.

He was awarded France's Legion d'Honneur in 1984.

One of his biggest successes overseas was the 1947 novel "La Romana," (The Woman of Rome), considered scandalous at the time.

His novels, like those of Dickens or Balzac, were mirrors of his time.

He successively scrutinized World War II in "La Ciociara" (1957), the takeoff of the consumer society in "La Noia" (Boredom, 1960) and the growing terrorist wave in "La Vita Interiore" (The Inner Life, 1971). "Io e Lui" (Me and Him, 1971) took the form of a dialogue between a man and his penis.

A tall man with a slight limp, an austere face and piercing eyes under bushy eyebrows, Mr. Moravia said in a recent interview with AFP, in his impeccable French, "I write for pleasure, you know. I like to tell myself stories."

"I became ill when I was a child," he said in a biographical interview with Alain Elkann that will be published next month. "I lived alone. Solitude penetrated my soul so deeply that I still feel a profound detachment towards others."

But he was no recluse: "I think every person is worth knowing."

He was born Alberto Pincherle of Jewish parents in 1907 and changed his name to Moravia in 1938 when the Fascist government of Alberto Mussolini passed anti-Semitic laws.

#90269d4910 09/26/1990 ~French/German News Agency
MADRID (SEPT. 26) - A convicted Spanish terrorist on day release from jail was shot dead Wednesday in what police believe was an underworld gang killing.

They said 28-year-old Ramon Agra Alonso was shot in the head and shoulder as he sat in a car in the southern coastal town of Fuengirola, about 30 kilometres from Malaga.

Agra Alonso was a member of the ''autonomous anti-capitalist commando'' linked to the Basque terrorist organisation Eta.

He was serving a jail sentence of more than 16 years for terrorist attacks. He had been on day release from prison since 1987.

Police said the attacker fired four shots into the car before escaping in another vehicle driven by an accomplice. They believe the killing was the result of drugs gang rivalry.

#90269d4930 09/26/1990 ~French/German News Agency
PARIS (SEPT. 26) - The French Epeda Bertrand Faure group, the leading European manufacturer of car seats, on Wednesday reported a 21 percent increase in interim profits and said that it was taking control of German Rentrop to become the world's biggest auto seat supplier.

Net interim profits after minorities were 151.8 million francs (29 million dollars), group president Pierre Richier said.

The group owns the Epeda and Merinos bedding companies, the Delsey luggage label, and auto and aero interests.

Mr. Richier said that it was to create a holding with two un-named European financial groups, and that his company, by contributing its German subsidiary Schmitz and 130 million francs (25 million dollars) in investment would acquire 61 percent of the holding company with a 70 percent stake in the Rentrop-Schmitz group.

German authorities had given their approval, he said.

The French company said that it had improved its profits despite a 2.25 per cent fall in sales to 4.734 billion francs (910 million dollars) caused by the disposal of the defence activities of its Luchaire subsidiary.

Underlying sales had risen by 5.8 percent.

For the whole year the company forecasted a fall in sales of four to five percent from 9.29 billion francs last year and a 10 percent increase in net profits from 173 million francs.

#90269d5080 09/26/1990 ~French/German News Agency

JOHANNESBURG (SEPT. 26) - The Rose of Soweto, Dingaan Thobela, got a hero's welcome at Jan Smuts airport here Wednesday, back from Texas where he dethroned World Boxing Organisation lightweight champion Mauricio Aceves at the weekend.

Promoter Thinus Strydom said Thobela would train in New York at Lou Fulcingo's gym for the whole of November to iron the kinks that took the Aceves fight to a split decision.

"Tommy Gallagher, a cutman for Mike Tyson, was in Dingaan's corner on the night of the fight and he spotted a few technical mistakes," Strydom explained.

"He said Thobela looked awkward when going into clinches, and also appeared unsure of himself when attacking the body."

Strydom also ruled out rumours that Thobela would fight South Africa's World Boxing Association Junior Lightweight champion Brian Mitchell, who is going for a record 11th title defence in Italy on Saturday against American Frankie Mitchell.

KAMPALA (SEPT. 26) - At least 20 rebels of the Uganda People's Army (UPA) have been killed by government troops at Awoja in eastern Uganda, the New Vision newspaper reported Wednesday.

The rebels, killed Tuesday, were part of a bigger contingent that attacked the soldiers.

Last week a rebel group raided an army base at Tukum, also in eastern Uganda, catching troops unawares and forcing them to flee.

In the western district of Kasese, two senior rebel officers have surrendered to government authorities, press reports said.

The two, former officers of deposed president Milton Obote's Uganda National Liberation Army (UNLA), were said to be key commanders of the newly formed Uganda National Liberation Movement (UNLM) led by former deputy cabinet minister Amon Bazira, based in Zaire.

Their surrender was seen as a result of a visit two weeks ago by Zairean President Mobutu Sese Seko, during which Uganda and Zaire agreed not to harbour subversive elements from each other's country.

They also agreed to expedite the drafting of an extradition treaty whose absence has frustrated Uganda's efforts to have Mr. Bazira extradited from Zaire.

Hamburg (SEPT. 26) - The ruling Christian Democratic Union (Cdu) parties in East and West Germany will merge into the German Christian Democratic Union during their party congress here on October 1, two days before German unification.

West German Chancellor Helmut Kohl, 60, who is chief of West Germany's Cdu, is expected to become the first all-German Cdu chairman. Both conservative parties were founded 45 years ago in the ruins of Nazi Germany.

East German Prime Minister Lothar de Maiziere, 51, who heads the East Cdu, is the sole candidate for the post of deputy party chairman.

The 1,000 delegates to the congress - 250 of them from East Germany - also plan to adopt a manifesto of party principles.

All-German elections are scheduled for December 2, and polls show the Cdu, which rules in Bonn together with the Free Democrats (Fdp), to be far ahead of the opposition Social Democrats (Spd) in popularity.

The Cdu is also said to have the best cards for regional elections to the parliaments of the five East German states on October 14.

FREETOWN (SEPT. 26) - A ship carrying 1,000 Ghanaian soldiers left here late Tuesday for Monrovia to join a 4,000-strong West African peacekeeping force trying to impose a ceasefire in Liberia's nine-month civil war.

The Nigerian merchant ship, River Oli, which was docked at Freetown for two weeks, also carried 6,500 tons of rice, 10 tons of canned meat and eight tons of vegetable oil as food supplies from the United Nations World Food Programme for some 80,000 Liberians still in Monrovia.

Seven Western journalists were also aboard.

Charles Taylor, leader of the National Patriotic Front of Liberia (NPFL) rebels on Tuesday threatened to end a two-day ceasefire in Monrovia if the peace-keeping force, known as ECOMOG, was reinforced.

A Nigerian landing craft left here late Sunday for Monrovia with 800 Nigerians on board while African diplomats said two Nigerian navy ships and a merchant vessel were to have left Lagos on Monday for Monrovia.

Diplomatic sources said Wednesday they expected an additional 800 Nigerian troops to arrive here ate th weekend. This will bring the total reinforcement of the Economic Community of West African States' monitoring group (ECOMOG) to about 6,000.

It was not know whether any of the troops reinforcements had arrived in Monrovia.

Meanwhile, 55 Ghanaians who fled Monrovia over the weekend flew to Accra Wednesday aboard a Ghanaian air force jet.

Some 250 refugees, mainly Nigerian, Senegalese and Guinean nationals, arrived in Freetown by road on Wednesday from Liberia.

Another 15 mainly Lebanese nationals evacuated by the U.S. Navy on Wednesday reported further deaths in the Liberian capital. One of the 15, Toufic Ahmed, said people were dying daily from malnutrition, cholera and dysentery.

BRUSSELS (SEPT. 26) - The European Commission is planning to propose cancellation of debts of about 500 million Ecus (650 million dollars) owed to the European Economic Community (EEC) by 69 poor countries, EEC sources said on Wednesday.

Manuel Marin. development commissioner in the executive arm of the EEC, hinted

at the initiative late on Tuesday in Luxembourg when he announced forthcoming proposals to help the 69 African, Caribbean and Pacific (ACP) countries which are linked to the EEC under the Lome Convention.

These countries would have to spend an extra 2.5 billion dollars per year to import oil on the basis of a 30 dollars per barrel price, he said.

The proposal would affect only debt contracted with the EEC itself and not with individual EEC member states. France and Britain have each announced that they will ease some of the debts owed to them by some of their former colonies.

by HALIMA NJIRAINEY-GICHUKI

NAIROBI (SEPT. 26) - Karimi remembers a chilly morning 10 years ago when she faced the circumciser's knife, pinned down by two women on the dirt floor of a small thatched hut in a village in the foothills of Mount Kenya.

The then 15-year-old girl stifled her cries as the village circumciser, a respected older woman, cut out her clitoris in an age-old ritual symbolising that she was now accepted as a woman.

A few herbs were all that were applied to her wounds during the agonizing two-month healing period.

Many Kenyan women still undergo the ordeal of circumcision, some willingly, others at knifepoint, though attitudes are changing among their menfolk, at least in cities.

The government frowns on the practice, which can very often be fatal because of poor hygiene.

"I was scared to death, but I had to go through it as tradition demanded," said Karimi, now a social worker in Nairobi.

"But there's no way I would let my daughter suffer that. I don't see the point of circumcising women. The effects are nothing but negative."

According to official statistics, 17 per cent of girls circumcised in Kenya die as a result of the operation. Many bleed to death, and others are infected with tetanus or AIDS.

"Girls are usually circumcised in unhygienic conditions," says gynaecologist Catherine Lore.

Dr. Lore said most Kenyan tribes traditionally remove the entire clitoris,

though some communities cut off the tip.

The practice of female circumcision is deeply rooted in religion and social customs. Circumcised women are believed to be deprived of sexual pleasure and therefore more faithful to their husbands.

But Karimi said: "Circumcising women won't stop them sleeping around. It depends on a woman's character. Many circumcised girls become single mothers."

Some communities circumcise women because the external genitalia are considered ugly and dirty.

Deaths through circumcision are even more frequent among Somali, Sudanese and some Ethiopian tribes, according to Somali women living here and aid workers, though there are no official statistics.

Some Somali girls have their genitalia stitched up allowing only a small gap for urine and menstrual blood. When they marry, they undergo a second operation before they can have sex, the women said.

Dr. Lore said circumcision could cause infection of the reproductive organs, while long-term complications could damage and block the fallopian tubes.

Few Kenyan women are willing to talk about circumcision -- still a powerful taboo.

Circumcision is so important in some communities that parents fear their families may become the laughing stock of the village if their daughters do not undergo the rite.

Though women's organisations and the government are against the practice, many older Kenyans and even some young educated women still strongly support it.

A 15 year-old-girl said she was circumcised "secretly" but that she herself saw nothing wrong with circumcising women.

"It's part of our traditions. My grandmother went through it and I would go through it again if need be. It instills discipline and responsibility in a woman.

"After you're circumcised, the elder women educate you about what society expects from a woman," she said.

But Assistant Culture Minister Grace Ogot said the government encourages the prosecution of circumcisers if girls die or fall ill because of the operation.

She condemned female circumcision and also taboos forbidding women to eat such foods as eggs, chicken or liver, despite their high nutritional value.

"The life of an African woman used to be dominated by traditional ethics," Mrs. Ogot said. "These are traditional practices with negative effects on women and children."

Many educated urban Kenyan men are also against female circumcision.

Assistant Education Minister Mathews Karauri said: "Boys no longer want to marry circumcised girls. They complain when girls they want to marry undergo the ritual."

Kuria, a 28-year-old Nairobi accountant, said: "I've had both circumcised and uncircumcised girlfriends and I can't tell the difference. I'm not convinced that circumcision deprives women of sexual enjoyment.

"But I think it's an unnecessary hangover from the past."

The government may find it hard to ban female circumcision, as such a move could be seen as undue interference in traditional customs, although President Daniel arap Moi has condemned it because of its harmful side-effects.

Male circumcision is far more common than female circumcision in Kenya. Most tribes insist that teenaged boys be inducted into manhood by traditional circumcisers, though cases of boys bleeding to death are frequent.

Elders frown upon boys who are circumcised in hospital under hygienic conditions, considering them cowards.

GAZA (SEPT. 26) - Palestinians in the Israeli-occupied territories Wednesday overwhelmingly followed a general strike called in support of Iraq and its leader Saddam Hussein.

Shops and businesses throughout the West Bank and Gaza Strip were closed throughout the day, traffic on the roads was extremely light and only a limited number of Palestinians left for work in Israel.

In Gaza, an army imposed curfew was in force in the El Bureij, Jabaliya and Nusseirat refugee camps as well as in the nearby town of Dir el Balah.

Military sources said the curfews were imposed to prevent violence as Israeli army bullodozers completed the razing of 26 shops and seven houses in El Bureij at the site where a reserve Israeli soldier was stoned and burned to death last Thursday.

The general strike call was issued by the Plo-backed unified leadership of the

intifada and the Moslem fundamentalist Hammas which last week ended a feud that had seen numerous violent clashes.

Analysts said the near unanimous support for the strike underscored the strong Palestinian support for Iraq since the start of the Gulf crisis.

Only minor infranctions were reported, with three soldiers and a tourist lightly injured in stone-throwing incidents in East Jerusalem and the West Bank.

MOSCOW (SEPT. 26) - A one-day general strike in the Ukraine called by nationalist and reform movements has been postponed until Monday when the republic's parliament meets for its autumn session, nationalist sources said Wednesday.

The walk-out, supported by miners in the Soviet Union's largest coal basin, Donbas, was originally scheduled for Thursday.

A mass rally will be held in Kiev, the Ukrainian capital, Oles Fedoruk, spokesman for the regional inter-party group, a radical national movement that is to hold its first congress next week, said.

Miners' strike committees meeting Tuesday in Donetsk approved the targets of the proposed stoppage in the Soviet Union's second biggest republic, including closing down the Chernobyl nuclear power station, site of the world's worst nuclear accident in April 1986.

Strike organisers -- a Coordinating Council of Democratic Associations and Democratic Blocs in the Ukraine Soviets, or parliaments -- also want Ukrainian conscripts serving in other Soviet trouble spots to return home, as well as privatisation of property under worker control, and nationalisation of Communist Party assets.

The coordinating council was created last July.

PARIS (SEPT. 26) - A French company, Technip, has urged its employees who are being held in Baghdad hotels to reduce their living expenses because they have nearly eaten, drunk and telephoned their way through funds available in a company bank account.

The problem came to light after it emerged that a Technip sub-contractor, GERIB, had decided to end the employment contracts of its 10 employees in

Baghdad and to demand payment of telephone and hotel expenses totalling 40,000 francs (7,700 dollars) from one of its staff.

A spokesman for the Technip engineering group said that it had been working on two contruction sites when the Gulf crisis began, and was now paying the hotel expenses of about 10 of its own staff and of the employees of about 10 sub-contracting companies, representing in total between 50 and 100 people.

Bills from the two hotels were costing Technip about two million French francs (384,000 dollars) per month, and were paid weekly from a dinar account which Technip had established in Baghdad for the operation of its sites.

"The funds available are drying up. We might be able to hold out for another month or a month and a half, but what will we do when there is no more money?" the spokesman told AFP.

In principle, Technip may not send more funds to Baghdad because of the United Nations embargo inmposed after Iraq's August 2 invasion of Kuwait.

"We have therefore asked employees to be careful because we want absolutely to keep them in the hotels. So far none of our employees nor any of those of our sub-contractors, has been sent to a strategic site. We want to keep it like this."

The spokesman said: "Under the circumstances some people have run up excessive expenses. That is why we have told them to toe the line."

He added that it was understandable that the hostages phoned their families. Technip was continuing to pay its own employees held in Baghdad their full allowances, but it was up to sub-contracting firms to decide whether to prolong the contracts of their own employees.

Technip said that it had not specifically asked for 40,000 francs from GERIB, adding: "We merely indicated to our sub-contractors that we would work out later who owed whom what."

Regarding the decision by Iraq to seize local assets owned by western interests, Technip said that so far the bank account had not been seized although there were now "problems" in drawing from the account.

Technip was in contact with the French government to try to find solutions to all of these problems.

At the time Iraq invaded Kuwait, Technip was building a natural-gas factory in the south of Iraq near the border with Kuwait, and was working on a hydrocarbons field in the north of the country.

LIBREVILLE (SEPT. 26) - A 20-member committee drafting a new constitution to legalize multi-party politics in Gabon has completed its work three months after being appointed, officials said here Wednesday.

The draft, due for approval by the national assembly, "enshrines pluralist democracy by taking pains to guarantee the most freedoms possible" and sought to set up institutions "better adapted to this new political landscape," acting Justice Minister Cecile Nkama commented.

Innovations include cutting the presidential mandate from seven to five years and making it renewable only once (President Omar Bongo has held office since 1967).

The prime minister's powers are boosted, and a two-tier parliament of national assembly and senate is proposed.

A first round of voting, with 520 candidates fighting 120 seats, was held last weekend to elect an interim national assembly. Only Mr. Bongo's party fielded candidates in every constituency, in what was the country's first multi-party poll in a quarter of a century.

The authorities admitted voting was marked by "disorder, extortion and irregularities," cancelled the results in 32 constituencies, and rescheduled a second round of voting there and in 30 runoff seats for the end of October instead of this weekend as previously planned.

BRUSSELS (SEPT. 26) - The growing danger of terrorist attacks in the wake of the Gulf crisis was discussed Wednesday by the North Atlantic Treaty Organisation council at a session in Brussels.

Nato representatives said afterwards that according to intelligence reports, terrorist organisations believed to be supported by Iraq had stepped up their activities.

''There are activities that worry us,'' they said, although there were no concrete indications of impending attacks.

The Nato allies had therefore agreed to intensify still further their cooperation and exchange all available information.

The officials, who did not wish to be identified, said terrorist organisations headed by Abu Nidal and George Habbash had converged on Baghdad during the past few weeks. It was feared they could get support from terrorist groups in

Western Europe.

''The current situation is serious,'' said officials, adding that the terrorist organisations had a ''considerable capacity'' to carry out attacks.

#90269d5450 09/26/1990 ~French/German News Agency

JOHANNESBURG (SEPT. 26) - World-acclaimed jazz trumpeter Hugh Masekela has called for the immediate but conditional lifting of the decades-long cultural boycott imposed on South Africa, local reports said Wednesday.

Breaking a 30-year-long self-imposed exile, South African-born Masekela last week returned to Johannesburg and called on other exiled artists to follow his example in "reversing the exodus".

In an interview published in the Johannesburg Star newspaper Wednesday, Masekela said it was now time for the "hardliners" who have spearheaded South Africa's cultural isolation to "bend".

"People have to adjust with the times otherwise they'll be left along the roadside... The majority of the population want to boogie, they want to have a good time and you can't stop people who want to have a good time."

Proposing the establishment of a National Arts Fund, he said the boycott had to be amended so that musicians who visited the country wouldn't just "milk our people".

"Ray Charles and Frank Sinatra came here and they just took the money, they didn't leave a guitar string or a plectrum behind. They didn't see anything, they pretended there were no poor people.

"The bulk of the money that visiting musicians generate should be left here. Under that kind of condition I think the cultural boycott should be amended," Masekela said before jetting off to the United States.

"People who want to come here, the artists who didn't want to come before because they stood in solidarity with us, like Quincy Jones, Eddy Murphy, Michael Jackson and the Rolling Stones, should be able to come here and perform and put the money back into the community.

"I'm not saying that they shouldn't be paid, but this musn't be a bonanza place because that's why the cultural boycott was started in the first place."

He said he and other exiled South African musicians, among them Miriam Makeba, Letti Mbuli and Abdullah Ibrahim (Dollar Brand), planned a major pre-Christmas "Exiles" concert in South Africa to start the National Arts Fund rolling.

A spokesman for the Johannesburg-based anti-apartheid South African Musicians Alliance, which tightly controls the cultural boycott, Wednesday refused to comment on Masekela's proposal beyond saying it was only one of a number of options being studied.

BY ADNANE ZAKA

MANAMA (SEPT. 26) - The positive Iraqi attitude to proposals by France to settle the Gulf crisis conceals a bid by President Saddam Hussein to split the Western campaign against Iraq and allow him an honourable exit from Kuwait.

Baghdad Tuesday welcomed as "non-hostile" a new plan by President Francois Mitterrand that calls as a priority for an Iraqi pledge to pull out of Kuwait and the release of foreigners held hostage in Iraq and Kuwait.

Analysts said the plan, which has received a cautious response from Washington after it was presented Monday at the United Nations, would allow Iraq an honourable way out of Kuwait as it satisfies some of Baghdad's demands.

Mr. Mitterrand said once Iraq had made its pledge and freed the hostages, the U.N. would guarantee the withdrawal, the restoration of Kuwaiti sovereignty and "the expression of the democratic choice of the Kuwaiti people."

This is a departure from earlier Western calls for an immediate Iraqi pullout, which Baghdad believes would still leave it vulnerable to a U.S. attack, and for a restoration of the previous Kuwaiti leadership.

Iraq detests Kuwait's exiled ruling al-Sabah family and a pullout that would lead to a restoration of the status quo would be a serious loss of face.

Baghdad would also be encouraged by Mr. Mitterrand's proposal for an international Middle East conference as the third stage of his plan, although he opposed a global solution to all the region's problems.

President Hussein, in opposing U.N. calls for a pullout from Kuwait, has repeatedly called for all Middle East issues to be resolved together.

Whether or not the plan is accepted by the international community, Iraq's positive reaction was also a calculated political move.

Baghdad has been looking for ways to encourage a political and military split between France and the United States and weaken the Western alliance opposed to Iraq's occupation of Kuwait, Gulf analysts said.

It made an initial test of French resolve when it allowed its troops to

ransack the French ambassador's residence in Kuwait City September 14.

#90269d5680 09/26/1990 ~French/German News Agency

MANAMA (SEPT. 26) - Iraq's invasion of Kuwait has reinforced the world's negative perception of Arab countries and their people and dealt a blow to the cause of Arab nationalism and the fight for a Palestinian state, human rights groups and Arab intellectuals fear.

Yet the root cause for a cultural and political ''iron curtain'' between the West and the Arab world lies in the West, they say.

''Arabs in U.S. feel the backlash'', wrote the daily Gulf Times in Qatar as reports began appearing here of an anti-Arab feeling abroad following Iraq's march into Kuwait.

As one student commentated: ''We will all have to pay the price for these shattering effects of the invasion.''

Arabs claim their image abroad has long been fixed by the poor press they have received as a result of plane hijackings by Arab groups, terrorist attacks or the civil war in Lebanon.

Edward Said, an Arab orientalists and professor of literature, said that when viewing television and reading journals in the West he was often struck by ''how little awareness there is that the Arab world is more than a large and empty desert sitting on top of a wide pool of oil''.

He told the Arab News it was as if there was a general preference for ''conceiving the Arab and Islamic world basically empty, or filled with terrorists and oil suppliers''.

BANGKOK (SEPT. 26) - Cambodian guerrilla factions Wednesday accused Phnom Penh of sabotaging the peace process, following its rejection of a compromise proposal by guerrilla leader Prince Norodom Sihanouk on the make-up of an interim authority for the country.

One guerrilla official said here it ''amounted to sabotage'' of an agreement earlier this month in Jakarta where the Cambodian adversaries formed the authority, the Supreme National Council (SNC).

He also accused the Vietnamese-backed government in Phnom Penh of ''de facto rejection'' of a United Nations-brokered framework to end Cambodia's 12-year-old civil war.

Squabbling between Cambodia's warring factions on the composition of the SNC led to the collapse last week in the Thai capital of the first meeting of the body.

The continuing dispute ruled out the possibility of a resumption of the meeting here this week as had been tentatively planned, Thai officials said.

The blueprint provides for the setting up of the SNC to represent Cambodia at the world organization and giving the U.N. broad executive powers until elections are held.

Another guerrilla official said the guerrilla coalition joining the powerful Khmer Rouge, Cambodia's former Marxist rulers, with two smaller non-communist factions had already made many concessions, particularly in accepting that the SNC be equally divided between Phnom Penh and the resistance as a whole.

''The more they (Phnom Penh) are given, the more they demand. This is standard communist tactics,'' he said.

Vietnam invaded Cambodia in December 1978 to overthrow a Beijing-supported Khmer Rouge radical Marxist regime and replace it with a client government which is also communist but less extreme.

Prince Sihanouk, in a bid to reactivate talks between the factions, proposed Monday that the 12-member SNC be expanded by two, with himself being named chairman and the Phnom Penh government being given an extra seat.

At the meeting which collapsed last week, Mr. Hun Sen had refused to accept the prince as a 13th member to chair the SNC, saying he should replace one of the six guerrilla representativbes already named.

But Cham Prasith, a vice minister in Mr. Hun Sen's office, said Tuesday that Phnom Penh was rejecting Prince Sihanouk's offer because it failed to include giving the premier the SNC vice-presidency.

Mr. Hun Sen said last week at a press conference before returning home from Bangkok that he would accept Prince Sihanouk as chairman of an equally divided SNC, but added, ''then, the Phnom Penh side will be given the vice-chairmanship.''

(And in Phnom Penh Wednesday he told an estimated 25,000 people at a demonstration of mass support for the government: "Our position is that we maintain 12 members without Sihanouk".

(Mr. Hun Sen said that he had received a faxed message from the tripartite resistance with a programme for a resumed SNC meeting, earmarking Prince Sihanouk as president of the council but failing to mention the vice

presidency.

(He said three formulas were acceptable to his government: Prince Sihanouk as president with Mr. Hun Sen as vice president, two co-chairmen, or a single chairman rotated on a monthly basis.

(But he said that Phnom Penh was ready to resume the meeting if the resistance abided by the Jakarta accord and its provision for 12 members.

(Mr. Hun Sen, speaking on the first anniversary of the Vietnamese withdrawal from Phnom Penh, also said that he wanted the SNC to discuss the immediate implementation of a cease-fire, "but the other side insisted on discussing the presidency alone.")

BANGKOK (SEPT. 26) - Thai police on Wednesday launched a crackdown on illegal substandard gas tankers as the death toll from the fiery explosion of an unlicensed tanker climbed to 59, police said.

Hospitals said they would seek massive skin donations from the public to use as grafts for the almost 100 people who suffered burns in Monday's disaster. Many of those injured had third degree burns covering the whole body.

Gas transports which were not licensed and did not meet the standard set by the government's Public Works Department will be subject to arrest, the police said.

The measures were reinforced after a double-capsuled truck carrying about 3,700 litres of liquefied petroleum gas crashed in a sea of fire into buildings in the heart of Bangkok, setting ablaze scores of vehicles trapped at a traffic light.

The fire gutted 40 shops on both sides of the street, 60 houses in a nearby slum and left about 1,000 people homeless. Damage was estimated at 100 million baht (four million dollars).

The police said they found that the truck, believed to have belonged to Siam Gas Co., did not have a license and did not comply with government standards. The manager of the company is still at large, they said.

#90269d5880 09/26/1990 ~French/German News Agency

BELGRADE (SEPT. 26) - Several thousand supporters of the opposition Movement of Serbian Renewal (MSR), protesting at alleged police violence and a ban on its newspaper, Wednesday braved a police ban on all demonstrations in central

Belgrade.

Police roughed up three women after checking their identity papers, MSR leader Vuk Draskovic told demonstrators. Mr. Draskovic's wife was among the three.

Two members of the Serbian Saint Sava party told an Agence France-Presse correspondent they had also been manhandled. No other incidents were reported after the rally ended.

Demonstrators had been called to gather outside the official residence of Serbia's president in the former royal palace but police pushed them back and ringed in the crowd at the nearby federal parliament building.

Serbian authorities had on Tuesday confirmed a ban on demonstrations in central Belgrade effective since June, but said the rally could be held in a park on the outskirts of the city.

MSR spokesmen have attacked the police for cracking down on movement members in the country at large and said that the MSR must again be able to publish its newspaper Srpska rec (The Serbian Word).

Demonstrators, in a letter to Serbian authorities, called for the resignation of the interior minister and access to the Belgrade media by all opposition groups.

The press in Yugoslavia's capital is mostly controlled by Serbian President Slobodan Milosevic's reformed communist Socialist Party.

The MSR and other opposition parties Wednesday filed a lawsuit against the Socialist Party for forcing company directors and employees to organize rallies in support of the ruling party during work hours.

The state-run television Monday showed footage from gatherings in several Serbian companies in which people criticized a demonstration organized by opposition groups here outside Mr. Milosevic's office Monday.

#90269d5950 09/26/1990 ~French/German News Agency

PRETORIA (SEPT. 26) - Two white "bullies" who abducted a black man and assaulted and humiliated him before leaving him in a field to die were Wednesday jailed by a Supreme Court judge here.

Mr. Justice Swart jailed Wynand Bakker, 22, to 10 years' jail and Neels Nel, 20, to eight years' jail for the murder of Ezekiel Mashala last year.

The judge described the men as bullies who had abducted a helpless man simply because he was black.

He said Mr. Mashala must have felt like a trapped, terrified animal when the men kept him prisoner in the back of their car.

The possibilities were overwhelming that he was assaulted while in the car and he was probably informed of his fate with great glee. The fact that his assault was turned into a "spectator sport" must have been intensely humiliating.

Later the accused mutilated their victim's body by cutting off his ears and middle fingers and displayed their "trophies" to their girlfriends.

The judge accepted that alcohol played a part in the incident, that the accused had influenced each other, that they were both young and that they were first offenders.

#90269d6040 09/26/1990 ~French/German News Agency

KABUL (SEPT. 26) - Kabul army chief General Nabi Azimi on Wednesday played down a massive snap deployment of troops and tanks in the Afghan capital, calling it an exercise in defence preparedness.

He also denied that a huge explosion, which shook the city's Wazir Akhbar Khan diplomatic area before troops rushed into the city center, had taken place in the vicinity of the home ministry, saying what people had heard was outgoing artillery.

In a briefing called inside the fortified Kabul garrison headquarters, the general said the manoeuvres had involved air force, artillery and army units and had been "aimed at testing the defence preparedness" of his men and to educate the public.

He said the exercise, which is conducted every three months, also involved ruling party cadres who were pushed into service with rifles and heavy weapons to man street corners.

The briefing came after journalists and diplomats, most of whom witnessed a coup attempt against Afghan President Najibullah in March by army and airforce units, had telephoned the defence ministry to find out why the troops had been called out.

"All important streets, important buildings and key positions were occupied by the army," Gen. Azimi said.

He added that the exercise had begun at 9:00 a.m. (0430 GMT) and had ended three hours later.

He denied reports of a huge explosion in the area of the home ministry prior to the troop deployment, saying it had been the sound of artillery fire directed at mujahedeen resistance positions in the hills around the capital.

"We had fired at the rebels," he said, referring to the blast which reverberated through the diplomatic area of Wazir Akhbar Khan.

Journalists trying to reach the scene were turned back at the nearby state television station at gunpoint.

"This exercise proves that the armed forces are willing to repulse any muajhedeen offensive on the Afghan capital," he said, adding that soldiers from other ministries with military wings had taken part in the surprise manoeuvres.

"We are ready to fight off any offensive on this city," said Gen. Azimi, who commands three elite divisions totalling 24,000 men.

The briefing was recorded by national television apparently to reassure Kabul citizens who had panicked when tanks raced through the streets.

"Last time we defeated a coup through our preparedness," he said referring to the March coup attempt led by former defence minister Shah Nawaz Tanai.

He also said the army had prior presidential consent for the deployment of troops in the city of 1.5 million.

Streets however remained empty late Wednesday and cars stayed off the roads despite the announcement that the manoeuvres were an exercise.

Observers said the participation of President Najibullah's Watan party members in the war game appeared to indicate that the manoeuvre was geared more towards another possible military coup attempt than to a mujahedeen attack.

#90269d6190 09/26/1990 ~French/German News Agency

PRETORIA (SEPT. 26) - South Africa's maize harvest for 1989-90 fell by 2.8 million tons, coming in at 8.75 million tons against the previous year's second best-ever harvest of 11.55 million tons, the Maize Board said here Wednesday.

Maize Board spokesman Piet de Nysschen said that heavy rain in the planting season had meant that some 300,000 hectares (741,000 acres) that would normally have been planted lay fallow in 198990.

Drought in the key maize belt areas of western Transvaal and the northeastern Orange Free State in the critical months of January and February also contributed to the lower harvest, he said, but added the crop was more of a

return to normal than a particularly bad year.

The harvest comprised 4.7 million tons of white maize and 4.05 million tons of yellow maize, the Board said.

Other harvests announced by the Board were 362,000 tons of grain sorghum, 79,000 tons of ground nuts, and 609,000 tons of sunflower seed.

BELGRADE (SEPT. 26) - The crown prince of Yugoslavia, Alexander Karadjordjevic, said in a live interview Tuesday night with a Yugoslav radio station that he would only return from lifelong exile in London as King Alexander II.

It was the first time the prince spoke directly to a Yugoslav audience.

The only son of King Peter II, who died in 1965, explained in excellent Serbo-Croatian that unlike many members of the royal family, he had no intention of returning to his country as a mere visitor.

"I would like to go to my country, but I am not a tourist and if I return some day, it will be to serve it as king," he said.

He chided a Serbian party that asked his uncle Prince Tomislav -- also a Londoner -- to run for president, saying firmly, "I head the dynasty. I would like everyone to forget the offer and never renew it."

Prince Tomislav had refused the offer.

At a time when Yugoslavia is gripped by centrifugal ethnic forces, Prince Alexander has seen his popularity rise. Many see him as he sees himself -- a unifying force at a time when the Balkan nation needs one badly.

He favors a British-style constitutional monarchy that would hold together a federation of republics administered by a freely elected government.

"The king would be the point of intersection of all the political parties of the country," he said.

He praised Slovenia and Croatia for having instituted free elections, but asserted, "The rest of the country is still a dictatorship."

"We must not be the last in Europe to choose the path of democracy," he said. "There will be a lot to do after democratic elections. We have lost 45 years."

#90269d6490 09/26/1990 ~French/German News Agency
WASHINGTON (SEPT. 26) - Israel does not hold it against Egypt that the United States will forgive its seven billion dollar military debt, but the Jewish state is more deserving of such a move, an Israeli official said Wednesday.

Israeli Finance Minister Itzhak Modai said forgiveness of its 4.5 billion dollar U.S. debt is more urgent because Israel faces a greater threat from Iraq.

''We have no objection to the forgiveness of the Egyptian loan,''

he said, ''but as far as we are concerned, it stands to reason that once this loan is forgiven, the Israeli loan, which is fortunately only half this amount should also be forgiven by the same token, and most probably for the same reason.''

Israel, he said in an interview with the telvision network Cnn, is in confrontation with Iraq ''much more so'' than Egypt. ''In the first place, we are within range of Iraqi missiles. All they have to do is push a button.''

Modai has been in Washington since Monday, discussing his country's financial problems with Treasury Secretary James Brady, Deputy Secretary of State Lawrence Eagleburger, and members of Congress.

Other strains on Israel's economy include the absorption of up to a million Soviet Jews over a five-year period, and the costs of preparing for an Iraqi attack.

Israel spends 12 percent of its budget just on defence, he said, enough money to ''build another Israel next to the present one.''

PARIS (SEPT. 26) - The French government on Wednesday issued a stern warning against attempts to move the European Parliament from Strasbourg to Brussels.

In a letter to European Parliament President Enrique Baron Crespo, made public Wednesday, Foreign Minister Roland Dumas spoke of the "grave consequences" and "the attitude of hostility" such a move would entail.

Mr. Dumas said Strasbourg was "exclusively" the city where full sessions of the European parliament should be held and rejected "insidious attempts" to move the seat of parliament elsewhere.

A decision to hold a full special session of parliament in Brussels in October would constitute a violation of the Treaty of Rome, Mr. Dumas said.

The treaty provides that the choice of the headquarters of European institutions can only be decided by unanimous agreements among the governments of all member states, he said.

The Enlarged Bureau of the European Parliament meets Thursday to consider holding a special session of parliament in Brussels in October for the first time and to take decisions concerning the purchase of property for use by a European chamber.

While Mr. Dumas said Paris understands the "preoccupations of parliament concerning the organisation of its work," he warned against any initiative which ignored the Treaty of Rome.

"It is unreasonable to pursue a dead end that the French resent as an attitude of hostility regarding them," the minister said.

A controversy has raged for several years over the question of moving the European Parliament to Brussels, where the European Commission, executive wing of the European Economic Community, is already located.

France is demanding that Strasbourg be definitively confirmed as the seat of parliament and has been blocking decisions on the location of other Community headquarters.

Belgian Prime Minister Wilfred Martens has said he will use his veto to block confirmation of Strasbourg as Parliament headquarters.

NAIROBI (SEPT. 26) - No general election will be held in Kenya before the due date of 1993, the ruling party's chairman Peter Oloo Aringo stated while attacking people who wanted to create "chaos and anarchy", the official Kenya News Agency reported on Wednesday.

Speaking on Tuesday at Kisumu in western Kenya, Mr. Aringo said the current

government had been "popularly elected by the people according to the constitution" in 1988.

People urging early elections should forget the idea, he said.

Many political and religious figures called for the dissolution of parliament and early general elections during hearings in July and August of a review committee set up by the Kenya African National Union, the country's only legal political movement.

President Daniel arap Moi, also speaking on Tuesday at Eldoret, said: "We have no reason whatsoever to indulge in experiments on how our nation should be governed. We made our choice a long time ago. The choice is one government, one people and one nation".

The KANU review committee received a number of calls for the introduction of political pluralism. The two leading proponents, former government ministers Kenneth Matiba and Charles Rubia, have been in detention without trial since early July. Their arrest sparked off nearly a week of rioting in which at least 22 people died.

#90269d6600 09/26/1990 ~French/German News Agency

NEW YORK, United Nations (SEPT. 26) - British Foreign Secretary Douglas Hurd told the U.N. General Assembly here Wednesday that once the Gulf crisis was resolved, the Palestinian problem must be tackled.

Speaking a day after the Security Council passed a resolution extending its arms and economic embargo to include air traffic, Mr. Hurd said, "Although Iraq's aggression dominates our thoughts about the Middle East, we must not lose sight of other issues in the region, above all the need for a just solution to the Palestinian problem."

He was echoing a theme highlighted by other members of the Security Council during Tuesday's debate.

Cuba, the only of the 15 council members to vote against the air embargo on Iraq, noted for instance that the council had failed to act as decisively in the cases "of Palestine, Lebanon and apartheid."

After the vote Tuesday, Mr. Hurd called the air embargo on Iraq "another brick to the international wall being constructed around the aggressor."

"There was something about the simple brutality of the (August 2) attack on Kuwait which put it in a category by itself. It was clear and complete. Every principle of law was flouted," he told the assembly Wednesday.

"Once (Iraqi President) Saddam Hussein has been driven from Kuwait, we will need to consider how lasting peace can be brought to the Middle East," he said.

Referring specifically to the Palestinian question, he added: "We have no intention of forgetting that unfinished business.

"But any solution to that problem will have to rest on respect for international law and of engagements entered into. That is why before that problem can be solved, we must deal with the case of Iraq.

"It is clear that the chances of a more secure world order depend directly on the success of the international coalition in reversing the occupation of Kuwait.

"The test is formidable but it cannot be evaded. This a defining moment. How we act now will shape the next decade."

Mr. Hurd also stressed the need for a new security structure for the Middle East, echoing a similar suggestion recently made by U.S. Secretary of State James Baker.

But Mr. Hurd made it clear that it was up to "the states in the region to decide how this should be done."

#90269d6770 09/26/1990 ~French/German News Agency

DUBLIN (SEPT. 26) - Iraqi authorities have said 12 Irishmen, all over the age of 55 and believed to be employed by Irish firms with interests in Baghdad, could be granted exit visas to return home soon, the Irish Foreign Ministry said Wednesday.

A spokesman said permission for the 12 to depart, along with three Irishwomen, was contingent on approval from the Iraqi organisations they were working for.

Iraq has released thousands of Western women and children since its August 2

invasion of Kuwait but has continued to hold most Western men in the country hostage.

The 15 Irish nationals, whose names were delivered to Irish embassy officials in Baghdad, were believed to be employed either by Baghdad's Parc Hospital, a subsidiary of the Irish national airline Aer Lingus, or by the Irish engineering consultant firm MF Kent which has been contracted for work by Iraqi firms.

The Iraqi authorities provided no further explanation for why the group had been selected, the spokesman said, adding that Irish ambassador Antoin Mac Unfraidh had been told they might be granted exit visas within days.

Two Irishmen reported to be employed by MF Kent along with a third Irishman were arrested earlier this month and were said to be awaiting court action for trying to flee from Iraq without obtaining authorization.

NEW YORK, United Nations (SEPT. 26) - Exactly a week before the two Germanies are to be reunified, West German Foreign Minister Hans-Dietrich Genscher Wednesday pledged that the new state would not strive for more power but would help Europe shape a new world order.

Addressing the U.N. General Assembly here for the last time as the West German foreign minister, he said: "The united Germany will carry greater weight. With it we shall not strive for more power but will be conscious of the greater responsibility such additional weight implies.

"We will accept this responsibility in Europe and around the world. We will place our weight on Europe's scales in such a way that it will benefit all nations in our continent and hence the whole of manking."

"Germany recognizes and accepts its responsibility to help a better future for Europe. We want a German Europe but a European Germany," he said.

In words meant to reassure the new state's neighbors, Mr. Genscher reiterated that "the United Germany has no territorial claims whatsoever against other states and will not assert any in the future."

"Our relationship with Poland is a special manifestation of our European calling. We therefore intend to establish in an additional, comprehensive treaty the basis for a new chapter of good-neighborly relations between Germans and Poles."

CAIRO (SEPT. 26) - Egyptian President Hosny Mubarak announced Wednesday that a referendum would be held on October 11 to decide on dissolving the people's assembly or parliament.

In a statement broadcast live on Egyptian radio and television, Mubarak said: ''I have decided to go to the people, who alone are sovereign and the source of powers, to seek their opinion in a referendum on dissolving the people's assembly.

The move follows a ruling by the constitutional court from May 19 that previous electoral procedures were unconstitutional because they favoured candidates entered on party lists and gave little chance to independent contenders.

Mubarak announced that the court's decision would be respected and promised to introduce electoral changes, including the direct election of deputies.

BANGKOK (SEPT. 26) - Burmese officials have warned monks and students they will face stern action if they creating disturbances and instability in the country, Radio Rangoon said Wednesday.

The radio, monitored here, quoted Major General Tin U, secretary of the ruling State Law and Order Restoration Council (SLORC), as saying that some monks and students had "in recent days" caused disturbances and created instability in Mandalay, Burma's second largest city.

Maj. Gen. Tin U's remarks were made in talks with officials in the three central cities of Mandalay, Sagaing and Magwe Thursday to Sunday.

He said that if the peace and stability of the country continued to be affected and excesses were committed once again, effective action would be taken in accordance with the law.

Lieutenant General Phone Myint, home and religious affairs minister, said during the same trip: "Today, people who are envious of the stabilizing and tranquil situation in the country are infiltrating the young students and young monks and are encouraging unrest and disturbances.

"We urge them to stop these acts now," Lt. Gen. Phone Myint said. "We are able to crush the threat that emanates from inside the country and care very little about the threat that comes from the outside because we have the power to overcome that threat."

The military seized power in September 1988 and put down pro-democracy

protests. The SLORC allowed general elections in May which were won by the main opposition National League for Democracy but has so far shown no readiness to hand over power.

Rangoon-based diplomats have reported hundreds of arrests in several cities as unrest against the junta has increased.

#90269d6990 09/26/1990 ~French/German News Agency

ISLAMABAD (SEPT. 26) - A high court Wednesday ordered the three largest national dailies of Pakistan to answer charges of contempt as legal battles intensified over last month's dismissal of premier Benazir Bhutto and all the assemblies of the country.

The newspapers, Nawa-e-Waqt, Jang and Dawn, were accused of sensationalising the proceedings of the Lahore High Court by reporting that the present caretaker administration of Pakistan was there only to hold elections, according to state-run television.

They had said there was a 90-per-cent chance of the dismissed assemblies being revived. Earlier the newspapers had been twice warned by the court for allegedly inaccurate reporting. They are to answer the charges Saturday.

The contempt notices to the newspapers followed a verdict by the Peshawar High Court restoring the dismissed government and the assembly of the Northwest Frontier Province (Nwfp).

But the caretaker government immediately secured a supreme court order stopping implementation of the Peshawar judgement.

The high court said it did not find ''an iota of reliable evidence'' to prove the Nwfp government, run by Bhutto's Pakistan People's Party (Ppp), and the assembly had been legally dismissed by the provincial governor.

Referring to the governor's claim of immunity from appearing before the court, it said: ''It does not lie in the mouth of the rulers to claim immunity for appearance in courts of law as functionaries of an Islamic state ...''.

LONDON (SEPT. 26) - Two London futures exchanges, the Futures and Options Exchange (FOX) and the Baltic Futures Exchange (BFE), plan to merge to make it easier to expand operations, the BFE said in a statement Wednesday.

The move, which requires approval by members of both exchanges, will enable development of existing contracts and exploration of new possibilities, BFE chief Pat Elmer said.

The BFE comprises futures contracts on potatoes, grain, soya flour, pork and freight shipping, and is considering introducing contracts on oil freight and lamb and mutton.

The FOX has contracts on robusta coffee, cocoa, sugar, rubber and an indicator price for non-ferrous metals, and is planning to add an arabica coffee contract in the next three to six months.

It is also studying the possibility of introducing contracts on electricity and property.

PARIS (SEPT. 26) - French group Lafarge-Coppee said Wednesday it made a net profit of 1.004 billion francs (189 million dollars) in the first half of this year, up from 986 million (186 million dollars) in the same period of 1989.

Sales were up 15 percent at 15.71 billion francs (2.96 billion dollars) against 13.64 billion (2.57 billion dollars).

But on a comparable structure basis, turnover was up only five percent.

-30- 606

#90269d7300 09/26/1990 ~French/German News Agency

PARIS (SEPT. 26) - Some 2,000 demonstrators, including scores of mayors and accompanied by a dozen wild horses, marched here Wednesday in protest against a proposed new route for the high-speed TGV train that would carve through southern France's Provence region.

After marching on the office of Prime Minister Michel Rocard, who refused to meet with a delegation of five elected officials, the demonstrators pledged to occupy train stations and tracks.

Among them were 38 mayors and a dozen of the wild horses of the Camargue region, at the delta of the Rhone river. Some of the protestors wore traditional costumes.

One mayor said the proposed route would "destroy 80 to 100 villages and disturb the tranquility of 200 others".

The new route is aimed at speeding up travel between Paris, Nice and Marseilles. Its opponents have called for changes that they say would add "only a few minutes" to the travel time.

-30- 1117

#90269d7360 09/26/1990 ~French/German News Agency

PRETORIA (SEPT. 26) - The white Pretoria City Council restored electricity to two black townships Wednesday barely 12 hours after it was cut due to unpaid bills.

Lights came on in Attridgeville and Mamelodi, adjoining Pretoria, as the two communities were preparing to take court action against the city council, civic leader A.S. Nkomo said.

A day earlier the council said it was being forced to make the move because the two black town councils had not paid their bills because of a boycott.

By August 24, Attridgeville owed some 1.7 million rands (661,478 dollars) and Mamelodi 3 million rands (1.17 million dollars).

In a statement published here Wednesday, the Pretoria council said electricity had been turned on pending a final agreement between all parties, but warned that electricity would be cut indefinitely if no agreement was reached by October 12.

#90269d7390 09/26/1990 ~French/German News Agency

BAGHDAD (SEPT 26) - Iraq Wednesday sharply criticised Soviet Foreign Minister Eduard Shevardnadze a day after he told the U.N general Assembly the United

Nations would be justified in using force to drive Iraq out of Kuwait if sanctions failed.

A commentary by the official Iraqi News Agency said the Soviet Union had adopted Washington's hostile attitude towards Iraq ''which stand counter to all that is humane and honourable''.

Shevardnanze's speech demonstrated that he was not concerned with friendship with Arab states. If the Soviet foreign minister was ''not keen'' on friendship with the Arabs, they in turn ''will not be keen on you or the likes of you'', the report said.

In his speech in New York, Shevardnadze said the United Nations ''has the power to answer aggression with violence''.

Shevardadze said Wednesday he was still optimistic of a peaceful solution to the Gulf crisis but this could only be achieved by Iraq withdrawing from Kuwait, the Soviet Tass news agency reported.

#90269d7450 09/26/1990 ~French/German News Agency

BUENOS AIRES (SEPT. 26) - Argentina will continue to sell wheat to Iran even though it cannot prevent the grain from being reshipped to Iraq in violation of the U.N.-mandated trade embargo against Baghdad, the head of the government's grain authority said Wednesday.

Grain Board chairman Jose Ramon Saez Garcia said Argentina and Iran were still negotiating a possible 1.5-million-ton wheat deal. But he added that the sale could fall through because of the low price being offered.

Last week grain industry officials here said the talks with Teheran had collapsed over the price issue, with Argentina offering to sell the wheat for 80 dollars per ton and Iran offering to pay 70 dollars.

Talking with reporters here Wednesday, Mr. Saez said that if Iran were to get the wheat, Argentina "cannot foresee what Iran and Iraq would do next."

He said it would be impossible for Argentina to ensure the wheat would not find its way to Iraqi hands in breach of the trade embargo.

Argentina has pledged to abide by the embargo, imposed after Iraq invaded Kuwait August 2, and on Tuesday Buenos Aires dispatched two warships to help enforce the naval blockade in the Gulf.

Before the Gulf crisis, Iraq was one of the biggest importers of Argentine grain and beef.

#90269d7660 09/26/1990 ~French/German News Agency

NEW DELHI (SEPT. 26) - India is to send two more military aircraft to Iraq to bring back Indian nationals, but must seek United Nations clearance for any further flights, a government official here said Wednesday.

Iraq had given landing permission for five flights of airforce transport planes to fly Indians home before a new U.N. resolution passed Tuesday extending the sea embargo on Iraq to cover planes.

Three of the evacuation flights from the Iraqi city of Basra had already been carried out, a Ministry of External Affairs spokesman said.

He said that New Delhi was not required to seek U.N. clearance for the remaining two flights to Basra, but that clearance would be required for any further flights, even though they were unlikely.

Meanwhile, the national television Wednesday said that some 15,000 Indians from Iraq and Kuwait were waiting in Jordan to be flown back home on civilian flights.

Some 66,794 Indians have been officialy repatriated since the August 2 Iraqi invasion of Kuwait. About 172,000 Indians were in Kuwait and 10,000 in Iraq at the time of the invasion.

-30- 1285

#90269d7670 09/26/1990 ~French/German News Agency

Dublin (SEPT. 26) - Inflation in Ireland is down to 2.9 percent for the past 12 months, just marginally above the rate in West Germany and le half the

European Community average of 5.9 percent.

The latest figures are a strong boost for government economic policy in advance of talks with the country's trade unions and employers about a new three-year national plan to regulate incomes.

Forecasters say the economy should continue to grow at its present rate of about 4 percent a year if the Gulf crisis does not cause a worldwide recession.

For the past three years pay increases have been kept to an annual rate of just 2.5 percent, slightly below the annual inflation rate of 3 percent.

While this has led to dissatisfaction among some trade unionists it has resulted in a turn around in the economy and the virtual elimination of government borrowing for day to day spending.

With inflation in Britain, Ireland's main trading partner, now running nearly four times higher at 10.6 percent the benefits of continuing the strict economic regime are obvious to trade union and employers leaders.

Irish exports are booming as a result of wage costs being kept under control, and the country is heading for a significant trade surplus for the fifth year in a row.

The one black spot in the economy is unemployment which remains at 16 percent of the labour force - well above the European Community average.

Though employment is expanding, it is not growing fast enough to cater for a workforce which is expanding even more rapidly as a result of high birth rates in the late 1960's and early 1970's.

A by product of this has been high emigration since the mid-1980's, though this is slowing down as the economy begins to grow.

#90269d7830 09/26/1990 ~French/German News Agency

MADRID (SEPT. 26) - Former Algerian president, Ahmed Ben Bella, 73, left here by boat for Algiers Wednesday after ten years in exile.

Some 700 supporters and members of his party, Movement for Democrarcy in Algeria (Mda), boarded the Algerian ferry El Hoggar for the journey home. They are due to reach Algiers Thursday.

Ben Bella was ousted in a coup in 1965 and spent 14 years in prison before being allowed to go into exile in 1980 by President Chadli Benjedid.

Ben Bella went first to Barcelona and then spent most of the time in

Switzerland.

''I am not returning to Algeria as a saviour'', Ben Bella said before the ship sailed. ''I want only to make again my modest contribution to the building up of my country''.

He plans to make a speech on arriving in Algiers and then to go on tour of the country. Travelling with him on the boat is Otelo Saraiva de Carvalho, one of the chief strategists of the peaceful revolution in Portugal in 1974.

#90269d8350 09/26/1990 ~French/German News Agency

BAGHDAD, (SEPT 26) - Iraq will cut off food supplies to all foreigners stranded in Kuwait and Iraq starting October 1, a reliable source said.

The source said Foreign Minister Tarek Aziz informed the International Committee of the Red Cross his country would not be able to provide foreigners with their food requirements beyond October 1.

Vietnam's Ambassador to the United Nations in Geneva said Wednesday that 16,137 Vietnamese workers in Iraq were in a highly precarious situation following an announcement here that they would receive no more food from next Monday.

Prince Sadruddin Agha Khan, the United Nations' special humanitarian representative for the Gulf, said in mid-September that two million foreigners -- mostly Arab and Asian workers -- were stuck in Iraq and Kuwait.

-30- 998

#90269d8440 09/26/1990 ~French/German News Agency

LONDON, (SEPT 26) - Prime Minister Margaret Thatcher called on British employers Wednesday to keep salary increases below the inflation rate, now 10.6 per cent, saying that to do otherwise would fuel inflation and endanger productivity.

"It's quite wrong for wage settlements simply to follow the latest Retail Price Index. That is no indication of what any business can afford", Mrs. Thatcher said in an address to the Confederation of British Industry (CBI).

"Many are spending not only what they are paid, but also as much as they can borrow. So demand has been growing too fast", she said.

"A one-per-cent increase in earnings adds nearly three times as much to costs as an extra one percentage point on interest rates", the prime minister added.

Inflation breached 10 per cent in August despite the raising of interest rates

to 15 per cent last October in a bid to reduce demand and push inflation lower.

Chancellor of the Exchequer John Major told an International Monetary Fund (IMF) meeting in Washington Wednesday that fighting inflation was his top priority but he predicted the rate could go even higher.

#90269d8590 09/26/1990 ~French/German News Agency

WASHINGTON (SEPT. 26) - Iraqi forces have captured at least seven more Americans, bringing to at least 100 the number of U.S. citizens held by Iraq, the State Department said Wednesday.

Department spokesman Richard Boucher said the seven Americans were probably in Kuwait when they were abducted, but he did not say when they were captured or where they were being held.

He said the United States had had no access to any U.S. citizens held by Iraq since September 22, when the U.S. charge d'affaires in Baghdad met with an American shot and slightly wounded by Iraqi troops when he tried to flee a residence in occupied Kuwait.

"The Iraqis have also not provided us with a list of Americans that they are holding, and they have not responded to our demand that those citizens with serious medical problems be allowed to depart immediately," said Mr. Boucher.

He said Deputy Assistant Secretary of State David Mack met with Iraq's ambassador here Tuesday to raise U.S. concerns about Americans in Iraq and Iraqi-occupied Kuwait.

Since Iraq invaded Kuwait August 2, it has reportedly placed dozens of Americans at military installations to serve as human shields to discourage a U.S. attack.

#90269d9900 09/26/1990 ~French/German News Agency

WELLINGTON (SEPT. 27) - New Zealand-based corporate giant Brierley Investments Ltd. (BIL) reported Thursday a 10 percent rise in net profit for

the year to June to a record 401.7 million New Zealand dollars (249.5 million U.S.).

The figure compared with the previous year's 365.5 million dollars (227.0 million U.S.), BIL said.

Chief executive Paul Collins said the company had adopted its traditional conservative stance in writedowns. Provisions and writedowns in BIL and its Hong Kong-based subsidiary Industrial Equity (Pacific) totalled 146 million dollars (90 million dollars).

While the 10 percent increase seemed modest compared with past performances, Mr. Collins said, it had been achieved against a backdrop of adverse conditions.

He cited high interest rates, continuing volatility in world stock markets,

the "virtual total collapse" of the entrepreneurial sector in New Zealand and Australia, a slowdown in corporate profitability, and heightened concerns about recession in the United States and Britain.

The result saw earnings per share increase to 21.1 cents (13.1 U.S. cents) from 19.9 cents (12.3 U.S. cents).

A final dividend of six cents (3.7 U.S. cents) a share was declared, making an annual dividend of 11 cents (6.8 U.S. cents) a share, an increase of 15 per cent, allowing for the 1989 one-for-10 bonus issue.

For the first time, BIL's trading profit -- 495 million dollars (307 million U.S.) -- exceeded dividend and other investment income, representing 51 per cent of the gross contribution of 976 million dollars (606 million U.S.) compared with 45 percent last year.

The gross contribution by region was: 325 million dollars (201 million U.S.) from New Zealand, 97 million dollars (60 million U.S.) from Australia, 404 million dollars (250 million U.S.) from Britain and 150 million dollars (93.1 million U.S.) from the United States.

Athens (SEPT. 26) EFE - Most banks and offices remained closed Wednesday in Greece for the second time in a week at the start of a two-day general strike called by trade unions to protest the government's plans to cut social security benefits.

The stoppage, expected to bring financial and administrative activity to a standstill, has been organized by the Greek General Confederation of Labor

(GSEE), the Association of Public Employees (ADEY) and other unions which represent some 1.5 million workers.

Civil servants, teachers, transport, hospital, mail, railway and telecommunications workers were all expected to heed the strike along with bank and electricity employees who have been holding their own stoppages over the last 10 days.

Most shops, as in previous strikes, are keeping their doors open and many residents of the capital are expected to spend the strike browsing around them.

The GSEE and ADEY are protesting government plans to cut pensions and raise retirement age and claim Prime Minister Constantine Mitsotakis is trying to curb the Social Security's dlrs six billion deficit by taking away benefits won by workers over the last 15 years.

Wednesday's strike, which comes six days days after unions held a 48-hour general strike, is the seventh stoppage since Mitsotakis took office in March.

Negotiations between the government and union leaders on the social security isues have so far failed to produce an agreement.

Rubbish has piled up in the streets, public transport has been constantly disrupted, while electricity services have regularly been cut and banks have been closed due to this month's stoppages.

Mitsotakis' government is now said to be considering forcing workers at key positions in banks and electricity companies to return to their posts.

BRUSSELS (SEPT. 26) EFE - Belgian Prime Minister Wilfried Martens Wednesday said his government was set to increase its air and naval support of the United Nations embargo against Iraq, and added he was willing to take further action if necessary.

Martens told the lower house he had offered fellow member nations of the Western European Union (WEU) to send an escort frigate to the Persian Gulf and would make available four Hercules C-130 transport planes.

Martens said he did not rule out providing additional support "if developments in the situation make other measures necessary."

The Belgian frigate is to escort Western warships heading to the region, and if the WEU decides, it will then join ships in the Gulf maintaining the U.N. embargo or relieve another ship taking part in the blockade.

The transport planes will be at the disposal of WEU countries "during the month of October," Martens said.

Belgium already has two mine-sweepers and a support vessel operating in the Gulf.

Meanwhile, public support in Belgium for the government's decision to partake in the international effort to force Iraq out of Kuwait has increased by 10 per cent since last month.

According to an opinion poll published Wednesday in the Brussels daily Le Soir three out of four Belgians applaud the sending of their warships to the Gulf -- a 10 percent increase over a similar poll conducted August 21.

#90269e0013 09/26/1990 ~Latin America New Agency

NICOSIA (SEPT 26) EFE - The air embargo against Iraq approved by the United Nations Security Council is a "declaration of war" that will change +the situation of foreigners+ held by Baghdad, the president of Iraq's parliament said Wednesday.

In statements to the France Presse news agency, reported on Arab radio, parliamentary president Saadi Mahdi Saleh called the air embargo approved Tuesday "a new defiance, not only of Iraq but also of moral and international law."

The air embargo "in terms of international law" is a "declaration of war," Saleh said, adding that it would "impede the arrival of food and milk for children."

The new sanctions "will increase Iraq's economic problems, but will also change the situation of Westerners held by Iraq," said Saleh without explaining how the hostages would be affected.

Meanwhile, an Iraqi Airways flight on which 11 French diplomats were to have been evacuated has been delayed and flights between Baghdad and Jordan, Yemen and Libya are expected to be affected by the air embargo.

Iraq Airways is the only carrier authorized to evacuate Western foreigners from Iraq. The last flight carrying foreigners left Bagdad on Saturday with 140 people aboard.

The U.N. imposed a trade embargo on Iraq following the invasion of Kuwait August 2.

#90269e0014 09/26/1990 ~Latin America New Agency
NICOSIA (SEPT 26) EFE - U.S. warplanes patrolling the Gulf forced an unidentified foreign plane to land in Bahrain to have its cargo inspected, Arab radio stations monitored in Cyprus reported Wednesday.

The reports did not give the nationality of the aircraft nor indicate whether it was carrying material which would violate the United Nations embargo against Iraq and occupied Kuwait.

The incident came only a day after the U.N. voted to extend the embargo it slapped on Iraq last month to cover the interdiction of air traffic to and from the countries affected.

#90269e0015 09/26/1990 ~Latin America New Agency
TEHRAN (SEPT 26) EFE - An Iranian government organization Wednesday callps in Saudi Arabia, where their presence allegedly defiles Islam's holiest shrines.

The Tehran-based Office for the Propagation of Islam urged the Moslem faithful to join Iranians Friday in chanting "Death to America" as they march in what was termed a show of strength and confidence in victory.

According to its organizers, the march would also make it clear that "In the eyes of the Iranian people, the United States is mainly responsible for the (1980-1988 Iran-Iraq) war" in which over a million people were killed.

Following the same line, the Tehran daily Jamhuri Islami said that Friday's demonstration would celebrate a double victory, the first of which was the Iraqi decision last month to accept all of Iran's demands for a peace treaty formally ending the Iran-Iraq war.

The second victory, the paper said, was "that Iraq, which was armed to the teeth by the West, has now become a threat and turned its arms against those who supoorted and financed Baghdad in its war against Iran."

#90269e0019 09/26/1990 ~Latin America New Agency
RIYADH (SEPT 26) EFE - The Saudi Arabian civil defense chief Wednesday announced that his government was to start selling gas masks to civilians at a reduced price because of the threat of an Iraqi chemical weapons attack on the country.

"We can't underestimate the result of chemical bombs," Civil Defense Director Hachem Abdelrrahman said in making the announcement.

At present an old gas mask on sale in the neighboring Gulf state of Bahrain

costs dlrs 86 and masks are in limited supply.

The Riyadh government has already handed out old gas masks to the inhabitants of parts of oil-rich eastern Saudi Arabia, one of Baghdad's probable targets in the case of an attack.

Since last month's Iraqi invasion of Kuwait, a U.S.-spearheaded multinational force has been stationed in Saudi Arabia to stave off further aggression by Baghdad in the region.

According to U.S. press reports, over the last two weeks Iraqi forces have prepared chemical decontamination sites in the south of their country where vehicles and soliders could be decontaminated if Iraqi poison gas accidentally affected its own forces.

Quoting U.S. military officials, the reports said Baghdad had as many as six such sites close to its border with occupied Kuwait.

Iraq used chemical weapons in its 1980-1988 war with Iran and against its own minority Kurdish population.

The inhabitants of a number of Gulf countries have asked their governments to buy enough masks to distribute to protect them in the case of a war in the Gulf.

#90269e0029 09/26/1990 ~Latin America New Agency

MOSCOW (SEPT. 26) EFE - The Soviet parliament Wednesday overwhelmingly approved the general text of a proposed law permitting freedom of religion and conscience in the Soviet Union.

Although the legislation will have to be debated article by article, there was only one voice against and one absention among the 343 deputies of the Supreme Soviet who voted.

The vote surprised even religious leaders present given the large number of communists among the legislators.

The Patriarch of the Orthodox Church of Moscow and all the Russias, Alexi II, who is also a parliamentary deputy, said that some of the church's proposals had been incorporated in the proposed law.

"The realization of the liberty of conscience in a society depends on if the state structures work in defense of it or, on the contrary, the state with all its power intends to quash the autonomy of conscience of the people," he said.

"We don't want a piece of the social cake," Alexi added, saying that the

fundamental wishes of the church was to escape from the previous limitations and obstacles on its believers.

One of the main planks of the church's proposals was that religious teaching should be allowed in state schools.

The proposed legislation would prevent the financing of atheism by the state as previously happened under Marxist rule.

Novice priests will be given the same rights as other students, and soldiers would be allowed to take part in religious activities in their spare time.

The document also proposes the ending of social discrimination against priests or those that work in religious centers.

The president of the council of Seventh Day Adventists, Mikhail Kulakov, also praised the legislation , especially the clause allowing religious groups the right to set up confessional schools.

BUENOS AIRES (SEPT 26) EFE - After more than a decade of searching, the locating of a youth whose parents and sisters went missing during the former Argentine military dictatorship has brought to 50 the number of "missing" children discovered by a human rights group, it was announced Wednesday.

The Grandmothers of the Plaza de Mayo, a group dedicated to finding the missing children, said they had discovered Marcelo Mariano Ruiz, 14, living with adoptive parents in the province of Cordoba, 750 km nothwest of Buenos Aires.

A total of 23 children whose parents "disappeared" during the rightist military repression in the late 1970s and early 1980s have been returned to their natural families in the last 10 years.

Another 14 have stayed with their adoptive parents and five others are waiting the courts' decision on their futures.

The remaining eight remained with families who had illegally adopted them. Most of them live in neighboring Paraguay.

At least 9,000 people were kidnapped, tortured and killed during the so-called "Dirty War" in which the Argentine military dictatorship clamped down on suspected leftists.

Dozens of their children are believed to have been illegally adopted, many of them by security force officers in Paraguay or Argentines who fled across the

border following the return to civilian government in 1983.

The leader of the Grandmothers group, Estela Carlota, said Marcelo and his parents left Argentina in 1977 because of political problems for Europe where his mother gave birth to a daughter.

But they returned to Buenos Aires three years later where they were seized and sent to a naval detention center where his mother gave birth to another daughter.

What happened to the family since then had remained a mystery and the daughters have never been located.

But when in 1985 Marcelo's aunt asked the Grandmothers to investigate the case they found that Marcelo had been abandoned in the state hospital from where he had been adopted.

Carlota said his adoptive parents had carried out a seemingly "legal" adoption. They had told the youngster of his true identity.

"Only in cases guided by the truth can we get the two families together, the blood family and the adoptive family," said Carlota.

But with illegal adoptions the grandmothers have called for the children to be returned to their true families, sometimes resulting in long legal battles.

#90269e0036 09/26/1990 ~Latin America New Agency

NICOSIA (SEPT 26) EFE - The U.S. aircraft carrier Independence is set to enter Gulf waters, carrying 70 fighter jets as part of the U.S. build up againt with Iraq, Arab radio stations reported Wednesday, citing Pentagon officials in the region.

The Independence is one of three U.S. Navy aircraft carriers dispatched to the region since Iraq invaded Kuwait August 2.

It is the first to enter Gulf waters since 1974, and it's arrival comes after the United Nations Security Council beefed up its economic embargo against Baghdad by ordering a block on all air traffic to or from Iraq.

Alongside the three aircraft carriers, Washington has sent more than 40 other vessels, including frigates, destroyers and cruisers, to the region.

The United States is spearheading the multinational forces deployed in a bid to force Iraqi troops to pull out of Kuwait.

#90269e0037 09/26/1990 ~Latin America New Agency
GUATEMALA CITY (SEPT 26) EFE - A Guatemalan judge Wednesday ordered the arrest of four soldiers for the torture-slaying of a U.S. citizen in northern Guatemala last June.

Government Minister Col. Carlos Morales said the four suspects were all members of the Army counter-inteligence unit. They were identified as Rafael Tiul, Pablo Cucul, Pablo Lajuj, and Carlos Zelada.

U.S. citizen Michael Devine was decapitated and his mutilated body was found in June near the Mexican border in the northern department of Peten.

According to the indictment, the four suspected soldiers were all on leave from an anti-insurgency school in Peten when Devine was killed.

U.S. Ambassador to Guatemala Thomas Stroock had been pressing the government of President Vinicio Cerezo to arrest those responsible and the daily New York Times reported that Washington was considering further cutbacks in military aid.

Cerezo, in a letter to Stroock last week, acknowledged Army involvement in Devine's slaying and promised to clear up the murder.

It was the first time the Army had been implicated by the president in a murder, although nearly 100,000 Guatemalans have been killed in the past 30 years as successive governments attempted to wipe out leftist insurgents.

Devine, who had lived in Guatemala for 18 years, arrived as a member of the Peace Corps and then stayed on to run a hotel and restaurant for tourists.

U.S. aid to Guatemala was expected to reach dlrs 120 million in 1990, dlrs 30 million less than last year, due to cutbacks that were prompted by concern over the country's appalling record on human rights.

#90269e0040 09/26/1990 ~Latin America New Agency
NEW DELHI (SEPT. 26) EFE - Violent student demonstrations in which at least seven people have died continued Wednesday in northern India to protest the government's decision to reserve 27 per cent of public jobs for the Untouchables, the lowest caste among India's Hindu majority.

The capital was virtually paralyzed after the nationalist Hindu party Bhartiya Janata called a strike because of police +excesses+ in trying to suppress student protests the day before.

Six of the victims have been killed by police gunfire, one of them dying

Wednesday morning in New Delhi after security forces opened fire on demonstrators Tuesday.

One youngster died in New Delhi Tuesday after setting himself on fire.

The protests began a week ago against Prime Minister V.P. Singh's decision to give more openings to the Untouchables as had been recommended by a commission 10 years before.

The students see the move as usurping the traditional privileges enjoyed by the upper castes in education and work opportunities.

An indefinite curfew was imposed Wednesday in the city of Modingar in the state of Uttar Pradesh where four people have died from police bullets in an attempt to control 25,000 demonstrators who burned buses and stoned a police station.

One person was shot dead by the Army in Jammu, and another in Khalanwali in Haryana state, with curfews being called in seven cities in the two states and neighboring Punjab.

Authorities have now banned further demonstrations in various parts of New Delhi for two weeks.

Shops closed in the city and bus services were suspended after a number of buses were torched or damaged. Once again roads were blocked and cars attacked.

In Ghaziabad in Uttar Pradesh demonstrators set a passenger train ablaze. They also torched two post offices in the city and another in nearby Mattura.

In an effort to halt the violence the Communist Party of India has called on Singh to convene an immediate meeting of all parties involved.

Former prime minister Rajiv Gandhi, now leader of the opposition, Tuesday called on Singh to resign.

The Anti-Mandal Commission Forum, set up to protest the report which recommended the Untouchables' job quotas, said it would not talk to the government until it stopped pushing through the proposals announced August 7.

#90269e0043 09/26/1990 ~Latin America New Agency

SANTO DOMINGO (SEPT. 26) EFE - Public transport was considerably reduced Wednesday in cities throughout the Dominican Republic as a 72-hour general strike began peacefully.

The strike is the second to be called by trade unions in less than two months

to protest the economic policies of President Joaquin Balaguer.

Only one minor incident was reported when several youths threw stones which broke windows of a bus and a police patrol car in the town of Haina, 15 km southwest of Santo Domingo.

Reports from the northern city of Santiago and the southern city of San Cristobal said the strike was only being partially heeded.

Joint Army, Navy and Air Force patrols were guarding access points to Santo Domingo while National Police officers were patrolling other parts of the capital.

Last month 13 people died and 60 policemen were injured in violence during a 48-hour nationwide stoppage protesting price hikes on basic foodstuffs which averaged 83 per cent.

This week's strike, organized by the Collective of Peoples' Organizations, is not supported by nine of the country's other unions.

On Tuesday the police and Army announced the discovery of a bomb factory and the seizure of 33 powerful bombs.

The Army accused strike organizers of plotting terrorist actions on supermarkets, military bases and banks.

Last Sunday three students were killed by home-made bombs at the offices of the National Union of Revolutionary Students.

Police said the students were also planning to plant explosives during the strike.

#90269e0048 09/26/1990 ~Latin America New Agency

DUBLIN (SEPT 26) EFE - The Irish government Wednesday said Iraq had given permission for 12 Irish men and three women, all aged over 55, to leave Baghdad.

If they are allowed to leave, it will be the first group release of Western men since Baghdad said it would keep hostages to prevent a U.S. air attack in response to the Iraqi August 2 invasion of Kuwait.

Irish Ambassador Antoin Mac Unfraidh was Tuesday informed of the offer by Iraqi authorities, and was told they would be issued with exit visas within days.

Iraqi officials said the 15 could leave if their employers agreed.

Thirteen of the 15 are thought to be employed either by Park Hospital, a subsidiary of the Irish airline Aer Lingus, or the M.F. Kent engineering firm, which has contracts in Iraq.

The remaining two were said to be relatives of some of the workers.

DHAKA (SEPT. 26) XINHUA - A MINOR BOY REPORTEDLY DROWNED IN THE WESTERN DISTRICT OF SIRAJGANJ AS A FRESH WAVE OF FLOOD INUNDATED A LARGE PORTION OF LOW-LYING AREAS OF THE DISTRICT DURING THE LAST ONE WEEK, REPORTS REACHING HERE SAID TODAY.

THE LATEST OUTBREAK OF FLOOD, THE FIFTH IN THE LAST FOUR MONTHS IN THE DISTRICT, HAS AFFECTED 18 UNIONS AS WATER INTRUDED FROM THE JAMUNA (BRAHMAPUTRA) WHICH SWELLED FOLLOWING RAINS IN THE UPPER CATCHMENT AREAS, OFFICIAL SOURCES SAID.

ABOUT 1,000 PEOPLE WERE FORCED TO ABANDON THEIR HOMES AND THE FLOOD AFFECTED AT LEAST 75 VILLAGES, DESTROYING TRANSPLANTED RICE CROPS ON ABOUT 5,000 ACRES OF LAND.

THE JAMUNA HAS ALSO CAUSED WIDESPREAD EROSION. THE RIVER WATER LEVEL NEAR SIRAJGANJ TOWN INCREASED BY NINE CENTIMETERS AND WAS FLOWING 27 CENTIMETERS BELOW DANGER LEVEL.

MEANWHILE, THE EROSION OF THE RIVER TEESTA HAS TAKEN A SERIOUS TURN IN TWO SUBDISTRICTS, NORTHWEST BANGLADESH, RENDERING ABOUT 500 FAMILIES HOMELESS AND ENGULFING 1,000 HOUSES.

BESIDES, A FIVE-MILE-LONG SECTION OF THE FLOOD CONTROL EMBANKMENT AND STANDING CROPS ON 500 ACRES OF LAND HAVE ALSO BEEN WASHED AWAY BY THE RIVER.

#90269h0459 09/26/1990 ~Chinese News Agency

LONDON (SEPT. 27) XINHUA - SOME UNIVERSITIES IN BRITAIN ARE FACING SERIOUS FINANCIAL DIFICULTIES AND HAVE FAILED TO BRING THEIR INCOME AND EXPENDITURES INTO BALANCE, ACCORDING TO A PARLIAMENT REPORT PUBLISHED TODAY.

THE PUBLIC ACCOUNTS COMMITTEE OF THE HOUSE OF COMMONS SAID OF THE 50 UNIVERSITIES OUTSIDE LONDON, 24 HAD BEEN IN A DEFICIT SITUATION SINCE JULY 1989, AND A FURTHER 28 INSTITUTIONS FORECAST DEFICITS FOR THE FISCAL YEAR THAT ENDED THIS JULY.

MANY INSTITUTIONS WOULD BE WORSE OFF THAN THEIR 1990 FORECASTS SHOWED, WITH LONDON UNIVERSITY FACING PARTICULARLY SERIOUS DEBT PROBLEMS. ITS TOTAL DEFICIT IS BEING PROJECTED TO TOTAL 46 MILLION POUNDS (ABOUT 82 MILLION U.S. DOLLARS) BY THE YEAR 1993, THE REPORT SAID.

IN SOME UNIVERSITIES, COURSES HAVE BEEN CLOSED AND DEPARTMENTS REORGANIZED IN ORDER TO SAVE MONEY, BUT THE GENERAL TREND HAS BEEN A GRADUAL WORSENING OF STAFFING LEVELS AS MORE LECTURERS TAKE EARLY RETIREMENT WHILE THE NUMBER OF STUDENTS IS RISING SHARPLY, THE REPORT NOTED.

THE NUMBER OF STUDENTS PER LECTURER IN BRITISH UNIVERSITIES INCREASED FROM 10.7 TO 11.4 IN 1988 TO 1989, AND THE RATIO IS CERTAIN TO HAVE RISEN DURING THIS LAST ACADEMIC YEAR, THE REPORT SAID.

THE COMMITTEE REPORT CALLED ON THE GOVERNMENT TO TAKE "VIGOROUS AND PROMPT" MEASURES TO RESOLVE THE PROBLEM.

EDUCATION SECRETARY JOHN MACGREGOR TOLD UNIVERSITY CHIEFS TODAY TO KEEP THEIR FINANCES IN ORDER, AND ENSURE THAT THE MONEY THEY RECEIVE IS PROPERLY SPENT.

HE URGED THEM TO GET A MORE SOUND ACCOUNTING SYSTEM, ADDING: "SOME OF YOU MAY CHAFE AT THIS, BUT IT IS A FACT OF LIFE."

OSAKA (SEPT. 26) KYODO - MATSUSHITA BATTERY INDUSTRIAL CO. SAID WEDNESDAY IT WILL BEGIN SHIPMENTS EARLY NEXT MONTH OF A RECHARGEABLE NICKEL-HYDROGEN BATTERY THAT HAS TWICE THE LIFESPAN OF NICKEL-CADMIUM BATTERIES.

OFFICIALS OF THE COMPANY, AN AFFILIATE OF THE MATSUSHITA ELECTRIC INDUSTRIAL GROUP, SAID IT EXPECTS STRONG DEMAND FOR THE BATTERY FROM USERS OF PORTABLE TELEPHONES AND VIDEO CAMCORDERS, WHICH REQUIRE BATTERY PACKS COMPRISING FIVE OR 10 CELLS.

THE 16.5 MILLIMETER DIAMETER AND 42.5 MILLIMETER HIGH BATTERY DIFFERS FROM CONVENTIONAL NICKEL-CADMIUM BATTERIES IN WHICH THE POSITIVE ELECTRODE IS MADE OF NICKEL AND THE NEGATIVE ELECTRODE IS FORMED FROM CADMIUM.

THE NEW BATTERY CONSISTS OF A NICKEL-BASED POSITIVE ELECTRODE AND A HYDROGEN NEGATIVE ELECTRODE. HYDROGEN IS ABSORBED AND STORED IN A COMPOUND METAL, WHICH ACTS AS AN ELECTROLYTE, GIVING THE BATTERY ITS SPECIAL CHARACTERISTICS, THE OFFICIALS SAID.

THE BATTERY CAN BE RECHARGED WITHIN ONE HOUR AND WILL INITIALLY COST ABOUT TWICE THE PRICE OF NICKEL-CADMIUM BATTERIES, THEY SAID. THE COMPANY PLANS TO BEGIN MANUFACTURING 40,000 OF THE BATTERIES PER MONTH, THEY SAID.

#90269k0056 09/26/1990 ~Japanese News Agency
TOKYO (SEPT. 26) KYODO - IDEMITSU PETROCHEMICAL CO., LTD., ONE OF THE MAJOR WHOLESALERS OF LIQUEFIED PETROLEUM GAS, SAID ON WEDNESDAY IT WILL RAISE ITS PRICES ON PROPANE AND BUTANE GAS.

THE RISE, TO GO INTO EFFECT ON OCTOBER 1, WILL BE 11.50 YEN A KILOGRAM ON PROPANE GAS AND 11.40 YEN ON BUTANE.

THE OTHER WHOLESALERS OF LIQUEFIED PETROLEUM GAS ARE EXPECTED TO ANNOUNCE HIKES ON WEDNESDAY OR THURSDAY.

THIS IS THE SECOND CASE OF A HIKE IN OIL PRODUCTS, FOLLOWING THE RISE IN GASOLINE AND KEROSENE PRICES ON SEPTEMBER 17.

-30- 696
#90269k0082 09/26/1990 ~Japanese News Agency
TOKYO, SEPT. 26 KYODO - SUMITOMO FORESTRY CO. AND THE HOKKAIDO-BASED MITSUHASHI AND CO. HAVE SET UP A JOINT VENTURE WITH THE U.S. COASTAL LUMBER CO., OFFICIALS ANNOUNCED WEDNESDAY.

THE NEW LUMBER FACTORY, CALLED COASTAL LUMBER PRODUCTS, BASED IN WEST VIRGINIA WILL PREPARE WHITE OAK AND RED OAK FOR EXPORT EXCLUSIVELY TO JAPAN.

CAPITALIZED AT 1 MILLION DOLLARS, THE NORTH CAROLINA-BASED LUMBER COMPANY HOLDS A 50 PERCENT SHARE AND THE TWO JAPANESE FIRMS 25 PERCENT EACH.

OAK IS IN STRONG DEMAND IN JAPAN FOR USE IN FURNITURE AND HOUSING, BUT IS BECOMING LESS AVAILABLE IN HOKKAIDO WHICH HAS BEEN THE COUNTRY'S MAJOR SUPPLIER.

-30- 802
#90269k0089 09/26/1990 ~Japanese News Agency
TOKYO (SEPT. 26) KYODO - JAPAN AIRLINES CO., JAPAN'S LARGEST AIRLINE, IS CONSIDERING RAISING TICKET PRICES FOR INTERNATIONAL FLIGHTS FROM TOKYO TO TAKE ACCOUNT OF SOARING JET FUEL PRICES, ITS PRESIDENT SAID WEDNESDAY.

"I WANT TO AVOID RAISING SUCH AIRFARES BY MAKING IN-HOUSE EFFORTS TO OFFSET THE INCREASED FUEL COST, BUT SUCH A HIKE IS UNDER CONSIDERATION," MATSUO TOSHIMITSU TOLD REPORTERS.

BUT TOSHIMITSU SAID HE WOULD WAIT TO SEE HOW WORLD OIL PRICES WILL BE SETTLED BEFORE DECIDING WHETHER TO RAISE THE COST OF INTERNATIONAL AIR TICKETS.

HE SAID, HOWEVER, THERE WAS NO POSSIBILITY OF DOMESTIC FLIGHT FARES BEING

RAISED.

THE INTERNATIONAL AIR TRANSPORT ASSOCIATION (IATA) AGREED LAST MONTH ON RAISING INTERNATIONAL AIRFARES, BUT PUT OFF FOR FURTHER STUDY A PLAN TO RAISE FARES ON FLIGHTS FROM TOKYO DUE TO OPPOSITION FROM JAL AND ALL NIPPON AIRWAYS CO.

ON OTHER ISSUES, TOSHIMITSU DISCLOSED THAT HIS COMPANY HAS BEEN TOLD BY THE TRANSPORT MINISTRY THAT JAL IS NOT REQUIRED TO PROVIDE CARGO CARRIERS FOR MEDICAL SUPPLIES AND OTHER NONMILITARY EQUIPMENT FOR THE MULTINATIONAL FORCE AGAINST IRAQ, DEPLOYED MAINLY IN SAUDI ARABIA.

YIELDING TO PRESSURE FROM THE UNITED STATES, THE JAPANESE GOVERNMENT HAS PLEDGED TO PROVIDE AIRPLANES AND SHIPS AS PART OF ITS CONTRIBUTION TO THE INTERNATIONAL EFFORTS TO END IRAQ'S OCCUPATION OF KUWAIT.

ACCORDING TO GOVERNMENT SOURCES, JAPAN HAS NOT YET RECEIVED ANY ACTUAL REQUEST FROM THE UNITED STATES TO SEND AIRCRAFT, AND TOKYO HAS NO PLANS TO TRANSPORT NONMILITARY SUPPLIES ON ITS OWN.

THE JAL PRESIDENT SAID HE IS READY TO OFFER AIRCRAFT WHENEVER THE U.S. REQUESTS.

-30- 1810

#90269k0098 09/26/1990 ~Japanese News Agency

TOKYO (SEPT. 26) KYODO - ACE POLYMER, A MAJOR MARKETER OF SYNTHETIC RESIN, SAID WEDNESDAY IT WILL RAISE THE PRICE OF POLYETHYLENE AND POLYPROPYLENE BY 25 YEN PER KILOGRAM, ABOUT 10 PERCENT, FROM OCTOBER 21.

NEGOTIATIONS OVER THE PRICE HIKE ARE UNDER WAY BETWEEN ACE AND LEADING COMMERCIAL USERS OF THE SUBSTANCE, AN ACE SPOKESMAN SAID.

THE RISE IS IN RESPONSE TO THE PLANNED 25 PERCENT INCREASE IN THE PRICE OF ETHYLENE FROM OCTOBER FOLLOWING THE AUGUST 2 IRAQI INVASION OF KUWAIT.

THREE OTHER MAJOR MARKETERS ARE EXPECTED TO FOLLOW SUIT, INDUSTRY SOURCES SAID.

POLYETHYLENE AND POLYPROPYLENE ARE USED IN THE PRODUCTION OF FILM, BICYCLE PARTS, AND SYNTHETIC FIBER.

"WE HAVE NO CHOICE BUT TO PASS ON THE ADDED COST TO CONSUMERS," SAID A LEADING MAKER OF SYNTHETIC FIBERS.

THE IMPACT OF A 10 PERCENT PRICE HIKE WILL UNDOUBTEDLY BE FELT BY THE VAST MAJORITY OF CONSUMERS SINCE IT WILL BOOST THE PRICE OF MANUFACTURED CHEMICAL GOODS, SUCH AS APPAREL MADE FROM SYNTHETIC FIBERS AND PLASTIC BAGS, THE SOURCES SAID.

-30- 1196
#90269k0102 09/26/1990 ~Japanese News Agency
TOKYO (SEPT.26) KYODO - MITSUBISHI WAREHOUSE AND TRANSPORTATION CO. SAID WEDNESDAY IT HAS NOTIFIED THE TRANSPORT MINISTRY OF ITS INTENTION TO RAISE BY 6.8 PERCENT THE STORAGE FEES ON ALL GOODS KEPT IN REGULAR WAREHOUSES.

MITSUI WAREHOUSE CO., YOKKAICHI WAREHOUSE CO., AND OTHER LEADING WAREHOUSE CONCERNS ARE EXPECTED TO FOLLOW SUIT, INDUSTRY SOURCES SAID.

THE HIKE IN STORAGE FEES WILL BE THE FIRST IN OVER FOUR AND A HALF YEARS. THE LAST TIME THEY WERE INCREASED WAS IN APRIL 1986, WHEN THEY JUMPED 9.4 PERCENT.

MITSUBISHI OFFICIALS ATTRIBUTED THE PLANNED INCREASE TO THE HIGHER COST OF LAND AND LABOR.

THEY WERE QUICK TO ADD, HOWEVER, THAT THE PRICE HIKE HAS NOTHING TO DO WITH SPIRALING CRUDE OIL PRICES.

-30- 891
#90269m0001 09/26/1990 ~Market Consensus Surveys
FALLS CHURCH, VA (SEPT. 26) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The COMMERCE DEPARTMENT reports that durable goods orders for August slipped 0.8%. Economist were expecting a drop of 1.2% following the 2.9% rise in July durable goods orders.

The Nikkei nosedives 1109 points, breaking through 23,000 to close at 22,251, a loss of nearly 5%. ... U.K. stocks are up 15 points at midday, but U.S. shares in London are trading lower. ... The dollar is mixed. ... The long bond is yielding 9.10%. ... North Sea crude falls $1.67 to $35.85. ... Existing home sales rose 2.1% in August according to the NATIONAL ASSOCIATION OF REALTORS. ... The big three U.S. automakers report a 11.3% decline in car and truck sales for mid-September. ... A bill that would allow the SEC to curb program trading was approved by the SENATE yesterday. ... MARRIOTT CORP. has declared a moratorium on all new construction projects, and will cut capital spending in half. ... AMERICAN WEST AIRLINES says it is talking to PAN AM about buying the Pan Am shuttle. ... KOBE STEEL and ALCOA announce that they will form a joint venture in Japan to produce aluminum for cans and autos in Asian markets. ... CITICORP plans to lay off 100 workers in its leveraged lending unit in the next two weeks.

WHAT'S AHEAD:

The COMMERCE DEPARTMENT is scheduled to release personal income data for August at 10 a.m. EDT. ... The NATIONAL ASSOCIATION OF BUSINESS ECONOMISTS meets today. DEFENSE SECRETARY CHENEY is scheduled to speak. ... U.S. TREASURY SECRETARY BRADY is scheduled to speak before the IMF/World Bank as their annual meeting continues.

FROM THE BULLS:

"We might very well have seen the closing low on Monday," says ANDREW ADDISON of "The Addison Report." Addison sees a number of positive divergences between Monday's close and the August lows. "I would expect the rally phase has begun now, will carry it perhaps a couple of days, then a little bit of a selloff, then a further rally." Addison sees the market moving up to the mid-2600s with downside risk limited to 2400. (FNN "World Business Update", 9/26)

FROM THE BEARS:

"We're bound to have a rally," says GREG SMITH, chief investment officer for PRUDENTIAL-BACHE SECURITIES INC., "simply because we've gone down so much. But I don't think it'll last very long or go very far." He says the rise might not last "more than a week or so or more than 50 or 100 points." Mr. Smith believes that the unresolved Federal budget deficit and "more bad news on inflation" will keep the market down. (NYT, 9/26)

STOCK MARKET:

"The sharp jump in MCA was extremely significant and gave the stock market a big shot in the arm," says EUGENE PERONI of JANNEY MONTGOMERY SCOTT. "It's encouraging in that it could be showing that stocks are moving to unrealistically low levels." However, he describes his own outlook as "guarded" because he says the market has not yet "turned the corner." Peroni says the "bear-market rally" will not "right itself until ... late October or early November." ("Investor's Daily", 9/26)

"We are nowhere near as bearish as we were in mid-July," says DAN SULLIVAN at "The Chartist" who is beginning to look at buy candidates. Sullivan still thinks a global bear market is underway and recommends keeping equity exposure to the very minimum. But the fact that just about everybody is stressing the negatives makes him think the turn could be just around the corner. "We can expect the rally to be quite strong, once it takes hold." (CNBC "World Business", 9/26)

"This is a market with absolutely no conviction," says EDWARD SHOPKORN, general partner at MABON, NUGENT & CO. "The economic numbers say we are going into a recession. Equities are overvalued relative to the economic outlook

around the world." (WSJ, 9/26)

"I think the Dow is in a trading range between 2450 to 2750 and so, I think, we're probably on our way up somewhat further, but that's conditional on war fears," says ARNOLD MOSCOWITZ of COUNTY NATWEST. "I could see us drifting down to 2300 or 2350, but I doubt you could get much below that." (CNBC "Market Wrap-Up", 9/25)

"The market got itself into a slightly oversold condition, and some of the selling seems to be exhausted," says KENNETH DUCEY, senior vice president in the trading department of S.G. WARBURG & COMPANY. He adds, "People are starting to live with the Middle East crisis. But if the market goes up any further, it'll run into resistance and the selling will start again." (NYT, 9/26)

"What could be worse for the stock market than a worse downturn and the hit on revenues from that, higher inflation ... and higher long- term rates?" asks the BOSTON CO.'s ALLEN SINAI. "It's a triple dose of poison." (FNN "Marketwrap", 9/25)

"This is a market that moves on event risk," says TIM SCALA of SEQUOR GROUP. "People are waiting for statements to make a play. Everybody's playing it very close to the vest." He looks for increased volatility, and predicts there will be a major disappointment from Washington this week. "It's even possible that they will suspend the Gramm-Rudman-Hollings Amendment," says Scala. (FNN "Marketwrap", 9/25)

"The market has inadvertently or unconsciously focused on the oil market," says SMITH BARNEY market strategist JOHN MANLEY. He says factors such as the budget deficit crisis and the fluctuations of the dollar may have had some effect on equities, "the correlation to oil prices is the best that we find." (CNN "Moneyline", 9/25)

"It's a two-tier market, and with volume so light I have the feeling we're going to ease off again," says MICHAEL BRITT at KIDDER, PEABODY. "The market's been program driven this afternoon [Tuesday] and day traders hop on the rallies as they get started. But so far there have been few longer-term takers - institutions are very quiet." ("The Washington Post", 9/26)

"Any time you lose nearly 60 points in one day, you have to expect some sort of rebound, but lower oil prices helped," says RICHARD MAKIN of KIDDER, PEABODY. ("USA Today", 9/26)

"I think your move today [Tuesday] is basically simply one of those things where the market has gone down very significantly and, as it very often does, it just pauses a moment and goes back up," says MONTE GORDON of DREYFUS CORP. "This is not the beginning of a sustained rally by a long shot." (CNBC "Market Wrap-Up", 9/25)

"A main factor for the lift [yesterday] was the bid for MCA," says ALFRED GOLDMAN of A.G. EDWARDS. "In a market that had been down nearly 550 points before this morning, that kindled some hope that U.S. stocks are cheap. But the buying was focused on a few blue chips that had been slam-dunked recently." ("USA Today", 9/26)

World stock markets have lately become "exaggeratedly panicky," says GILBERT de BOTTON, chief executive at GLOBAL ASSET MANAGEMENT. "Certainly the behavior in Tokyo today has confirmed we are nearing the final blowout phase," says de Botton who thinks the bottom is near and is beginning to invest in the German and Japanese markets. Avoid markets in emerging countries, advises de Botton. (CNN "Business Morning", 9/26)

STOCK TIPS:

Japanese giant MATSHUSHITA ELECTRIC announced today that it was interested in purchasing MCA, causing the stock to skyrocket nearly 20 points. But some analysts say the buyout is far from a done deal. "I think the two critical issues are ... access to financing" and "will other participants come in and do some kind of Japanese bashing," says CHRISTOPHER DIXON, an entertainment analyst at KIDDER, PEABODY. (CNN "Moneyline", 9/25)

DONALD KRUEGER of SANYO SECURITIES AMERICA says he is "baffled" by MATSUSHITA's $6-7 billion buyout bid for MCA. "Matsushita is not the kind of company to go out and buy a flashy production company. It's very surprising for them to move into a totally different business in a big way." While some analysts have questioned whether MCA will accept the buyout offer, MARK MANSON of DONALDSON, LUFKIN & JENRETTE points out that MCA chairman LEW WASSERMAN, who controls 15% of the company's shares, is 77 and may be ready to hang up his briefcase. "There's a high probability, if the bid is real, that it will be accepted," asserts Manson. ("Investor's Daily", 9/26)

THE OHIO CO. recommends stock in BINDLEY WESTERN INDUSTRIES INC., a major drug wholesaler that specializes in prescription drugs. The brokerage says company earnings should grow 84% for fiscal 1990 because of a recent contract for it to be the primary supplier to the Kroger supermarket chain. The company is also being effective in its cost-cutting efforts. ("USA Today", 9/26)

"I call FORD and GM attractive entirely on the basis of yield," the ratio of the dividend to the stock's market price, says RONALD GLANTZ, auto analyst at MONTGOMERY SECURITIES. General Motors stock is yielding 8.2% and Ford Motor 9.1%. (WSJ, 9/26)

LISE BUYER of NEEDHAM & CO. lowered her earnings estimate for BIZMART INC. from $.42 a share to $.30 a share after the company announced that profits would be lower due to increased competition. Buyer says the company has "a huge credibility problem." When Bizmart announced slow sales just days after

a stock offering, "they angered a lot of investors," according to Buyer. ("Investor's Daily", 9/26)

MOTOROLA and DISNEY "are very fine stocks that have been beaten down in this crush," says ARNOLD MOSCOWITZ of COUNTY NATWEST. He also likes industrial exports, pharmaceuticals, technology, energy and utilities. (CNBC "Market Wrap-Up", 9/25)

-30- 9989

#90269m0002 09/26/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (SEPT. 26) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"Short-term, with the higher interest rates, we're seeing that does give some support to the dollar," says KAREN GIBBS of DEAN WITTER REYNOLDS. "Longer-term, I think the path of least resistance still remains to the downside." She says the Swiss franc, sterling and the Canadian dollar are seeing the most buying. (FNN "Marketwrap", 9/25)

The dollar was strengthened yesterday by technical factors linked to cross trading between the yen and mark, according to DAVID MARSHALL of MMS INTERNATIONAL. Interest was also sparked by Wall Street's rebound and the steadying of oil and gold prices. ("Investor's Daily", 9/26)

"If you talk to people who are real business people and not economists sitting in a library or the Federal Reserve, you hear of real weakness," says Fed. Governor MARTHA SEGER. "And if you talk to people in construction and housing it is really terrible." Ms. Seger favors lowering interest rates, but she is a minority in this opinion among the Federal Reserve's policy makers. (NYT, 9/26)

"I think the budget deal could be the key determining factor," says RICHARD RIPPE, vice president of THE NATIONAL ASSOCIATION OF BUSINESS ECONOMISTS. "It could tip the Fed into an easing mode, and it's probably not likely that the Fed will do that in the short run, unless there is a significant budget deal." ("Nightly Business Report", 9/25)

"At confused times like this, people don't like to take chances, and buying a two-year Treasury note doesn't entail any credit risk and very little price volatility," says BRUCE WHITEFORD, a vice president at CHASE MANHATTAN's U.S. private banking division. "This is a good way to get a high yield without trying to guess where the market is going." (WSJ, 9/26)

Buying short-term notes "makes a lot of sense, given all the uncertainty in

the Gulf and the eventual implications for inflation because of what's happening to oil prices," says EDWARD TREICHEL, investment strategist at VAN KAMPEN MERRITT INVESTMENT ADVISORY CORP. ((WSJ, 9/26)

"People are worried about all finance company paper, not just the banks," says one corporate bond trader. "This is like the Salem witch hunt. People are looking for something to worry about, and I think it will continue." (NYT, 9/26)

THE ECONOMY:

"The Federal Reserve, in particular, is admitting, in effect, that under the current strategy, it cannot avoid a contraction in the economy over the next one or two quarters," says DAVID HALE, chief economist at KEMPER FINANCIAL SERVICES. "Most of us consider that to be a recession." (NYT, 9/26)

"The economy was headed toward a recession before Iraq, and Iraq was just the nail in the coffin," says ALLEN SINAI, chief economist for the BOSTON COMPANY. (NYT, 9/26)

"We entered a recession [in the] fourth quarter of last year, although it hasn't been firmly reported as such yet, " says WALTER WILLIAMS of AMERICAN BUSINESS ECONOMETRICS. "You'll see negative growth in the third and fourth quarter of this year. People will be using the 'R' word before the end of the year," predicts Williams. ("Nightly Business Report", 9/25)

"There's nothing inevitable about a recession," says CONFERENCE BOARD economist GAIL FOSLER. She says the level of production is well below both sales and orders, which leads her to conclude that manufacturers are "banking growth for the future." Fosler admits that her more optimistic view of the economy is not widely accepted, saying, "I'm the economist that came in from the cold." But LEWIS LEHRMAN of LEHRMAN BELL MUELLER CANNON shares Fosler's view of the economy, predicting 2% growth in the fourth quarter. "The economy will be stronger than expectations," says Lehrman. ("Investor's Daily", 9/26)

"The GNP number told me that the worst still lies ahead as far as the economy is concerned. In looking at the data, it is extremely difficult to find any sources of growth," says WARD McCARTHY, managing director at STONE & McCARTHY RESEARCH ASSOCIATES. NEAL SOSS, chief economist at the FIRST BOSTON CORPORATION, adds, "We have had a year of growth that was not really growth, with profitability under strain. Now we face what will be a long but rather shallow recession." (NYT, 9/26)

While the final revision of the second quarter GNP figures may be quite different from what was expected, DAVID BLITZER, chief economist at STANDARD & POOR'S, says, "the general [economic] picture is not that much different." He says the main effect of the revision was to confirm "that the economy was very soft before the oil crisis began." ("Investor's Daily", 9/26)

BERNARD MARKSTEIN at MERIDIAN BANCORP says yesterday's GNP downward revision "shows we're either in a recession or near one." MICHAEL PENZER at BANKAMERICA CORP. says the figure supports his forecast of an even worse third quarter. "I'm saying there will be 0% growth this quarter," says Penzer. ("USA Today", 9/26)

Commenting on the GNP revision STUART HOFFMAN, chief economist at PITTSBURGH NATIONAL BANK, says, "I think this tells you we're a lot closer to stagnation than we thought." (NYT, 9/26)

"It now appears that the second quarter was weaker than we originally thought and the momentum for the third quarter is much less," says RAY STONE of STONE & McCARTHY. Stone says that the problem "is not that there is dramatic momentum on the downside," but he says there may be negative growth in the fourth quarter because "no sector can be pointed to that will lend strength to the economy." ("Investor's Daily", 9/26)

"Many of us have felt for some time that, at least, a mild recession was underway," says ROBERT HORTON, CEO of BP AMERICA. (FNN "Marketwrap", 9/25)

"We believe that the economy is now on a weaker growth path than we did in the summer," says MICHAEL BOSKIN, chairman of the COUNCIL OF ECONOMIC ADVISORS. "Partly, but not exclusively because of the oil shock." (FNN "Marketwrap", 9/25)

"Consumer spending is weak, especially on housing, but not so much on cars," says KEN GOLDSTEIN, chief economist for the CONFERENCE BOARD. "What we know about what has already happened in the third quarter - in terms of spending on cars in July, August and for at least a good portion of September - says not that consumers have been so shocked by events in Iraq, [but] that they have just simply kept their hands in their pockets. They are at least spending some money." (CNBC "Market Wrap-Up", 9/25)

"Even skittish consumers are finding the model year closeout bargains too good to pass up," says TOM WEBB, an economist with the NATIONAL AUTOMOBILE DEALERS ASSOCIATION. "The next test will be harder, though. Will sales survive falling real income levels? I doubt it." (NYT, 9/26) "As long as we have the Persian Gulf crisis and anticipation of recessions across the globe, I think you're going to see gold being a safe haven," says KAREN GIBBS of DEAN WITTER REYNOLDS. She says gold could go to "at least $450 ... no doubt about it." (FNN "Marketwrap", 9/25)

IN WASHINGTON:

As the budget talks have stalled, the debate has shifted from how to solve the deficit crisis to how to stave off sequestration. Democrats voted on Tuesday in favor of moving back the Oct. 1 deadline. "It's necessary that we have

this 20 day extension [of the Gramm-Rudman-Hollings deadline] to keep the country going," says REP. JAMIE WHITTEN (D. - Mass.), but Republicans are reluctant to give up the threat of across the board cuts. "If we don't do it, there's going to be a stock market crash and there'll be a depression in this country like we have never seen before," says REP. SILVIO CONTE (R. - Mass.). (FNN "Marketwrap", 9/25)

#90269p8169 09/26/1990 ~PR Newswire

PALO ALTO, CALIF. (SEPT. 26) PR NEWSWIRE - More U.S. businesses are starting up their own coprporate subsidiaries in Japan in order to increase their control over the marketing and sales of their products rather than work through joint ventures or a product presence such as a distributor, sales representative or licensee. Even companies whose first entry into Japan was a joint venture are considering establishing their own subsidiary in order to increase their business success.

The Silicon Valley law firm of Fenwick, Davis & West has prepared a guide to the basic legal considerations involved in setting up operations in Japan. This practical guide covers changes to the Japanese company law that will go into effect in April 1991. The report addresses whether a branch office or subsidiary should be used in setting up business in Japan, how to protect a corporate name, minimum capitalization requirements, management of day-to-day operations and how to document the parent-subisidary corporation relationship.

#90269p8186 09/26/1990 ~PR Newswire

SEATTLE (SEPT. 26) PR NEWSWIRE - Univar Corp. (NYSE, PSE: UVX), North America's largest chemical distributor, today announced a slight increase in sales and earnings for its second quarter ended Aug. 31. Net earnings for the quarter were $5,732,000, or 32 cents per share, on sales of $362,102,000, compared to earnings of $5,655,000, or 32 cents per share, on sales of $353,931,000 for the same period a year ago.

For the six months ended Aug. 31, net earnings rose to $11,478,000, or 64 cents per share, on sales of $724,163,000. For the same period a year ago, net earnings were $10,370,000, or 58 cents per share, on sales of $713,549,000.

All per share data reflect the effects of a two-for-one stock split paid Nov. 4, 1989, as a 100 percent stock dividend to shareholders of record Oct. 16, 1989.

James W. Bernard, president and chief executive officer, noted that the company's increased earnings were achieved in spite of increased costs

incurred as a result of the initial rollout of a new computer system and ongoing expenses related to safety, environmental stewardship, and quality programs. These increased cost loads were offset by increased gross margin contributions and lower interest rates during the periods.

Univar Corp., headquartered in Seattle, distributes chemicals to industry through two subsidiaries, Van Waters & Rogers Inc. in the United States, and Van Waters & Rogers Ltd. in Canada.

CONTACT: Nicolaas Samsom of Univar Corp., 206-447-5911; or Leslie Lewis of Hill and Knowlton, 206-682-6944, for Univar.

#90269p8187 09/26/1990 ~PR Newswire

LOS ANGELES (SEPT. 26) PR NEWSWIRE - Kaufman and Broad Home Corp. (NYSE: KBH) a major home builder and commercial real estate developer, today reported earnings of $8.3 million for its third quarter ended Aug. 31, 1990 as continued robust growth in the company's French operations helped to offset the impact of a weak California real estate market.

Revenues increased to $325.3 million, up 12 percent from $290.7 million in the prior year's period. Net income of $8.3 million was down 58 percent from $19.5 million in the third quarter of 1989 -- the company's most profitable third quarter in its history. Included in the 1989 third quarter results is a pretax gain of 5.7 million from the sale of land. Primary earnings per share were $.26 compared to $.57 a year ago.

For the first nine months of 1990, Kaufman and Broad's revenues increased to $991.1 million, up 35 percent from 736.6 million in the first nine months of 1989. Net income for the period totaled $36.8 million, 28 percent below the company's nine-month earnings record of $51.1 million established in 1989, but well above the $30.9 million earned in the same period of 1988. Primary earnings per share were $1.13 compared to $1.55 a year ago.

Bruce Karatz, president and chief executive officer of Kaufman and Broad, said the company's financial results for the third quarter and throughout the year reflected increasing revenue and profit contributions from its French commercial and residential businesses, which have helped to offset lower profit margins and sales volume in its California housing operations.

The company's commercial development activities, all located in France, added more than $83 million to third quarter revenues, compared to 39 million in the prior year's quarter, while French housing deliveries continued to outpace 1989's record level of 1,720 units.

Kaufman and Broads's single-family home building divisions, located throughout California, in metropolitan Paris and Toronto, Canada, delivered 1,224 units

in the third quarter of 1990, compared to 1,318 in the third quarter of 1989. During the first nine months of 1990, the company delivered 3,499 units versus 3,632 in 1989. California's softer 1990 housing market accounted for the dip in new homes delivered; French unit deliveries have grown 12 percent through the first nine months of 1990.

Los Angeles-based Kaufman and Broad Home Corp. is the largest producer of single-family housing in California and the largest builder in metropolitan Paris, where the company develops commercial office properties and a variety of residential investment properties in addition to single-family homes.

#90269p8189 09/26/1990 ~PR Newswire

LOS ANGELES (SEPT. 26) PR NEWSWIRE - Over 300 Hyatt hotel workers will be joined by community supporters, labor leaders, and Los Angeles City Councilpersons today to protest what they call the hypocrisy of the Hyatt Corporation's second annual "In Touch Day," when corporate executives and hotel managers will dress up as bartenders, cooks, housekeepers, and other hotel line employees in every Hyatt hotel in the United States to get "in touch" with their workers and customers.

Represented by Local 11 of the Hotel Employees & Restaurant Employees Union, workers from the Hyatt Regency Los Angeles, Hyatt on Sunset, and Hyatt Wilshire hotels will hold a press conference today at 10:30 a.m. in front of the Hyatt Regency Los Angeles, to be followed by demonstrations later this afternoon in front of all three Hyatt hotels.

The union today announced it has released a report entitled "The REAL Hyatt Touch" -- a copy of which can be obtained from the union -- in which workers and community leaders in California, New Mexico, Maryland, Michigan, Ohio and elsewhere speak out about their encounters with the Hyatt Corporation, including, according to the report:

-- racism in hiring and promotions practices; -- sexual harassment of employees by guests and managers; -- failure to live up to commitments to hire poor and minority residents in cities where Hyatt hotels have been constructed with public subsidies.

Their stories are especially egregious, the union maintains, in light of the sizable public funds that have subsidized the construction of several Hyatt hotels nationwide.

"In Touch Day" was initiated last year by Hyatt President Darryl Hartley-Leonard, who dressed up as a bellman at the Hyatt Regency Chicago last year and generated considerable press attention.

Controlled by Chicago's billionaire Pritzker family, the Hyatt Hotels Corporation and Hyatt International owns or operates 155 hotels and resorts in the United States and in 27 countries around the world. The Pritzker family also has an interest in Spectacor Management Group, which operates over 15 sports and entertainment facilities nationwide. Among the Pritzkers' other holdings are: the Marmon Group, a multinational industrial and services conglomerate with 60 separate companies; Ticketmaster, the largest computerized ticket vendor in the United States; Ticor Title Insurance; and Getz Bros. & Co., a worldwide trading company.

TORRANCE, CA (SEPT. 26) PR NEWSWIRE - Ashton-Tate Corp. (NASDAQ: TATE) today announced that it began beta testing of the dBASE IV Server Edition, its front-end database product for the client/server marketplace.

"We're pleased with the progress we're making with the product; this announcement is another positive step forward in our overall product strategy " said Dave Proctor, Ashton-Tate vice president and general manager for the database division. "Building on the stable dBASE version 1.1 baseline, the additional functionality of the Server Edition will be tested thoroughly in the beta program by high- level users interested in developing client/server applications."

The company also said that it will implement a phased strategy of incremental releases for the Server Edition product.

Designed for Intel 80286-, 80386- and 80486-based systems, the Server Edition will permit multiple personal computer users to access and manipulate data across client/server-based local area networks (LANs) through the dBASE environment.

In addition, dBASE IV Server Edition provides an extended memory solution for users. The Server Edition executes the majority of dBASE code from extended or virtual memory. This leaves more space available for large applications for users working in memory- intensive environments, such as those using terminal emulation, large terminate and stay resident (TSR) applications and large LANs.

The initial Server Edition software, currently in beta testing, features the full dBASE IV system with the ability to run locally as well as in a LAN file server environment. In addition, the software provides the capability to develop and run integrated dBASE/Structured Query Language (SQL) applications, utilizing SQL to access remote database servers in a true client/server

architecture. Developers will be able to take advantage of the dBASE/SQL language, as well as use a pass-through mechanism to access native server functionality such as stored procedures and triggers for improved performance and data integrity.

Headquartered in Torrance, Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. Major product categories include database management systems, word processing, integrated decision support, spreadsheets, graphics and utilities. Ashton-Tate is a worldwide organization with products available in 20 languages and in more than 50 countries.

The company also offers a comprehensive line of training and support services for individuals, corporations and government agencies.

#90269p8197 09/26/1990 ~PR Newswire

READING, PA. (SEPT. 26) PR NEWSWIRE - Samuel A. McCullough, chairman and chief executive officer of Meridian Bancorp Inc. (NASDAQ: MRDN), today announced "a comprehensive plan to strengthen Meridian's reserves, improve capital, decrease reliance on external credit sources, and position the company to focus and expand upon core banking businesses."

The plan includes: -- a $75 million increase in the reserve for possible loan losses; -- the sale of its title insurance operations; -- the sale of its approximately $300 million credit card portfolio, and -- the securitization of about $300 million of its portfolio of indirect automobile loan receivables.

Meridian said it expects to report a net loss in the range of approximately $35 million to $39 million or about $.86 to $.96 per fully diluted share, for the quarter ending Sept. 30, 1990, primarily due to the special increase in reserves for possible loan losses and to a significant charge relating to the planned disposition of title insurance operations. Meridian said it expects net earnings in the range of about $3.4 million to $7.4 million or about $.08 to $.18 per fully diluted share for the nine months ending Sept. 30, 1990.

For the third quarter of 1989, net income was $22.5 million and earnings per fully diluted share were $.56. For the first nine months of 1989, Meridian reported net income of $68.4 million. or $1.70 per fully diluted share.

Consolidated financial statements for the third quarter, reporting net income (loss) from both continuing and discontinued operations, should be available for release by the week of Oct. 15, 1990.

Meridian also indicated that it expects to maintain its dividend at present levels.

During the third quarter, Meridian undertook a re-evaluation of its loan portfolios in response to the continued weakening of the economy in general and the real estate sector in particular, as well as the changing banking climate. As a result, the expected third quarter loss includes a special $75 million pre-tax provision for possible loan losses which is in addition to the planned $9.5 million quarterly provision. This special provision is the result of a continued weakening of a number of significant credits in the commercial and real estate loan portfolios, which in part resulted in an increase of $26 million in non-performing assets and an increase in potential problem loans since June 30. Meridian emphasized that the increase in the reserve is not due to recent examinations by its state and federal regulators as of Dec. 31, 1989, concluded during the second quarter.

In disclosing its expected third quarter, 1990 results, Meridian stated: -- Non-performing assets are expected to increase from $107.6 million at June 30, 1990, to approximately $135 million at Sept. 30, 1990.

-- The reserve for possible loan losses will be strengthened from $98.7 million at June 30 to approximately $165 million at Sept. 30, 1990. This is about 2 percent of loans outstanding, up from 1.18 percent at June 30 and is expected to amount to a coverage ratio at Sept. 30, 1990, of about 122 percent to total non-performing loans. Management said it believes that these ratios should rank Meridian in the top 25 percent-50 percent of peer banks at Sept.

30, 1990.

Meridian also indicated that it had engaged Goldman, Sachs & Co. to sell its title operations as soon as practicable. The title units incurred net losses of $11.1 million and $7.3 million for the year ended Dec. 31, 1989, and the six months ended June 30, 1990, respectively. Meridian indicated that in order to provide for the anticipated losses related to the sale, an estimated $15 million to $17.5 million, including anticipated operating losses for the third quarter, will be charged against earnings for the third quarter and reflected as "loss from discontinued operations." This anticipated loss will be re-evaluated on a quarterly basis and may be increased or decreased based on operating results and management perception of gain or loss on sale and the time necessary to effect a sale.

McCullough said, "Although recent sales of title companies at premiums demonstrate the industry's favorable long-term prospects, we decided to sell our title operations in order to focus our capital and managerial resources on our core banking businesses. We took this action after the completion of an intensive 90-day study by a new management team at the title insurance companies. We expect that the sale of the title business should have a positive impact on future continuing operations."

Meridian also reported that the company had decided to sell its $300 million portfolio of credit card receivables. Premiums paid on recent sales of other credit card portfolios have ranged from 20 percent to 25 percent. Meridian said it expects to effect this sale during the fourth quarter of 1990 or the first quarter of 1991. With increased costs attributable to high overhead, potential legislative restraints and the need for increased investment in technology, McCullough stated, "Our choices were to significantly increase the size of the portfolio through acquisition or sell and deploy our assets to more profitable opportunities elsewhere." After the sale Meridian said it expects to continue to make available a full range of VISA and MasterCard credit cards to its customers as an agent for the purchaser, and will take steps to assure a continued high level of customer satisfaction.

In addition, Meridian said it expects to securitize at least $300 million of indirect automobile loan receivables during the fourth quarter of 1990 or first quarter of 1991. This will improve regulatory capital ratios, will reduce reliance on external funding and should not result in the recognition of any material gain or loss.

"We believe this comprehensive plan positions Meridian well for the future," McCullough said. "Our capital position is strong and exceeds the more stringent 1992 regulatory guidelines, and our reserves for possible loan losses has been significantly improved. We expect to return to normal levels of profitability in the fourth quarter, to be profitable for all of 1990, and to continue the payment of dividends at current levels," he said.

NEW YORK (SEPT. 26) PR NEWSWIRE - Duke Enterprises, Ltd., of Vancouver, B.C., Canada, in response to complaints from United States shareholders concern over the price of its shares said today that a sudden price drop is attributable to alleged illegal short selling on the Vancouver Exchange.

Company officials attributed the alleged illegal short sales as the major factor in a 50 percent drop in the company's stock price.

Guilford Brett, president of the family-run Duke Enterprises company, indicated that the size of the short position may be in excess of 500,000 shares. Duke Enterprises has 4.5 million shares outstanding and is tightly held.

"This flies in the face of major company developments," Brett said, in informing United States shareholders that the alleged illegal trading is an attempt to impede financing and an acquisition the company is in the process of concluding.

Brett and other company representatives of Duke Enterprises are in New York launching a major nationwide advertising and marketing campaign for its new interactive real-life consumer product called "Winning At Wall Street -- The

Game."

Brett said the recent attempts to precipitate a sharp drop in the company's traded shares on the Vancouver Exchange, which also trade on the Pink Sheets in the United States, is entirely attributable to this alleged illegal short selling.

He stressed that company attorneys have been instructed to conduct a full investigation and litigate any criminal activity to the fullest.

"We will not tolerate such activities designed to undermine Duke Enterprises and its shareholders, and we will pursue this vigorously," he said.

NEW YORK (SEPT. 26) PR NEWSWIRE - Mitsubishi International Corp., a subsidiary of Japan-based Mitsubishi Corp. and the Orlando, Florida-based firm of Steve Baker & Associates announced today that they have reached a broad agreement to cooperate in developing theme-park related business in the United States, Japan, and elsewhere.

As part of the agreement, Mitsubishi International invested in Steve Baker & Associates and has acquired a 25 percent equity interest in the firm. Financial terms of the transaction were not disclosed.

Steve Baker & Associates is a sponsorship and management firm which specializes in theme parks and the leisure industry. With a combined total of over 40 years experience with the Walt Disney Company in a diverse array of executive positions, the principals of the company have an unmatched level of expertise. The group raises sponsorship revenue for entertainment and leisure projects and offers consulting, project development and management services in these industries as well.

Mitsubishi International, a "general trading company," with 20 offices located throughout the United States, ranks among the 10 largest exporters of American goods to the world marketplace. Handling more than 25,000 items from raw materials to highly sophisticated advanced electronics, the company registers some $14 billion in trade transactions annually. With its parent company, Mitsubishi International also is increasing its direct investment in the United States.

Theme parks, resorts, and leisure-related facilities have been targeted by many companies as a growth area in coming years, not only in the United States but increasingly so in Japan and Europe.

In Japan, several major theme parks exist or are currently under construction. Existing major theme parks include Tokyo Disneyland, Nagasaki Holland Village and Space World. Other are either under construction or being planned and it appears that a theme park "boom" is under way.

In Europe, Disney is planning a major theme park project, Euro Disneyland, located outside of Paris, which is scheduled to open in 1992.

The combination of a major Japanese corporation and a specialized professional group in the United States is indeed a unique and complementary pairing. It reflects the willingness of a Japanese corporation to team up with strong professional expertise in an industry to which it is quite new. The U.S. theme park market, with its diversity of parks, offers a good opportunity to develop that expertise.

ROCHESTER, NY (SEPT. 26) PR NEWSWIRE - Genencor International, one of the world's leading industrial biotechnology companies, today named W. Thomas Mitchell executive vice president, operations.

The announcement was made by Robert E. Leach, who recently was named president and chief executive officer of the company.

In his new position, Mitchell will be responsible for sales, marketing, manufacturing, materials, management and manufacturing development. He previously served as vice president and general manager of biochemicals and manufacturing at the firm.

"Our vision at Genencor International is to deliver innovation through biotechnology," Mitchell said. "Our company's multinational capabilities in marketing, distribution, and manufacturing provide essential elements for the fulfillment of that vision."

Earlier in his career, Mitchell held various engineering and management positions at Eastman Kodak Company. He was serving as general manager of the biochemicals business at Kodak's former Bio- Products Division in 1989 when the division entered the joint venture that eventually became Genencor International.

Since its inception, Genencor International has focused its efforts on a broad spectrum of industrial enzymes and specialty chemicals . Its Spezyme (TM),

Multifect(TM), and Rhozyme(TM) lines of enzymes for the detergent, dairy, textile, food, and starch processing markets have established Genencor International as a leading supplier of industrial enzymes.

The company also is a major player in the field of diagnostic reagents, and has achieved global recognition with its Snomax(R) snow inducer.

Mitchell holds a B.S. degree in chemical engineering from Drexel University. He lives on Bridgewater Court in Pittsford, N.Y.

Genencor International has multiple facilities in the United States and Finland. In addition to its Rochester headquarters, U.S. facilities also include South San Francisco, Indianapolis, and Schaumburg, Ill. In addition, the company has three manufacturing plants in Finland, as well as processing facilities at various sites in the U.S.

Genencor International also has sales and marketing offices in Helsinki, Paris and Stuttgart. A new large-scale production facility, now under construction in Cedar Rapids, Iowa, is expected to be on-line in 1991.

STAMFORD, CT (SEPT. 26) PR NEWSWIRE - Crompton & Knowles Corp. (NYSE: CNK) announced today that it is expanding its plastics extruder equipment and systems business into the specialized areas of compounding and recycling. Through its Davis-Standard Division, the company has introduced a group of twin screw extruders to service the engineered plastics compounding market. Simultaneously it has introduced a specially-designed single screw extruder for processing reclaimed and recycled plastics.

"Not only is compounding of engineered plastics the fastest growing segment of the plastics industry," said Vincent A. Calarco, president of Crompton & Knowles, "but it's also attractive to us because of its highly specialized technical nature." To help meet the technical challenges, Crompton & Knowles has an exclusive agreement with Japan Steel Works to apply that company's technology for producing and marketing twin screw extruders for the North American market. Japan Steel Works is a world leader in twin screw extruders.

According to Calarco, "Recycling of post-consumer scrap and reclaiming of plastics in the manufacturing process presents excellent growth opportunities for Crompton & Knowles because it's just in its infancy and its technical demands are closely allied to our capabilities. This market is expected to continue to show accelerated growth as demand for plastics recycling spreads."

Crompton & Knowles also produces and markets dyes for textiles and paper and

specialty ingredients for food and pharmaceuticals. Its 1989 sales were $356 million.

LYNDEN, WASH. (SEPT. 26) PR NEWSWIRE - James P. Cox, spokesman for The Bon Dente Company, today announced successful completion of scale-up tests and enthusiastic acceptance by sausage makers of Prime O Lean(TM) breakfast sausages. Prime O Lean, an artificial adipose tissue, replaces the normal fat portions of the sausage meat, resulting in a greater than 50 percent cholesterol reduction and one-third lower calories. Prime O Lean is made from natural products.

In a variety of scale-up and taste comparisons conducted around the country with sausage and patty makers, Prime O Lean sausage has found consistently enthusiastic response. The Prime O Lean sausage cooks, tastes, smells and has the texture of conventional sausage.

Cox said, "Prime O Lean may help reverse the downtrend in sales of the breakfast sausage industry which has been hit extremely hard as a result of changing consumer dietary habits. Fast foods chains are currently evaluating Prime O Lean sausage for introduction on breakfast menus." Cox went on to say, "It is good to have more choices in our food selections again, particularly for traditional breakfast meals which have undergone the greatest changes and which are probably missed by consumers the most.

"In a radical departure from our traditional role, Bon Dente will not 'spin off' its new artificial adipose development. While we have for many years successfully created and licensed new products such as Egglite(TM) (artificial whole eggs), Fibersalt(TM), Booster Fat(TM), and others, this time we are going to market it ourselves," said Cox.

The Bon Dente Company is a seasoned research and development firm dedicated to serving the needs of large corporations by generating and licensing innovative market-ready new products.

HANCOCK, MI (SEPT. 26) PR NEWSWIRE - D&N Financial Corp. (NASDAQ: DNFC) announced today that a quarterly cash dividend of 7.5 cents per share for the third quarter of 1990 would be paid Oct. 25, 1990 to stockholders of record

Oct. 9, 1990. This compares to 15 cents per share for the prior quarter.

In making the announcement, Chairman Kenneth D. Seaton stated, "The reduction in the dividend was made to strengthen our capital position. Our board of directors believes it is prudent and good banking practice to conserve capital at this time in recognition of the uncertain commercial real estate market and associated risks that we as well as other financial institutions are facing."

In other action at D&N Financial Corp.'s regular board of directors meeting on Sept. 24, the corporation announced changes to the boards of directors of the corporation and its subsidiary, D&N Savings Bank, FSB.

R. Daniel Musser's recent resignation from the savings bank board due to other commitments was accepted, and Financial Corp. directors George Schwartz and Richard Nelson were then appointed to that board.

In addition, an adjustment was made to the staggered terms of the Financial Corp. board of directors with the result that the term of director Joseph Bromley will now expire at the 1991 annual meeting.

D&N Financial Corp., through its subsidiary, D&N Savings Bank, FSB, has financial services offices throughout Michigan's Upper Peninsula and mid-Michigan, as well as mortgage banking operations in Arizona, Illinois, Michigan, North Carolina, and Texas.

D&N is the fourth-largest thrift institution in Michigan based on asset size. D&N Financial Corp.'s stock is traded over the counter and is quoted on the NASDAQ National Market System under the symbol DNFC.

MOSCOW (SEPT. 26) PR NEWSWIRE - Officials of Aeroflot, the Soviet National airline, and The Jepson Burns Corporation of Winston-Salem, North Carolina (U.S.A.), announced today that Jepson Burns will provide first class, business class, and economy class seating for five new Aeroflot A310 aircraft.

The announcement was made by G.B. Jewell, president and chief executive officer of Jepson Burns, during Technika Aeroporta Moscow '90, an international air exposition at WDNG Fairgrounds in Moscow.

The first delivery of the 965-passenger place order will occur in July 1991. The first of five shipsets will be manufactured at Jepson Burns' plant in Winston-Salem. Portions of the remaining four shipsets will be made by Russo Burns Aero Products, a joint venture in Moscow of Jepson Burns and Design Bureau Automatika.

Aeroflot, the world's largest airline, selected the Airest(R) 5 and Airest 20/20 models. The purchase marks the first time that Aeroflot has purchased seats from a Western manufacturer, according to Jewell. He said the 16g capabilities of the seats, along with their comfort and quality were major reasons they were chosen by Aeroflot.

Jepson Burns, a subsidiary of Great American Management and Investment, Inc. (NASDAQ: GAMI) of Chicago, manufactures and markets aircraft interiors worldwide. It has joint ventures in the Soviet Union and Brazil and is completing arrangements for anther joint venture in Yugoslavia. It also has a division on the West Coast, Trans-Aero Industries, which is located in Inglewood, Calif.

NEW YORK (SEPT. 26) PR NEWSWIRE - Uniforce Temporary Services (NASDAQ: UNFR), a national temporary personnel company, today helicoptered temporaries to job assignments in San Diego; Pompano Beach, Fla.; and Montvale, N.J.

These unique air flights -- the fastest simultaneous delivery of temps to their jobs ever undertaken -- served to demonstrate the importance of speed, efficiency and productivity in the workplace today.

Coast-to-coast flight plans included: 1. Uniforce of San Diego -- President Allan Shaw flew a temp from Charles Lindbergh Field to Titan Corp. in San Diego.

2. Uniforce of Fort Lauderdale -- Co-owners Gary Kamler and Janis Buongermino flew a temp from the Pompano Airport to Pompano Race Track, Pompano Beach.

3. Uniforce of Paramus, N.J. -- President Henry Schnierer flew a temp from Hancock Airport to KPMG Peat Marwick in Montvale, N.J.

John Fanning, chairman of the board of Uniforce Temporary Services, headquartered in New Hyde Park, N.Y., stated: "In this age of the computer,

modem and fax, temporary employment companies are streamlining their services to meet technological change. Helicoptering temps to their jobs dramatically underscores the new challenges of the workplace where productivity depends on a greater sense of urgency, skill and service. Temporaries are 'pilots' on the flight path to the workplace of the future, in terms of their flexibility to move from one job assignment to another, gaining experience, ability and competence as they go."

Uniforce Temporary Services is a nationally franchised, publicly held temporary personnel company with 115 offices coast to coast, providing temporary employment in the general and automated office, marketing, accounting, technical, records management, hospitality and light industrial service categories.

#90269p8220 09/26/1990 ~PR Newswire

MINNEAPOLIS (SEPT. 26) PR NEWSWIRE - International Multifoods Corp. (NYSE: IMC) today reported results for its second quarter ended Aug. 31, 1990.

Net earnings were $7.6 million, or $.59 per common share, about even with last year's second quarter which included a $2.6 million pre-tax gain related to the restructuring of Canadian operations. Excluding this unusual gain in last year's results, second quarter net earnings this year showed double-digit growth. Net sales for the quarter were up 6 percent to $525 million.

Beginning this quarter, the company's results are reported under new business segments which more closely parallel the company's business structure today. Sales and operating earnings are now reported as follows: U.S. Foodservice, consisting of specialty distribution and foodservice manufacturing; Canada Food Products, comprising retail and industrial food businesses in Canada; North American Agriculture, including principally U.S. and Canadian agricultural operations and U.S. grain merchandising; and Venezuela.

U.S. Foodservice. Earnings for U.S. Foodservice were $9.2 million, up 11 percent over last year's second quarter which included earnings from the Mister Donut franchising business sold early this fiscal year. Improved operating efficiencies were achieved by several foodservice businesses, led by specialty meats and pizza restaurant distribution. Net sales for the quarter rose 10 percent to $358 million.

Canada Food Products. Canada Food Products posted an 18 percent increase in earnings to $4.4 million with excellent gains in retail foods, led by family flour and pickles. These gains were partially offset by lower results in industrial foods due to a strike at one of the company's mills. Net sales

declined 15 percent to $57 million due to the divestiture of businesses last year.

North American Agriculture. Earnings for North American Agriculture rose 63 percent to $2.5 million with the improved agricultural economy. Both U.S. agricultural operations and grain merchandising benefited from the more favorable market conditions versus a year ago. Net sales in this segment increased 4 percent to $60 million.

Minneapolis-based International Multifoods, with fiscal 1990 net sales of $2.1 billion, is a diversified food company with major operations in the United States, Canada and Venezuela.

#90269p8222 09/26/1990 ~PR Newswire

DALLAS (SEPT. 26) PR NEWSWIRE - The Southland Corporation said today that its previously announced exchange offers have been extended to expire at midnight New York City time on Monday, Oct. 22, 1990, unless further extended. The company also announced that Ito-Yokado Co., Ltd., Seven-Eleven Japan Co., Ltd. and Southland have mutually agreed to extend the termination date of their previously announced stock purchase agreement to Oct. 22, 1990.

Southland also announced that it has submitted for clearance with the Securities and Exchange Commission (SEC) an amendment to the exchange offers that includes a cash election option for holders of less than $300,000 aggregate principal amount of Southland debt securities. Such holders who tender all of their debt securities into the exchange offers may elect to receive either cash or new debt securities in addition to the previously announced allocation of common stock and, in the case of the senior extendible reset notes, cash. Southland will pay a maximum of $35 million in cash to holders who choose the cash election option.

Cash elections made with respect to each issue of debt securities will not be satisfied unless the cash elections made with respect to the issues of debt securities ranking junior thereto shall have been satisfied in full.

The exchange offers continue to offer all Southland security-holders an aggregate of 25 percent of the company's common equity.

The amendment submitted to the SEC also includes a prepackaged reorganization plan with substantially the same economic terms as the proposed exchange offers, except that the cash election option will not be available.

Southland's exchange offers require that at least 95 percent of each issue of

debt securities be tendered and 66-2/3 percent of the preferred stock be voted in favor of the exchange offers. In comparison, the prepackaged reorganization plan must be accepted by a majority in number and two-thirds in dollar amount of each class of debt-holders who vote, as well as the holders of two-thirds of each class of equity securities who vote.

Upon clearance by the SEC of the amended plan, a proxy statement/ prospectus will be available for distribution. Thereafter, the company will solicit acceptances for its prepackaged reorganization plan. If the company is unable to obtain the required tenders, but has received the necessary acceptances of security-holders for the prepackaged reorganization plan by Oct. 22, then at that point, the company may decide to file its prepackaged reorganization plan. If the prepackaged reorganization plan is filed and is then approved by the bankruptcy court, it would bind 100 percent of Southland's security-holders.

Southland anticipates that a prepackaged plan of reorganization could gain court approval within six months of a filing, whereas traditional (non-prepackaged) Chapter 11 bankruptcies often take several years to complete.

Southland's proposed prepackaged reorganization plan contemplates that all of the company's operations, including its 7-Eleven stores and distribution and food centers, would continue uninterrupted.

BRAINTREE, MA (SEPT. 26) PR NEWSWIRE - The board of directors of Grossman's Inc. (NASDAQ: GROS) announced today that it has sent a letter to stockholders citing the board's record of building financial, management and market strength to compete effectively, notwithstanding the current difficult conditions in the housing industry, and to prosper in the future.

The letter also contrasted the current board's experience with that of the proposed Shidler/Holman nominees and reaffirmed the board's unanimous opposition to the Shidler/Holman consent solicitation proposal to take control of the Grossman's board.

Tom Schwarz, chairman and chief executive officer of the company said, "Shidler and Holman are real estate financiers, with no apparent experience in running a retail business. Only one Shidler/Holman nominee appears to have served as either chairman of the board, CEO, or president of a public company. Their program to narrow our merchandise selection is a blueprint for disaster. The current directors of Grossman's have over 100 years experience in managing a retailing business. They know how to satisfy our customers.

Given this contrast in experience and the rapidly deteriorating economic conditions, especially in the housing industry, in our principal markets, does it make any sense to turn the management of Grossman's over to the Shidler/Holman nominees?"

Schwarz continued, "The current board understands the challenges posed by today's depressed economic conditions and by vigorous competition. We are confident that Grossman's has the financial strength, the retailing experience the team and the strategy to meet these challenges and to increase stockholder values. Our open market stock repurchase program, which the company announced last week, underscores our confidence in the company's long-term goals and strategies and reflects our belief that Grossman's stock is currently undervalued."

Grossman's, a major retailer of lumber and building materials, operates 156 stores in nine Northeastern states and in California.

CONTACT: Stanley Berman of Grossman's, 617-848-0100, ext. 2350; or Joele Frank of Adams & Rinehart, 212-557-0100, for Grossman's.

MELBOURNE, FLA. (SEPT. 26) PR NEWSWIRE - Harris Corporation (NYSE: HRS) announced today that it expects earnings in the first half of its fiscal year will be lower than previously anticipated. At the beginning of August, Harris said it expected that first-half earnings would be relatively flat compared with last year.

John T. Hartley, the company's chairman and chief executive officer, said, "Based upon our current assessment of the economic environment, particularly in our semiconductor and communication markets, together with the uncertainties generated by events in the Middle East, we now believe that earnings in the first half of fiscal '91 will be substantially lower than the first six months of last year."

Hartley said, "As recently as August, while we expected that semiconductor profits would be down somewhat compared with last year's strong first half, we believed this decline would be offset by increased earnings in our other business sectors. However, although our Electronic Systems and Lanier Worldwide businesses are both doing well in difficult environments, it is now clear that the rapid deterioration in domestic semiconductor markets, coupled with higher-than-planned restructuring costs in that segment, will have a greater impact on earnings than originally anticipated. These developments, combined with an earnings shortfall in our domestic communications business, cause us to revise our near-term earnings outlook."

Hartley said that the company's outlook for the year as a whole will depend to a significant degree upon how quickly these markets stabilize and recover. He concluded, "Despite the current weakness in semiconductor markets, we remain confident that the longer-term growth outlook for this business will meet our full expectations. We have a strong portfolio of new products coming to market; we are realizing significant cost reductions and improved operating performance, both of which will provide further benefits when major plant-consolidation programs are completed later this fiscal year; and we expect semiconductor demand to improve during 1991."

Harris Corporation, with worldwide sales of more than $3 billion, is focused on four major businesses: Electronic systems, communications, semiconductors and office equipment.

MINNEAPOLIS (SEPT. 26) PR NEWSWIRE - The board of directors of Norwest Corporation (NYSE: NOB) late yesterday voted to authorize the corporation to reacquire up to 5 million shares of Norwest common stock.

Norwest said the shares, to be purchased from time to time at market price, will be used to meet periodic stock requirements of the company's employee savings and investment plan, to expand its employee stock ownership plan (ESOP), for its shareholder dividend reinvestment plan, and for other corporate purposes. At June 30, 1990, Norwest had approximately 102.5 million common shares outstanding.

The Norwest board met in regular session yesterday in Kohler, Wis., the former headquarters city of First Interstate Corporation of Wisconsin, which Norwest acquired in May 1990.

Norwest Corporation is a $26.8 billion diversified financial services organization providing banking, banking-related and specialized financial services through a total of more than 1,290 offices in 47 states and internationally.

THOROFARE, N.J. (SEPT. 26) PR NEWSWIRE - Joining Checkpoint Systems' (NASDAQ: CHEK) board of directors, Dr. Roger Blackwell, a world-renowned author and lecturer, will provide the company with broad insight into marketing strategy and consumer research.

In making the announcement, A.E. Wolf, chairman of the board and chief executive officer at Checkpoint, said, "Dr. Blackwell's extensive knowledge of socioeconomic principles and their role in the development of marketing strategies should assist our development as a market- oriented company. We are pleased to welcome Dr. Blackwell to the board of directors."

Named Marketing Educator of the Year by Sales and Marketing Executives International, Blackwell teaches marketing strategy and consumer research at Ohio State University. He specializes in the analysis of changing social and economic variables and their effects on marketing strategy. Blackwell has co-authored two books in 1990 which are used by universities throughout the world.

A consultant to some of America's largest companies, Blackwell has also appeared as an expert witness before several congressional committees and other legal proceedings. He is a principal in Market Group One Inc., a marketing and research consulting firm. He earned B.S. and M.S. degrees at the University of Missouri, and his Ph.D. at Northwestern University. His appointment to Checkpoint's board of directors is effective immediately.

Checkpoint Systems Inc. is the leading developer and manufacturer of advanced microprocessor radio frequency-based security systems. Using detectable, paper thin, disposable circuits that can be deactivated remotely, Checkpoint's Electronic Signatures(R) systems identify items or people in retail, institutional, industrial and commercial applications.

IRVINE, CA (SEPT. 26) PR NEWSWIRE - The board of directors of Gradco Systems, Inc. (NASDAQ: GRCO) announced that it has unanimously voted to authorize Gradco management and its legal and financial advisors to explore a plan to spin-off Gradco's printer products business to existing Gradco shareholders.

The purpose of the plan is to maximize long-term shareholder value and increase flexibility by separating Gradco's copier products and printer products businesses into two distinct and separately traded entities. It is intended that the proposed plan would involve the following steps:

- All printer related and non-copier operating entities will be merged with Gradco Printer Systems, Inc. ("GPS");
- Gradco will spin-off GPS to shareholders;
- Gradco Systems (Japan), Ltd. ("GSJ") will continue to conduct all the worldwide copier business;
- As part of the plan, Gradco will pay down all of the existing Gradco

Systems, Inc. debt, write-off certain business assets and will function as a holding company owning only shares of GSJ.

Keith B. Stewart, chairman and chief executive officer of Gradco, stated, "The disparity between the two businesses in their respective development cycles and risk profiles and the fundamental differences in the end-markets for the copier products and printer products businesses has produced confusion among Gradco investors.

"The spin-off plan will reflect the historical profitability of the copier products business and provide the initial working capital to the printer business. Going forward, these two businesses will be conducted by two separate publicly traded entities and by separate and independent management teams."

Stewart added, "We believe that the separation of Gradco and Gradco Printer Systems and the ability to trade the shares independently according to shareholders' individual risk-return profiles will improve market perception, focus market attention on the potential of each business and maximize the value of the shares."

The spin-off will provide shareholders with investments in two distinctly attractive companies. The remaining Gradco Systems stock should represent a solid investment solely in the worlwide sorter business based in Japan and will provide a unique vehicle to participate in the proposed initial public offering of GSJ shares in Japan.

The newly separated Gradco Printer Systems should provide investors with an opportunity to participate in a high growth venture with management proven in the printer business. Longer-term, this entity will seek a strategic partner to further improve business opportunities.

Gradco and its financial and legal advisors are continuing to reveiw the feasibility of the plan including any tax consequences, if any, associated with it. No definitive plan will be adopted or implemented prior to Gradco's upcoming Oct. 12 annual meeting and there can be no assurances that the spin-off plan will be implemented.

While Gradco believes that the spin-off plan should provide holders of Gradco shares with an attractive opportunity to participate in the higher valuations historically available in the Japanese capital markets, the likelihood of a successful initial public offering in Japan is jeoparized by the pending litigation filed by Martin Tash of Plenum Publishing Corporation.

The company has, therefore, decided to make all reasonable efforts to work towards an amicable settlement of the suit. The company is willing to enter into discussions with Plenum, however; neither Plenum nor Tash have communicated with the company at this point.

Gradco is the world's leading independent supplier of sorters, sheet feeders, and other paper handling devices for the office automation market.

CAMBRIDGE, MA (SEPT. 26) PR NEWSWIRE - The U.S. Patent and Trademark Office has awarded a patent to Genetics Institute, Inc. (NASDAQ: GENI) covering human Interleukin-3 (IL-3) type products, the company announced today.

The patent, U.S. 4,959,455, covers proteins produced using part or all of the IL-3 DNA sequence (including fusion proteins) and exhibiting IL-3-like properties. Sandoz, Ltd. has exclusively licensed IL-3 from Genetics Institute and initiated clinical trials for IL-3 in 1989.

IL-3 is a blood cell growth factor which stimulates certain cells in the body's host defense system. The company believes that it may be useful in treating the blood cell deficiencies associated with cancer treatment, bone marrow transplantation, and certain other blood cell disorders.

IL-3 acts earlier in the pathway of blood cell development than other blood cell stimulators. It may also have enhanced activity when used in combination with other blood cell growth factors such as GM-CSF, as reported by Genetics Institute scientists in 1988 in the journal Science.

"The issuance of this patent illustrates the continuing innovation and productivity of Genetics Institute's research organization and our achievements in the field of blood cell growth factors", said L. Patrick Gage, Ph.D., executive vice president of Genetics Institute.

"This patent, paired with the IL-3 process patent which we received last November, reflects both the strength and breadth of our patent position in this product area," said Bruce Eisen, vice president and chief patent counsel for Genetics Institute.

Genetics Institute is a leading biotechnology firm engaged in the discovery and development of human pharmaceuticals through recombinant DNA and other technologies.

The company has a diversified portfolio of licensed and proprietary pharmaceutical products at various stages of approval, testing and research which include erythropoietin (EPO), Factor VIII, GM-CSF, IL-3, IL-6, M-CSF, and bone growth factors (BMPs).

ROCKVILLE, MD (SEPT. 26) PR NEWSWIRE - A RoundTable devoted to support of tax preparation and forms software published by Softview Inc. is now available on the GEnie online information service offered by GE Information Services.

Softview, of Oxnard, Calif., publishes tax preparation software, on both the personal and professional level, as well as a family of forms- related software products. The Softview RoundTable (RT) on the GEnie service will be the official source of online support for users of Softview products.

According to Softview RT Manager Russ Sprouse, "At Softview we are busy finalizing plans for our 1990 tax products, and working closely with a big six accounting firm to detail the specifications for the many tax forms involved for the 1990 tax returns."

"Our big emphasis this year," added Sprouse, "will be to get the products out earlier, particularly the state tax supplements. We will be adding supplements for Michigan, Minnesota, Maryland, Pennsylvania, and the District of Columbia, bringing to 13 the number of states supported by Softview."

"Another exciting growth is electronic filing of tax returns," added Sprouse. "The IRS received over 4.2 million tax returns electronically in the 1989 tax season, and many of those returns were filed using Softview software and services. We expect tremendous growth in the electronic filing area, and we're here on GEnie to answer any questions we can regarding electronic filing of tax returns."

The Softview RT, like all GEnie service RoundTables, offers a Bulletin Board capability for posting and reading messages by categories, a Real-Time Conference capability for online discussions, and software libraries where subscribers can download public domain software related to the subject of the RoundTable.

The software libraries contain two types of files: text files containing information such as product specifications and question and answer files; and software files containing updates to Softview products or demonstration versions of certain products.

For further information in the United States and Canada on the GEnie service and the Softview RoundTable, please call 1-800-638-9636. GE Information Services, a division of General Electric Company, U.S.A. (NYSE: GE), is headquartered in Rockville, Md.

MAYWOOD, NJ (SEPT. 26) PR NEWSWIRE - AutoInfo, Inc. (NASDAQ: AUTO) reported record revenues and net income for the first quarter ended Aug. 31, 1990.

Revenues for the first quarter increased by 24 percent to $2,317,000 from $1,875,000 for the comparable quarter of the prior fiscal year. The company reported net income for the first quarter of $553,000, or $.08 per share, compared to a net income of $322,000, or $.05 per share, for the same quarter of the previous year.

Announcing the quarterly results, Martin Rubin, president, stated "Revenues increased in the quarter due to the growth of our Orion Network and the increased sales of the Checkmate(TM) computer systems. The dramatic increase in the quarter's net income was attributed to the increase in sales and the operating efficiencies achieved over the past year. We anticipate that these trends will continue in the future."

AutoInfo provides communications and computer services to over 2,000 auto parts salvage dealers in 49 states and eight Canadian provinces. The company operates one of the largest satellite networks in North America and provides database services to major automobile insurance companies.

AUTOINFO, INC. SUMMARY FINANCIAL DATA (Unaudited)

FAIRFAX, VA (SEPT. 26) PR NEWSWIRE - Hadron Inc. (NASDAQ: HDRN) today announced the formation of the Aerospace Sciences Division, and the appointment of Michael E. Walker as its vice president and general manager.

As a new operating unit within Hadron's Professional Services Segment, the Aerospace Sciences Division (ASD) provides human resources management, systems engineering, systems analysis, and training support to government and industrial clients involved with aerospace applications of complex human-machine systems.

Walker has more than 20 years in the professional services industry, and has served both government and industry in the development and acquisition of complex human-machine systems. He has held executive level management positions at Science Applications International Corp. Inc., Horizons Technology Inc., and Research Management Consultants Inc.

"Hadron is moving forward with its plans to broaden and strengthen its product offerings," stated James L. Arnold, Hadron president and CEO. "The formation of the ASD and the appointment of Mike Walker as its leader are important elements in management's plans to move the company forward into exciting new directions."

"The experience that Walker brings to Hadron provides the business leverage and growth potential needed for the launch of the Aerospace Sciences Division " added Arnold.

Walker served in the U.S. Army Astronaut Candidate Program, and was awarded the Distinguished Flying Cross for his Vietnam service. He holds both B.S. and masters degrees in electrical engineering from New Mexico State University.

Hadron Inc. is an integrated high technology company providing technical products and services in the fields of engineering, computer science, litigation support, and data communications.

CHICAGO (SEPT. 26) PR NEWSWIRE - Unichema North America, one of the world's leading producers of oleochemicals, announced that it will increase its pricing of fatty acids.

The price increase, averaging 6 percent to 8 percent, will apply to stearic, oleic and tallow fatty acids. According to Unichema North America, the increase in pricing is necessary to compensate for the higher costs of processing, energy and transportation, as well as lower credit for glycerine, a co-product in the production of fatty acids.

Unichema North America manufactures fatty acids and glycerine in Chicago. The organization is part of Unichema International, a group of international companies producing more than one billion pounds of oleochemicals annually.

WILMINGTON, DE (SEPT. 26) PR NEWSWIRE - Du Pont (NYSE: DD) announced today it is constructing a "Ti-Pure" titanium dioxide pigment sizing and packaging facility in Uberaba, Brazil.

The facility will begin operation in late 1991 to serve the Brazilian market.

Titanium dioxide provides opacity to paint, paper, plastics and other products.

The plant is being built on a 235-acre site owned by Du Pont in the state of Minas Gerais, approximately 200 miles northwest of Sao Paulo.

"Manufacturing capacity in Brazil is a key element of our global strategy, and this project represents the first step," said Dennis Reilley, director of international operations. "We plan to build additional processing units to make the Uberaba facility a full-scale titanium dioxide manufacturing facility by the mid-1990s."

Du Pont is the world's largest producer of titanium dioxide, with capacity of more than 700,000 metric tons. The company has production facilities in Edge Moor, Del.; New Johnsonville, Tenn.; Antioch, Calif.; De Lisle, Miss.; and Altamira, Mexico.

CLEVELAND (SEPT. 26) PR NEWSWIRE - Realty One announced plans to merge with the 10 Akron/Canton-based Realty One Boebinger offices in order to expand its independent real estate network to 49 offices serving 18 counties throughout Northeast Ohio. Prior to the merger, Realty One Boebinger was an affiliate of Realty One.

To celebrate this merger, Realty One will stage an Olympic-style rally featuring 1984 U.S. Olympic gold medal gymnast Peter Vidmar on Sept. 27 from noon to 4:30 p.m. at Public Auditorium in the Cleveland Convention Center, 500 Lakeside Ave. A press conference will take place at 1:15 p.m. on the main stage.

Vidmar's motivational address to more than 1,500 full-time Realty One sales associates and 385 employees will parallel his Olympic achievements to achieving success in today's business world. He will deliver this message while demonstrating his gymnastic skills.

Representatives from the Special Olympics Ohio team will also participate in the festivities. Plus, Realty One will present a charitable donation to a local chapter of the Special Olympics commemorating the Realty One/Realty One Boebinger merger. Special Olympics organizes competitive sports activities for mentally handicapped and developmentally disabled athletes.

Other Realty One rally highlights include a parade featuring Vidmar and representatives from each Realty One office and department along with the marching band from Lake High School, Hartville, Ohio, and gymnasts from Hudson High School and Gymnastics World, Brecksville. The 49 Realty One offices will also compete by designing an exhibit that depicts their community's unique features and services. Judges will award gold, silver and bronze trophies to the three offices or departments that best portray their market area.

Realty One Boebinger began in 1966 as Boebinger, Realtors. Founder Betty Boebinger opened the company's first office in Canton. Her husband John joined the company as president in 1967. The company grew to become the Akron/Canton area's largest residential brokerage firm with 300 agents and 50 employees.

With more than 1,500 full-time sales associates and 385 employees, Realty One participated in more than 20,000 residential listings and sales sides in 1989 for a combined sales volume of $1,831,000,000.

FORT WORTH, TX (SEPT. 26) PR NEWSWIRE - Justin Industries, Inc. (NASDAQ: JSTN), Fort Worth, and Tony Lama Company, Inc. (NASDAQ: TLAM), El Paso, Texas, jointly announced today the successful completion on Tuesday, Sept. 25, of Justin's tender offer to acquire the outstanding shares of Tony Lama at $9 in cash per share.

Justin said that according to a preliminary count by its depositary, Ameritrust Texas, N.A., approximately 1,886,252 Tony Lama shares were validly tendered in the offer and accepted for payment by Justin's wholly owned acquisition subsidiary, TL Acquisition, Inc., including shares subject to

guarantees of delivery, through midnight, New York City time, on Sept. 25. As a result, TL Acquisition now owns shares representing approximately 97 percent of the outstanding Tony Lama shares.

Pursuant to the merger agreement between Justin and Tony Lama, Justin intends to merge TL Acquisition with and into Tony Lama. As a result, holders of shares of Tony Lama common stock who did not tender their shares in the offer will receive $9 in cash per share. Following the merger, Tony Lama will become a wholly owned subsidiary of Justin.

Tony Lama's principal business is the design, manufacture and marketing of western boots and leather accessories under its "Tony Lama" trademark.

Justin Industries includes Justin Boot Company and Nocona Boot Company - makers of famed Justin(R) and Nocona(R) footwear; Acme Brick Company - the top domestically owned U.S. manufacturer of face brick; Ceramic Cooling Tower Company - designer/builder of cooling systems for utility and commercial users manufacturers of Permalite(R), Ultralite(R), and Unilite(R) cooling towers plus Tradewinds(R) evaporative air coolers for residential and commercial needs; Featherlite Building Products Corporation - leading Southwest producer of concrete masonry products; and Northland Publishing Company - publisher of fine books focused on the art and history of the American West.

#90269p8262 09/26/1990 ~PR Newswire

LUMBERTON, NC (SEPT. 26) PR NEWSWIRE - Bank officials at Southern National Corporation (NASDAQ-NMS: SNAT) say a unique product they successfully developed and marketed last year is being used as the catalyst in an aggressive deposit campaign launched last week to grow market share in North and South Carolina.

Southern National's "Guaranteed Up CD", unveiled last week in a major television and newspaper advertising campaign, is as its name suggests, a certificate of deposit that is guaranteed to increase by a 1/2 percent midway through the term even if the prime rate falls. The product requires a minimum deposit of $1,000 for nine or 12 months. The rate is adjusted quarterly to match the amount the prime rate has risen.

"There's no other product like it on the market today," said Rudy Oates, marketing director. "As far as we know, no one in the industry is promising their customer that the rate on their CD will go up. The guarantee is unique. Those who invested in this CD last year saw their rates rise a full one percent by the end of their term.

"If prime goes up, your CD goes up. If prime falls, your CD still goes up.

Becauseof the unpredictability of the market right now, people are looking for stable returns on their investments. We believe we will attract a large number of people who regularly shop rates."

Currently, rates for nine- and 12-month CDs are at 7.70 percent with a minimum guarantee to increase to 8.20 percent. "That number could easily climb higher depending on the prime," Oates said. "This is a powerful product."

To compliment its efforts to increase market share among its 142 banking offices in the Carolinas, Southern National is signing up customers by mail. Thousands of CD sign-up cards have been sent to existing and new customers. "We want to make it as convenient for the customer as we can. That's why we are giving them the opportunity of banking by mail.

"For the past several years, Southern National has been redefining customer convenience," Oates said. "It's only been a few weeks since we brought on-line a voice response system that enables our customers to get information on their accounts over the phone. We're simply making it easier for our customers to bank without having to go to the bank."

MORRIS PLAINS, N.J. (SEPT. 26) PR NEWSWIRE - Warner-Lambert Company (NYSE: WLA) today confirmed it has entered into a three-year agreement with the state of California that provides for the addition of four of the company's Parke-Davis pharmaceuticals to the Medi-Cal list of contract drugs that gives patients unrestricted access to certain products.

The agreement covers the lipid-regulating drug Lopid in both 300 mg. and 600 mg. doses, the oral contraceptives Loestrin and Norlestrin and the anti-anginal Nitrostat.

All other Parke-Davis products which were on the Medi-Cal formulary will remain available to Medi-Cal patients without prior authorization. The agreement ensures that patients who rely on California's Medicaid program for health care will have access to a broader range of Parke-Davis pharmaceutical products.

"This agreement reflects our belief that the unrestricted availability of high-quality prescription drugs remains the single most cost-effective action in dealing with the rising cost of health care," said Parke-Davis Group President Joseph E. Smith.

Warner-Lambert is a worldwide company devoted to developing, manufacturing and

marketing quality health care and consumer products. It employs approximately 33,000 people.

#90269p8265 09/26/1990 ~PR Newswire

NEW YORK (SEPT. 26) PR NEWSWIRE - The Dreyfus Corporation (NYSE: DRY) announced today that effective Oct. 1, 1990, it will allocate to Dreyfus Worldwide Dollar Money Market Fund a portion of the fund's operating expenses equal to .05 percent (5/100 of 1 percent) of assets. For the past 19 months, since the fund's inception, Dreyfus has waived its entire management fee and has absorbed all of the fund's other operating expenses, currently running at .24 percent (24/100 of 1 percent).

On Aug. 22 Dreyfus announced that it would continue to waive its entire management fee for the fund until June 30, 1991.

Joseph S. DiMartino, president of both the fund and The Dreyfus Corporation, said: "We have repeatedly stated that, when and if it was deemed appropriate to allocate to the fund its normal operating expenses, it would be done on a gradual and phased basis, and this is the course we will follow."

Since Dreyfus Worldwide Dollar Money Market Fund began it has offered cumulatively, the highest yield of any money market fund. At the close of business on Sept. 24, 1990, the fund's assets totaled $8.96 billion and its seven-day compounded yield was 8.6 percent. The seven- day current yield on that date was 8.28 percent.

Dreyfus Worldwide Dollar Money Market Fund invests only in high quality money market instruments issued around the world but sold in U.S. dollars, thus eliminating the risk of currency fluctuations.

Investors who are interested should obtain a prospectus containing more complete information, including charges and expenses, and should read it carefully before they invest. Past performance is no guarantee of future results; the fund's yield fluctuates.

NEW YORK (SEPT. 26) PR NEWSWIRE - Thomson McKinnon Inc. today released the following:

On Sept. 25, 1990, the U.S. Bankruptcy Court temporarily adjourned the hearing called to consider the previously announced proposed acquisition by Thomson Advisory Group Inc. of Thomson McKinnon's interest in Thomson Advisory Group L.P. (formerly Thomson McKinnon Asset Management L.P.) and its affiliated distributor. This adjournment will allow the two bankrupt entities, Thomson McKinnon Inc. and Thomson McKinnon Securities, Inc., and their Creditors Committee to consider a competing bid which was submitted shortly before such hearing from the Manufacturers Life Insurance Company of Toronto, a large Canadian life insurance company. The new bid, for $33 million in cash, is subject to numerous conditions, including due diligence review, negotiation and execution of definitive agreements, approvals by the trustees and shareholders of the partnership's mutual fund clients, retaining or replacing senior mutual fund portfolio managers, governmental and court approvals, and approval by the board of Manufacturers Life.

Thomson Advisory Group L.P. manages a family of nine mutual funds and serves as advisor to private accounts through its Columbus Circle Investors and its Foxhall Investment Management divisions. As of June 30, 1990, total assets under management exceeded $7 billion.

HOUSTON (SEPT. 26) PR NEWSWIRE - Zapata Corporation (NYSE: ZOS) announced today that it is issuing notices of redemption to the holders as of Sept. 27, 1990, of its 8-5/8 percent United States government guaranteed ship financing bonds due June 15, 1996 for redemption on Nov. 1, 1990. The price to be paid is 101.815 percent of principal plus interest accrued from June 15, 1990.

Some $27.6 million in principal is outstanding on the 8-5/8 percent bonds.

Zapata will also be redeeming its 8-1/4 percent United States government ship financing bonds due June 15, 1996, which are not traded on the New York Stock Exchange. The price to be paid is 102.230 percent of principal plus interest accrued from June 15, 1990. Some $5.1 million in principal is outstanding on the 8-1/4 percent bonds.

Zapata Corporation is a Houston-based international company that operates a fleet of offshore drilling rigs, produces oil and natural gas, and conducts commercial fishing operations that produce fish meal and edible fish oil.

DUBLIN, CA (SEPT. 26) PR NEWSWIRE - Hexcel Corp. (NYSE: HXL) stated today that its results for the third quarter ended Sept. 30, while still profitable, are likely to be less favorable than the financial community expectations.

Cutbacks in military aerospace and profit margin pressures in the honeycomb business, which have affected the company's financial performance since early 1989, continue to impact results negatively. In addition, start-up difficulties in the manufacture of aspartame, the artificial sweetener produced under contract for Nutrasweet, have caused delays in meeting the sales originally projected. Furthermore, sluggish economic conditions in certain industries in Europe have resulted in a slowdown of business at several of the company's European operations.

The company noted that its third quarter results typically lag other quarters, due to the month-long summer holiday in most European countries when many businesses close down.

According to Robert L. Witt, president and chairman, the outlook is for improved earnings in the fourth quarter from third quarter levels. "We began manufacture of aspartame in July. Production levels are now on target and the product should be profitable in the fourth quarter."

Final results for the third quarter are expected to be announced around Oct. 23.

Hexcel is an international developer and manufacturer of honeycomb, advanced composites, reinforcement fabrics, chemicals and resins for commercial aerospace, space and defense and other general industrial markets. Its stock is traded on the New York and Pacific Stock exchanges under the symbol HXL.

HOUSTON (SEPT. 26) PR NEWSWIRE - DI Industries, Inc., (AMEX: DRL), announced today that in two separate bids they had received notice of award, both subject to final contract, in the amount of $4.7 million. The smaller project was in excess of $400,000 for an Upper Guadalupe River Authority project at Kerrville, Texas, which contract and notice to proceed have been received.

It also received a $4.3 million contract to construct 18 6-ft to 15- ft. large diameter shafts for the extension of the Chicago T.A.R.P. Tunneling Project, which will employ the company's Chicago Shaft Division for approximately two years. Max M. Dillard, president, says this large diameter work will greatly enhance the company's revenue when combined with its 68 oil and gas rigs, an already expanding oilfield market and its recently acquired Foundation Division.

DI Industries is engaged primarily in the business of providing onshore contract drilling and well workover services to firms in the oil and gas industry, commercial drilling, oil and gas exploration, development and production and equipment repair and sales.

HOUSTON (SEPT. 26) PR NEWSWIRE - Vallen Corporation (NASDAQ: VALN) today announced the signing of a letter of intent to purchase the business and assets of Instrument Services, Inc., Houston. Instrument Services' sales in calendar 1989 were $2.6 million. Ronald E. Hope, current president and owner of Instrument Services, will continue as that unit's general manager.

According to J.M. Wayne Code, Vallen's president, "Instrument Services specializes in the sales and servicing of gas detection and environmental monitoring equipment. They currently repair and service a wide variety of portable environmental monitoring devices for industrial users, including many Vallen customers. The acquisition will complement our occupational health and environmental safety equipment lines and enhance the company's growing repair and service business. In addition, Hope brings excellent industry experience to our management team."

Instrument Services will operate as a division of the company's distribution subsidiary, Vallen Safety Supply Company. Vallen Safety sells a wide variety of industrial safety and health products. It currently operates from 33 locations throughout the continental United States and Alaska. Encon Safety Products, Inc., Vallen's manufacturing subsidiary, is the leading producer of emergency shower and eye wash fountains for industrial use. The manufacturing subsidiary also molds and vacuum forms several industrial safety equipment items including optical quality protective eyewear.

LA JOLLA, CA (SEPT. 26) PR NEWSWIRE - Intermark Inc. (AMEX: IMI) and its 52 percent controlled Partner Company, Pier 1 Imports Inc. (NYSE: PIR) announced that Pier 1 has purchased from Intermark its controlling stake in Sunbelt Nursery Group Inc. (AMEX: SBN) for $22.7 million, cash. In the transaction, Pier 1 purchased approximately 1.9 million of the 3.8 million Sunbelt common shares outstanding, representing a 51 percent interest, for $12 per share. Intermark said the sale will result in a pretax gain of approximately $11 million. Pursuant to the stock Purchase Agreement in the transaction, Pier 1 has agreed to make a cash tender offer of $12 per share to all holders of Sunbelt stock.

Sunbelt Nursery Group is the dominant nursery enterprise in six of the 11 largest lawn and garden markets in the United States with 97 stores that feature nursery stock and garden supplies. For the 12 months ended July 31, 1990, Sunbelt had revenues of $142 million, net income of $9.4 million and net earnings of $2.29 per share. Pier 1 is North America's largest and

fastest-growing specialty retailer of decorative home furnishings and related items, with 541 stores in 44 states and Canada.

Intermark also announced that, with the recent merger of its affiliate Triton Group Ltd. just completed on Aug. 30, its Board of Directors has not yet had the opportunity to fully evaluate the Company's dividend policy in light of the merger, applicable debt instruments and the anticipated strategic restructuring of its balance sheet. Therefore, it will not declare or pay a quarterly cash dividend for Oct. 1990, on its Common or Participating Preferred Stock.

Intermark is a $2 billion operating/holding company whose business is to acquire a controlling interest in, operate through and add value to well-established, successful, mid-sized American growth companies in broadly diverse industries.

DETROIT (SEPT. 26) PR NEWSWIRE - Cadillac Motor Car Division reported overall sales of 9,001 units for the Sept. 10-20 sales period, a slight drop of 1.8 percent from the 9,167 units sold during the same period last year.

Sales of the full-size De Ville/Fleetwood models, America's best- selling luxury cars, were reported at 6,690 units -- up 2.4 percent from last year's sales of 6,534. Sales of Cadillac's personal luxury sedan, Seville, also were up substantially -- 563 units compared to 391 units during the same period last year.

"Selling just 166 units less than a year ago tells us that consumer confidence in our products remains strong," according to John O. Grettenberger, General Motors vice president and Cadillac general manager. "Our customers are telling us that they are concerned about the economy in general, the Persian Gulf crisis and availability of fuel."

For 1991, fuel economy ratings for Cadillac's De Ville/Fleetwood, Seville and Eldorado models are EPA-rated at 16 mpg city and 26 mpg highway -- more than double compared to what it was during the first oil embargo in 1974.

#90269p8297 09/26/1990 ~PR Newswire

STRATFORD, CT (SEPT. 26) PR NEWSWIRE - The new and highly affordable Pitney

Bowes Model 9100 facsimile system features revolutionary inkjet printer technology which allows for noiseless operation and crisp, clear image on plain paper at low cost and easy maintenance.

"We have taken a proven technology utilized by the computer industry for years and applied it to fax. The result is a highly reliable, cost-effective, "true" plain paper machine that delivers superb copy quality. The print mechanism in the Model 9100 is the same found in the more than one million inkjet printers installed around the world," according to Meredith Fischer, vice president, marketing, Pitney Bowes Facsimile Division.

The Model 9100 features extra-fine, 300 x 300 dpi/11.8 x 11.8 dpmm, printing and scanning. This, combined with plain paper printing and CCITT error correction, ensures clear transmission of fine print copy, detailed drawings and halftones.

A natural replacement for thermal fax in smaller businesses, branch offices or incremental "department" machines, the Model 9100 is equipped with many memory functions designed to save time and provide hassle-free service. Multi-station transmission enables the transmission of the same document to as many as 100 stations sequentially. Specific documents also can be sent selectively to different destinations. In case of line failure, memory feature redials and retransmits from the page where disconnection occurred. In addition to a standard memory capacity of 12 pages, the 9100 can be configured with optional memory of 42, 72 and 132 pages.

Fischer also noted that the Model 9100 is equipped with diagnostic software which allows engineers in Pitney Bowes Diagnostic Centers around the world to identify and correct 70 percent of all problems over the telephone. "The customer's business can resume almost immediately, without having to wait for a service tech." If, however, on site service is required, the company provides a 4 hour service response through over 6,000 Pitney Bowes technicians in locations worldwide.

The Model 9100 is compact, 17.8" x 15" x 9.1" (w x d x h), and weights 26 lbs. (12kg) and is available through a variety of financial terms, including Pitney Bowes rental.

Pitney Bowes, Inc. (NYSE: PBI) is a $2.9 billion, multinational manufacturing and marketing company that provides mailing, shipping, copying, dictating, facsimile and retail systems, as well as business supplies and services, and product financing.

CONTACT: Meredith Fischer of Pitney Bowes, 203-381-7417, or Scott Tangney of Lobsenz-Stevens, 212-684-6300, for Pitney Bowes.

ARLINGTON, VA (SEPT. 26) PR NEWSWIRE - Customers needing Codex, Hayes and other data communications products for their office now will be able to order them through Bell Atlantic (NYSE: BEL) as a result of a recently signed agreement between Bell Atlantic and Data Net, Inc., a division of Willcox & Gibbs, Inc. (NYSE: WG).

Under a marketing pact between Bell Atlanticom Systems, Inc., and Data Net, Bell Atlantic is now authorized to arrange for the sale, installation and maintenance of Data Net's products such as name-brand modems, T-1 multiplexers fiber multiplexers and local area network (LAN) routers and bridges. Data Net is a sales and service organization specializing in data communications products.

"Business customers can now turn to Bell Atlantic for state-of-the-art data communications products," said Bruce Gordon, Bell Atlantic vice president of marketing and sales. "Since its formation, Bell Atlantic has led the telecommunications industry in developing data communications services that use the public network. We've formed this relationship with Data Net in order to better meet the needs of our customers for data solutions -- including premises-based equipment as well as network-based services."

"The agreement helps Data Net realize its plans to expand into new markets on the East Coast," said Joel Schwarz, president of Data Net. "We're pleased to be working with Bell Atlantic, which has a reputation for providing high quality service."

Bell Atlantic will first test and refine its agency relationship with Data Net in Pennsylvania this month. Over the next several months Bell Atlantic plans to expand the relationship to the rest of its mid-Atlantic serving territory.

Data Net, Inc., based in Englewood, N.J., is a division of New York- based Willcox & Gibbs, Inc., a corporation with sales of over $600 million.

Bell Atlantic is owner of seven telephone companies serving the mid-Atlantic region: New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone serving Delaware, and the Chesapeake and Potomac Telephone Companies serving Maryland, Virginia, West Virginia and Washington. Bell Atlantic also is a supplier of mobile communications in the mid-Atlantic region, and software, systems integration, computer services and support, financial services and telecommunications consulting in national and international markets.

The corporation's equipment subsidiary, Bell Atlanticom Systems, Inc., sells, installs and maintains communications systems and equipment for business, education and government customers across the United States.

ROCHESTER, NY (SEPT. 25) PR NEWSWIRE - Beginning Oct. 1, inTeleFeatures will be available to approximately 50,000 Rochester Telephone customers in Pittsford and Perinton whose telephone numbers begin with 223, 248, 377, 381, 383, 385, 388, 398, 425 and 586.

inTeleFeatures are new services designed to give customers more convenience and control over the use of their telephones. The services include:

--Call Return --Automatic Redial --Call Tracing By dialing a simple code, Call Return automatically dials the telephone number of the last incoming call regardless of whether or not the call was answered.

Automatic Redial eliminates dialing busy numbers over and over. By dialing a simple code, Automatic Redial will continuously redial busy telephone numbers for up to 30 minutes. Call Tracing allows customers to take immediate action against annoyance callers. By dialing a simple code after receiving an annoyance call, information about that call is sent directly to Rochester Telephone and an investigation can begin.

Rates for Call Return and Automatic Redial are each $4 per month. Customers purchasing both features will receive a 15 percent discount on each feature.

Call Tracing will be made available on an "as needed" basis. The charge for each successful trace will be $1.50.

"This is the first phase of our program to provide inTeleFeatures throughout our six-county territory," said Terry Davenport, residence sales director. "We expect to be able to offer these services to the majority of our customers by the end of 1991." Customers will be officially informed when inTeleFeatures are available in their area by way of direct mail.

CHICAGO (SEPT. 26) PR NEWSWIRE - Organogenesis Inc. (AMEX: ORG) today announced it has received the prestigious R & D 100 Award presented annually by Research and Development Magazine for outstanding new technical innovation. The award is for Testskin(TM), Organogenesis' new in vitro skin research and testing product, introduced in 1989.

Organogenesis Inc., based in Cambridge, Mass., is a biotechnology company which produces human tissue and organ equivalents intended to meet the research and testing needs of industry and for clinical use in replacing damaged or diseased tissues or organs.

Testskin, which is based on Organogenesis' patented Living Skin Equivalent(TM) technology, is used for research and testing of cosmetics, pharmaceuticals, chemicals and household products.

The R & D award is given to a broad array of technical products developed by major government and industrial laboratories. It recognizes the major advances in biological research and development on which Testskin is based and the tremendous potential the product has to improve skin research and testing.

Organogenesis Inc. introduced Testskin in the fall of 1989 and since then has been supplying it to dozens of major research laboratories in the cosmetic, pharmaceutical and chemical industries as well as to major academic and government research facilities. These laboratories are evaluating and using Testskin as a reproducible and readily available in vitro model of human skin with applications for the evaluation of skin irritants, the measurement of the absorption of substances through the skin and to evaluate the efficacy of new drugs or cosmetics.

RICHMOND, VA. (SEPT. 26) PR NEWSWIRE - Dean Foods Company, a wholly owned subsidiary of The C.F. Sauer Company, unveiled its newest product today which is the nation's lowest saturated fat margarine, Canola Sunrise. Dean Foods Company is a leading producer of private and store brand margarines and spreads. After much research, the company saw the need for a nutritionally superior margarine product and decided to expand production to include this new margarine rich in canola oil.

"Market research shows that canola oil is increasingly popular with the health conscious consumer," says Bob Holden, Vice President of Dean Foods. "This all vegetable oil is lower in saturated fats than other oils such as olive, safflower, sunflower and corn oils. That's why Canola Sunrise, rich in canola oil, is healthier and our taste tests show that people prefer it to other margarines."

Canola Sunrise has half the saturated fats of other leading margarines such as Mazola, Promise, Fleischman's and Parkay. This is good news for Americans who enjoy margarine, but are concerned about their health and the risk of coronary heart disease. Many nutritionists and dieticians are already recommending canola oil products to their patients in an effort to reduce their saturated fat intake.

Beginning October 1, 1990, Canola Sunrise will be test marketed in Virginia's Richmond and Tidewater areas.

Dean Foods Company was purchased by The C.F. Sauer Company in 1965 and is located at 1595 Mary Street, Sandston, Virginia. The company is a certified Kosher facility which makes approximately 100 million pounds of margarine and spread annually. Dean Foods Company products are marketed throughout the United States.

TAHLEQUAH, OK (SEPT. 26) PR NEWSWIRE - American Nursery Products Inc. (NASDAQ: ANSY) announced today operating results for the three months ended Aug. 31, 1990.

Consolidated net sales were $5,093,000 compared with $4,955,000 for the same period last year. For the quarter, the company reported a net loss of $983,000 or 26 cents per share compared with a net loss of $926,000 or 25 cents per share for the same quarter last year.

The company's interim results of operations reflect the seasonality of the nursery business as most shipments are made during the period February through May while operational costs are incurred throughout the year.

American Nursery Products Inc. is principally engaged in the business of growing trees, ornamental plants, and foliage plants for distribution on a wholesale basis.

The company is headquartered in Tahlequah, Okla. and owns and leases nursery farm properties and warehouse facilities in the states of Alabama, Florida, Iowa, Michigan, Ohio, Oklahoma, Oregon, and the Republic of Guatemala.

#90269p8305 09/26/1990 ~PR Newswire

NEW YORK (SEPT. 26) PR NEWSWIRE - Noise Cancellation Technologies, Inc. (NCT) (NASDAQ: NCTI) today announced the successful demonstration of an active

engine mount prototype developed under contract with Chrysler and a major European car manufacturer.

"Our active engine mount provides improvements in the areas of comfort, fuel economy and maintenance," said Michael J. Parrella, NCT president. "And, as with our muffler technology, provides us with the opportunity to address the multi-billion dollar automotive and truck markets by solving some very real problems."

The active engine mount electronically cancels engine vibration by effectively decoupling engine vibration from the automobile chassis, preventing repetitive vibration from passing through the engine mount to the passenger compartment. Automobile passengers are isolated from vibration and will enjoy significantly improved driving comfort.

In recent tests conducted on four cylinder engines from Chrysler and a major European car manufacturer, NCT achieved a level of vibration reduction far beyond the initial target of 20 dB. In fact, NCT reduced second-order vibration by 22-43 dB from idle to 5,000 RPM.

"NCT's active mount impressed us all by far outreaching the level of vibration reduction that any of us expected," said Christopher A. Wolfe, product engineer for Jeep/Truck Engineering at Chrysler. "At the beginning of this project we had no idea the results would be so dramatic."

Auto manufacturers have traditionally tried to quiet engine-born vibration through the use of mechanical countervibration shafts placed within the engine. These systems are moderately effective and are expensive. In addition, current-generation automobiles use heavy weights incorporated into the chassis to dampen engine vibration which can result in increased fuel consumption due to the additional weight.

The lightweight active engine mount replaces the countervibration shafts and heavy weights traditionally used to reduce vibration in automobiles. The lessening of the automobile's overall weight can contribute to increased fuel economy.

Additionally, the active engine mount reduces cabin noise by lessening structurally borne vibration that resonates in the cabin of the vehicle. Moreover, the implementation of the active mount results in less vibration-induced wear on the automobile frame.

Dr. Thomas O'Grady, president of Integrated Automotive Resources, and a leading industry analyst adds: "As a result of intensified competition in the automotive market, passenger comfort is at the forefront of auto manufacturer features and an increasingly important consumer priority. Vibration deteriorates passenger comfort and hence has also become an industry issue. Any technology that reduces vibration is on the right track."

Noise Cancellation Technologies, Inc. is a world leader in active noise and vibration abatement. The company owns worldwide patents for the process and application of active noise and vibration cancellation to a variety of industries. NCT is headquartered in New York City with domestic research and development facilities in Linthicum, Md., and an overseas facility in Cambridge, U.K.

LEXINGTON, MA (SEPT. 26) PR NEWSWIRE - Raytheon Company's (NYSE: RTN) board of directors today elected C. Dale Reis and Edmund B. Woollen as vice presidents of the $8.8 billion diversified technology company.

As previously announced, Reis will become the general manager of Raytheon's Submarine Signal Division, based in Portsmouth, R.I., on Oct. 1. Reis, 45, has been manager of Raytheon's Equipment Development Laboratories in Marlborough, Mass., for the past two years.

Woollen will direct the company's corporate marketing operation from its Lexington headquarters, effective Oct. 1. He succeeds Senior Vice President Philip A. Phalon who is retiring at the end of this month. Woollen, 45, has been director of marketing for Raytheon's government group since August 1986.

Reis joined Raytheon in 1967, after receiving a bachelor's degree in electrical engineering from Grove City College. He earned a master's degree from Massachusetts Institute of Technology in 1970.

He has held increasingly important positions within the company's Equipment Division for 23 years. He served as program manager for Cobra Dane, a large phased array radar system in Alaska and as the director of data acquisition systems, where he was responsible for several large radar systems that perform intelligence, early warning and spacetrack functions.

Reis is married to the former Katherine G. McCarthy of Framingham and Brighton Mass. They currently reside in Portsmouth, R.I.

Woollen joined Raytheon in 1979, after service as a U.S. Navy officer, an engineering assignment with Hughes Aircraft in Canoga Park, Calif., and a marketing position with OTI in Burbank, Calif.

From 1979 to 1981, he marketed electronic warfare systems in the U.S. and internationally for the company's division in Santa Barbara, Calif. He then

spent five years as a vice president of Raytheon Overseas Limited, operating from the company's office in Brussels, where he was responsible for marketing activities in various NATO and Middle Eastern countries.

Woollen is a native of Rocky Mount, N.C. He graduated with a bachelor of science degree in geophysical oceanography from the University of Washington in 1967. He is married to the former Marie Thompson of Maxton, N.C., and they reside in Windham, N.H.

Raytheon Company is active in electronics, aviation, appliances, industry and environmental services, construction and publishing. It has more than 76,700 employees worldwide.

CUPERTINO, CALIF. (SEPT. 26) PR NEWSWIRE - Grace Ventures Corp. and Horn Venture Partners, the managing partner of Grace Ventures Partnership II, announced today that the partnership has invested $500,000 in ELF Technologies Inc., of Foster City, Calif. ELF Technologies was founded by Ray Noel, Dr. Gary Geschwind and Dr. Leo Svendsen in order to commercialize a xerographic process to manufacture flexible circuits.

ELF has invented a plateable toner, similar to photocopier toner, that enables the printing of flexible circuit patterns directly on polymer films by electrostatic techniques such as xerography or laser printing.

Flexible circuits are electronic circuit patterns that are produced on flexible substrates such as polyester or polyimide film. They are used in electronic devices where, because of size, weight, motion or shape/configuration, rigid boards cannot be used. Flexible circuits today are found in a variety of electronic applications including automobiles, cameras, computers and printers.

Noel, president of ELF Technologies, stated, "ELF Technologies' proprietary process is a breakthrough in manufacturing flexible circuits. Using our

patented xerographic process, we can manufacture flexible circuits at competitive prices. Prototype and quick delivery capabilities are intrinsic in the system since we do not use photo-masks or chemical etchents to make our circuits."

Dr. Christian F. Horn, president of Grace Ventures Corp. and managing partner of Horn Venture Partners, commented, "ELF Technologies addresses a billion dollar market which is growing at 12 percent per year. ELF's ability to manufacture flexible circuits of virtually unlimited length should expand the market. Flexible circuits are expected to replace wire harnesses in many applications."

Grace Ventures Corp., a wholly owned subsidiary of W. R. Grace & Co. (NYSE: GRA), and Horn Venture Partners, a partnership of the officers of Grace Ventures, manage 48 high technology, emerging growth company investments through three venture capital funds, including Grace Ventures Partnerships I and II.

GUILDERLAND, NY (SEPT. 26) PR NEWSWIRE - Intermagnetics General Corporation (NASDAQ: INMA) today announced the successful test and exceptional performance of a high-field superconductive model magnet.

The test magnet achieved its operating design performance of 20.4 Tesla at 1.8 Kelvin in a background field provided by the high field test facility (HFTF) at the Lawrence Livermore National Laboratory (LLNL).

The three-section 40 mm bore magnet was designed and constructed at IGC in Guilderland. New York, using a novel internal-tin processed niobium-tin (Nb3Sn) wire manufactured at its IGC Advanced Superconductors Inc. subsidiary located in Waterbury, Conn.

The performance test was part of a joint feasibility study project between IGC and the Superconducting Magnet Development Group at LLNL for a 900 MHz

spectrometer for Carnegie-Mellon University, supported by a grant from the National Institute of Health.

The magnet reached short sample current without any "training" quenches. The test demonstrates the combined advanced technology of IGC in both Nb3Sn conductor and magnet technology. The test also demonstrated the reliable performance of the low temperature refrigerator designed and fabricated under this program by LLNL.

A number of individuals in the organizations listed above were involved in making this project a complete success, thereby confirming the viability of 900 MHz spectrometers, and a range of commercial high field magnets for research in biology, chemistry and medicine.

IGC is a leading manufacturer of superconducting wire, and superconducting magnet systems, especially those used in MRI medical diagnostic imaging systems. The company also produces cryogenic equipment, permanent magnet systems and material separation devices.

DEDHAM, MA (SEPT. 26) PR NEWSWIRE - Bird Corporation (NASDAQ: BIRD), one of the nation's ten oldest continually operating companies, yesterday declared a dividend of 20 cents per common share for the year 1990 to stockholders of record on Sept. 30, 1990. The dividend will be paid of Oct. 15, 1990.

Bird's last common dividend payment was made in 1982. During the intervening years the company has materially restructured its operations, focusing on improving the profitability of its core business units and gradually divesting operations whose long-term profit potential was not consistent with its growth and return objectives.

On a smaller revenue base, the company is poised to enjoy one of its best years in earnings from continuing operations in 1990 and enjoys a virtually debt-free balance sheet.

Bird's first half results reflected a more than a two-and-one-half million dollar increase in operating earnings. Despite the current vissitudes of the housing sector, its principal end market, Bird's continued year-to-year improvement is expected for the balance of 1990.

In making the announcement, George J. Haufler, Bird's chairman and chief executive officer, noted that, "It was the unanimous decision of our board of directors to reward the shareholders for their enthusiastic support during the period of restructuring. It is also a clear indication of the board's

confidence in Bird's enhanced earnings capability despite the difficult industry operating conditions in which we currently find ourselves."

Bird Corporation is a U.S.-based manufacturer and distributor of building materials products and a provider of environmental services.

ST. LOUIS, MO. (SEPT. 26) PR NEWSWIRE - Contracts valued at $8.6 million have been awarded to LaBarge Electronics, a company of LaBarge, Inc. (AMEX: LB), for the production of cables and electronic assemblies to be used in the U.S. Army's Bradley Fighting Vehicle. The announcement was made today by Craig E. LaBarge, president and chief operating officer of LaBarge, Inc. The contracts were awarded by FMC Corporation's Ground Systems Division.

Under the four-year contracts, LaBarge will produce quantities of seventeen different cable assemblies and various electronic assemblies, including instrument panels and fan controllers for the Bradley Fighting Vehicle. The vehicle is an armored personnel carrier designed to transport and defend infantry soldiers on the batterfield.

The assemblies will be produced at LaBarge Electronics' manufacturing facilities in Joplin, Mo., and Huntsville and Berryville, Ark. Initial shipments are expected to begin in the first quarter of 1991. LaBarge has been building products in support of the Bradley program since 1980.

ATLANTA (SEPT. 26) PR NEWSWIRE - Days Inns today announced it has signed a

unique co-marketing agreement with AT&T to market AT&T long-distance service to its more than 1,100 Days Inn properties nationwide.

Under terms of the exclusive co-marketing agreement, Days will actively solicit new and existing Days Inn franchisees to offer AT&T long-distance service to their guests. Letters of endorsement will be sent to all franchisees, and the AT&T logo will appear in a future Days Inn directory denoting those Inns offering AT&T long-distance service.

Days also renews a three-year contract with AT&T to provide 0-plus long-distance service to room phones and public payphones at all Days Inn properties. AT&T currently provides long-distance service for public telephones at 13 of the 15 largest hotel and motel chains in the country.

Days Inns was also the world's first corporation to employ AT&T's Look Ahead Interflow, and the first hotel chain to utilize AT&T's Integrated Services Digital Network (ISDN), electronic services making it easier for travelers to make reservations quickly at any of its 1,100 properties currently open worldwide.

Days Inns of America Inc., with its Days brand inns, hotels, suites and Daystops, is the third-largest hotel brand in the world and the fastest growing in the moderate-price segment of the market. An international lodging operator and franchisor, the chain has more than 1,600 hotels open and under development in 50 states, Canada, Mexico, Europe, the Pacific Rim and India.

MELVILLE, NY (SEPT. 26) PR NEWSWIRE - Genovese Drug Stores, Inc. (AMEX: GDX.A) today announced the appointments of Phillip Silverman and David C. Reynolds as vice-presidents of the company.

Silverman, who has recently joined Genovese as the director of distribution, is responsible for the operation of the company's 265,000 square-foot distribution center. Prior to joining Genovese, Silverman was associated with Deloitte and Touche, where he was a management consultant in the area of retail and wholesale distribution. His previous experience includes 22 years with Allied Stores as corporate director of operations and manager of distribution and customer services. Silverman was a member of the Grace Commission which provided cost reduction recommendations to the Federal Government. A graduate engineer of New York University, Silverman also did graduate studies in industrial management.

Reynolds joined Genovese in December of 1988 as director of merchandising of

all photofinishing products. In July of 1989, he was appointed general manager of Genovese's Living Color Photofinishing division. Reynolds is a veteran of the wholesale photofinishing industry, having served as vice president-operations at Bicknell Photo Service and prior to that, as vice president/regional general manager of Guardian Photo.

Genovese Drug Stores, Inc. is a chain of 93 super drug stores located primarily in the metropolitan New York area. Genovese recently announced record sales results for the first half of the fiscal year ending Aug. 17, 1990. The company also announced an earnings increase of 22 percent for the same period.

#90269p8337 09/26/1990 ~PR Newswire

CLEVELAND (SEPT. 26) PR NEWSWIRE - Only an average of 15 percent of an incandescent light bulb's energy is utilized in producing visible light -- certainly not the most efficient use of electricity and an ever-growing challenge for GE engineers.

A surprising 75 percent (A) of a bulb's output is infrared energy which is invisible to the naked eye, and therefore wasted, according to Dr. Frederic Ahlgren, manager-Advanced Lamp Technology at GE Lighting's Nela Park facility

in Cleveland. "Infrared energy is what makes a light bulb hot to the touch," he explained. "We've now learned to turn more of that heat into light."

Ahlgren and a team of 50 scientists and engineers have been trying to harness the wasted infrared energy from incandescent halogen lamps for several years, and were successful in 1989. They have refined a new lamp design that "recycles" some of that infrared energy, resulting in significant energy savings and more visible, useful light.

The new lamp, called Halogen-IR(TM), achieves up to a 60 percent energy savings over conventional incandescent lamps. A 60-watt Halogen-IR PAR (B) lamp produces the same visible, useful light as a standard 150-watt PAR lamp. And by "recycling" the infrared energy or heat, a Halogen-IR lamp is 1/3 cooler than a standard halogen PAR lamp -- allowing perishable items -- and people -- to stay cooler under these lamps.

What recycles this infrared energy is a unique, breakthrough process that coats a quartz halogen filament tube with a filter that reflects infrared energy back onto the filament, causing it to burn hotter and produce more light.

Another technological breakthrough in the Halogen-IR process is the shape of the inner quartz filament tube -- its precise elliptical shape allows infrared energy to be reflected directly back on the filament rather than "bouncing" around unfocused and wasting the recycled infrared energy.

(SEPT. 26) PR NEWSWIRE - Citibank will sponsor the fifth annual benefit gala for Georgetown University Medical Center's Vincent T. Lombardi Cancer Research Center, Friday evening, Oct. 5, at the J.W. Marriott Hotel, 1331 Pennsylvania Ave. N.W., Washington.

The dinner-dance is the highlight of the center's annual fund-raising campaign to benefit cancer patients in the metropolitan area. Washington has the highest incidence of cancer of any city in the United States, making this center especially important to the area's residents.

For nearly two decades, the Lombardi Cancer Research Center has provided cancer treatment for thousands of cancer patients in the District of Columbia, and pioneered innovative research into the mysteries of the nation's most feared disease. The center was named after coach Lombardi who was treated for cancer in 1970 at what was then the cancer wing of Georgetown University Hospital. This year marks the twentieth anniversary of his death.

The evening's events will include both silent and live auctions, a cocktail reception, and a black-tie dinner and dance culminating with the presentation of the annual "Symbol of Courage" award. The recipient of the Vincent T. Lombardi Symbol of Courage award is always someone who is active in sports, has suffered cancer, and exhibits the fine qualities for which Vince Lombardi was known.

The annual gala event has raised more than one million dollars since it was first held. Last year's ball, also sponsored by Citibank, raised $450,000. The proceedings of the gala are donated in their entirety to the Lombardi center as an unrestricted grant.

Margaret C. Hodges, chairman of the Vincent T. Lombardi fund raising gala, and her co-chairman, Charles E. Long, executive vice president and corporate secretary of Citicorp, will preside over the event. They are both available for interviews and talk-show appearances.

NEW YORK (SEPT. 26) PR NEWSWIRE - Burson-Marsteller, the international consulting and communications company, announced today new assignments for three senior officers.

Andrew Cooper, general manager of Burson-Marsteller/New York, becomes corporate executive vice president, operations, and will be responsible for instituting the firm's recently developed strategic plan for the future.

James E. Murphy, vice chairman, corporate practice, becomes chairman and chief executive officer of Burson-Marsteller/New York. William F. Noonan, president, Burson-Marsteller/International, becomes president and chief operating officer of Burson-Marsteller/New York. James H. Dowling, Burson-Marsteller's president and chief executive officer, announced the changes.

"Burson-Marsteller's management team has developed an ambitious plan for the future and recommended that a senior executive be freed to oversee its development," Dowling said. "I am delighted that Andy Cooper, who is both a superior manager and outstanding communicator, has agreed to take on this vital task."

Cooper is a 15-year veteran of Burson-Marsteller, having worked in both Chicago and New York. He has been head of the New York creative services unit and general manager of the New York office. In his new role he will report to Dowling.

Murphy was a senior communications officer at Owens-Corning, Beatrice Foods and Merrill Lynch before joining Burson-Marsteller four years ago as head of its corporate practice.

Noonan has been at Burson-Marsteller for 28 years. He was general manager of the New York office during the late 1970s and early 1980s when the office grew to become the largest operation in the public relations industry.

He has run the firm's London office and headed its network of overseas offices. He is also the chairman of Dentsu Burson-Marsteller, the joint venture between Dentsu in Japan and Burson-Marsteller. The New York office reports to Thomas J. Mosser, president of Burson-Marsteller's North and South American operations.

"The importance of our New York office is self-evident," Mosser noted. "With income in excess of $50 million, it ranks as the largest office in the public relations agency world. It is almost half of our U.S. income and more than a quarter of our worldwide income. Entities this large should have both a CEO and COO to adequately cover our needs for a market, client, and product orientation as well as strong internal management."

STURBRIDGE, MA (SEPT. 26) PR NEWSWIRE - SpecTran Corporation (NASDAQ: SPTR) today announced an appeal of the court approved settlement of the class action suit that had been filed against various defendants, including the company, in October 1986.

In April of this year, the company reported a tentative settlement with counsel for the plaintiffs and the court approved the settlement in its entirety as being fair and reasonable on Aug. 14, 1990, subject to the normal 30-day appeal period.

Three individuals, including two of the named plaintiffs in the class action suit, have since appealed the settlement without legal representation. Counsel for the plaintiff class, as well as counsel for the defendants, including the company, all believe that the appeal is without merit and will vigorously attempt to convince the Appellate Court to dismiss it.

In addition, the company is aggressively reviewing its options with regard to recovering any damages resulting from the appeal, including taking action against the three individuals.

BEVERLY, MASS. (SEPT. 26) PR NEWSWIRE - The Amicon Division of W.R. Grace & Co. (NYSE: GRA), Beverly, announced today that its Irish subsidiary has received a significant order from U.S.-China Industrial Exchange, Inc. for delivery of hollow fiber membranes to the People's Republic of China.

The hollow fibers are components of hemofilters which will be manufactured in China. Hemofilters serve in the intensive care of patients suffering from fluid accumulation due to temporary failure of the kidneys resulting from shock, surgery and other causes. They may also be used to reduce excess blood fluids in open heart surgery. Used externally, hemofilters are temporarily connected to an artery and vein and act similarly to the natural kidneys which are given the opportunity to regain their natural function.

Hemofilters -- one of Amicon's many molecular separation products -- are produced at a facility in Limerick, Ireland, for use in many countries. The arrangement with the People's Republic of China is unique in that it represents a cooperative arrangement in which the final product is manufactured by the customer.

According to Kenneth J. Patti, Amicon's director of medical products marketing this opens for the company an important secondary market which is expected to continue and, in time, to expand. "We are working closely with the customer in China," said Patti, "sharing our know-how in the assembly of reliable hemofilters and in the clinical application of these devices."

COSTA MESA, Calif. (SEPT. 26) PR NEWSWIRE - Irvine Sensors Corp. announced that it has been selected to organize and chair the session on High Density Packaging and Interconnect Technology at November's WESCON meeting in Anaheim. WESCON is the nation's oldest and largest exhibition and conference for electronics engineers and managers.

Microelectronics packaging and interconnect technologies are critical to the design of the next generation of computer systems. Significant improvements are needed to meet the desired performance and density characteristics of supercomputers, mainframes, workstations, and various strategic and tactical military systems. The WESCON session will describe the state-of-the-art that addresses these needs by bringing together the nation's leaders in Multichip Modules, High Density Interconnects, and Three-Dimensional Integrated Circuit Packaging. Presentations are scheduled by IBM, General Electric, Texas Instruments, N-Chip and Irvine Sensors.

Irvine Sensors' role in the conference stems from its decade of experience in developing ultra-high density electronics modules for both infrared focal planes and computer applications. The firm has pioneered a three-dimensional process for stacking microcircuits into devices about the size of sugar cubes with interconnections on one or more faces of the cube. Government sources indicate that this approach is the highest-density electronics packaging technology known to be under development in the world.

Specific papers to be presented in the WESCON session include:

COMPANY	PRESENTER	TITLE
Irvine Sensors	John Carson	Overview of Advanced Packaging and Interconnect
IBM	Dave Meyers	High Density Multichip Module
N-Chip	Kamran Malik	High-Performance Silicon and Silicon Multichip Modules
General Electric	Raymond Fillon	GE High Density Interconnect Multichip Module Technology
Texas Instrument	Mark Kressley	Overview of Three-Dimensional Packaging
Irvine Sensors	Stuart Shanken	3-Dimensional Integrated Circuit Packaging

The "High Density Packaging and Interconnect" session will be held from 12 noon to 2 p.m. on Thursday, Nov. 15, at the Anaheim Convention Center. More information about this session may be obtained through its coordinator, Myles F. Suer, at 714-549-8211. General Session information can be obtained through WESCON organizers at 800-877-2668, ext. 219.

Irvine Sensors, headquartered in Costa Mesa, is primarily engaged in the development of infrared devices and high density packages of computer electronics which will have broad applications in military and commercial systems.

CALGARY, Alberta (SEPT. 26) PR NEWSWIRE - A wholly owned subsidiary of Gulf Canada Resources Limited, (Toronto: GOU) Asamera (Overseas) Limited, has announced a significant gas discovery in the Corridor Production Sharing Contract area in South Sumatra, Indonesia.

The Gelam-1 wildcat well, located 22 miles north of Asamera's Bentayan oil field, encountered 210 feet of net gas/condensate pay. The productive interval was within the Talang Akar formation sandstones at a depth of 5,482 feet.

A 30-foot perforated interval at a depth of 5,555 feet flowed 13.4 million cubic feet of gas and 61 barrels of condensate per day through a 36/64-inch choke on a 6 per cent drawdown; flowing tubing head pressure was 1,550 psi; flowing bottom hole pressure measured 2,398 psi. The cumulative flow rate of the tested intervals was 24.8 million cubic feet of gas per day.

Additional drilling is planned to delineate the vertical and areal extent of the Gelam discovery and to determine if a downdip oil accumulation is present.

Asamera (Overseas) Limited is operator and holds a 54 per cent interest in the Corridor Block. Asamera's partners, Bow Valley Industries and Pertamina, have interests of 36 per cent and 10 per cent, respectively.

MINNEAPOLIS (SEPT. 26) PR NEWSWIRE - Consul Restaurant Corporation (NASDAQ: CNSL), the nation's largest franchisee of Chi-Chi's Mexican restaurants, today reported financial results for the three months ended Aug. 31.

Revenues in the first quarter totaled $24.5 million, up four percent from $23.6 million a year ago. Net income totaled $115,000, or one cent per share, compared with $776,000, or six cents per share, in the first quarter last year.

"Overall, the first quarter was disappointing," said James H. Crivits, chairman and chief executive officer. "Our business was adversely affected by weaker economies in both the U.S. and Canada and by intense competition in some of our key markets. As a result, first-quarter sales were below our expectations, and expenses as a percent of revenues were higher. However, the previously announced actions taken in the last 30 days to reduce administrative costs should produce improvements in succeeding quarters."

Consul operates 39 full-service Chi-Chi's family-style restaurants, nine Chi-Chi's el Pronto! quick-service units and one Magnolia's seafood dinner house. They are located in six states and six provinces. The company also provides contract foodservice management through its Foodservice Division.

HOUSTON (SEPT. 26) PR NEWSWIRE - American Capital Management & Research (NYSE: ACA) has today announced the recent introduction of the newest member of the American Capital Family of Funds - American Capital Government Target Series Portfolio '97 (Target Series).

Target Series is a bond fund which seeks wealth accumulation consistent with safety of capital and liquidity. The fund has a seven- year defined life and will liquidate on Dec. 16, 1997. It invests primarily in securities issued by the U.S. government, its agencies and instrumentalities. These securities include treasury obligations, zero coupon bonds and mortgage-related securities. The fund also offers an active management strategy designed to ensure that market fluctuations will have less and less impact on the portfolio as the fund nears maturity in 1997.

"The appeal of this kind of conservative bond fund is heightened in these times of unsettled world events," said Don Powell, chairman of American Capital Management & Research, Inc. "It clearly has a place in our fund family which offers investment products for many different kinds of investment needs."

American Capital Government Target Series Portfolio '97 is being offered to the investing public during a limited initial offering period which ends no later than Dec. 17, 1990. Prospectuses and brochures containing more complete information including all charges and expenses are available through investment representatives across the nation or by calling American Capital at 1-800-421-5666. Investors should read the prospectus carefully before they invest or send money.

American Capital Management & Research is a Houston-based investment management and marketing firm which provides investment advisory services to 34 mutual funds and closed-end investment companies.

PHILADELPHIA, (SEPT. 26) PR NEWSWIRE - CIGNA Corp. (NYSE: CI) announced today that David W. Johnson, president and chief executive officer of Campbell Soup Co. (NYSE: CPB), has been elected to the CIGNA board of directors.

Wilson H. Taylor, chairman and chief executive officer of CIGNA, said, "The experience and leadership of our board will be enhanced by David Johnson's strong global perspective and extensive marketing expertise."

Johnson, 58, has served as a top executive of multinational companies on four continents. Prior to joining Campbell Soup in December 1989, he was chairman and CEO of Gerber Products Co. and president and CEO of Entenmann's Inc. During his tenure at Gerber, earnings grew at a more than 50 percent annual rate.

Johnson began his career with Colgate-Palmolive Co. in Australia and advanced to chairman and managing director of Colgate Palmolive South Africa. He then

became president of Warner Lambert/Parke Davis Asia, and subsequently served as president of a number of the company's divisions in the United States.

Johnson received a bachelor of economics degree from the University of Sydney and an M.B.A. from the University of Chicago.

The CIGNA companies provide insurance, health care, employee benefits, pension and investment management, and related financial services to businesses and individuals worldwide.

SAN FRANCISCO (SEPT. 26) PR NEWSWIRE - On Sept. 27, Esprit De Corp. is opening a discount outlet store at the Desert Hills Factory Stores Mall in Cabazon, 30 miles west of Palm Springs, Calif.

The outlet's 10,000 square foot selling floor will carry first quality, past season merchandise from Esprit Collection, Sport, Sportiv, Jeanswear, Kids, Footwear and Accessories lines at 30 percent to 70 percent off regular price.

Lisa Engler, Esprit's Retail President said, "We've had great success with our current off price store locations. We plan to continue developing and expanding our off price business in addition to moving forward with full price stores."

The Desert Hills location is the fourth Esprit Outlet store in the United States, with stores currently open in San Francisco, Dallas and New Orleans. The Desert Hills Outlet was designed by Esprit's in-house architecture team. While maintaining the supermarket style consistent with the company's original outlet in San Francisco, Desert Hills was designed with a flexible lighting and fixturing system to easily accommodate change within the store's clean, open space. Simple industrial materials were chosen for their durability, including concrete, galvanized sheet metal and aluminum diamond plate.

Esprit De Corp. is a privately held company owned by Susie Tompkins and an investor group, with headquarters in San Francisco.

WILSON, NC (SEPT. 26) PR NEWSWIRE - Ery W. Kehaya, Chairman and Chief Executive Officer of Standard Commercial Corporation (NYSE: STW), has

announced plans to relinquish his responsibilities as Chief Executive Officer of the company effective January 1, 1991.

Mr. Kehaya, age 67 and a major stockholder of Standard Commercial, will remain as Chairman of the Board of Directors while turning over more of the day-to-day responsibilties for the business to others.

J. Alec G. Murray, age 54, will become Vice Chairman and Chief Executive Officer of Standard Commercial on January 1, 1991. Mr. Murray is based in the company's U.K. office in Godalming, Surrey, and currently serves as Executive Vice President, Chief Financial Officer, and Chairman of the company's Wool Division.

Marvin W. Coghill, age 57, will remain as President and Chief Operating Officer of the company and Chairman of its Tobacco Division. Mr. Coghill has 33 years experience in the leaf dealer business and is based in Wilson, North Carolina.

Also effective Janauary 1, 1991, Anthony A.D. Arrowsmith, Senior Vice President, age 41, will become Chief Financial Officer of Standard Commercial; and J. Anthony Johnston, age 55, will become Managing Director of the company's Wool Division. Henry R. Grunzke, age 58, will continue in his capacity as Commercial Director of the Wool Division.

Mr. Murray is a British citizen born in Zambia (formerly Northern Rhodesia). He attended public schools in England and Scotland and performed national service in Berlin, Germany with the 1st Battalion of The Black Watch. After becoming a Chartered Accountant, Mr. Murray joined the General Electric Company (U.K.) in 1963 and served in Nigeria and London until 1969.

Mr. Murray was employed by Standard Commercial in 1969 as Chief Accountant. He became Chief Financial Officer of the company in 1970, a Vice President in 1977, and Executive Vice president in 1981. He was appointed Chairman of the company's Wool Division when it was created in 1985.

Standard Commercial is one of the world's largest leaf tobacco dealers and among the top international wool trading companies. It operates in virtually every tobacco and wool producing nation and sells worldwide to tobacco manufacturers and various wool users. Standard also owns small companies engaged in the landscape nursery and building supply businesses.

MALVERN, PA (SEPT. 26) PR NEWSWIRE - Centocor Inc. (NASDAQ: CNTO) today announced that Michael A. Wall, chairman emeritus of the company, has been

re-elected to the board of directors following a hiatus of several years.

Wall, a principal founder of Centocor, served as chairman of the board from 1979 to 1987.

"While we have always had the benefit of Michael's business and technical insight on a daily basis, we are very pleased to see him return to the board," said Hubert J.P. Schoemaker, chairman of the board and chief executive officer of Centocor. "His unique abilities in new product identification are critical to Centocor's long-term growth," Schoemaker added.

Centocor Inc., based in Malvern, develops, manufactures and markets diagnostic and pharmaceutical products for human health care. The company's products are based on monoclonal antibody technology and are primarily intended for use in the management of patients with infectious, cardiovascular and autoimmune disease and cancer.

SAN DIEGO (SEPT. 26) PR NEWSWIRE - Unocal Corp. (NYSE: UCL) and San Diego Gas & Electric (NYSE: SDO) today announced a joint demonstration project to make compressed natural gas (CNG) available at a service station.

The first-of-its-kind fueling facility in California will be installed at an existing San Diego-area Unocal 76 service station in early 1991. The project will provide experience in marketing CNG as an alternative motor fuel.

SDG&E will provide the engineering, on-going maintenance and customer billing. Unocal will provide the site and operate the facility through a dealer. SDG&E and Unocal will split the estimated start-up costs of between $200,000 and $250,000.

Previous CNG refueling stations have been mostly for utility or fleet-owner use. SDG&E currently has two stations for its own fleet use and for the use by local fleet operators. The Unocal/SDG&E project will be the first joint oil company and utility facility in California.

Richard J. Stegemeier, chairman, president and chief executive officer for Unocal, said, "From an economic and environmental point of view, natural gas represents an extremely viable alternative fuel for vehicles, and a cost effective approach to help alleviate air quality problems."

Stegemeier also explained that there are already more than 30,000 CNG-powered vehicles in the United States. Most of these vehicles -- used by fleet

operators or utilities -- have been converted to operate on either CNG or gasoline.

For its part, SDG&E sees the Unocal/SDG&E project as another step in its five-year effort to make natural gas a viable vehicle fuel.

SDG&E is currently seeking approval of an expanded development plan for CNG as a vehicle fuel from the California Public Utilities Commission. Until CNG rates are approved, the cost of CNG can only be estimated at about 40 to 50 percent less than the current prices of other fuels on an equivalent basis.

Natural gas vehicles produce 50 percent less ozone-forming pollutants and 90 percent less carbon monoxide than gasoline and other fuels. Future vehicles with engines dedicated to CNG fuel may prove even cleaner than the current dual-fuel vehicles.

CNG offers additional safety features. CNG storage cylinders are built to more rigorous standards than gasoline tanks. CNG is lighter than air, so it rapidly disperses if released, instead of pooling on the ground.

The joint project is one of several efforts each company is making to solve vehicle-related environmental concerns.

SIMSBURY, CONN. (SEPT. 26) PR NEWSWIRE - Kollmorgen Corporation (NYSE: KOL) announced today that the previously announced $20 million periscope contract, received by its Electro-Optical Division in April 1990, has been terminated for convenience by its international customer.

The Model 76 periscopes were to have been delivered from mid-1991 to 1993. The company does not believe that the termination of this contract will have any adverse financial impact on Kollmorgen in 1990. The company is not yet in a position to determine the effect, if any, on the company's business plan beyond 1990.

Kollmorgen has been the sole designer since 1916 of all operational periscopes used by the U.S. Navy, and is widely recognized as the pre- eminent international designer and manufacturer of military periscopes for the free world. Kollmorgen has been selling periscopes to international customers since the early 1970s.

Kollmorgen Corporation has continuing operations in two business segments: special purpose servo motors and controls, and electro- optical instruments.

SEATTLE (SEPT. 26) PR NEWSWIRE - The Federal Aviation Administration (FAA) has granted approval for extended-range operations for the Boeing twin-engined 737-300/-400/-500 series jetliners.

If the airplanes are configured to meet certain equipment requirements as set out in the FAA-approved Configuration, Maintenance and Procedures (CMP) guide, they are now cleared to operate on flights that take them up to 120 minutes flight time from an approved landing field with one engine inoperative. With this authority, airlines can fly more direct routes between some cities, saving time and fuel.

This FAA approval recognizes the reliability of the 737-300/-400/-500 fleet of 770 airplanes, all equipped with CFM56-3 engines. With six million hours of flight time, this Boeing fleet has the best reliability record in the industry.

The 737-300 was originally approved for 120-minute extended-range operations in November 1986. That approval was withdrawn in July 1989 when the FAA issued an airworthiness directive to address concerns related to operation in heavy rain and hail. The new FAA approval restores 120-minute extended-range operations to those 737-300s.

The 737-300/-400/-500 airplanes now join the 737-200s equipped with JT8D-9/9A, JT8D-15/15A and JT8D-17/17A engines as 737s approved for extended range operations of up to 120 minutes.

#90269p8405 09/26/1990 ~PR Newswire

ROCHESTER, NY (SEPT. 26) PR NEWSWIRE - Rochester Community Savings Bank (NASDAQ: RCSB) today reported net income of $4.0 million or $.29 per share for the third quarter ended Aug. 31, 1990, compared to net income of $5.4 million or $.39 per share in the year-ago quarter.

RCSB's net income was $13.0 million or $.94 per share for the first nine months of fiscal 1990, comparable to net income of $13.4 million or $.97 per share reported for the same period in fiscal 1989.

Third quarter results were primarily affected by increases in net interest income and other income, which was offset by a higher provision for possible loan losses. Leonard S. Simon, RCSB chairman and CEO, commented, "RCSB's year-to-date operating earnings have kept pace with last year's record levels, which we believe is a considerable achievement in the current economic environment."

A 35.0 percent year-to-year increase in net interest income to $25.0 million for the 1990 third quarter reflects improved interest rate spreads, balance sheet restructuring, and interest income from Shadow Lawn Savings Bank (SLSB), a $650 million New Jersey thrift which was acquired by RCSB on April 2, 1990. RCSB's net interest margin increased to a record 2.43 percent for the recent quarter, up substantially from 1.94 percent in the 1989 third quarter.

Simon noted, "Successful expansion of our retail deposit base in New Jersey and Buffalo will enable RCSB to sustain increases in net interest income, the bank's largest source of earnings. Moreover, returns on RCSB's adjustable-rate mortgage (ARM) portfolio continue to increase and the balance sheet has been restructured to reduce the level of lower-yielding assets." Simon added that RCSB's one-year gap, a measure of the bank's sensitivity to interest-rate movements, remained low at 1.3 percent.

The third quarter provision for possible loan losses was $5.9 million, which allowed the bank to recognize current loan losses while increasing reserves to $17.9 million at the recent quarter-end. Simon indicated that the bank remains committed to adequately addressing loan problems on a timely and as needed basis.

Other income for the 1990 third quarter increased to $17.7 million, 10.6

percent higher than the year-ago quarter, reflecting contributions from mortgage banking income, bank fees and service charges, and the sale of mortgage-backed securities.

For the first nine months of 1990, other income was $45.3 million, 17.9 percent higher than the 1989 period. On a year-to-date basis, mortgage banking income, the largest contributor to other income, was up by 3.3 percent to $28.6 million, which represents a solid performance in the context of this year's slower housing market.

Bank fees and service charges increased by 66.6 percent in the 1990 third quarter, again due to increased servicing fee income from securitized auto loans and SLSB's retail banking fees.

Simon noted, "RCSB's core businesses - retail banking, automobile financing, and mortgage banking - continue to provide steady earnings which offset reduced joint venture income and the effects of increased nonperforming assets during this weak cycle in the commercial real estate market. Each business has the underlying strength to assure RCSB's continued profitability."

Operating expenses for the third quarter of 1990 were $29.5 million, compared to expenses of $23.2 million for the 1989 third quarter, reflecting the addition of a full quarter of SLSB's operating expenses and marketing expenses related to RCSB's opening of four retail branches in Buffalo during the quarter. Operating expenses for the first nine months of 1990 were $77.5 million, up 12.5 percent from expenses of $68.9 million for the same 1989 period.

Simon explained, "Although the growth of RCSB's retail banking network has increased baseline operating expenses for the retail bank, we expect this investment to yield favorable returns based on increased revenues and enhanced operating efficiencies. Without SLSB's operating expenses, year-to-date expenses would have been flat, demonstrating RCSB's diligence in its cost control efforts."

Total assets at Aug. 31, 1990 were $4.34 billion compared to $4.71 billion at the end of the 1990 second quarter and $3.98 billion at the end of fiscal 1989.

At Aug. 31, 1990, nonperforming assets were 4.03 percent of total assets reflecting the combined impact of a previously disclosed increase in nonperforming commercial real estate loans, a smaller asset base and the effect of a reduction in the availability of credit for commercial real estate projects.

Other real estate, which is marked to current market value as part of the process of taking assets into portfolio, represents 53 percent of RCSB's nonperforming assets.

"A substantial portion of the recent increase in nonperforming assets consists of projects which we categorize as 'earning nonperformers,'" Simon explained.

"These are properties that are generating positive cash flows and are fundamentally sound projects, but have been negatively affected by the general financial difficulties some developers are having as a result of the nationwide credit crunch. It's very important to make a distinction between this type of situation and those in which the secured property has lost substantial economic value."

Simon reiterated the bank's posture in handling real estate workouts by taking early control of projects. "As we stated at the beginning of the third quarter our experience has been that this proactive course of action enables us in many cases to fully recover principal on foreclosed properties, but it typically takes some time." Simon also indicated that the bank's loans on commercial real estate are relatively moderate, representing 12 percent of total assets.

Deposits at Aug. 31, 1990 increased to $3.04 billion from deposits of $2.63 billion at the end of fiscal 1989, as a result of the acquisition of SLSB and expansion into Buffalo. Shareholders' equity increased to $331.1 million or $23.97 per share from $325.6 million or $23.57 per share at Nov. 30, 1989.

The ratio of equity to assets was 7.63 percent at the end of the third quarter. RCSB exceeds all regulatory capital requirements and ranks among the best-capitalized large thrifts in the United States. Total residential mortgage originations were $390.8 million for the quarter and $1.07 billion year-to-date.

Rochester Community Savings Bank is a publicly-owned, state- chartered savings bank headquartered in Rochester, N.Y. The bank operates 27 retail banking offices in Western New York, and through its wholly owned subsidiary, Shadow Lawn Savings Bank, 19 retail banking offices in New Jersey. RCSB also owns subsidiaries engaged in mortgage banking, automobile financing, commercial real estate banking, insurance, and securities brokerage.

PORTLAND, OR. (SEPT. 26) PR NEWSWIRE - NERCO Inc. (NYSE: NER) today announced its oil and gas unit has successfully completed a new development well at the natural resource company's Eugene Island Block 108 field offshore Louisiana.

The field is located 25 miles offshore from St. Mary Parish, La., and was placed into production in 1983. NERCO acquired a 61 percent operating interest in the field during 1988 and 1989. Production facilities at the 5,000-acre offshore lease are located on an eight-pile platform in 25 feet of water.

The Eugene Island 108 Number 13 well establishes a new economic zone for the field. At 4,470 pounds per square inch flowing tubing pressure, the well was tested at a rate of 11.1 million cubic feet of natural gas per day, with 96 barrels of oil per day. Total well depth was 13,900 feet. The well is expected to be placed into production by early November.

The field has eight producing wells, each of which averages approximately 6.6 million cubic feet of natural gas and 85 barrels of condensate per day. NERCO's net daily production rates from the EI 108 field are approximately 30 million cubic feet of gas and 370 barrels of condensate.

Total net daily production rates for NERCO Oil & Gas are 205 million cubic feet of gas and 6,500 barrels of oil and natural gas liquids.

NERCO Oil & Gas President Roger A. Markle noted, "The development of this well reinforces our emphasis on developing the exploration and production potential of our existing producing acreage."

NERCO Oil and Gas is a wholly owned subsidiary of NERCO Inc., a diversified natural resources company. NERCO is a significant North American producer of coal, gas, oil, gold and silver. Approximately 82 percent of the company's common stock is indirectly owned by PacifiCorp (NYSE: PPW), a diversified electric utility.

#90269p8407 09/26/1990 ~PR Newswire

DENVER (SEPT. 26) PR NEWSWIRE - The Sumitomo Trust & Banking Co., Ltd., one of Japan's premier financial institutions, closed a $319 million commitment regarding variable rate financing for the city and county of Denver to be used for the construction of the new Denver Airport, according to a statement released today.

Specifically, Sumitomo Trust will be providing credit support and liquidity enhancement for Denver's Airport System subordinate revenue bonds. The initial issue will provide $200 million for the new airport project. A subsequent issue will provide an additional $100 million in funding.

The bonds will be issued as tax-exempt, commercial paper-type instruments. The interest rate on these can be fixed for anywhere from one to 180 days. Goldman, Sachs & Co. is serving as lead underwriter and remarketing agent for this transaction.

The new Denver Airport, the first new airport constructed in the United States in the past 20 years, is designed to help alleviate the severe overcrowding that has developed at the nation's existing airports due to rapidly increasing consumer demand. Accordingly, the new Denver Airport has received strong support from the Federal Aviation Administration, as well as state and local officials. The new Denver Airport is owned and operated by the city and county of Denver.

The total estimated cost of the airport project, including design, engineering construction, tenant improvements, and access roads is expected to be $2 billion. Of this, $700 million has already been funded through the issuance of fixed-rate senior bonds, and approximately $600 million will ultimately be

provided by bank-supported variable rate bonds. It is expected that $501 million will be furnished by federal grants.

The Sumitomo Trust & Banking Co., Ltd., not to be confused with the Sumitomo Bank, Ltd., is one of Japan's leading financial institutions. Founded in Osaka in 1925 as the trust bank of the Sumitomo Group, Sumitomo Trust added commercial lending to its core business in 1948. In its most recently reported fiscal year ending March 31, 1990, Sumitomo Trust had total assets of over $193 billion, net income of $394 million, and over 7,000 employees.

CONTACT: Alan Charnes, manager of revenue, 303-640-2700, or Gennifer P. Sussman, deputy of aviation-finance, 303-270-1900, both of the city of Denver; Frank Chin, managing director of Smith Barney, 212-698-6101; Ellen Jewett, vice president of Goldman, Sachs, 212-902-5500; or Yutaka Itoh, deputy general manager, 213-299-2103, Ninoos Y. LIVINGSTON, NJ (SEPT. 26) PR NEWSWIRE - John F. Kuntz was promoted to executive vice president and general counsel of the Howard Savings Bank (NASDAQ: HWRD), Chairman and Chief Executive Officer William P. Tuggle III announced today.

"John Kuntz is an important member of the management team at the Howard," Tuggle said in announcing the appointment. "This promotion not only attests to the quality of his performance, but also emphasizes the significance of the position in the management structure of the bank."

Kuntz, who also serves as corporate secretary of the bank, joined the Howard in 1983 as an assistant counsel. He was named senior counsel in 1986, vice president and counsel in 1988, first vice president, counsel and corporate secretary in 1989 and senior vice president in March of this year.

A member of the New Jersey, New York and Morris County Bar Associations, he was previously an associate attorney with the New York City law firm of Cusack Stiles and Hale.

Kuntz is a magna cum laude graduate of Fairfield University with a bachelor's degree in political science. He earned his law degree, magna cum laude, from New York Law School. He is also a graduate of the National School of Finance and Management in Fairfield, Conn.

Kuntz, 35, is a resident of Chatham, N.J., where he has served as president of the Chatham Jaycees.

HOUSTON (SEPT. 26) PR NEWSWIRE - The Coastal Corporation (NYSE: CGP) said today it has commenced its previously announced public offering of $400 million of debt securities.

The offering, underwritten by Lehman Brothers, consists of $250 million of 10-3/8 percent senior notes due Oct. 1, 2000, and $150 million of 10-3/4 percent senior debentures due Oct. 1, 2010. The notes were priced at 99.875 to yield 10.395 percent and the debentures were priced at 99.59 to yield 10.8 percent.

Coastal said it intends to use the net proceeds from the offering for the repayment of short-term borrowings and other outstanding debt.

The Coastal Corporation is a Houston-based energy holding company. It has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

AUSTIN, TX (SEPT. 26) PR NEWSWIRE - The retrial of Horton v. American Tobacco Company, Inc. in Oxford, Miss., resulted in a jury verdict for the plaintiff, Nathan Horton, but the jury awarded no damages to his family.

The jury of eight women and four men including six smokers, did conclude, on Sept. 24, 1990, that Pall Mall cigarettes were defective and unreasonably dangerous and caused Horton's lung cancer.

Under Mississippi law the next phase of the case will be up to the court. Don Barrett of Lexington, Miss., and one of Horton's attorneys, stated, "In cases like this, in which the evidence of damages is clear, the court has the option to determine damages based on the available evidence or to grant a retrial on the damage issue. This case is not over."

Another member of Horton's legal team, Don Davis, of Byrd, Davis & Eisenberg, stated, "Naturally we are disappointed that the jury was unable to make the required determination of damages. Damages, however, were not seriously disputed in this case. It is important to realize what the jury did find on

the disputed issues.

"They determined that cigarettes constituted defective and unreasonably dangerous products, that cigarette smoking causes cancer and they rejected the tobacco companies argument that Nathan Horton assumed the risk of smoking and therefore was solely responsible for his own death."

"This trial was significant both for the jury finding that cigarettes are unreasonably dangerous because they cause cancer and because the testimony and documents introduced into evidence in this trial have publicized the enormous risk of contracting lung cancer, emphysema, and associated diseases from smoking," Barrett said.

"The evidence is also important because it reveals American Tobacco Company's and the industry's callous disregard for the health and safety of their customers. They have spent billions of dollars to reassure smokers that smoking is safe; yet, when their customers become sick and die, the cigarette companies turn on them with a vengeance, saying that the smoker is foolish for believing cigarette smoking was safe."

The retrial of the case, originally scheduled to begin April 23, 1990, in Lexington, was moved to Oxford, Miss., when Judge Eugene Bogen of the Holmes County Circuit Court granted American Tobacco Company's motion for change-of-venue.

The first Horton trial ended with a hung jury and a mistrial, amid charges of jury tampering and other misconduct in January 1988. It was the first cigarette liability case in which the tobacco industry did not win a favorable verdict from a jury or judge.

Since the Horton hung jury, three additional juries have now made findings adverse to the cigarette companies, Cipollone v. Liggett & Myers, Girton v. American Tobacco Company, Inc. and the most recent Horton jury.

#90269p8431 09/26/1990 ~PR Newswire

HERSHEY, PA (SEPT. 26) PR NEWSWIRE - Responding to the challenges facing utilities in the '90s requires more participatory, problem-solving cultures, firm control of costs and the willingness on the part of both companies and regulators to take risks, Standley H. Hoch, chairman, president and chief executive officer of General Public Utilities Corp. (NYSE: GPU), told approximately 500 utility executives today.

Hoch's comments were made in the keynote address at the 83rd annual meeting of the Pennsylvania Electric Association, an organization of management personnel from Pennsylvania-based investor-owned electric utilities. The meeting was also attended by state regulatory commissioners and legislators.

"Our industry is at a pivotal stage," Hoch said. "Those who succeed in today's more competitive environment will be those who act today with a focused view of what they want their companies to be tomorrow."

Hoch also told the meeting that the Middle East crisis is unlikely to have much direct impact on Pennsylvania utilities, since none are highly dependent on oil. "However," he said, "the rise in oil prices could send the nation into recession and upset the fragile economic resurgence we have helped to build in some of the areas we serve here in Pennsylvania."

The special challenges for utilities include increased competition coupled with a changing regulatory climate.

"The ability to manage those changes will require the development of new company cultures equipped to anticipate competitive challenges and implement responsive strategies," Hoch said. " Companies must define their vision and make that vision an integral part of the organization," he added.

Making that vision a reality, Hoch said, "requires that you build a participatory environment where all employees buy into the vision. It also requires empowering workers by listening to suggestions and by consulting them."

As an example of cultural change at GPU and other utilities, Hoch cited the recently announced agreement between GPU and Pittsburgh-based DQE Inc. to jointly generate and move energy across the state. The agreement, which

involves the reopening of two mothballed generating stations and the construction of 200 miles of new transmission line, adds new total West-to-East capacity for Pennsylvania and increases long-range transmission capacity and system reliability for all of the state's utilities, Hoch said.

The cooperation embodied in the venture "represents a cultural change for the industry and for both companies," Hoch said.

Hoch also called for utilities to take a proactive approach on environmental issues, anticipating and responding to environmental concerns before they are forced to do so.

And Hoch said the industry's challenges necessitate a new level of cooperation between the industry and its regulators. Such cooperation would "ensure fair and equitable treatment both to our ratepayers and to the utility shareholders who finance the investor-owned utility," he said.

Parsippany, N.J.-based General Public Utilities (NYSE: GPU) is the nation's 15th largest investor-owned utility. It provides approximately 39 billion kilowatt hours of electricity for approximately 1.9 million customers through three operating companies -- Jersey Central Power & Light Co., Metropolitan Edison Co. and Pennsylvania Electric Co.

BALTIMORE (SEPT. 26) PR NEWSWIRE - In another win of U.S. Postal Service

business, the Westinghouse Electronic Systems Group (ESG) has been awarded a $14.2 million contract that will help to speed processing of the nation's mail.

The contract for 1,313 Wide Area Bar Code Readers will upgrade bar code sorters now in use or being built. The equipment will allow a bar-coded address to be read almost anywhere on the face of an envelope. Currently, automated sorters read a bar code in the "postnet" position -- the lower right-hand corner of an envelope.

"This contract is very significant," said Suzanne Jenniches, general manager, Westinghouse Civil Systems Division, "because it allows us to demonstrate the full management capability of Westinghouse by providing very quick turnaround on build-to-print hardware to meet this high priority USPS need."

A strong start-up performance on the prior Postal Service contract gave Westinghouse the schedule confidence for this win, said Tom Evans, Westinghouse Postal Systems Department manager. The first contract, awarded to Westinghouse last August, calls for 211 bar code sorters to be delivered through October of 1991. The first of those bar code sorters was successfully installed nearly one month early and accepted by USPS at its Wilmington, Del., facility on schedule on Sept. 13.

This latest contract award represents another step in Westinghouse-ESG's diversification of its business base. The company has been a leader in defense electronics for more than 50 years and is now working to apply that expertise to new business areas.

IRVINE, CA (SEPT. 26) PR NEWSWIRE - National Education Corp. (NYSE: NEC) today announced that its Steck-Vaughn subsidiary has been named exclusive worldwide distributor of the Official GED Practice Tests.

National Education said that the American Council on Education has awarded Steck-Vaughn the publishing and distribution contract for the period beginning Sept. 1, 1990 and ending Aug. 31, 1993.

The new practice exams introduce special editions for Canadian, Spanish-speaking, and visually-impaired populations, as well as new features, according to Steck-Vaughn President Roy Mayers.

Doug Whitney, director of GED Testing Service for the American Council on Education, said Steck-Vaughn's selection as the exclusive distributor for the Official GED Practice Tests was based on the company's ability to serve the adult education field.

"Steck-Vaughn's wealth of experience in adult education and their extensive service capabilities were impressive to our selection committee," Whitney said.

Mayers added that the Official GED Practice Tests are half-length simulations of actual GED assessments, with similar appearance and content. The practice tests were developed by GED Testing Service - the same organization that prepares the actual GED tests.

He said that they are used to identify problem areas for GED candidates and quickly predict their GED test scores. Approximately 650,000 persons are expected to pursue GED diplomas in 1990.

BEVERLY HILLS, CALIF. (SEPT. 26) PR NEWSWIRE - After two years of investigations, security directors from Giorgio and Yves Saint Laurent have uncovered the largest perfume counterfeit operation known to exist in Singapore. Al Vetter, Giorgio's director of security and Jean-Luis Faure, YSL's director of security conducted the investigation and led the raid. In conjunction with local investigators, they seized more than 26,000 bottles of fake Giorgio, Chloe, Christian Dior and Azzaro worth an estimated $1.8 million

at retail. The haul was packed and ready for export to the United States, Middle East and Europe.

The raid occurred at a warehouse in Woodlands, a suburb of Singapore. Most of the perfume seized is believed to have been manufactured in a makeshift laboratory in Yan Kit village, Singapore. Documents seized in the raid showed that the counterfeiters manufactured an estimated 400,000 bottles of perfume a year at the site. Oil was imported from Spain and France while the bottle were manufactured in Taiwan.

Additionally, intelligence gathered from the raid should result in the apprehension of another large counterfeit operation which is under investigation.

Legal action will be taken against the counterfeiters. However, Singapore currently has no anti-counterfeiting laws, making the city one of the main centers for worldwide counterfeit perfume trading. New legislation prohibiting counterfeiting will take effect in June, 1991.

"Over the last six months we have significantly affected the manufacturing of counterfeit perfumes in Singapore and Taiwan," said Michael Gould, Giorgio's president and chief executive officer. "And we will continue to pursue these professionals around the world until they are stopped."

In June, 1990, Giorgio and YSL raided three key counterfeit perfume operations in Taiwan and Singapore. The companies security departments have also been instrumental in uncovering bogus perfumes in California and New York.

WESTBORO, MA (SEPT. 26) PR NEWSWIRE - The next generation of engineers will now have the opportunity to use the latest generation of computer equipment thanks to a $2.5 million Digital Equipment Corporation grant, announced today, to the Massachusetts Microelectronics Center (M2C).

Digital previously donated a total of $10 million in equipment to the Center, a university-industry-state partnership in technology education in support of programs in semiconductor technology at M2C's 11 member schools.

At a donation ceremony at the Center's Westborough facility, Massachusetts State Senator John P. Houston accepted the grant on behalf of M2C. He said, "Education will provide the competitive edge in today's economy. Digital's investment is a recognition of that and the excellent work done at the Microelectronics Center."

Laurence Walker, manager of Digital's Semiconductor Design & Interconnect Engineering Group, presented a check representing the grant and said, "It is important to maintain a positive vision of the future of our industry even in these changing economic times. By continuing our support of the Massachusetts Microelectronics Center's mission, we ensure a future that contains well-trained professionals in the VLSI and semiconductor engineering disciplines. We feel that this endeavor is worth supporting."

The current Digital Equipment donation consists of DECstation 3100s and DECsystem 5000/200s which will be used to upgrade Computer-Aided Design Laboratories at M2C's member universities, as well as additonal equipment which will be employed by M2C to monitor the fabrication process used in producing integrated circuit chips from student designs. About 2,000 students per year participate in Center-supported courses.

Digital's past donations to M2C have allowed the Center to create the sophisticated CAD communications network which links its member universities, and which allows students to send integrated circuit designs to the Center. Digital also donated its mask making technology to the Center, which is an integral part of the chip fabrication process.

ATLANTA (SEPT. 26) PR NEWSWIRE - Hughes Aircraft Co. and Morris Brown College have entered into a partnership agreement aimed at enhancing the computer science department at the historically black college and providing cooperative research programs at both MBC and Hughes.

The multi-faceted partnership will consist of a variety of working arrangements involving students and faculty at the college and technical personnel of the aerospace company. It will include joint research projects and curriculum development, as well as faculty and student development programs.

Announcement of the innovative partnership agreement was made today at a breakfast meeting at the college's student center. In attendance were the presidents of Hughes and Morris Brown, plus city and state government officials and business leaders.

"The partnership is based on each institution bringing something to the 'marriage' that will benefit both sides," said Dr. Calvert H. Smith, president of the college.

Principal components of the partnership include a teaming arrangement between Hughes and the Morris Brown Research Institute to pursue research contracts; establishment of a MacIntosh computer laboratory at the college to assist students in developing data processing skills; and technical experts to be provided by Hughes to conduct seminars and provide consulting services.

Members of the Morris Brown faculty will be invited to participate in computer and data processing courses, both on campus and in Los Angeles, and summer employment opportunities, a $2,000 annual scholarship and career-development seminars will be offered for students.

D. Kenneth Richardson, Hughes' president and chief operating officer, said that the partnership was a formal acknowledgment and commitment that the two institutions will be working together in the future.

"The historically black colleges and universities must play an important role in helping us meet the challenges we are faced with," he said. "We will be looking to colleges such as Morris Brown for a steady supply of talented graduates needed to staff an increasingly technical workforce in the 1990s."

Los Angeles-based Hughes, with approximately 65,000 employees, is the nation's leading supplier of defense electronics. The company's long-standing relationship with colleges and universities nationwide includes partnerships with several of the historically black colleges, including Alabama A&M, Howard Jackson State, Morgan State, South Carolina State, Southern, and Tuskegee.

#90269p8466 09/26/1990 ~PR Newswire

TECUMSEH, MI (SEPT. 26) PR NEWSWIRE - Tecumseh Products Company (NASDAQ: TECU) announced today that its 1990 third-quarter operating results would include a special after-tax charge of approximately $19,200,000 or $3.51 per share to provide for estimated costs associated with clean up of certain PCB contamination of the Sheboygan River and Harbor Superfund Site in Wisconsin. This special third-quarter charge likely will result in the company reporting a net loss for the quarter of approximately $2.50 to $3 per share.

As previously reported, the U.S. Environmental Protection Agency (EPA) advised late in 1985 that the company, as well as others, allegedly had contributed to the Sheboygan River and Harbor contamination.

Shortly thereafter, the company commissioned an extensive study to be made by an independent environmental engineering firm in order to determine the nature and extent of such contamination and to identify remedial alternatives.

As a result of substantial progress in this study, the company and its consultants now initially have estimated that the cost of remedial action likely will be approximately $19.2 million (after income tax benefits).

In making such an estimate, the company has not taken into consideration the likely recovery of at least a portion of such costs from other sources, including insurance companies and other parties involved with the site.

Todd Herrick, president and chief executive officer, pointed out that the ultimate costs to the company will be dependent upon many factors beyond its control such as definitive remedial action requirements to be established by the EPA, rapidly changing technology and the results of any related litigation.

Herrick also emphasized that the company remains committed to environmental compliance and to the pursuit of any appropriate cost recovery opportunities with regard to the site.

Tecumseh Products Company is a leading worldwide manufacturer of refrigeration and air conditioning compressors and gasoline engines for lawn and garden applications. Sales in 1989 amounted to $1.5 billion.

LINDEN, NJ (SEPT. 26) PR NEWSWIRE - General Magnaplate (NASDAQ: GMCC) President Candida C. Aversenti announced today that the metallurgical coatings company has declared a semiannual dividend of three cents per share, a 50 percent increase over the previous dividends. The dividend will be Oct. 5, 1990 to shareholders of record on Sept. 14.

In announcing the dividend, Aversenti said that the increase "reflects our confidence that the strategic plans we have been implementing over the past 11 months will continue to allow us to prosper both short and long term. In some areas, in fact, we are already surpassing objectives. In the fiscal year ending June 30, 1990, gross revenues reached the record level of $10.4 million up 6.2 percent over last year."

Strategic acquisitions have allowed General Magnaplate to take advantage of significant growth opportunities in key regional industrial markets such as lumber and paper, food, pharmaceuticals, chemicals, and packaging, where its "synergistic" metal surface enhancement coatings prevent friction, metal wear and corrosion while improving the performance of metal parts in terms of surface hardness and lubricity.

The company's most recent expansions were the acquisitions of Magnaplate's Service Corporation in Texas in April, 1989 and General Magnaplate Wisconsin and General Magnaplate Canada in January, 1990.

Growth prospects are bright in a most timely way, according to Aversenti. "Chief among the growth opportunities is our ability to use specialized coatings technologies to 'substitute' for strategic metals.

"With more and more people in government and industry recognizing the potentially devastating impact impending strategic metal shortages will have on the Western democracies, General Magnaplate is poised to do its part to avoid the crisis.

"We will continue to develop innovative new surface enhancement coatings that significantly improve the performance of abundant, inexpensive metals such as aluminum, magnesium, cast iron, and low-grade steels. These can then be used in place of increasingly scarce and expensive strategic metals such as chromium, cobalt and manganese. For General Magnaplate this is both a patriotic obligation and a profitable opportunity - one we intend to pursue fully."

CONTACT: Candida C. Aversenti, president of General Magnaplate, (908) 862-6200.

WESTVILLE, NJ (SEPT. 26) PR NEWSWIRE - Mars Graphic Services Inc. (AMEX: WMD) today reported consolidated results of operations for the three and six months ended Aug. 31, 1990.

Sales for the six months ended Aug. 31, 1990, were $13,415,727 compared to $10,438,772 for the six months ended Aug. 31, 1989. Net income was $296,203 or $.14 per share (2,116,872 shares) compared to $472,527 or $.27 per share (1,779,360 shares). Sales for the three months ended Aug. 31, 1990, were

$6,856,760 compared to $6,074,449 for the three months ended Aug. 31, 1989. Net income for the three months ended Aug. 31, 1990, was $220,113 or $.10 per share (2,178,500 shares) compared to $332,774 or $.19 per share (1,779,360 shares) for the three months ended Aug. 31, 1989.

Mars sales for the three months ended Aug. 31, 1990, were $4,894,049 which resulted in net income of $244,305 or $.11 per share (2,178,500) compared to sales for the three months ended Aug. 31, 1989, of $4,519,323 which resulted in net income of $202,665 or $.11 per share (1,779,360 shares).

DiMark's sales for the three months ended Aug. 31, 1990, were $2,123,948 which resulted in a net loss for the period of $24,192 or $.01 per share. (Since DiMark was not acquired until Aug. 3, 1989, comparative results are not included.) DiMark generates its highest revenues during periods when it is engaged in the production phase of its projects for customers. Accordingly, it is not unusual for DiMark to experience losses during periods when its customer base is not heavily involved in production projects. It is anticipated that this year the larger volume production projects will occur in the third and fourth fiscal quarters.

Mars and DiMark occupy a prominent position in the direct response industry. The combination of Mars and DiMark created one of the few vertically integrated direct response marketing organizations in the country. The firm provides a comprehensive range of services including printing, product development, creative, data base marketing, production and administration to financial services, publishing and consumer products companies. Mars is traded on the American Stock Exchange under the symbol WMD. The company's registered trademark -- "We Make Deadlines" -- is reflective of its commitment to timeliness and service.

MONTREAL (SEPT. 26) PR NEWSWIRE - Alupower, Inc. today received one of the 1990 R&D 100 Awards for its Alwatt Battery Model SDL-1A. The awards are presented by R&D Magazine to recognize the 100 most significant technological advances of the year.

The Alwatt Battery is an aluminum-based salt-water-activated battery in which the only reactants are aluminum and water. The primary function of the battery is to generate electric power in sea- water. This particular application is to provide additional power in a small electric-powered research and rescue submarine.

The Alwatt battery system was created at Alupower, Inc., in New Jersey, and the SDL-1A version was developed for the Canadian Department of National Defense by Alupower Canada Ltd. and Alcan's Kingston Research and Development Center in Kingston, Ontario.

The R&D 100 Awards program is the only competition in the world to recognize the 100 most-significant new technical products of the past year. This international competition, which is in its 28th year, seeks to recognize innovators and organizations for outstanding practical technical developments and to identify significant technological advances.

Alupower, Inc., based in Warren, N.J., is a wholly owned subsidiary of Alcan Aluminum Corporation.

SARASOTA, FL (SEPT. 26) PR NEWSWIRE - After reporting four consecutive profitable quarters in fiscal 1990 totaling $504,485 in net operating income and $3,275,249 in sales, Tech:Time is pleased to announce that the results for the first quarter ended Aug. 31 will continue the profit trend.

The company generated sales of $741,202 and net operating income of $58,995 in the first quarter of fiscal 1991 representing an increase in net profit of 35 percent over the first quarter of fiscal 1990.

Management is confident about the development of the company and expects sales and earnings to continue growing as a result of previous decisions to sell products directly to end-users.

A comparative summary of selected first quarter 1991 and 1990 operating results is shown below:

Fiscal quarter ended	8/31/90	8/31/89
Net sales	$ 741,202	$ 733,289
Net income (loss)	$ 58,995	$ 43,458
Net income (loss) per share	$ 0.01	$ 0.007

Tech:Time Inc. is a manufacturer of computerized data collection terminals used for time and attendance, security, access control, job costing, labor distribution, scheduling, communications and messaging. Tech:Time's stock is traded in the Over-the-Counter market as a non-listed company.

#90269p8489 09/26/1990 ~PR Newswire

TULSA, OK. (SEPT. 26) PR NEWSWIRE - T/SF Communications Corp. (AMEX: TCM) today announced that its preliminary review of the second half of 1990 indicates that income will likely be approximately the same as or only slightly better than for the last six months of 1989. The company noted that certain analysts had projected better earnings for the second half of 1990 and that such projections were not likely to be achieved. The net effect of these preliminary projections for the last six months of 1990, when coupled with actual first half results would indicate that the company will probably sustain a slight loss for the entire year.

G. Douglas Fox, chairman of T/SF, stated, "The continuing problems in our New Jersey shopper-newspaper operation, particularly in its commercial printing division, will hold down expected results for the second half of 1990. These problems and the mixed results we expect from our Long Island shopper-newspaper because of the fast changing market conditions on Long Island, will result in disappointing earnings. Continued softening of the economy in the northeast is contributing to our current problems in New Jersey and New York. Our daily newspaper, information services and trade journal divisions are doing well and will likely complete the year with substantial improvement from 1989."

Fox continued, "Even with these earnings disappointments, T/SF continues to have substantial cash flow in excess of debt service requirements and a strong balance sheet. We are planning substantial operating changes to improve results for 1991."

Fox noted that the company's stock price had dropped significantly during 1990. He reported that the board of directors of T/SF had authorized the company to take steps to initiate a "Dutch auction" for up to 500,000 shares of its common stock. This process would allow stockholders to offer to sell their stock back to the company at a price specified by the tendering stockholder, subject to the company agreeing to the offered price. The company would then determine how many, if any, of the tendered shares it would acquire. The final terms of the offer have not been determined and the offer

will only be made by a formal tender offer when necessary Securities and Exchange Commission filings are made. While there is no assurance that the offer will finally be made, it is estimated that the auction offer, if made, will not occur until November, 1990.

MINNETONKA, MN (SEPT. 26) PR NEWSWIRE - Advance Circuits, Inc. (NASDAQ: ADVC) Minnetonka-based manufacturer of printed circuits, announced today record financial results for its 1990 fiscal year.

Sales for the fiscal year ended Aug. 25, 1990, were an all-time high of $88,274,000, an increase of 29 percent from 1989 sales of $68,551,000. Net income for the year was also an all-time record of $8,453,000 or $1.49 per share. This compares to net income of $5,358,000 or $.90 per share in fiscal 1989.

For the fourth quarter, the company reported sales of $22,816,000 and a net income of $2,163,000 or $.38 per common share. This compares to fourth quarter fiscal 1989 sales of $18,532,000 and a net income of $2,688,000 or $.46 per share which included a tax credit of $835,000.

Thomas F. Leahy, chairman, indicated that the company completed the fiscal year with record results in both the military and commercial divisions. The results reflected the company's continued expansion of capacity and upgrading of equipment. In the fiscal year of 1990, the company purchased $8.5 million of new equipment. The company completed the fiscal year with an order backlog of $41,509,000.

The company's common stock is traded on the NASDAQ National Market System under the symbol -- ADVC.

YPSILANTI, MI (SEPT. 26) PR NEWSWIRE - ENVOTECH, Inc., an Ypsilanti-based company, announced today that it is currently completing the formation of a new partnership with a German-based organization of Ameropa Umweltschutz, Limited, to provide consulting and environmental protection services for waste management projects in East Germany.

The announcement was made by Walter W. Tomyn, president of ENVOTECH, Inc.

The Halle site is a 1,000-acre former coal mine that has been used as a general landfill for several decades. The new company will utilize ENVOTECH's technical knowledge and expertise to determine the best remediation -- or cleanup -- plan for the site.

ENVOTECH is part of a related group of companies based in southeastern Michigan providing environmental protection services including both hazardous and non-hazardous waste treatment, recycling, processing and disposal services.

ENVOTECH is currently proposing a 350-acre hazardous waste landfill and incinerator facility inside an 1,800-acre site it owns in Michigan's Washtenaw County.

ENVOTECH and its related companies, recognized experts in both hazardous and non-hazardous waste management, were originally contacted by Ameropa Enterprises to assist in the development of treatment, processing and disposal facilities to be established throughout East Germany.

The related companies include: Wayne Disposal, Inc., operator of non-hazardous landfills and Michigan's only commercially available hazardous waste landfill operation; Michigan Disposal, Inc., a hazardous and non-hazardous liquid and sludge treatment and processing plant; and Michigan Recovery Systems, Inc., an industrial solvent reclamation and recycling operation.

Two other related firms have pioneered environmental enhancing techniques in Michigan. Willow Run Farms, Inc. operates a 45,000- square-foot (one acre) hydroponic greenhouse on top of a closed landfill near Willow Run Airport. Specialty herbs and salad greens are grown without dirt similar to the experimental program at Walt Disney World's Epcot Center.

The ENVOTECH companies provide comprehensive environmental protection technologies and services. They have extensive experience and expertise utilizing the abilities of chemists, engineers, sanitarians, biologists, industrial hygienists, horticulturists and other environmental protection specialists.

INDIANAPOLIS (SEPT. 26) PR NEWSWIRE - Quad Pharmaceuticals, Inc. announced today that, as a follow up to its previously announced suspension, the firm has been formally debarred by the Defense Logistics Agency (DLA) from

contracting with the federal government until Aug. 31, 1992.

According to Par Pharmaceutical (NYSE: PRX), Quad's parent company, President Kenneth I. Sawyer, "While Quad is of course disappointed in this decision, we look forward to the time when we can demonstrate that we are responsible to do business with the federal government."

In commenting further, Sawyer stated: "As with all federal authorities, Quad has cooperated with DLA on this matter. Indeed, we initiated the disclosures to FDA of the problems concerning Quad's history of regulatory compliance that were among the grounds cited by DLA in its decision, and that have also led to an investigation by the U.S. attorney of Quad. Quad will continue to work with federal agencies and the U.S. attorney's office to seek a speedy and fair resolution of any open issues."

This DLA action applies only to Quad and does not affect Par Pharmaceutical, Inc.

#90269p8516 09/26/1990 ~PR Newswire

CHARLOTTE, N.C. (SEPT. 26) PR NEWSWIRE - NCNB Corp. (NYSE: NCB) announced

today that it is strengthening its allowance for loan and lease losses in response to continuing weak economic conditions, and their effect on commercial real estate markets in the Southeast. NCNB presently expects to increase its allowance by $65 million, to approximately $590 million. With net loan charge-offs estimated to total approximately $75 million to $85 million, the provision for loan and lease losses in the third quarter of 1990 should approximate $145 million. This compares to a provision of $84 million in the second quarter.

Including the effect of this increased provision, preliminary estimates for NCNB's net income for the quarter are in the range of $55 million to $65 million, or 50 cents to 60 cents per common share. The company plans to announce its financial results for the third quarter on October 17.

"This action reflects our awareness of weakening economic conditions that have affected not only the real estate markets, but lending activities in general," said Hugh McColl, NCNB Chairman.

NCNB anticipates that the allowance for loan and lease losses at September 30 1990 will total $585 million to $600 million, or 1.60 percent to 1.65 percent of net loans and leases. This compares to an allowance of $525 million, or 1.46 percent of net loans and leases, at the end of the second quarter.

Nonperforming assets are expected to rise to $850 million to $900 million at the end of the third quarter. Included in this total are nonperforming loans of approximately $650 million, of which $250 million are paying interest. Nonperforming assets would represent approximately 2.30 percent to 2.45 percent of total loans and leases at September 30, 1990, or below the average for major regional banks based upon second quarter results. Nonperforming assets stood at $695 million, or 1.94 percent of total loans and leases, at June 30, 1990.

NCNB Corp. is a bank holding company with $66.2 billion in assets and more than 900 banking offices in seven states.

#90269p8525 09/26/1990 ~PR Newswire

CHARLOTTE, NC (SEPT. 26) PR NEWSWIRE - Hoechst Celanese Technical Fibers will increase its cellulose acetate tow and flake capacity worldwide by 32,500 and 55,000 metric tons, respectively, by 1994.

That will result from a combination of expansion and productivity improvements at locations in the United States, Belgium, Canada, Mexico, and a joint-venture operation in the People's Republic of China.

Hoechst Celanese is expanding and debottlenecking the productivity of its acetate tow and flake capabilities in anticipation of continuing high levels of demand worldwide.

A just-approved, $100-million-plus expansion of the company's joint-venture cellulose acetate filter tow plant at Nantong in China's Jiangsu Province will double tow capacity from 1990's 12,500 metric tons to 25,000 metric tons and will add a 25,000-metric-tons-per year acetate flake operation.

By 1994, productivity improvements and expansions currently in progress will add a combined 30,000 metric tons of acetate flake capacity at the company's Rock Hill, S.C., Narrows, Va., and Ocotlan, Mexico, plants and a total of 20,000 metric tons of tow capacity at Narrows, Edmonton, Canada, and Lanaken, Belgium.

The Nantong Cellulose Fibers Co. Ltd. plant brought on stream in late 1989 by Hoechst Celanese and China's Jiangsu Tobacco Co. at a rated annual capacity of 10,000 metric tons already has improved productivity to 12,500 metric tons per year of output.

An additional 12,500 metric tons of tow capacity will be brought on stream there by the first half of 1992. The acetate flake facility is targeted for completion there in 1994. Engineering for both facets of the Nantong Cellulose expansion is in progress.

Nantong Cellulose Fibers Co. Ltd. is the only acetate tow producer in China. Its products are sold exclusively in the People's Republic of China, the world's fastest-growing cigarette tow market.

Hoechst Celanese Technical Fibers and its Filter Products Division are parts of Hoechst Celanese Corp., a wholly owned subsidiary of Hoechst AG of West Germany. Hoechst Celanese has leading positions in chemicals, fibers, advanced materials and technologies and the life sciences.

#90269p8527 09/26/1990 ~PR Newswire

NEWTOWN SQUARE, PA (SEPT. 26) PR NEWSWIRE - ARCO Chemical Co. (NYSE: RCM) executives today met with financial analysts in New York to discuss several key issues, including the restart schedule for the Channelview, Texas, plant.

President and Chief Executive Officer Harold A. Sorgenti announced that the first unit had been successfully restarted in mid-September. The unit produces methyl tertiary butyl ether (MTBE), a gasoline- blending ingredient that

reduces automotive emissions. The entire Channelview complex had been shutdown following an explosion and fire on July 5. According to the current schedule for restarting the remaining units, butanediol should be on stream by the end of the month, polyols in October, and the propylene oxide/styrene plant in December.

Sorgenti said that insurance should mitigate a substantial portion of the financial impact of the accident. The company has business interruption coverage with a $12.5 million deductible, which was met in the third quarter, and it is considering accruing a portion of the business interruption claim in the third quarter. The company has property damage insurance with a $20 million deductible; however, the depreciated value of the assets destroyed at the plant is significantly less than that number. "The personal injury litigation will be complicated and take some time to be resolved. It is difficult to estimate the financial impact any ultimate resolution will have," Sorgenti said. "Our dividend and our capital programs will not be affected," he said.

He also mentioned that the company had completed one equity styrene arrangement and has a letter of intent for a second. With the existing equity arrangement, the partner will invest in the new propylene oxide/styrene plant now under construction at Channelview. ARCO Chemical will operate the plant. The partner provides raw materials and pays its share of the plant operating costs. Sorgenti said: "All told, with these arrangements we have new commitments representing essentially the entire styrene capacity of the new plant, or more than one billion pounds annually."

ARCO Chemical Co. is a leading multinational manufacturer and marketer of intermediate chemicals and specialty products used in a broad range of consumer goods.

#90269p8528 09/26/1990 ~PR Newswire

DETROIT (SEPT. 26) PR NEWSWIRE - A lawsuit was filed today in Wayne County Circuit Court on behalf of Detroit taxpayers charging the Detroit City Council acted illegally in authorizing tax dollars to help finance the Comerica Bank riverfront project.

"The city cannot legally subsidize a private venture that does not predominantly serve the public interest," explained Richard A. Soble, one of the attorneys filing the suit.

"There is no constitutional authority which allows tax dollars to be used in a business project which does not clearly and unequivocally serve the public in

a manner which substantially exceeds the private interest," said Ronald Reosti another of the plaintiffs' attorneys. "With Comerica," Reosti charged, "the matter is clear. This program fails to meet even the minimum requirements."

Evidence that the public benefit is not clear, the lawyers argue, includes the failure of City Council to demand or be given architectural drawings, an environmental impact statement or zoning board approval. In addition, the plan is not consistent with the city's own Master Plan. Also, the bank has yet to disclose whether it has obtained the private financing which is necessary to begin the project.

The legal team acting for the plaintiffs include attorneys Neil Bush and Deborah A. LaBelle, all acting on behalf of the local chapter of the National Lawyers Guild.

The case will be heard by Circuit Court Judge Susan Borman, who already has a lawsuit before her on the same project, filed two weeks ago by Council President Maryann Mahaffey regarding the city's authority to demolish Ford Auditorium, a private gift to the city.

CONTACT: Atty. Richard Sobel, (313) 965-0500; or Morris Gleicher of MG Associates, Inc., (313) 864-5151, for the plaintiffs.

MINNEAPOLIS (SEPT. 26) PR NEWSWIRE - Sienna Technologies, Inc., Eagan-based developers of testing equipment for semiconductors, and Investar Acquisition Corporation, a wholly own subsidiary of Investar, Inc., today completed a merger of the two companies.

Under terms of the agreement shareholders of Sienna Technologies will own approximately 74 percent of the new company. The company is named Sienna Technologies, Inc.

In announcing the merger, Sienna President Peter Erdman said, "The merger will help Sienna meet a growing industry demand for its systems, as well as develop new products to meet the needs of its customers throughout the world."

John Trucano, president of Investar, said the merger will accomplish three things: provide an excellent growth company for Investar shareholders, develop growth opportunities for Sienna Technologies, and provide liquidity for Sienna's shareholders.

Sienna Technologies was established in 1988 to develop and market a line of testing equipment to evaluate semiconductor reliability. The company had sales of $1.8 million for the fiscal year ended Dec. 31, 1989, with earnings of $190,000.

Investar was formed in 1988 as a "blind pool," closing its public offering in July 1989. Investar, Inc., is traded on the local OTC market.

CONTACT: John Trucano of Investar, 612-830-0988; Edward Raupp of Sienna Technologies, 612-688-6106; or Anders Davidson of Shepherd & Shaw Communications, 612-338-7057, for Investar and Sienna Technologies

TALLAHASSEE, FLA. (SEPT. 26) PR NEWSWIRE - Three Florida agencies today announced a recall of contaminated oysters sold under the label "Hilton's Willapoint Fresh Oysters," shipped to Florida from Washington state. The oysters can be identified by labels containing Washington certification number 006 and "sell by" dates of Sept. 27, Oct. 2 and Oct. 4.

In Florida, the oysters are sold in cans, plastic wrappings and buckets. The Department of Health and Rehabilitative Services and the departments of Natural Resources and Agriculture and Consumer Services jointly have placed stop-sale notices on all such oysters shipped to Florida merchants from the Coast Oyster Company.

The oysters contain a neurotoxin called paralytic shellfish toxin. The toxin causes a type of food poisoning that can lead to numbness of the mouth, lips, face and fingertips. In more severe cases, the toxin can cause difficulty in swallowing, speaking and walking.

The toxin rarely is fatal, and symptoms usually disappear within two days. Some victims experience a floating sensation, while others become nauseated.

"Anyone who has recently eaten oysters and exhibits these symptoms should see a doctor immediately and then report their illness to a local HRS county public health unit," said Dr. Robert Calder of the HRS Office of Disease Control.

Anyone who has purchased any of these oysters should not eat them. They should notify the vendor where the oysters were sold, Calder added.

Questions can be directed to the local HRS county public health units, the Department of Natural Resources at 904-488-5471, or the Department of Agriculture and Consumer Services at 904-488-3951.

CONTACT: Steve Konicki of the Florida Department of Health and Rehabilitative Services, 904-488-4854

ARLINGTON, VA (SEPT. 26) PR NEWSWIRE - As part of its previously announced plan to reduce growth during the next several years, USAir has reached agreement with the Boeing Commercial Airplane Group to reschedule the delivery of 16 new aircraft from 1991 and 1992 to 1993 and 1994.

This is in addition to plans announced earlier this year to reschedule 12 Boeing 737-300/400 aircraft from 1991-92 until 1995. USAir also has agreed to convert ten existing options for 737s into firm orders, with deliveries scheduled for 1994.

"Our fleet size at the end of 1992 will remain relatively unchanged from the present total of about 445 jet aircraft," said Seth E. Schofield, USAir president and chief operating officer.

USAir will take delivery of nine of the 23 Boeing 737-300/400 aircraft previously scheduled for delivery during 1991-92. Deliveries of the remaining 14 jets will be rescheduled. Two 767-200s will be delivered as planned in 1991 while two originally slated for delivery in 1992 will be rescheduled, one for 1993 and the other in 1994.

The airline is in the process of phasing out about 28 older, non-advanced models of the 727-200 and 21 non-advanced 737-200s between 1990 and 1992. These aircraft will be made available for sale.

#90269p8557 09/26/1990 ~PR Newswire
NEW YORK (SEPT. 26) PR NEWSWIRE - The partial purchase of two separate concert promoting organizations, John Scher's Metropolitan Entertainment Inc.,

and Jim Koplik and Shelly Finkel's Cross-Country Concerts, was announced today by Alain Levy, executive vice president of PolyGram International and chairman of PolyGram Holding Inc. The move becomes the basis for the establishment of the new PolyGram Diversification Division, of which John Scher will become president.

The Diversification Division will be a part of PolyGram Holding Inc. (PHI), the holding company for A&M, Island and PolyGram Records and PolyGram Group Distribution. The Diversification Division will concentrate on areas of creating new business, such as pay per view, merchandising, tours, facility development and artist management. PolyGram will be funding the new division with a substantial investment. The division will be based in New York.

The agreement to purchase a portion of both Metropolitan and Cross- Country was made by the PHI board of directors, which includes Levy, A&M president and CEO, Jerry Moss and Island Records founder, Chris Blackwell.

As a result of the PolyGram purchase of a part of both promotion firms, the two companies, Metropolitan and Cross-Country, have merged, with the new company to maintain the Metropolitan name, and to continue to operate out of its Montclair, N.J., offices. Koplik will become president of the firm, while Scher assumes the new title of chairman of the board.

Cross-Country has for more than 20 years, been an active promoter in major Southern New England locations, including New Haven, Hartford and Springfield, as well as the New York State capitol district. A notable achievement for the company was the staging of the historic Watkins Glen Festival in July of 1973, where the Allman Brothers Band, the Grateful Dead, and The Band played for more than 600,000 fans, then and now, the biggest single gathering for a live concert. The company also exclusively books the New Haven club known as Toad's Place, where both the Rolling Stones and Bob Dylan chose to start their recent tours.

Metropolitan Entertainment Inc., based in Montclair, N.J., is one of the nation's leading concert promotion and talent management companies. PolyGram has purchased a substantial interest in the firm, and also has the option to buy the entire company.

#90269p8559 09/26/1990 ~PR Newswire

ELGIN, ILL. (SEPT. 26) PR NEWSWIRE - Donald W. Brinckman, chairman and chief executive officer of Safety-Kleen Corp. (NYSE: SK), announced today that Safety-Kleen achieved record revenue and net earnings in the third interim reporting period of 1990.

Revenue for the 12 weeks ended Sept. 8, 1990, was $136,635,000, an increase of 23.7 percent over 1989. Net earnings increased 19.8 percent to $12,079,000. Earnings per share were $.35, compared to $.30 last year. Year-to-date revenue increased 22.8 percent to $395,123,000 and net earnings were up 15.3 percent to $35,267,000. Earnings per share for the thirty-six weeks were $1.03 versus $.91 in 1989.

Brinckman said, "Revenue of the core Parts Cleaner Service was $218,878,000 year-to-date in 1990, an increase of $27,609,000 or 14.4 percent over 1989. Revenue of the newer services was up 35 percent to $176,245,000."

"Growth in parts cleaners in service remained strong, with an increase of approximately 41,800 units or 8 percent from the same time last year," Brinckman added. "Industrial customers accounted for 17,700 of the increase in parts cleaners in service, representing a 24.9 percent increase over the installed base a year ago. At the same time, parts cleaners in service in the more mature non-industrial market increased 5.4 percent or 24,100 units over last year."

"The Fluid Recovery Service continued to register strong growth in the current quarter," Brinckman added. "Revenue of this service year-to-date was $29,737,000, an increase of 125 percent from $13,198,000 last year. This service is now being offered through 110 of our branches, up from 74 branches a year ago."

"Revenue of the Oil Recovery Service was $53,895,000 year-to-date, up 42 percent from $38,068,000 last year," Brinckman said. "We are now collecting waste oil through 62 of our branches in the United States. We plan to expand this service to an additional six branches by the end of 1990."

Brinckman said, "Our earnings for the current quarter were adversely impacted by greater losses from our European joint venture operations. Our share of these losses was $798,000 in the third quarter of 1990, an increase of $496,000 from last year. Year-to-date our losses have totaled $1,635,000, an increase of $779,000 over last year. We planned losses in these operations for the full year, since they are still in the developmental stage, but losses are running somewhat higher than budgeted."

"The dramatic increase in the price of crude oil since the end of July 1990 has resulted in increased prices for various refined petroleum products," Brinckman said. "While these price changes did not have a significant impact on our third quarter results, we are now seeing large increases in the cost of virgin solvents used in the Parts Cleaner Service and in the price of vehicle fuels. We have increased prices in the domestic Parts Cleaner Service effective Oct. 8, 1990, in response to these cost increases. Longer term, increased crude oil prices, if sustained, should result in higher earnings from the oil recovery business due to increased selling prices for the

re-refined lubricating oil and industrial fuels."

DALLAS (SEPT. 26) PR NEWSWIRE - LTV Missiles and Electronics Group (NYSE: QLTV) announced that its Missiles Division received a contract for approximately $10 million to develop a Kinetic Energy Anti-satellite system for the U.S. Army.

LTV is a subcontract team member on the ground-launched anti-satellite program with Rockwell International, El Segundo, Calif., which received the contract from the U.S. Army Strategic Defense Command.

The potential value of the program to LTV could exceed $200 million through full-scale development.

During the initial 24-month contract, the Missiles Division will support system engineering and missile integration and provide the missile booster, launcher and ground support equipment; integrated logistics; and manpower and personnel integration planning.

The division will also be responsible for the guidance processor that controls the missile's flight and satellite intercept.

LTV is well-known for its successful U.S. Air Force air-launched ASAT program. Although the kinetic energy kill vehicle performed a flawless satellite intercept in 1985, the program was terminated in 1988 due to congressional restrictions on testing and development.

The Missiles Division manufactures missiles, rockets and space systems and is involved in a wide variety of advanced technology research and applications. It is one of three divisions of LTV Missiles and Electronics Group which also produces electronics, avionics and military vehicles.

ARLINGTON, VA (SEPT. 26) PR NEWSWIRE - The Board of Directors of USAir Group, Inc. (NYSE: U) decided today to suspend for an indefinite period the payment of the regular quarterly dividend of three cents per share on the company's common stock.

"We recognize that the company's historic three cent quarterly dividend, while comparatively modest, is nonetheless important to many of our stockholders.

"However, in light of the company's recent financial performance and the poor outlook for the nation's economy and its effect on air travel, the Board determined that the long term interests of the company and its stockholders would be better served by conserving funds to meet the company's ongoing capital needs," said USAir Group Chairman and President Edwin I. Colodny. He noted that the Board intends to review the company's dividend policy periodically.

DETROIT, (SEPT. 26) PR NEWSWIRE - Andrew J. Soffel, president of Crowley, Milner & Company (AMEX: COM), announced today that a reduced quarterly cash dividend of 12-1/2 cents per share had been declared by the company's board of directors. The dividend will be paid on Oct. 26, 1990, to shareholders of record at the close of business on Oct. 12, 1990.

In making the announcement, Soffel stated: "This has been a difficult year for the retail department store business across the nation and particularly in southeastern Michigan. Although Crowley's has performed well by comparison to many of its peers in the Midwest, we are all suffering the effects of the slower economy. We have been discussing the long-range strategic plans of Crowley's for many months and have retained the investment banking firm of Kidder, Peabody & Co. to advise management and the board of directors as to their view of the most desirable course of action to pursue in order to enhance shareholders' value and capitalize on the long-standing position of Crowley's in our market. We expect that the board will be in a better position to implement specific objectives to fulfill this goal as we complete the Christmas season and have a better view of how the company has performed this year."

#90269p8571 09/26/1990 ~PR Newswire

NEW YORK, (SEPT. 26) PR NEWSWIRE - Chock full o' Nuts Corporation (NYSE: CHF) today reported net income of $4,407,000, or $.54 per share, for the year ended July 31, 1990. This compares to net income of $3,461,000, or $.43 per share, in fiscal 1989. The excellent results for the year were obtained despite pre-tax charges of $6,000,000 ($.47 per share) for a loss related to the termination of real estate agreements and $900,000 ($.06 per share) for a loss

on note receivable from sale of real estate.

The current year's results include an after- tax $1 million ($.12 per share) extraordinary gain on redemption of convertible subordinated debentures. Last year's results reflect a $3,000,000 pre-tax charge ($.24 per share) covering inventory write- downs and losses on green coffee purchase commitments, an unrealized pre-tax gain of $2,484,000 ($.20 per share) on marketable equity securities and an extraordinary credit of $671,000 ($.08 per share) arising from the utilization of capital loss carryforwards. Net sales for the year were $243 million compared to $239 million last year. Operating profits from food product sales increased by 112% to $19,634,000 reflecting increased margins as well as the favorable results of the instant coffee business acquired from Tetley, Inc. on November 7, 1989.

The net loss for the current quarter was $2,438,000 ($.30 per share) versus a loss of $557,000 ($.07 per share). The current quarter's results include the aforementioned real estate transactions, while last year's quarterly results included a gain on marketable equity securities of $924,000 ($.08 per share) and the aforementioned inventory write- downs and losses on purchase commitments. Net sales were $62 million compared to $62.6 million in the year-ago quarter.

Leon Pordy, chairman and chief executive officer, stated, "The continued growth of all of our food product operations generated a record performance for this segment of our business. Retail coffee operations had its highest operating income in the company's history. We are pleased by the results of our food service coffee operations and the integration of our recently acquired instant coffee business."

Chock full o' Nuts Corporation roasts, packs and markets regular, instant and decaffeinated coffees under the Chock full o' Nuts label. Its best known coffee product is its premium, vacuum packed, all-method grind coffee. The company is also one of the largest marketers of food service and private label coffee, tea and beverage products, as well as the number one supplier of in the shell peanuts in the United States.

WHITE PLAINS, N.Y. (SEPT. 26) PR NEWSWIRE - American Savings Bank (NYSE: ASB) today announced that its board of directors did not declare the quarterly cash dividend on American's $1.8125 cumulative convertible exchangeable preferred stock. The dividend would normally have been declared in September for payment on Nov. 1, 1990. The bank in April suspended payment of its common

stock dividend and in June suspended payment of the quarterly preferred dividend (payable in August), citing its operating results, uncertainties in the real estate market and the economy generally and the regulatory environment.

The bank's preferred stock is cumulative; unpaid quarterly dividends accumulate without interest as obligations of the bank. Preferred dividends which are in arrears may be declared and paid as and when the board determines. The bank's charter provisions governing its preferred stock and New York law prohibit payment of dividends on the bank's common stock when preferred stock dividends are in arrears.

American Savings Bank is a New York State-chartered savings bank with executive and administrative offices in White Plains, N.Y. Together with its wholly owned subsidiary, Riverhead Savings Bank, FSB, American operates 39 branch offices in New York City and in Westchester, Nassau and Suffolk Counties. The bank's common stock and $1.8125 cumulative convertible exchangeable preferred stock, Series A are both listed on the New York Stock Exchange.

BEVERLY HILLS, CA (SEPT. 26) PR NEWSWIRE - International Cablecasting Technologies Inc. is pleased to provide an update on the status of its proposed emigration from Canada to the United States and its SEC Registration and NASDAQ listing. Following unanimous shareholder approval in late July, the company submitted its Plan of Reorganization to the respective Canadian regulatory authorities and subsequently received both local and federal Canadian clearances to emigrate the Company. ICT's Registration Statement (Form S-1), filed with the U.S. Securities and Exchange Commission (SEC) was subsequently amended. The company expects that the most recent amendment filed will receive SEC approval within a few days. ICT's application for NASDAQ listing has been submitted and should be effective fourteen days after SEC approval of the Registration Statement. NASDAQ has reserved the trading symbol ''CDMX'' for the company's shares; the company's current Vancouver Stock Exchange trading symbol, ICC, will be changed to ''DMX''.

Following the effective implementation of the company's reorganization, ICT (the newly listed U.S. company) will appoint William E. Johnson, Dean A. Gilbert and Kent Burkhart to its Board of Directors.

Johnson is the chief executive officer of Scientific-Atlanta, Inc. (S.A), a leading manufacturer of cable television electronics and satellite based communication networks, and the manufacturer of the Company's cable digital

audio tuner. He is a graduate of Yale University and the Harvard Business School where he was a Baker Scholar. Prior to joining S-A, Johnson had his own consulting firm, William E. Johnson Associates, which specialized in major strategic redirections and turnarounds. The firm's clients included GE, GTE, Hoffman La Roche, Allied Chemical, American Standard, the American Stock Exchange and S-A.

Gilbert is the Vice-President of Marketing and Programming for KBLCOM Incorporated, a multiple system operator representing nearly one million subscribers throughout the U.S. and a charter affiliate of the Company. Prior to joining KBLCOM, he was the vice president - marketing and public affairs for Paragon Communications, a joint venture between Time Inc. and Houston Industries; vice president - corporate marketing for TKR Cable Company, a joint venture between Knight-Ridder and TCI and; he held various marketing management positions with Continental Cablevision.

Burkhart is the chairman of Burkhart/Douglas & Associates (B/D & A). B/D & A provides consulting services in administration, programming, marketing, merchandising for radio stations and is considered to be the premiere company in the development of new music formats in the U.S. radio industry. In addition, Burkhart is the president and director of Degree Communications, which owns radio stations in Austin, TX and Greenville-Spartanburg, SC. B/D & A is the exclusive programmer for ICT's premium digital audio service.

COARSEGOLD, CA (SEPT. 26) PR NEWSWIRE - Sierra On-Line Inc. (NASDAQ: SIER) announced today that it will assume European distribution rights to Sierra and Dynamix products on Oct. 1, 1990.

Sierra has established Sierra Limited, U.K., to distribute its line of entertainment software in Europe. Previously, Sierra products were distributed in the United Kingdom and Europe by Activision U.K.

With the re-acquisition of distribution rights, Sierra has opened offices for Sierra Limited U.K. in Reading, just outside London. The company will maintain a customer service line, with Sierra trained personnel, to provide support to Sierra computer game fans in Europe.

Ken Williams, Sierra president and chief executive officer, said, "Sierra is already a recognized brand in Europe and the U.K., with thousands of loyal fans. We feel that by opening Sierra Ltd., we can further serve and support our British and European customers."

Sierra Ltd. will distribute more than 12 new titles for the 1990 Christmas season, with the much anticipated King's Quest V, from Sierra superstar designer Roberta Williams, heading the list. Also included are "Space Quest IV " "Quest for Glory II" (formerly "Hero's Quest"), "Oil's Well," "Jones in the Fast Lane," and updated versions of "King's Quest" and "Mixed-Up Mother Goose."

Dynamix, a Sierra subsidiary, will offer a mixture of products for 256-color computer systems, including "Stellar 7," a space battle arcade game, and a World War I flight simulator, "Red Baron." Dynamix will also be releasing two 256-color adventure games - "Rise of the Dragon" and "Heart of China."

Sierra plans home language versions of several games in French, German and Spanish in the coming months. CD-ROM products are also being readied for the European market, with "Mixed-Up Mother Goose" the first of many CD-ROM titles scheduled for release in late 1990 and 1991.

Sierra develops and publishes interactive animated adventure software for home computers. The company's products feature high quality graphics, music and sound effects and are designed for IBM PCs and compatibles, Atari ST, Amiga, and Macintosh computers.

#90269p8603 09/26/1990 ~PR Newswire
MOSCOW (SEPT. 26) PR NEWSWIRE - McDonnell Douglas (NYSE: MD) announced in Moscow today that the company's transport aircraft division is making a major

commitment to acquire commercial airline business in the Soviet Union.

Ves Zommers, commercial marketing regional vice president of Douglas Aircraft Co., said the company's popular MD-80 twin-jet airline series and its new MD-11 wide-cabin tri-jet are well-suited to the Soviet Union's domestic and international airline needs.

Speaking at the International Exhibition of Airline and Airport Equipment being held in Moscow this week, Zommer said, "McDonnell Douglas jetliners offer a combination of range capabilities and load capacities that are just right for the kinds of routes flown by carriers in the Soviet Union and for their international flights.

"We are very pleased to have this opportunity to introduce our advanced jetliners to the people of the Soviet Union." MD-80s can carry as many as 172 passengers non-stop over ranges up to 2,880 miles (4,635 km). MD-11 maximum passenger capacity is more than 400 and the aircraft is capable of flying more than 8,000 miles (12,874 km) non-stop with mixed-class passenger loads.

McDonnell Douglas' short-to-medium range twin-jets are currently in service with more than 50 operators worldwide. MD-80 aircraft passed two milestones this year when the company delivered its 750th MD-80 and when the twin-jet aircraft carried its 500 millionth passenger.

Including DC-9 airliners, McDonnell Douglas has delivered more than 1,750 twin-jets and currently has firm orders and other commitments for more than 1,000 additional twin-jets.

The quiet and fuel efficient MD-80 is available in five versions, offering customers different range capabilities. Comfortable five-across seating makes the plane a popular choice of airlines and passengers alike.

The company's latest entry into the wide-cabin market, the MD-11, is in flight test. McDonnell Douglas expects certification of the aircraft by the U.S. Federal Aviation Administration this fall.

Deliveries to customers will begin immediately after certification. These aircraft will be equipped with General Electric and Pratt & Whitney engines. Certification of MD-lls with Rolls-Royce engines is expected in 1993. The company has orders and other sales commitments for 379 MD-11s from 32 customers.

McDonnell Douglas transport aircraft are assembled at the Douglas Aircraft division facility in Long Beach, Calif.

#90269p8604 09/26/1990 ~PR Newswire

PORT NEWARK, N.J. (SEPT. 26) PR NEWSWIRE - EPI International, Inc. (NASDAQ: EPIX) announced today that it has discovered a number of financial irregularities which it alleges were committed by its former vice president and chief financial officer and that, as a result of this discovery, it has terminated the employment of this officer. The officer has also resigned as a director of the company. Due to the termination of this officer, the company is unable at this time to determine the exact amount of the financial irregularities. The financial irregularities discovered by the company consisted of the following:

1. Erroneous reports were submitted to the company's major lending institution. The reports overstated sales and accounts receivable. Based on these erroneous financial reports, the bank loaned substantial sums to the company. While the company is presently negotiating with the bank for the repayment to the bank of the entire outstanding loan balance of approximately $5,900,000, the bank has notified the company that it will not make any further advances to the company. As a result, the company is attempting to obtain additional funding from outside investors.

2. The company overstated its sales and cost of goods sold for the third quarter of its fiscal year ended June 30, 1990 by approximately $2,200,000 and $1,000,000 respectively. As a result, while the company had previously reported a loss before income taxes of approximately $450,000 for such quarter and earnings before income taxes of approximately $540,000 for the first nine months of that fiscal year, it actually had a loss before income taxes of approximately $1,650,000 for its third fiscal quarter and a loss before income taxes of approximately $660,000 for the first nine months of the fiscal year.

3. The company's former vice president and chief financial officer issued checks of the company on non-existent funds. At the time this was discovered the company had overdrawn its account at one of its other banks by $790,000. The company believes that all of the funds were used for corporate purposes. The company has entered into an agreement with such bank which requires repayment of the entire $790,000. The company has already paid to such bank the sum of $290,000 within the last several weeks.

The company also announced today that it had decided to discontinue its warehouse and rack jobbing operations as a result of substantial losses by the operation during the second half of its fiscal year ended June 30, 1990. As a result of these terminations, the company will recognize a charge against operations of approximately $600,000 for its 1990 fiscal year.

NEW YORK (SEPT. 26) PR NEWSWIRE - Credit Suisse Financial Products (Credit Suisse FP), the swaps and derivative products joint venture of Credit Suisse and CS First Boston, Inc., today announced the opening of a Representative Office in New York to serve clients in the United States, Canada and Latin America.

Credit Suisse FP, a AAA/Aaa-rated bank incorporated in England with unlimited liability, commenced operations in London on July 16. On Sept. 25, the license to maintain a Representative Office in New York was issued by the New York State Banking Department.

Allen D. Wheat, chief executive of Credit Suisse FP and president and chief executive officer of CS First Boston Pacific, said, "Credit Suisse FP intends to be at the cutting edge of financial technology and innovation; creating value for clients by solving complex risk management problems and providing superior financing and investment alternatives through derivatives. The Representative Office in New York will now allow us to serve our clients in Canada and the Americas."

John M. Hennessy, president and chief executive officer of CS First Boston, Inc., said, "A strong derivative products capability is a key element in serving client's needs in the 1990s -- both issuers and investors. With Credit Suisse FP and its new Representative Office in New York joining its existing offices in London and Tokyo, that capability is now in place worldwide."

"We are pleased to represent the comprehensive product range of Credit Suisse FP in the Americas," said James P. Healy, managing director and co-head of Credit Suisse FP's New York Representative Office. "From plain vanilla

interest rate swaps to the most complicated currency and equity-linked hedging financing and investment strategies, Credit Suisse FP has capabilities unmatched in the world today."

"We have the opportunity to provide something of unique value to our clients; leading edge financial products offered under the umbrella of AAA/Aaa ratings from Standard & Poor's and Moody's," noted Benjamin C. Weston, managing director and co-head of Credit Suisse FP's New York Representative Office. "Coupled with the much broader financing and advisory activities of Credit Suisse and CS First Boston, Inc., this is a powerful combination."

PURCHASE, NY (SEPT. 26) PR NEWSWIRE - IBM Corporation and U.S. Trust Corporation (NASDAQ: USTC) today announced their intention to form a new joint venture, Financial Technologies International L.P. (FTI), which will provide integrated information systems solutions to trust banks and other customers in the financial services industry.

FTI will develop, market and support trust and investment management software products. These new solutions will be based on the hardware, software and service offerings of IBM and Financial Technologies International, Inc., which is currently a subsidiary of U.S. Trust.

Ownership of FTI will be shared by IBM, U.S. Trust and FTI's management. Financial details of the arrangement were not disclosed.

FTI will be located in New York City, where it will continue operations under the new ownership arrangement upon completion of the agreements.

Existing offerings include the Asset Management System (AMS), which IBM announced in June as a cooperative software product; and the Trust and Securities Industry Relational Data Model and Data Base, an IBM product announced in March 1990 that FTI, Inc., developed for IBM.

U.S. Trust Corporation is an asset management, private banking, fiduciary and securities services firm. Through its principal subsidiary, United States Trust Company of New York, and its regional subsidiaries in California, Florida and Texas, U.S. Trust provides financial services to individuals and institutions nationwide.

#90269p8618 09/26/1990 ~PR Newswire

MIAMI (SEPT. 26) PR NEWSWIRE - South Florida families and friends of service personnel busy sending free fax messages to Saudi Arabia from AT&T Phone Center Stores may begin receiving phone calls from Americans in the desert country next week, when AT&T begins a new calling service from Saudi Arabia.

AT&T will be allowing U.S. service personnel in Saudi Arabia to make free three-minute phone calls to celebrate the introduction of USADirect(R) Service from Saudi Arabia. The service, which will allow Americans stationed in Saudi Arabia to reach an AT&T operator from most telephones by simply dialing 1-800-100, will begin on Oct. 3.

"AT&T is acting out of concern for military personnel stationed in Saudi Arabia who have had a difficult time communicating with friends and family," said Frank Ianna, vice president for AT&T International Communications Services. "We want to give all those who are serving in Saudi Arabia a chance to call home." With the addition of Saudi Arabia, USADirect Service is now available in 82 countries.

USADirect from Saudi Arabia is the second service offered by AT&T in the past week. Last Friday, AT&T began DESERT FAX, a free fax service allowing the families and friends of service personnel stationed in the Middle East to send a one-page fax message per day from AT&T Phone Center stores.

"AT&T's DESERT FAX service has been very popular in South Florida, with thousands of faxes having been sent from the 14 area Phone Center stores since the program began last Friday," said Barry Johnson, regional manager-AT&T in South Florida. "USADirect will connect the circle of communication, allowing American service personnel to keep in touch during these most trying times."

Travelers, expatriates, journalists and military personnel have found the five-year-old USADirect Service a good way to keep in touch with their friends and relatives in the United States.

USADirect Service is economical because calls are billed at AT&T rates and callers generally avoid hotel surcharges. It is also convenient to use, because calls go directly to American operators, avoiding language barriers.

WASHINGTON (SEPT. 26) PR NEWSWIRE - Rockwell International Corp. (NYSE: ROK) and Westinghouse Electric Corp. (NYSE: WX) today signed a memorandum of understanding (MOU) to jointly work on the development of a nuclear thermal propulsion system for the nation's Space Exploration Initiative (SEI).

Robert D. Paster, president of the Rocketdyne Division of Rockwell International, and Dr. Richard J. Slember, vice president and general manager of the Westinghouse Energy Systems Business Unit, signed the MOU to combine the talents, experience and resources of the two companies. The intent is to define and pursue technologies which will lead to the evaluation and application of a nuclear thermal propulsion system in support of the Bush administration's SEI goals. Both companies have long and successful records of accomplishments in the areas of energy, space and propulsion.

A nuclear thermal propulsion system uses the heat from a nuclear fission reactor to raise the temperature of a gas propellant, which in turn expands to provide thrust. Nuclear thermal propulsion provides performance levels unavailable in chemical rockets that can, for example, significantly reduce interplanetary trip times.

Slember, noting that Westinghouse has the nation's broadest base of nuclear experience with first-of-a-kind projects for the Department of Energy, said his company will concentrate on the project's nuclear aspects.

Westinghouse's space program experience includes development of the first Nuclear Engine for Rocket Vehicle Application (NERVA) power systems. The company also is working on a multimegawatt space nuclear power supply and is part of the team currently developing the SP-100 Ground Engineering System, a 100-kilowatt space nuclear electric power source.

Rocketdyne will bring to the team a highly successful 35-year record of accomplishments in rocket propulsion dating from the earliest days of America's space program which includes providing the booster propulsion for the Saturn V program which put man on the moon. Rocketdyne currently is the prime contractor for the Space Shuttle Main Engines, the Electrical Power System for the Space Station Freedom and provides the main engines for the Atlas and Delta expendable launch vehicles. It is also a member of the National Aero Space Plane contractor team.

Rockwell International, headquartered in El Segundo, Calif., is a $12 billion multi-industry company applying advanced technology to a wide range of products in its electronics, aerospace, automotive and graphics businesses.

Westinghouse, headquartered in Pittsburgh, is a technology-based, diversified corporation and is a world leader in the commercial nuclear power industry. The company's 1989 sales were $12.8 billion.

VIRGINIA BEACH, VA (SEPT. 26) PR NEWSWIRE - John B. Baines, Chairman of the Board, announced that Seaboard Savings and Loan Association (NASDAQ-NMS: SEAB) has received the approval of the Office of Thrift Supervision for its conversion to a federal stock savings bank and reorganization into the holding company form of organization. Mr. Baines stated that the Association presently intends to consummate the conversion and reorganization during the last quarter of 1990.

Stockholders of the Association approved the proposed transactions in May 1990. All shares of the Association will automatically convert, on the effective date of the reorganization into shares of the holding company, Seaboard Bancorp, Inc. ("SBI"), on a one for one basis. The common stock of SBI will continue to trade on the National Association of Securities Dealers Automated Quotation System under the symbol "SEAB" immediately after the reorganization becomes effective. Stockholders will not be required to exchange their share certificates for certificates of SBI. SBI will provide instructions with respect to the exchange of stock certificates as soon as possible after the effective date.

Seaboard is currently a Virginia chartered stock savings and loan association which provides mortgage and retail banking services principally in the Hampton Roads area of Virginia. Headquartered in Virginia Beach, Virginia, the Association has five offices, two in Virginia Beach, one in Chesapeake, one in Norfolk, and one in Portsmouth. Currently the Association has approximately 900 stockholders and 891,184 shares of stock outstanding. At June 30, 1990, total assets were approximatley $107 million.

ST. PETERSBURG, FL (SEPT. 26) PR NEWSWIRE - Home Shopping Network, Inc. (NYSE: HSN), announced today the appointment of Michael V. Roberts to its board of directors. Roberts is the co-founder of Roberts Broadcasting Company which owns the largest black-owned commercial television station in the country, WHSL-TV (Channel 46) in St. Louis. Channel 46 is the first new commercial television station in the St. Louis market in 20 years and is a full-time broadcast affiliate of HSN. In addition to founding Roberts Broadcasting Company, Roberts also established a firm to provide consulting services for minority business development specializing in the broadcasting industry. In this regard, Roberts is also a member of the board of directors

of the National Association of Black-Owned Broadcasters.

Roberts was elected and served on the St. Louis Board of Aldermen (City Council) for eight years prior to entering the private sector. As a result of his public service, Roberts has extensive political experience and contacts around the United States. He served as a member of the board of directors of the National League of Cities and the Black Caucus of Local Elected Officials.

Roberts has been the recipient of many awards for community service, including from the National Association of University Women and the Urban League of St. Louis.

Roy M. Speer, the chairman and chief executive officer of HSN, stated, "We are delighted with Mike Roberts' appointment to HSN's board of directors since he will add invaluable experience and perspective to the formulation of HSN's future business policy. HSN has made strong commitments to promoting minority broadcasting in this country and Roberts will play a significant role in continuing this commitment."

FLINT, MI (SEPT. 26) PR NEWSWIRE - Buick Motor Division has announced incentives for most 1990 and 1991 Buick models effective Sept. 27 through Dec. 12, 1990.

These include consumer rebates or (in lieu of rebates) special GMAC finance rates ranging from 3.9 percent to 10.9 percent, depending on the length of the contract.

In addition, Buick is featuring its "All-Time Winning Drive" promotion in connection with the National Football League (NFL), which began with sponsorship of the All-Time Super Bowl Team ballot on Sept. 7. For 11 consecutive weeks, Buick -- the official car of the NFL -- will list All-Time Super Bowl Team nominees and provide official All-Time Super Bowl Team ballots in the sports section of "USA Today."

Buick's specific incentive amounts are as follows:

REBATES BY OPTION PACKAGE (Sept. 27 - Dec. 12, 1990)

1990 and 1991 Buick Models	SA	SB	SC	SD/SM	SE/SF
Skylark	$ 250	250	500	750	1,000
Century	$ 250	250	500	750	1,000
Regal	$ 250	250	500	750	1,000
LeSabre	$ 250	250	500	750	1,000
Riviera	$1,000	n/a	n/a	1,000	1,000

Reatta	$3,000	n/a	n/a	n/a	n/a

Length of GMAC Contract	Special Interest Rate(A)
1 - 24 Months	3.9 percent
25 - 36 Months	5.9 percent
37 - 48 Months	7.9 percent
49 - 60 Months	10.9 percent

(A) except Park Avenue, Park Avenue Ultra and Estate Wagon.

SCOTTS VALLEY, CALIF. (SEPT. 26) PR NEWSWIRE - Macintosh Corp. (OTC) announced today the results of its private placement which began in March 1990. The offering consisted of a minimum of 10 and a maximum of 20 units at a price of $60,000 per unit. Each unit consisted of 500,000 shares of Macintosh common stock and five-year warrants to purchase 125,000 shares of common stock at $.18 per share.

According to Richard Hill, president, the company raised approximately $914,000 and netted approximately $774,000 in the offering. Global America Inc., an investment banker located at 110 Wall St., New York, managed the offering and was the placement agent.

Prior to the private placement, and after giving effect to the acquisition of Sixty-Eight Thousand Inc. (68000 Inc.) in Nov. 1989, the company had 13,430,908 shares outstanding. The company currently has 23,547,575 shares outstanding after giving effect to the offering and certain amendments to the terms of other securities issued as part of the private placement.

As part of the private placement, the company also issued an aggregate of 2,454,166 five-year warrants at an average exercise price of approximately $.15 per share for the warrants in the private placement units noted above and warrants associated with bridge loans during the private placement. The company also issued five-year warrants to the placement agent to purchase an additional 1,142,500 shares at an exercise price of $.14 per share.

The company also reported that unaudited revenues for the eight months ended Aug. 31, 1990 totalling approximately $224,000 on which it had a net loss. The company said that its wholly-owned subsidiary, 68000 Inc., a supplier of computer workstations compatible with Apple Computer's Macintosh software had recently begun to ship its new Dash 30fx workstation. This computer incorporates the 68030 microprocessor made by Motorola and Apple Computer's Macintosh series fx motherboard in conjunction with the company's expanded chassis, power supply, enhanced memory and peripherals to provide improved performance. The company expects to ship over $100,000 of this product in the

month of Sept. 1990

Macintosh Corp., formed in 1984, was an inactive public company until Nov. of 1989, and trades over the counter. 68000 Inc., its only operating subsidiary was formed as a California corporation in Sept. 1987 and is located in Scotts Valley.

HERSHEY, PA (SEPT. 26) PR NEWSWIRE - Responding to the challenges facing utilities in the '90s requires more participatory, problem-solving cultures, firm control of costs, and the willingness on the part of both companies and regulators to take risks, Standley H. Hoch, chairman, president and chief executive officer of General Public Utilities Corp. (NYSE: GPU) told approximately 500 utility executives today.

Hoch's comments were made in the keynote address at the 83rd Annual Meeting of the Pennsylvania Electric Association, an organization of management personnel from Pennsylvania-based, investor-owned electric utilities. The meeting was also attended by state regulatory commissioners and legislators.

"Our industry is at a pivotal stage," Hoch said. "Those who succeed in today's more competitive environment will be those who act today with a focused view of what they want their companies to be tomorrow."

Hoch also told the meeting that the Middle East crisis is unlikely to have much direct impact on Pennsylvania utilities, since none are highly dependent on oil. "However," he said, "the rise in oil prices could send the nation into recession and upset the fragile economic resurgence we have helped to build in some of the areas we serve here in Pennsylvania."

The special challenges for utilities include increased competition coupled with a changing regulatory climate.

The ability to manage those changes will require the development of new company cultures equipped to anticipate competitive challenges and implement responsive strategies, Hoch said. Companies must define their vision and make that vision an integral part of the organization, he added.

Making that vision a reality, Hoch said, "requires that you build a participatory environment where all employees buy into the vision. It also requires empowering workers by listening to suggestions and by consulting them."

Parsippany, N.J.-based General Public Utilities is the nation's 15th largest investor-owned utility.

#90269p8656 09/26/1990 ~PR Newswire

TORRANCE, CA (SEPT. 26) PR NEWSWIRE - Computer Communications Inc. (NASDAQ: CCMM) Torrance, today announced operating results for the 1990 fiscal year ended June 30, 1990. For the 1990 fiscal year, revenue decreased to $6,124,000 from the $9,818,000 reported in the prior year resulting in a net loss of $2,982,000, compared to a net income of $229,000 in fiscal 1989.

Raymond E. High, president, stated that the major factors leading to the lower sales volume and loss for the year are due primarily to the predicted decline in sales for the company's older CC-80/85 Communications Processor Systems, particularly in the fourth quarter.

During fiscal 1990, the company's continued major development effort on DATA EXPRESS (tm) and InterOp/7000 product family and the lower sales volumes has seriously diminished financial resources. In July 1990, the company retained R.G. Dickinson & Co. of Des Moines, Iowa, to undertake the private placement of securities totalling $2,500,000 to $3,500,000. That private placement is not projected to be completed until Oct. 31, 1990. In the interim, the company is attempting to secure bridge financing.

High further stated, however, that the InterOp/7000 family of products has completed initial on-site customer testing and results to date are positive. The company expects a major share of total product revenue to come from this product family in fiscal 1991.

The company, in its 24th year, is a leading independent producer of equipment and systems which are an integral part of high-speed communications networks serving a broad spectrum of users. Its common stock is traded in the Over-the-Counter market and is regularly quoted on NASDAQ under the symbol of "CCMM."

MOSCOW (SEPT. 26) TASS - IT TOOK LESS THAN A YEAR FOR THE SOVIET-CANADIAN JOINT VENTURE MOSCOW-MCDONALD'S TO SERVE AS MANY PEOPLE AS LIVE IN THE SOVIET CAPITAL. THE RESTAURANT NOW CATERS TO OVER ONE MILLION PEOPLE A MONTH.

MCDONALD'S SOVIET PERSONNEL ENSURE THE SUCCESSFUL OPERATION OF MCCOMPLEX, A PROCUREMENT FACTORY OF THE MCDONALD'S FIRM IN THE MOSCOW SUBURB OF SOLNTSEVO.

THIS PROCESSING COMPLEX, WITH AN AREA OF 10,000 SQUARE METERS, EMPLOYING ABOUT 300 PEOPLE, INCLUDES A MEAT-PACKING LINE, A DAIRY SHOP, A BAKERY AND A POTATO-PROCESSING SECTION.

THE COMPLEX HAS EVEN ITS OWN QUALITY-CONTROL LABORATORY. ACCORDING TO COMPLEX DEPUTY DIRECTOR FOR QUALITY CONTROL TERRY WILLIAMS, THE PERSONNEL ARE DOING THEIR BEST TO GUARANTEE HIGH-QUALITY HAMBURGERS, BIG MACS AND MILK SHAKES TO SOVIET FAST-FOOD DEVOTEES.

ALL INGREDIENTS ARE LOCALLY PRODUCED. MILK IS BROUGHT FROM SOVIET DAIRIES IN MOSCOW REGION. FLOUR, YEAST AND SUGAR ARE ALSO PURCHASED AT THE LOCAL MARKET.

DUTCH SPECIALISTS WORKING AT THE FIRM HELPED AGRONOMISTS ON FOUR FARMS IN MOSCOW REGION TO GROW THE BAREBANCKS DAWN POTATO VARIETY, MOST SUITABLE FOR THE PRODUCTION OF FRENCH FRIES.

THE VENTURE'S BUSINESS MANAGER MARINA TULUPNIKOVA SAID THAT MOSCOW-MCDONALD'S IS A LARGE CHARITY DONOR. MCDONALD'S CANADIAN PRESIDENT GEORGE COHEN WAS THE FIRST FOREIGNER TO JOIN THE BOARD OF THE SOVIET CHILDREN'S FUND.

HE HELPED COLLECT ABOUT 1.5 MILLION DOLLARS TO BUILD A REHABILITATION CENTRE FOR INVALID CHILDREN IN MOSCOW. THE VENTURE TRANSFERRED 100,000 ROUBLES TO THE FUND.

NEVERTHELESS, IT WOULD BE WRONG TO SAY THAT ALL MUSCOVITES ARE SATISFIED WITH MCDONALD'S. SOME ARE DETERRED BY HIGH PRICES: VISITORS SPEND, ON AVERAGE, ABOUT TEN ROUBLES IN THE SHOP.

FOR MANY, THIS IS MUCH MORE THAN THEIR DAILY PAY. CUSTOMERS FEEL THE SPEED OF SERVICE ONLY IN THE RESTAURANT: THEY HAVE TO QUEUE FOR AN HOUR OR MORE BEFORE GETTING INSIDE.

MCDONALD'S PLANS TO BUILD 19 MORE RESTAURANTS IN MOSCOW.

BALTIMORE (SEPT. 26) UPI - The first emergency shipment of rice to reach Liberia since the start nine months ago of a gruesome civil war in the West African nation has reached a strategic port city, according to a major relief organization.

Catholic Relief Services officials Tuesday said the shipment - part of a 30,810-metric-ton allocation of rice, vegetable oil, beans, peas and blended commodities - has reached the port of Buchanan.

Officials hope to quickly distribute 1,000 tons of U.S. government- donated rice throughout Liberia to citizens left hungry by a widespread civil war that gripped much of the nation.

The Baltimore-based relief agency had provided emergency assistance in Liberia and neighboring countries since shortly after the outbreak of fighting in December. CRS efforts focused on using food stocks already available in Liberia, but its workers were forced to evacuate during heavy fighting in August.

Relief workers returned to implement the current program in September, and the arrival of the first shipment comes amid widespread food shortages and reports of starvation in Monrovia, the capital.

CRS officials said another shipment of food is expected to arrive in Buchanan from San Pedro, Ivory Coast in the near future, augmenting the 1,000 tons of rice that is expected to feed an initial 140,000 people for a month. The full allocation is expected to feed 770,000 people for several months, officials said.

Initially, CRS will distribute the rice to the most accessible parts of Liberia in missions, schools, hospitals and other community centers around Buchanan and in Grand Bassa, Nimba, Bong, Lofa, River Cess, Margibi and Montserrado counties.

Because hostile troops loyal to slain President Samuel Doe are thought to be active in Sino, Grand Jide and Maryland counties, there will be no initial attempt to distribute food in those regions, officials said.

Regular food shipments into Liberia ceased months ago when rebels seized the ports of Buchanan and the Liberian capital of Monrovia.

Monrovia remains inaccessible because of heavy fighting between rival rebel groups, who in addition to battling each other are fighting troops loyal to Doe.

CRS officials said a cease-fire that went into effect Saturday has brought some temporary stability. If security can be assured, the relief agency plans to distribute food in the capital.

Rebel leader Charles Taylor claims to be president of Liberia, commanding a much larger force than rival Prince Johnson, whose troops captured Doe on Sept. 9, and soon after reported his demise. Both men have agreed to cease hostilities, and a large West African peace-keeping force has been deployed in Monrovia.

Taylor, leader of the National Patriotic Front of Liberia and self- proclaimed president, will meet Johnson at Freeport on Friday, according to sources close to the West Africa peacekeeping force.

Liberia was founded by freed American slaves in 1822 and became Africa's first republic in 1847. Until 1980 it was ruled by descendants of its American founders.

#90269u0243 09/26/1990 ~United Press International
WASHINGTON (SEPT. 26) UPI - Virtually all packaged foods should have labels that explain their nutritional content, including meals served in fast food restaurants, an expert panel recommended Wednesday.

The panel, going one step farther than recent government proposals, called for ''mandatory and uniform nutrition labeling'' for all packaged foods, as well as development of new federal regulations for labeling fresh produce, meat, fish and poultry, and restaurant meals, particularly those served by fast-food chains.

''If consumers are to make the dietary adjustments recommended by the health care community, they must be able to make informed judgments across the full spectrum of their daily shopping, cooking and eating decisions,'' said the report from the Institute of Medicine, which is part of the National Academy of Sciences.

''The lack of relevant information and the inconsistency of label formats among products are significant deterrents to making informed choices,'' the committee said.

Only about half of packaged foods carry nutritional labeling. Federal regulations require nutrition labeling only on foods with nutrients added or if the food's producer makes nutritional claims.

In March, Health and Human Services Secretary Louis Sullivan announced the first major government effort to improve food labeling in 17 years, saying the changes are needed to reduce the ''confusion and frustration'' that exists among Americans trying to choose healthful foods.

The label changes outlined by Sullivan would require foods to bear consistent nutritional labels, listing such nutrients as fat, fiber, cholesterol and calories from fat. Other proposed steps include establishing uniform serving sizes, and standardizing currently unregulated descriptions like ''low fat'' and ''high fiber.''

The new report was requested by the Food and Drug Administration and the Department of Agriculture, which regulate most foods consumed by Americans, ''to consider how food labels could be improved to help consumers adopt or adhere to healthy diets.''

The panel endorsed food labels that highlight content of fat, cholesterol, sodium and fiber to help consumers select foods that meet guidelines for reducing the risk of illnesses influenced by diet, such as heart disease and cancer.

In addition, the committee suggested formulation of new regulations to prevent confusion or deception over terms, such as ''lite,'' ''low calorie'' and ''natural,'' that manufacturers use to promote their food products as healthful.

While enactment of the committee's recommendations would simply expand and make uniform labeling already on many packaged foods, restaurants and fresh products would fall under a new arena of regulation.

Noting that Americans spend more than 40 percent of their food budgets on food prepared away from home, the panel took particular aim at fast-food restaurants, suggesting mandatory nutritional labeling for all meals or food items sold in standardized form. It also supported requiring other restaurants to make general nutritional information on menu items available to customers on request.

Because many fresh products - produce, meats, poultry and fish - are sold without packaging, the committee recommended retailers be required to post nutritional information for about 20 of the largest selling foods in each category. Accordingly, consumers would be able to readily compare the fat content of a steak to a chicken breast, or learn the fiber content in an average apple.

Under the committee's recommendations, only a few foods would be exempt from nutritional labeling, either because their packaging is too small to accomodate readable labels or because they have little nutritional value, such as tea bags or bottled water.

(SEPT. 26) UPI - Around the world... around the clock... news from United Press International: .

At least 16 people were shot and killed yesterday while playing soccer on a ranch near Cali, Colombia. Police say a dozen men dressed in military uniforms entered the ranch and opened fire. A government spokesman says the massacre apparently was an attack by one of the South American nation's cocaine cartels on another drug ring.

White House and congressional negotiators began another late session on slashing the federal budget deficit last night . House Republican leader Robert Michel of Illinois hinted the Bush administration may drop its insistence that capital gains taxes be cut. Michel says there are other ways of simulating the economy.

The U-N Security Council has ordered an air traffic embargo added to the naval embargo against Iraq. The Council says governments should NOT allow planes to take off for Iraq or Kuwait if they carry cargo other than medical supplies and food. Nations are asked to deny air rights to planes suspected of carrying banned goods.

A California appeals court has refused to lower the five-Million- dollar bail

for businessman Charles Keating, who is being held on criminal charges. The former Lincoln Savings and Loan chief is accused of defrauding elderly investors by selling junk bonds. The court gave NO reason for turning down the petition for lower bond.

The government says most foods Americans eat are free of pesticides or have only traces of the chemicals. The Food and Drug Administration says 99 percent of domestic food and 96 percent of imported food has residues within allowable levels. Acting Commissioner James Benson says- ''The American food supply is the safest in the world.''

-30- 1924

#90269u0263 09/26/1990 ~United Press International

(SEPT. 26) UPI - Senators who want to increase gasoline mileage standards for motor vehicles have shelved their bill until next year. The chief sponsor, Senator Richard Bryan, says- ''To reduce our dependence on foreign oil, we must improve our automobile fuel economy.'' The Nevada Democrat unexpectedly lost a test vote yesterday and withdrew the bill.

The director of a suicide hotline in Toronto says the yuppie suicide rate is rising. Gordon Winch says 64 of last year's suicides in Toronto were among people aged 30 to 39- the yuppie years. He reports an increasing number of affluent young people are calling the Toronto Distress Center hotline.

Two gun battles in the disputed Kashmir area along the India-Pakistan border have killed 13 people. Police say security forces intercepted Moslems who were crossing into India from Pakistan and the shooting followed. All of those killed were Moslems. Militant Moslems have been fighting for Kashmir's independence.

New York City police say youths in Brooklyn mistook two young Canadians for muggers and beat them with baseball bats. The tourists, aged 19 and 20, had stopped their car and one helped an old woman cross a street. They returned to the car, she fell and the tourists were helping her up when 10 to 12 teen-agers attacked them.

About 50-thousand teachers will be going to school tonight in 22- hundred K mart stores. They will watch a program broadcast by satellite by the Department of Education to learn new methods of teaching. The department says most students are NOT able to handle even moderately challenging math problems.

x-clinched division title.

-30- 1150

#90269u0287 09/26/1990 ~United Press International

(SEPT. 26) UPI - Kansas City got all the preseason hype and Chicago made a nice run before fading. But in the end it was the Oakland Athletics for the third straight year.

The A's, riding Dave Stewart's five-hitter and Rickey Henderson's three hits, clinched their third straight American League West title with a 5-0 triumph over the Kansas City Royals.

The victory makes the A's baseball's first divisional ''3-peaters'' since the New York Yankees, Kansas City Royals and Philadelphia Phillies in 1976, '77 and '78.

''I know people don't always see it this way but the toughest thing in baseball is to win the division,'' Oakland Manager Tony La Russa said. ''It's tough to do it once. It staggers me how things have to keep coming together to win it three times. But now we have to go on farther.''

The A's are currently a battered Western champion.

With the ALCS starting Oct. 6, the A's can afford to rest some of their injured starters for the playoffs. Jose Canseco, who sat out Tuesday, has a jammed finger and sore back, outfielder Dave Henderson is coming off knee surgery, outfielder Willie McGee has been bothered by a hamstring, third baseman Carney Lansford has a back problem, and Rickey Henderson is recovering from a jammed thumb.

The thumb didn't seem to slow Rickey Tuesday.

His 3-for-3 night boosted his batting average to .324, just six points behind the Royals' George Brett, who went 1 for 4 for an AL-best .330 mark.

Henderson, who also stole his 63rd base in the sixth inning to move within four of tying Lou Brock's all-time record, also had a run-in with Kansas City Manager John Wathan.

Wathan ordered Henderson intentionally walked in the eighth. Visibly upset, Henderson let Wathan know how he felt on the way to first, shouting at the Manager in the dugout.

''I didn't like it and I told him I didn't like it,'' Rickey Henderson said. ''After all, the score was 4-0 in the eighth inning. If he wants to help George Brett win the batting title, why doesn't he just not play him?''

''The batting race had nothing to do with it,'' Wathan said. ''I think Rickey was just caught up with the heat of the situation.

''Our hats are off to the A's. It's hard to win a World Series and not suffer a letdown but they sure haven't had one.''

Stewart, 22-10, struck out six and walked two in recording his fourth shutout. The victory marked a career high and was the fifth in a row for Stewart, who won 21 games in each of the last three seasons.

''You can't write it much better,'' Stewart said. ''We've learned you can't get too high in this game and your lows can't be too low.

''We have a great deal more baseball to play. When the final victory is there, we're going to have a great time.''

Elsewhere in the AL, Cleveland scalped Boston 5-2, Milwaukee topped Toronto 8-4, Detroit downed Seattle 4-1, New York blasted Baltimore 15- 3, Minnesota nipped Chicago 4-3, and California ripped Texas 8-2.

In the National League, it was: New York 3, Montreal 1; St. Louis 1, Philadelphia 0; Pittsburgh 5, Chicago 3; Atlanta 10, Cincinnati 0; Los Angeles 3, Houston 1 in 10 innings and San Francisco 3, San Diego 1.

-- AROUND THE AL --

Indians 5, Red Sox 2

At Boston, Jerry Browne collected two RBI and Sandy Alomar homered to lead the Indians over the slumping Red Sox. Boston, which has lost 15 of its last 21

games, trails first-place Toronto by 1 1/2 games in the AL East. Greg Swindell 12-8, was the winner and Doug Jones pitched the ninth for his 41st save. Boston starter Greg Harris, 13-9, suffered the loss.

Brewers 8, Blue Jays 4

At Milwaukee, B.J. Surhoff drove in four runs and Robin Yount added three RBI, preventing the Blue Jays from building their lead in the AL East. Bill Krueger 6-8, allowed three runs and seven hits in six innings for his first victory since July 19. Bud Black, 12-11, allowed five runs and six hits for the loss. The Brewers had lost seven straight.

Tigers 4, Mariners 1

At Detroit, pinch hitter Larry Sheets hit a three-run homer in the bottom of the ninth inning to lift the Tigers. Sheets hit a 1-0 pitch into the upper deck in right for his 10th homer. Reliever Rich DeLucia, 1-1 took the loss while Mike Henneman, 8-6, picked up the victory.

Yankees 15, Orioles 3

At New York, Roberto Kelly led off with a home run, triggering a record-tying succession of eight hits in the first inning as the Yankees rolled to the victory. Kelly's home run kicked off a 16-hit attack that allowed Dave Eiland, 1-1, to coast. Anthony Telford, 3-3, lasted just six batters, none of whom he retired.

Twins 4, White Sox 3

At Chicago, Gary Gaetti hit a three-run homer and Shane Mack singled in the go-ahead run in the fifth. The loss, combined with Oakland's victory, gave the A's the title. Mark Guthrie, 7-8, went 6 2-3 innings in winning for the first time in four starts. Rick Aguilera got three outs for his 30th save. Jack McDowell, 13-9, was the loser.

Angels 8, Rangers 2

At Arlington, Texas, Jack Howell keyed a five-run sixth inning with a two-run double and Scott Lewis was a winner in his major league debut. Texas' Bobby Witt, 17-10, lost for only the second time in his last 18 starts. Lewis, 1-0, allowed seven hits in 7 1-3 innings.

-30- 5544

#90269u0311 09/26/1990 ~United Press International

(SEPT. 26) UPI - Doug Drabek was on the mound, but he didn't start throwing the ball until Pittsburgh Manager Jim Leyland told him to.

Drabek shook off a bad start against the Chicago Cubs to rally the Pirates to a 5-3 victory Tuesday, reducing the Pirates' magic number for clinching the National League East to six games.

Drabek, at 21-6 the NL's winningest pitcher, used his arm and his bat to bring the Pirates' back from a 3-0 deficit.

In the first inning, Drabek walked leadoff man Jerome Walton and then gave up back-to-back singles to Ryne Sandberg and Mark Grace, producing a 1-0 Chicago lead.

Grace's hit brought Leyland out of the dugout.

''It was like I was just tossing it up there,'' Drabek said. ''Jim came out and asked me if everything was all right, and I said, 'Yes.' He said, 'Then start throwing the ball.'''

Drabek made good use of that advice. After allowing Andre Dawson's RBI groundout, he escaped further damage.

Drabek yielded Shawon Dunston's 17th homer in the second before finding his rhythm. He allowed a single in the third, a one-out walk in the fourth and then retired 15 straight batters.

''I was able to hold my concentration after the first two innings, and I was able to keep myself calm,'' Drabek said. ''A couple years ago I wouldn't have been able to do that.''

The right-hander gave up four hits, three runs and two walks over the first 3 1-3 innings but allowed only one walk the rest of the way. He notched his eighth complete game of the year.

At the plate, he doubled and scored the Pirates' first run in the fifth and singled and scored the Pirates' tie-breaking run off losing starter Steve Wilson, 4-9, in the seventh.

''He showed today that he not only has a God-given ability to throw a baseball but he has a heart,'' said Andy Van Slyke, who drove in two runs with a single and a double.

''It looked like he didn't have anything the first three innings. With Doug, people think he just goes out there, and it's easy for him.''

It seemed that way to Chicago Manager Don Zimmer, who watched his team's lead crumble.

''I'm trying to win,'' he said. ''I send in a right-hander against a right-handed hitter, he walks a guy. I send in a leftie to face a left- handed

hitter, he gives up a hit. That's just about the way our season's went all year.''

Both the Pirates and second-place New York Mets have eight games left. They conclude the season in Pittsburgh with a three-game series.

Elsewhere in the National League, New York defeated Montreal 3-1, St. Louis blanked Philadelphia 1-0, Atlanta routed Cincinnati 10-0, Los Angeles beat Houston 3-1 in 10 innings and San Francisco slipped by San Diego 3-1.

In the American League, it was, New York 15, Baltimore 3; Cleveland 5, Boston 2; Detroit 4, Seattle 1; Milwaukee 8, Toronto 4; Minnesota 4, Chicago 3; Oakland 5, Kansas City 0 and California 8, Texas 2.

-- AROUND THE NL --

Mets 3, Expos 1

At Montreal, pinch hitter Dave Magadan singled in two runs in the seventh inning, helping New York keep pace in the NL East. Alejandro Pena, the third Mets pitcher, pitched four innings of one-hit ball to improve to 3-3. Chris Nabholz, 6-1, suffered the loss.

Cardinals 1, Phillies 0

At Philadelphia, Bernard Gilkey tripled and doubled for the only hits allowed by Philadelphia's Terry Mulholland, 8-10. Gilkey scored on a sacrifice fly byGeronimo Pena. Joe Magrane, 10-16, combined on the shutout with Mike Perez and Ken Dayley, who earned his second save.

Braves 10, Reds 0

At Cincinnati, Ron Gant reached the 30-30 club by hitting his 30th home run and rookie Dave Justice belted his first grand slam to power Atlanta. Justice's blast, his 28th homer of the year, came off Norm Charlton, 12-8, and highlighted the Braves' six-run fifth inning. Tom Glavine, 10-11, allowed five hits in seven innings. Cincinnati's magic number remained at five to clinch the NL West.

Dodgers 3, Astros 1, 10 innings

At Houston, Hubie Brooks blasted a two-run homer in the 10th inning to lift Los Angeles to within 3 1/2 games of Cincinnati. Jay Howell, 5-5, worked two innings for the victory. Juan Agosto fell to 9-8.

Giants 3, Padres 1

At San Francisco, rookies Mike Benjamin and Steve Decker hit home runs and

rookie reliever Mark Dewey gained his first major league victory. Dewey, 1-0, started the fifth inning after starter Rick Reuschel, making his first start and third appearance since coming off the disabled list, suffered soreness in his knee. Andy Benes, 10-10, worked six innings and took the loss.

BEIJING (SEPT. 26) UPI - Production by China's rural industries rose by 9 percent in the first half of this year, more than triple the national average and again showing rural firms as the most dynamic industrial sector, an official newspaper reported Wednesday.

Nearly 100 million people work in the country's 18 million so-called rural enterprises, many of them small factories or industries run by towns and villages in farming areas.

The English-language China Daily said output value of rural industries grew by 9.02 percent in the first half of 1990 as compared to the same period last year. The value of their exports jumped by 38.2 percent, it said, although giving no currency amounts.

The first-half growth was more than triple the national average for all industries, which the China Daily said hovered around 2.6 percent.

Rural industries have proven the most dynamic of China's industrial sectors, far outpacing so-called collective enterprises and large, inefficient state-owned industries, which consistently show the poorest growth and generally lose money.

National industrial production has been slow to recover from a near- stall earlier this year caused by a government-imposed nationwide austerity program. The government has been forced to ease the austerity and loosen credit since early spring.

Still, the China Daily said in a separate article that realized profits among state-owned enterprises under direct central government control plunged 56.8 percent in the first eight months of 1990, compared to the same period last year.

Although the easing of the austerity has expanded investment, wages and credit ''the indicators also revealed that industrial economic efficiency further dropped'' and ''more enterprises were plunged into the red ... further squeezing state coffers,'' the China Daily said.

The rural firms, meanwhile, also absorb surplus farm labor, with millions of farm jobs no longer needed because of the country's 12-year- old economic reforms.

''Rural enterprises are considered the only feasible way for China to absorb large numbers of surplus rural labor into the industrialization process,'' the newspaper said.

#90269u0332 09/26/1990 ~United Press International

(SEPT. 26) UPI - The United Nations tightened economic sanctions against Iraq with an air traffic embargo as Iraqi President Saddam Hussein raised the specter of another Vietnam to the American people if Iraq were attacked.

Saddam's comments, which included a call for peace, came hours before a report that the aircraft carrier USS Independence was being sent to the Persian Gulf from the Gulf of Oman, carrying 90 aircraft and accompanied by at least six support ships.

The relocation reported by Cable News Network and attributed to the State Department was described as the first time since 1974 a U.S. aircraft carrier has actually gone into the Persian Gulf instead of remaining in the Gulf of Oman or Indian Ocean.

The aircraft carrier is part of a U.S.-led international force stationed in the Persian Gulf.

The U.N. Security Council voted 14-1 vote on the air traffic embargo Tuesday, with all permanent members backing it. Only Cuba voted against it.

Secretary of State James Baker, who said the air embargo was necessary to counter Iraq's Aug. 2 invasion of the small, oil-rich nation of Kuwait, warned nations not to try to evade the U.N.-imposed ''international quarantine.''

''No temptation of minor gain should lead any government to complicity with Iraq's assault on international legality and decency,'' Baker told the Security Council.

Soviet Foreign Minister Eduard Shevardnadze had earlier warned the U.N. General Assembly ''war may break out in the gulf region any day, any moment.''

He denounced Saddam's occupation of Kuwait as a ''major affront to mankind'' and an ''act of terrorism'' against the post Cold War period. Shevardnadze called on Moscow's former ally to ''to obey the demands of the law and plain common sense'' and withdraw.

In an apparent indication the Soviet Union would not oppose use of force against Iraq in the crisis, Shevardnadze noted the ''United Nations has the power to suppress acts of aggression. There is ample evidence that this right can be exercised. It will be, if the illegal occupation of Kuwait continues.''

Saddam, in his 76-minute videotaped speech, accused the United States of using a double standard when dealing with the Middle East, saying when Israel annexed land in the Middle East, ''no measures were taken against Israel.''

Israel annexed East Jerusalem immediately after the 1967 war and later annexed the Golan Heights of Syria. Neither annexation is recognized by the United States.

Responding to President Bush's televised message to the Iraqi people last week Saddam warned Bush he risked another Vietnam if he attacked Iraq - but with ''bigger sacrifices'' and a greater loss of life. Saddam however said that was a warning based on fact and added, ''We threaten no one.''

''Let us then resort to dialogue rather than arms as the road to a common understanding ... and an acceptable solution,'' he said in the videotape delivered to Washington by Iraqi Ambassador Mohammed al- Mashat.

Meanwhile, the Pentagon said Iraq is losing about $100 million a day in revenue from banned oil exports and that U.N. economic sanctions have ''proven very effective.'' Iraq's imports have been ''significantly reduced'' and less than 15 percent of Iraq's merchant fleet is at sea, Pentagon spokesman Pete Williams said.

Meanwhile, in an apparent rebuff to Iraq's efforts to woo former enemy Iran into an alliance, a joint Iranian-Syrian communique Tuesday charged ''Iraqi aggression against Kuwait gave foreign powers the pretext to enter the region.''

The communique came after four days of talks between Iranian President Hojatoleslam Ali-Akbar Hashemi Rafsanjani and Syrian President Hafez Assad, who according to the text believe foreign forces can be removed ''through the removal of the Iraqi aggression forces along with the foreign presence.''

#90269u0340 09/26/1990 ~United Press International

PESHAWAR, Pakistan (SEPT. 26) UPI - Ousted Prime Minister Benazir Bhutto and her Pakistan People's Party won a legal victory against the government Wednesday when a provincial high court overturned an order dissolving the region's legislative assembly.

The high court in the North-West Frontier Province said the decision dissolving the assembly was ''unconstitutional'' and ordered the legislative body restored, but the government appealed to the national high court and blocked a bid to convene the assembly.

President Ghulam Ishaq Khan fired Bhutto's government Aug. 6, accusing the

administration of corruption and nepotism. He also dismissed the national assembly and allowed the regional governors to dissolve the provincial assemblies. Khan called for new elections Oct. 24.

Since then, the president has lodged corruption charges in special courts in Lahore and Karachi seeking to have Bhutto and several members of her administration barred from participating in politics.

Bhutto has denounced the president's actions against her as unconstutitional and with the help of People's Party workers has launched legal battles in court to have her dismissal and the dissolution of the assemblies overturned.

The ruling Wednesday was her first legal victory against the government. If the decision is upheld by the nation's high court, it could serve as a legal precedent for attempting to overturn Khan's order firing the government and dismissing the national assembly.

The court announced its decision at 9 a.m. before a packed courtroom. The court said it found the government's case to be weak because the order dissolving the assembly gave no reasons for the action.

Hundreds of people gathered outside the courthouse despite a police cordon around the area and chanted slogans praising Bhutto and the Pakistan People's Party while condemning the president.

Shortly after the ruling, Assembly Speaker Masud Kausar said he had received a note signed by one-third of the assembly members asking him to convene the People's Party-dominated legislative body.

But the government immediately appealed the decision to the nation's supreme court and won a stay of the lower court decision, blocking the attempt to convene the assembly.

The court case challenging the order dissolving the North-West Frontier assembly was filed by Aftab Ahmad Khan Sherpaq, the former chief minister of the province. The case was argued by Iftikhar Gilani, the former law minister in Bhutto's Cabinet.

A similar case has been filed in Sind Province, where Bhutto's home is located and where the People's Party also was dominant. That case is still being heard by the Sind high court.

#90269u0341 09/26/1990 ~United Press International

TOKYO (SEPT. 26) UPI - Monica Seles and Jennifer Capriati registered straight- set victories Wednesday, while Katerina Maleeva struggled in three sets, each advancing to the quarterfinals of the Nichirei International Ladies

Tennis Championships.

Second-seeded Seles, the 16-year-old French Open champion from Yugoslavia, needed only 36 minutes to dispatch West Germany's Eva Pfaff 6-1, 6-0 in a second-round match on the indoor courts of the Tokyo Metropolitan Gymnasium.

Capriati, the 14-year-old teenage sensation from Wesley Chapel, Fla., who is making her first appearance in Japan, defeated Magdalena Maleeva 6-2, 6-4. Katerina Maleeva of Bulgaria rallied to beat American Gigi Fernandez 6-7 (6-8) 6-2, 6-2.

Also advancing to the quarterfinals was No. 8 seed Amy Frazier of Rochester Hills, Mich., who beat Eva Sviglerova of Czechoslovakia 6-2, 7-5.

Top-seeded Martina Navratilova and No. 4 Mary Joe Fernandez begin second-round play Thursday. Navratilova meets Stephanie Rehe and Fernandez faces Cristina Tessi.

''She wasn't the toughest opponent I could have drawn in the second round,'' said Seles, who makes her home in Sarasota, Fla. ''Nothing was going extremely well; everything was just going fair.''

Katerina Maleeva, ranked No. 7 in the world, needed 2 hours and 18 minutes to put away the ninth-seeded Gigi Fernandez of Aspen, Colo.

Capriati, who struggled in a first-round match against Japan's Misumi Miyauchi ranked 266th in the world, lost only three points on her serve in the first set and was never threatened by 15-year-old Magdalena Maleeva.

Capriati broke Maleeva in the second and eighth games of the first set. Maleeva opened the second set with a service break, but Capriati won the next three games.

Maleeva evened the set 3-3, but Capriati won three of the next four games, including two service breaks.

Friday, Capriati faces Katerina Maleeva, while Seles meets Frazier.

In the other second-round matches Thursday, No. 5 seed Manuela Maleeva-Fragnierd of Switzerland faces San Francisco's Peanut Louie Harper and No. 6 Helena Sukova of Czechoslovakia meets Marianne Werdel of Bakersfield, Calif.

#90269u0360 09/26/1990 ~United Press International

(SEPT. 26) UPI - Clear skies covered much of the nation Wednesday as the heat eased in the Great Plains and cool weather continued in the South and

Northeast.

High pressure kept the South dry as temperatures dipped into the 40s in some areas during the early morning hours, but bright sunshine was expected to send highs into the 80s.

Fog covered some valleys in Kentucky and light winds came from the southwest while partly sunny skies were reported in Virginia.

Patchy late night fog also cut visibility in Southern California where lows were in the 60s with southwest winds at 15 mph.

Light rain moved into the southwest panhandle of Nebraska from Colorado and other showers were reported in southeast Wyoming.

Temperatures were expected to peak in the 80s in the Great Plains, down from the 90-plus degree temperatures that baked the region earlier this week, prompting forecasters to say Indian summer had come early this year.

Northeast skies had morning clouds and low temperatures near 45 degrees but in the western part of the region, clear skies covered Pittsburgh as temperatures dipped down to 50 degrees.

In several areas in New Jersey, including Newark and Atlantic City and their vicinities, skies were partly cloudy. Newark had low temperatures in the upper 50s and winds moving south at 5 to 10 mph while temperatures were in the low to mid 50s in Atlantic City.

In the Boston metropolitan area, partly cloudy skies and temperatures in the low 50s covered the city, with temperatures dipping to 45 in the suburbs.

#90269u0368 09/26/1990 ~United Press International

(SEPT. 26) UPI - Here is a roundup of the latest major events in the Persian Gulf crisis stemming from the Aug. 2 Iraqi invasion of the oil-rich emirate of Kuwait:

WASHINGTON - The United States is sending an aircraft carrier into the Persian Gulf for the first time since 1974. The USS Independence, carrying 90 aircraft and accompanied by at last six support ships, was being moved Wednesday from the Gulf of Oman. The move was the first time since 1974 U.S. aircraft carrier has actually gone into the Persian Gulf instead of remaining in the Gulf of Oman or Indian Ocean. The Independence joins an international armada of ships enforcing the U.N. blockade against Iraq.

UNITED NATIONS - The U.N. Security Council clamped an air embargo on Iraq in retaliation for its invasion of Kuwait. The measure allows governments to

ground aircraft suspected of carrying goods to the two gulf countries and deny such aircraft permission to fly over their territories. The air embargo resolution, adopted on a 14-1 vote, was intended to tighten U.N. sanctions against Iraq, which has defied the world body for seven weeks.

In a videotaped message to the American people, Iraqi President Saddam Hussein warned the United States risks a conflict costlier than the Vietnam War if it attacks Iraq. Saddam said in the tape released Tuesday that Iraqis ''threaten no one'' and are not interested in a war with the United States. The Iraqi leader also accused the United States of using a double standard when dealing with the Middle East, saying U.S. officials took no official action when Israel annexed East Jerusalem and the Golan Heights of Syria in 1967.

ATHENS, Greece - In an apparent rebuff to Iraq's efforts to woo former enemy Iran into an alliance, a joint Iranian-Syrian communique Tuesday charged ''Iraqi aggression against Kuwait gave foreign powers the pretext to enter the region.'' The communique, reported by Tehran radio, came after four days of talks between Iranian President Hojatoleslam Ali-Akbar Hashemi Rafsanjani and Syrian President Hafez Assad, who according to the text believe foreign forces can be removed ''through the removal of the Iraqi aggression forces along with the foreign presence.''

UNITED NATIONS - Soviet Foreign Minister Eduard Shevardnadze denounced Iraqi President Saddam Hussein's occupation of Kuwait in a speech Tuesday before the U.N. General Assembly. Shevardnadze called Iraq's invasion of its southern neighbor a ''major affront to mankind'' and called on Moscow's former ally to ''to obey the demands of the law and plain common sense'' and withdraw.

WASHINGTON - The Pentagon said Tuesday the number of Iraqi soldiers in Kuwait and southern Iraq has increased to 430,000 from 360,000 a week ago, but U.S. officials concede they expanded the geographic area they are counting. The Pentagon also said 500 to 1,000 Soviet military advisers and technicians are in Iraq, many involved in maintenance on Soviet-built bombers and fighters.

WASHINGTON - House members angrily accused the administration Tuesday of failing to warn Americans of the impending Iraqi occupation of Kuwait or prepare for their evacuation before the invasion. House Foreign Affairs Committee members said the State Department failed to warn Americans even though Baghdad's massing of troops on Kuwait's border was well known.

-30- 3533

#90269u0479 09/26/1990 ~United Press International

(SEPT. 26) UPI - Secretary of State Baker says the air embargo imposed against Iraq by the United Nations yesterday is necessary to counter Iraq's invasion of Kuwait. The U-N Security Council voted 14-1 to impose the embargo. Another indication of increasing pressure on Baghdad comes with a report that the aircraft carrier U-S-S Independence is being sent to the Persian Gulf from

the Gulf of Oman.

Budget director Richard Darman says it's ''going to be tough'' to reach agreement on a deficit reduction package. But, budget negotiators report some progress after meeting for nearly eight hours in a marathon session that broke up this morning. They meet again today, amid signs of a possible breakthrough on the capital gains tax cut impasse. The House G-O-P leader says the president may back off on capital gains cuts.

A war between two Colombian cocaine cartels is cited as a possible cause of a massacre yesterday that killed at least 16 people. Officials say armed men dressed in military uniforms entered a ranch near Cali , and fired at people playing soccer. Authorities cite the luxuriousness of the ranch as an indication that drug wars might be the cause. The Medellin and Cali cartels have been in conflict off and on for several years.

House Democratic leader William Gray says his talks with South African President F-W de Klerk left him ''hopeful'' about racial reform. But he criticized de Klerk for making what he termed only ''small changes.'' Other black congressional leaders said the same thing. De Klerk told the National Press Club yesterday that blacks and whites in South Africa are ''NO longer divided.''

-30- 1809

#90269u0500 09/26/1990 ~United Press International

(SEPT. 26) UPI - Stocks on the Tokyo Stock Exchange plunged to their lowest level in more than 2 1/2 years Wednesday, hammered by large institutional investors and cash-strapped small investors on rumors of hostilities in the Middle East.

The blue-chip Nikkei Average of 225 selective issues, which fell 418.51 points Tuesday, tumbled 1,108.70 points or 4.7 percent to 22, 250.62 - its lowest close since Jan. 5, 1988, when it key index finished at 21,575.28.

The broader-based Tokyo Stock Exchange Price Index, a measure of all shares traded on the exchanges main section, tumbled 67.92 points to 1, 651.44. TOPIX lost 50.41 points on Tuesday.

Trading remained thin as an estimated 350 million shares changed hands, compared with 254 million shares Tuesday.

Declines pounded advances 919 to only 54, while 73 issues remained unchanged.

Elsewhere in Asia, stock prices closed lower in moderate trading on the Hong Kong Stock Exchange as stocks fluctuated severely, influenced by Tokyo.

The benchmark Hang Seng Index, which plunged 54.27 points Tuesday, dropped

another 28.76 points - or 1 percent - to 2,778.50.

Among the narrower indexes, financials rose 6.79 points, utilities were down 33.14, industrials shed 36.28, and properties dropped 67.47 points.

Volume remained light as an estimated 690 million shares changed hands, up slightly from the 600 million shares on Tuesday.

In Singapore, stocks plunged in light trading on the Singapore Stock Exchangein line with Tokyo's decline.

The Straits Times Industrial Index, which lost 19.55 points Tuesday, dropped 8.95 points to 1,104.24. The broader-based All Singapore Index fell 4.01 points to 311.17.

An estimated 43.3 million shares chnaged hands, compared with 43.1 million on Tuesday.

In Bangkok, stocks on the Thailand Stock Exchange rebounded slightly after falling more than five percent Tuesday.

The Stock Exchange of Thailand (SET) Index, which lost 33.16 points Tuesday, gained 11.11 points to 625.06.

Volume remained light as an estimated 1.2 billion shares changed hands, unchnaged from Tuesday's level.

In Australia, stock prices continued their slid in moderate trading on the Sydney Sharemarket.

The All Ordinaries Index, which fell 17.7 points Tuesday, slipped another 7.8 points to 1,386.0.

An estimated 95 million shares changed hands, compared with 80.4 million shares Tuesday.

#90269u0568 09/26/1990 ~United Press International

(SEPT. 26) UPI - Cable News Network says the carrier U-S-S Independence is going from the Gulf of Oman into the Persian Gulf along with six support ships. It will be the first time since 1974 that a U-S aircraft carrier has actually gone on station in the Persian Gulf. .

The U-N Security Council has widened the embargo against Iraq to include air traffic. It ordered governments to prohibit planes from landing or flying over Iraq if they are going in or out of Iraq or occupied Kuwait with banned cargo. .

The Pentagon says earlier United Nations sanctions have been effective. Iraq reportedly is losing about 100-Million dollars a day because of the ban on its oil exports.

Budget negotiators ended another long session this morning and reported progress toward an agreement on reducing the massive federal deficit. But budget director Richard Darman says- ''It's still going to be tough.''

Armed men raided a ranch near Cali, Colombia, yesterday and killed 16 people who were playing soccer. Authorities say the killings are part of a years-long war between two cocaine factions which has claimed more than 500 lives.

19-year-old Damon Lundgren pleaded with a jury yesterday NOT to sentence him to death. Lundgren was convicted of murder and kidnapping for helping his father commit cult killings in northern Ohio.

Massachusetts Governor Michael Dukakis has cut state spending another 310-Million dollars. More than one-BILLION dollars has been cut in the last year. Massachusetts has the lowest state credit rating in the nation.

#90269u0682 09/26/1990 ~United Press International

DES MOINES, Iowa (SEPT. 26) UPI - A class-action lawsuit involving several Iowa banks and investors and a Chicago firm has been filed in U.S. District Court in Des Moines against the Stotler Group, alleging the company misled investors with the sale of more than $7 million worth of commercial paper.

According to the suit filed Tuesday, the plaintiffs bought more than $2.5 million worth of the paper from R.G. Dickinson & Co. of Des Moines. However, Dickinson is not listed as a defendent in the suit.

The seven-count complaint alleges the directors of Stotler and its accounting firm, Coopers & Lybrand, misrepresented the financial condition of the company to those interested in purchasing the notes.

The suit said Stotler's quarterly reports issued in 1988, 1989, and earlier this year showed the company was in compliance with minimum net capital

requirements. However, the suit alleges the company then told the plaintiffs it could not pay the notes as they came due.

Stotler was dissolved in July after it was learned that Stotler & Co., a subsidiary of the Stotler Group, could not meet the capital requirements of the Chicago Board of Trade and the Commodity Futures Trading Commission.

Since then, the company has been the object of numerous lawsuits and fraud charges. Stotler filed for bankruptcy in late August after three companies who claimed to be creditors filed an involunatary bankruptcy petition.

A spokesman for Coopers & Lybrand in New York said the firm would not comment on the lawsuit.

Plaintiffs in the suit include Liberty Bank and Trust of Mason City, Iowa; Liberty Bank and Trust of Odebolt, Iowa; David Noyes & Co. of Chicago; Farmers Trust and Savings Bank of Buffalo Center, Iowa; Farmers Co-op of Wesley, Iowa, and individuals Jim Vonnahame, Gene Harris, Roger A.V. Lundberg and Eleanor D. Lundberg.

#90269u0734 09/26/1990 ~United Press International
WASHINGTON (SEPT. 26) UPI - Orders for durable goods fell 0.8 percent in August in the aftermath of Iraq's raid on Kuwait, with military hardware holding up weak demand for metals and non-electrical machinery, the government said Wednesday.

Excluding defense hardware, orders for the ''big ticket items'' made to last three or more years - from aircraft to washing machines - were off 1.6 percent the Commerce Department said in its monthly report.

In the category of transportation equipment, for example, ''Increases in motor vehicle and parts and shipbuilding and tanks more than offset a decline in aircrafts and parts,'' the department said.

Not counting transportation, August orders fell 1.6 percent.

In Chicago, Robert Dieli, an economist at Northern Trust, called the report ''a trifle weak'' but not enough to ''make you say 'It's time to head to the storm cellar.'''

Private analysts generally expected a 1 percent drop in the aftermath of Iraq's lightning invasion of oil-rich Kuwait Aug. 2 and the subsequent U.N.-backed trade embargo against the Baghdad regime.

Dieli said he ''wouldn't tie a great deal of'' the military spending to the Iraq crisis, but added ''no doubt that there's some of it'' was reflected in the latest data.

He also said he expects more crisis-related military spending ''down the road.''

But a market letter by Fuji Securities in Chicago noted: ''Durable goods orders have chopped back and forth over a year and a half without achieving

any significant net growth.''

August's 0.8 percent drop in orders to a little more than $127 billion follows an advance of 2.7 percent in July and a decline of 3.1 percent in June, according to the department's Census Bureau.

By category, August orders:

-Jumped 12.4 percent for defense capital goods.
-Plummeted 11.2 percent for non-defense capital goods.
-Fell 1.7 percent for primary metals.
-Plunged 6.1 percent for non-electrical machinery.
-Gained 2.6 percent for electrical machinery.
-Increased 1.3 percent for transportation equipment.

The Commerce Department also reported that shipments of durable goods increased 2.9 percent in August after slipping 1.8 percent in July and edging up 0.6 percent in June.

Unfilled orders, meanwhile, slid 0.3 percent in August after gaining 0.6 percent in July and dipping 0.5 percent in June, the department said.

The figures were adjusted for seasonal factors.

#90269u0739 09/26/1990 ~United Press International
(SEPT. 26) UPI - A Western diplomat says Jordan has violated the day-old air embargo against Iraq by letting an Iraqi Airways jet land in Amman. The diplomat calls the landing a ''clear violation'' of the embargo. He also says it is understood two other flights from Baghdad to Amman are scheduled today. The U-N Security Council approved the air embargo against Iraq and occupied Kuwait yesterday.

The government reports another sign of declining economy. Orders for durable goods fell eight-tenths of one percent last month. These are products intended to last three years or longer- things like aircraft to washing machines. The Commerce Department says if heavy defense equipment is excluded, the new orders fell one-point-six percent. Analysts had expected a drop because of tensions in the Persian Gulf and the trade embargo against Iraq.

Another late-night session of budget negotiators ended early this morning with word that progress has been made. But there's still NO agreement on how to chop 500-BILLION dollars from the deficit over the next five years. Budget Director Richard Darman said- ''NO deal tonight.'' President Bush will meet this morning with Republican negotiators to discuss the budget.

The Environmental Protection Agency says all of the 1991 cars getting the best

gasoline mileage are imports. The Geo Metro X-F-I, a Japanese- built car imported by General Motors, heads the list with 50-plus miles a gallon. Nine of the top 10 models are from Japan. The 10th, the Volkswagen Jetta, is built in West Germany.

#90269u0750 09/26/1990 ~United Press International

(SEPT. 26) UPI - A government report issued yesterday blames Aloha Island Air the pilot and the Federal Aviation Administration for an accident in Hawaii in October 1989 that killed 20 people. The National Transportation Safety Board says the pilot was flying too low and without instruments when the plane crashed. The board also found fault with the airline's supervision and the F-A-A's oversight of the airline.

A U-N commission says Asian nations have to slow migration to cities to solve their environmental problems. The report says if conditions in rural areas improve, the move to the cities will decrease. It calls for promotion of investments and development of skills in the rural areas. The U-N commission says the average urban growth rates are three times as great as village growth rates.

Enterprises in rural China are the fastest growing industrial sector in China. The newspaper China Daily says production of the rural enterprises increased nine percent in the first half of 1990... more than triple the overall Chinese growth rate. China's collective enterprises and state-owned industries show poor growth rates and most lose money.

When the two Germanys re-unite next Wednesday, their sports will merge along with their political systems. One theory holds that a super- power in sports will result. If there had been just one Germany in 1988 it would have won 142 medals- the most at the Seoul Olympics. But a conflicting theory finds Germany's star fading because communist subsidies for sports in the East have ended. Some eastern teams have sold stars to the West in order to make ends meet.

HOUSTON (SEPT. 26) UPI - Shell Oil Co. and two other companies negotiated a $7.8 million out-of-court settlement with the family of a Pasadena, Texas man who was killed in an industrial accident, the family's attorney said Tuesday.

Candy Salls, widow of Worley Lee Salls, will immediately receive $344,000 with the balance to go to her and her three children during their lifetimes, said attorney John F. Vecchio.

The case arose from a 1986 accident at the Shell refinery near Deer Park.

Worley Salls severed the femoral artery in his right leg while cleaning the inside of a tower with a high-pressure sprayer. He bled to death before he reached a hospital.

Vecchio, who pursued the case for two years, alleged Salls was ordered by a Shell supervisor to use a sprayer with a shorter barrel than permitted by Shell safety guidelines.

He also said Salls should not have been instructed to climb into the five-foot wide tower to clean the upper area.

Salls, a contract worker at the plant, was employed by Parkem Industrial Services Inc. The sprayer he was using is manufactured by Jetstream of Houston Inc.

Both companies contributed to the settlement.

Vecchio said the settlement allows for a $40,000 payment to Candy Salls next year and a $46,500 payment in 1992. In addition, she will receive $2,940 a month for the rest of her life, he said.

When her children - ages 7, 6 and 4 - turn 18, they will receive annual payments of $20,000 each for three years and $1,200 a month for the rest of their lives, he said.

Randall J. Heldt, attorney for Shell Oil, did not return calls for comment. James M. Kimbell, lead attorney for Parkem, declined comment.

#90269u0804 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - U.S. personal income advanced 0.3 percent in August in the weakest showing since an increase of 0.2 percent in April, the Commerce Department reported Wednesday.

Private economists expected a gain of 0.4 percent last month following increases of 0.5 percent in July and 0.4 percent in June.

The department's Bureau of Economic Analysis said the August increase in personal income totaled about $13 billion for an annual rate of just under $4.68 billion, adjusted for seasonal factors.

The national savings rate dropped to 4.3 percent in August - in the wake of the Iraq crisis and higher oil prices - from 4.5 percent in July and 4.6 percent in June, according to the government data.

Total wages and salaries increased $700 million last month after an advance of

$16.2 billion in July, the data showed.

The Commerce Department also reported that personal consumption, or consumer spending, was up only 0.5 percent in August - in the smallest monthly gain since remaining unchanged in May.

Personal consumption in July increased 0.6 percent after rising 1.2 percent in June. Disposable personal income, meanwhile, edged up 0.2 percent in August after twin increases of 0.5 percent in June and July.

The implicit price deflator, a measure of inflation linked to the latest consumption data, was up 0.6 percent in August after moving ahead 0.3 percent in both June and July, the government also reported.

In a related report issued Wednesday, the Commerce Department said that new orders for durable goods, including ''big ticket'' household items like appliances, were off 0.8 percent in August.

-30- 1846

#90269u0811 09/26/1990 ~United Press International

DEDHAM, MA (SEPT. 26) UPI - A man who videotaped a number of sexual assaults on children has been sentenced to 27 to 30 years in prison.

James Newell Sr., 57, of Plainville was sentenced Tuesday in Norfolk Superior Court after he pleaded guilty to raping a number of young girls from his neighborhood over a seven-year period.

The children ranged between 5 and 9 years old at the time of the rapes and assaults.

Before sentencing Newell, Judge Robert Banks described him as ''chronic, dangerous and untreatable.''

Testimony showed that Newell lured six girls to his home with candy, toys and games between 1981 and 1988. Once inside, he encouraged the girls to perform sex with him.

Testimony showed he occasionally videotaped the sex acts, using a camera hidden in the bathroom and another focused on a mattress in his living room.

He was arrested on Jan. 12 after a two young girls gave police information about some assaults.

Parents of some of Newell's victims said the children have suffered psychological problems stemming from the attacks.

Newell, who was known in the community as ''Papa'' and worked in a local

convenience store, sat passively in the courtroom during the sentencing. He pleaded guilty to the 47 counts last week.

The parents of the victims said they all knew Newell and unwittingly gave him permission to take their children into his home.

Newell will be eligible for a parole review in 18 years.

#90269u0833 09/26/1990 ~United Press International

HARTFORD, CT (SEPT. 26) UPI - The FBI Wednesday launched a search for two defendants in the 1983 Wells Fargo robbery suspected of jumping bail in Puerto Rico to pursue separatist activities.

A federal judge late Tuesday issued warrants authorizing the FBI to arrest Filiberto Ojeda Rios, 57, described as the mastermind of the $7 million robbery, and Luis Colon Osorio.

It was believed that Ojeda Rios, who was released on $1 million bail two years ago after being held for a record 32 months, had fled to Cuba with Colon Osorio.

Ojeda - who federal authorities have described as a Cuban agent - lived there for many years in the 1960s.

Stanley A. Twardy Jr., the U.S. attorney for Connecticut, said the warrants issued by U.S. District Judge T. Emmet Clarie authorize the arrests on charges of failing to abide by the conditions of bail.

Twardy said the government will also move to forfeit the property put up by friends and family of Ojeda Rios to meet the high bail.

Twardy said Ojeda failed to make curfew at his home on Saturday and Sunday and failed to report to the pre-trial services office in Puerto Rico.

Milt Ahlerich, the FBI agent in charge in Connecticut, said a large contingent of agents in Connecticut and Puerto Rico has been ordered to search for the two and the case has been given ''high priority.''

Daniel Lopez Romo, U.S. attorney for Puerto Rico, said Ojeda's escape while wearing an electronic bracelet proved prosecutor's claims the devices were ''highly questionable''.

Separatists at a rally Sunday in Lares, Puerto Rico, announced that Ojeda Rios had gone underground to continue the fight for independence for the island.

Ojeda Rios and Colon Osorio were among nine defendants waiting trial in

Hartford on charges they staged the $7 million robbery in West Hartford to finance the activities of Los Macheteros, which the FBI describes as a terrorist group working for Puerto Rican independence.

The government claims the robbery of the since-closed Wells Fargo depot was plotted by the Macheteros.

The FBI claims the robbery was pulled off by Wells Fargo guard Victor M. Gerena and that he has fled to Cuba with some of the stolen money.

#90269u0838 09/26/1990 ~United Press International

NEW BRUNSWICK, NJ (SEPT. 26) UPI - An 11-year-old girl has died of Lyme disease, marking what could be the nation's first reported case of a fatality caused by the tick-borne illness, health officials said Wednesday.

The listing of Lyme disease as the cause of death for Mandy Schmidt, of Sayreville, was confirmed Tuesday, said Bernard Mihalko the director of the Middlesex County Health Department.

The death also was believed to be the first in the nation caused solely by Lyme disease, said Dr. Terry Schulze, a state Health Department research scientist.

''To my knowledge it's the first time we've had that in New Jersey,'' Schulze said. ''I've heard anecdotally of deaths attributable to Lyme disease from other states, but there's always been some other underlying medical problem that was exacerbated by the Lyme disease.''

Tom Skinner, a spokesman for the federal Centers for Disease Control in Atlanta, said Wednesday the agency had never received a report of a death from Lyme disease.

''We have never received a report of a case fatality as a result of Lyme disease. If a case were to go untreated there is a slight possibility it could result in death. But we have never receive a case fatality. It would be the first if that is the case,'' he said.

Schmidt died Monday at Jersey Shore Medical Center in Neptune, Mihalko said. She succumbed to the disease after being treated for two years, he said.

''I can tell you she died in her mother's arms ... and it was a painful death '' he said.

Lyme disease is spread to humans by deer ticks infected with the bacteria.

Symptoms include fever, fatigue, headache, and stiffness in the neck. Later on

in the disease the patient can also suffer swelling and pain in the larger joints, especially the knees.

Lyme disease is sometimes characterized by a raised red bump or rash where the tick has bitten the victim, but it does not appear in all cases.

The disease was not recognized as a distinct illness in the United States until 1975, when patients were first diagnosed in Lyme, Conn.

More than 14,000 cases of Lyme disease have been reported in 43 states since 1980, with most cases occurring in the Northeast and Mid- Atlantic coastal states and Wisconsin, Minnesota, California and Oregon.

#90269u0843 09/26/1990 ~United Press International

LOGANVILLE, GA (SEPT. 26) UPI - A landscaper has served three years and three months of a life prison term after being convicted of a 1986 rape- burglary he apparently did not commit, officials said Wednesday.

Anthony Echols, 26, of Loganville, confessed Tuesday to a crime for which Willie Frank Williams was convicted in June 1987 after a two-day trial in Walton County Superior Court, said Loganville Police Chief Eddy Sharpe.

Williams, suspected as innocent by townspeople throughout his legal proceedings, was sentenced to life in prison for the rape of an elderly Loganville woman.

Police picked up Echols after reopening the investigation some six weeks ago for reasons they have not revealed.

''We had been watching him for a while, and we were thinking that he may have been the one responsible,'' Sharpe said.

''We picked him up when we got some fingerprint evidence back from the State Crime Lab and then we got the confession.''

Echols is being held without bond at the Walton County Jail on charges of rape burglary and aggravated assault. He faces additional charges, possibly for other 1986 burglaries.

The victim was the third elderly woman to be burglarized in a string of break-ins during the spring and summer of 1986 in the small town northeast of Atlanta.

William's sentence included 20 more years for aggravated assault, five years for possessing a firearm during the commission of a felony and 20 concurrent years on a burglary charge.

When he was convicted, then District Attorney John Ott called the attack on the woman ''brutal,'' saying he was not surprised with the severity of William's sentence.

The victim suffered broken ribs and other injuries in the attack by a masked intruder. She passed out after the attacker stuffed a pillow over her face, police said.

Ott is now a Superior Court judge in the Alcovy Circuit in Walton County, where Williams was tried.

Police said Echols was responsible for another break-in at the same victim's home in 1987. He was convicted of burglary in that case and served about 15 months in jail.

Williams, described as a quiet man who lived with his brothers on the outskirts of Loganville, was arrested at his home after police obtained a search warrant using results of a crime analysis of unidentified evidence.

Many people in the community said at the time and have maintained since that the court convicted the wrong man.

''We knew all along that Willie didn't do it,'' said a woman who asked not to be named. ''He wasn't that type of person. We just knew it wasn't him.''

Authorities are working on William's release from the Dodge County Correctional Institute in Chester, where he has served his time.

His release must come by order of a judge or the state Board of Pardons and Paroles.

''From our standpoint, we are glad we a have good correctional system that allow people to keep their dignity intact,'' Andy Bowen, a spokesman for the Georgia Department of Corrections, said in response to Echol's arrest. ''I hope his prison stay was as humane as possible.''

-30- 3322

#90269u0846 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - President Bush Wednesday submitted for Senate ratification a maritime agreement between the United States and the Soviet Union, which was signed last June 1 during the summit meeting with Mikhail Gorbachev.

The agreement reaffirms the maritime boundary between the United States and the Soviet Union, which was set in the conventions signed March 30, 1867, when the Soviets sold Alaska to the United States for $7.2 million. Alaska became

the 49th state Jan. 3, 1959.

The new treaty ''resolves differences over where each nation has the right to manage fisheries and oil and gas exploration and development, as well as its jurisdiction in marine areas. It also ensures that coastal state jurisdiction, in accordance with international law, is exercised by either party within 200 nautical miles of either or both coasts.

-30- 1046

#90269u0853 09/26/1990 ~United Press International

BUFFALO, NY (SEPT. 26) UPI - Buffalo-area viewers of Monday night's NFL game between the Buffalo Bills and New York Jets say a crack about the city during a halftime promotional spot was out of bounds.

The ABC television affiliate in Buffalo, WKBW-TV, Wednesday said it has received several calls complaining about a joke during a promotional spot for the ABC sitcom ''Coach.''

In the spot, which aired at halftime of the Bills 30-7 victory, Jerry Van Dyke the show's co-star, comments to ''Coach'' star Craig T. Nelson that even if the Bills win, they have to go back to Buffalo.

''Even if you win, you lose,'' Van Dyke said. ''You still have to go home to Buffalo.''

''We have taken a significant number of calls from viewers, enough to tell you that people weren't happy with it and didn't feel that it was funny,'' said John DiSciullo, WKBW promotional director.

DiSciullo said while he believes there was no intent by the network to ''slam the city,'' many regarded the comment as ''a cheap shot.'

He said the joke came at a bad time, during a high-rated sports show and when Buffalo is in the running to land a major league baseball expansion team in 1993.

Barry Kemp, chief writer and executive producer of the series, took responsibility for the remark and said it was ''a thoughtless slip.''

''I will figure out some way of making it up to Buffalo,'' Kemp said. ''We'll put something positive in the show to make it up.''

-30- 1664

#90269u0859 09/26/1990 ~United Press International

CAPE GIRARDEAU, MO (SEPT. 26) UPI - A mild earthquake measuring about 4.6 on the Richter Scale shook the Midwest along the New Madrid Fault Wednesday but

no injuries or serious damage were reported, authorities said.

The U.S. Geological Survey in Golden, Colo., said the quake that struck east-central Missouri along the Illinois border measured 4.6 on the Richter scale.

The USGS said the quake, which hit at 8:19 a.m., occurred about 10 miles southwest of Cape Girardeau, or 40 miles north of New Madrid.

The quake was felt as far north as St. Louis, as far south as Caruthersville in the Bootheel region of southeastern Missouri, and as far east as Paducah, Ky., and Tennessee.

''The floor shook,'' said Patrolman David Felton of the Cape Girardeau Police Department, who was in the police station when the temblor struck. Cape Girardeau is on the Mississippi River, about 100 miles southeast of St. Louis.

''I was talking on the phone at the time and the person on the other end said things were falling from their walls,'' said Felton. He said nothing fell off the walls at the police station during the quake, which he estimated lasted about five seconds.

Felton said no injuries had been reported in Cape Girardeau.

''The damage has been limited to pictures and things falling from the walls,'' he said. ''We've received a whole bunch of calls.''

''It shook us pretty good,'' said Lt. Frank Masterson of the New Madrid County Sheriff's Department. The county is in the Bootheel and gave its name to the fault that gained notoriety when it produced one of North America's greatest tremors in 1811.

''It was shaking the floors - our desk, our ceiling fans were really shaking '' said Masterson, who said it felt like the quake lasted about 15 seconds to those in the sheriff's office. ''It sounded like a big train coming through.''

A prediction by New Mexico scientist Iben Browning that a major quake could occur along the New Madrid Fault in early December has generated extensive publicity in the area and has prompted emergency preparedness officials in states along the fault to make contingency plans for a possible disaster.

The New Madrid Fault runs through southeastern Missouri near the borders of Illinois, Kentucky, Tennessee and Arkansas.

The 1811 earthquake is said to have made the Mississippi River flow backward for three days, drowning dozens of people and creating Reelfoot Lake in Tennessee. Scientists have warned there is a 90 percent chance of another devastating earthquake within the next 50 years somewhere along the

200-mile-long fault.

-30- 2819

#90269u0861 09/26/1990 ~United Press International

LANDING ZONE FOSS, SAUDI ARABIA (SEPT. 26) UPI - Marine Commandant Alfred Gray ordered his hot and dusty men Wednesday to banish any boredom and morale problems and keep focused on their anti-Iraq mission in the Saudi desert, where he said they will probably spend six-month tours of duty.

''Is it going to be easy? Hell no,'' the ruddy-faced four-star general told about 200 sweltering marines assembled in a forward desert staging post for the 1st Marine Expeditionary Force. ''Are we going to do it? Hell yes.''

Gray, who is dubbed ''Papa Bear'' among the 195,000 personnel in the U.S. Marine Corps, delivered a punchy 45-minute-long address to the troops, who clustered in a circle around their leader, bellowing affirmative answers to his constant directives.

The general's speech was peppered with reminders that their presense was to defend Saudi Arabia against the armies of Saddam Hussein in occupied Kuwait, more than 100 miles north.

''The best defense is a good offense,'' he told his audience at the remote desert base of scattered camouflaged structures and an impromptu helicopter landing site made of oil-soaked sand. ''We have everything we need to do whatever needs to be done ... we're going to play for keeps if that is required.''

Gray, after landing by chopper, eschewed the use of a microphone and energetically paced the sand as he bluntly told the men that as marines they were renowned for toughness and would just have to make do without many niceties amid the rigors of the Saudi desert.

''There will be no morale problem in th 1st Marine Expeditionary Force. Right?'' he said, drawing an obligatory but more low-key martial bellow from the troops.

''Because I say there will be morale. There also will be no boredom,'' said the veteran of 40 years service. ''This is a big continent, this Saudi Arabia, and there is a lot you've got to learn about and training that you've got to do.''

The general said the mission in the Persian Gulf was a top priority, but that the troops should remember other marines were enforcing America's numerous global obligations, whether off the coast of Liberia or training Colombian marines in the jungles of Latin America.

''I don't want to hear any more questions about how long you are going to be out here,'' Gray said. ''The commandant will think about that.''

He told the troops that their usual six-month tour could be extended if the mission required, causing some audible muttering in the ranks.

''What I am saying to our warriors is that in the corps we live a life of six month deployments, and then you are back for 15-18 months, and then you go again,'' he explained to reporters.

''That's the cycle. That's what our whole structure is about. It would make sense if we could hold to that as best we can. But we may not be able to, because ... we have enormous global commitments.''

Gray, who is in Saudi Arabia for about four days, declared that ''the privilege of being a marine takes in territory like this. When we suck in that gut and we have that price, we've got to buy that price.''

Gray said he hoped diplomacy would avert a conflict and spoke vaguely about a solution resulting in a ''better world,'' but would not say if this included Saddam.

''You have to try to shape things in such a way that you have a better situation when you finish than when you start out,'' he said. ''Certainly the world today, because of what Saddam Hussein has done, is a more dangerous place.''

Gray's numerous exhortations about the martial prowess of the marines struck a sound note among the soldiers, who in random interviews declared deep respect for the general and his many victories in securing congressional funding for the corps.

His visit was marked by a hot breakfast, the first given at the base named after Joe Foss - a World War II marine air ace - since the troops arrived about one month ago.

''We ought to invite him more often,'' joked Master Sgt. Alfred Chavez, 36, of Portales, N.M., watching a long line of men line up for chunks of orange-colored omlette and sloshy creamed beef. ''We will probably be back on the MRE (rations) tomorrow.''

PARIS (SEPT. 26) UPI - Terrorist leader Mohammed Abul Abbas warned of a ''war without limits'' if Iraq is attacked and threatened in an interview published Wednesday to strike against the United States and Western Europe.

''The Palestinians support Baghdad with all their force because Baghdad was the first to link the Palestinian cause to the Gulf and the petroleum crisis '' Abul Abbas, head of the Front for the Liberation of Palestine, told the Paris daily Le Figaro.

Asked specifically if he was threatening terrorist actions against the United

States and Western European countries in case of war, he replied:

''If your country were attacked, wouldn't you defend it? The war to come will be a war without limits, we will fight everywhere if we are attacked.

''In the same way that the Americans and Europeans have come to Saudi Arabia, we have the right to mobilize our Arab troops wherever they are, '' he said. ''We will fight in our own way. We will not let Iraq be crushed by imperialist forces and this war will have no frontiers.''

Abul Abbas is believed to have been the organizer of the attack on the Achille Lauro Italian cruise ship that resulted in the death of Leon Klinghoffer, an elderly, wheelchair-bound New Yorker who was thrown overboard.

His group also claimed responsibility for an aborted attack on a beach near Tel Aviv last May, an incident that led President Bush to suspend Washington's dialogue with the Palestine Liberation Organization. PLO leader Yasser Arafat refused to expel the group from his organization's executive committee despite Bush's threat to break off talks.

Abul Abbas' comments came just a few days after President Bush warned that any support of terrrorist acts by Iraqi President Saddam Hussein ''would indeed have serious consequences.''

''I will hold him, as will our allies, directly responsible for terrorist acts '' Bush told a White House news conference last Friday.

In the interview with Le Figaro from his office in Baghdad, Abul Abbas said he considered French President Francois Mitterrand's speech on the Persian Gulf crisis to the U.N. General Assembly Monday as ''more progressive than the American position.''

''The idea of an international conference on Lebanon and Palestine is a very important point of the French plan,'' he said. ''Here is a personal idea: if the issue of Kuwait were also taken up by that conference the French plan wpould appear more acceptable and more serious.''

In his U.N. speech, Mitterrand proposed a four-point peace plan to resolve the crisis that would reuire the withdrawal of Iraqi troops from Kuwait, the release of all foreign nationals being held hostage, reconciliation among the region's countries, and a broad disarmament program. But Mitterrand did not specifically mention holding an international conference on the crisis as has been suggested by the Soviet Union and some Arab states.

Despite his kind words for the Mitterrand plan, Abul Addas said he did not understand why Western European countries were supporting the United States in the crisis.

''The United States is pursuing a colonialist goal, and if it is successful it alone will control the world's sources of wealth. European interests will be gravely affected,'' he said. ''It is in the interest of Europe to be on the side of the Arab world. We thought France had understood this.''

Abul Abbas said the foreign nationals being held against their will in Iraq and Kuwait were not hostages but ''guests that Iraq has no choice but to invite to prevent war. When there is no longer the risk of war there will not be any more hostages.''

#90269u0927 09/26/1990 ~United Press International

JAKARTA (SEPT. 26) UPI - World oil prices could soar out of control and exceed $60 a barrel if the Persian Gulf crisis developed into a war, Indonesia's oil minister said in an interview published Wednesday.

Mines and Energy Minister Ginandjar Kartasasmita told the Indonesian Observer that it is very difficult to predict the level to which prices would rise should fighting occur in the Middle East.

''It might exceed $60 a barrel if war breaks out,'' the Observer quoted Ginandjar as saying.

If the oil production of Saudi Arabia, the world's largest oil exporter, and its neighboring Gulf countries are reduced by war, ''you can't imagine how high the prices (will go),'' Ginandjar said.

Crude oil prices topped the $40-a-barrel mark Monday for the first time in a decade. Prices have surged since Iraq's Aug. 2 invasion of Kuwait and the United Nations' decision to impose an embargo against both countries that removed about 4 million barrels of oil a day from both countries.

The minister predicted prices probably would remain at this level until December when demand for heating oil rises to meet fuel needs during the winter mr's cold.

He said the 13-nation Organization of Petroleum Exporting Countries cannot do much at this time ''because what we have done to boost the production by each member country has now reached maximum,'' the Observer reported.

Last month OPEC agreed to allow members to raise production in an attempt to make up for the oil lost on the world market from Iraq and Kuwait.

''It is time now that the industrialized countries played their role and released their strategic oil stocks to balance declining OPEC production,'' he said.

He estimated the industrialized countries' oil reserves total at least 1 billion barrels, and if these stocks are released, it could halt the rise in prices for up to three months.

In Paris, however, an official of the International Energy Agency said Tuesday it is unlikely IEA member countries would draw from their crude oil reserves.

He said they would release their oil stocks only in case of real shortages.

The IEA is made up of 21 of the world's largest oil-consuming industrialized nations, and closely monitors world oil output.

Current oil prices are nearly double those before Iraq's Aug. 2 invasion of Kuwait, Ginandjar said.

In an effort to help deal with the world oil shortfall, Indonesia is boosting its oil production by 100,000 barrels a day starting in December, he said.

#90269u0937 09/26/1990 ~United Press International

COLUMBUS, OH (SEPT. 26) UPI - The president of the American Farm Bureau Federation said Wednesday that agriculture is the key to the General Agreement on Tariffs and Trade negotiations now taking place in Europe.

Dean Kleckner told reporters, ''If we can get an agreement in agriculture, we're likely to have a successful trade round. But if agriculture is not settled, it's very likely the whole round will blow up.''

He said the United States is aiming for agreement on limiting or eliminating export subsidies, tariffs and non-tariff trade barriers.

Preparing to address the Ohio Farm Bureau Federation's board of trustees Kleckner said 25 percent of the farm acreage in America is devoted to producing exports, and other nations are restricting U.S. exports of meat, wheat and other products.

Kleckner said the Federation, a farmers' lobbying group, is firmly behind President Bush's capital gains tax reduction and favors a freeze on federal spending, even for agriculture programs, to help balance the federal budget.

But he warned that every time Congress has a budget summit conference, which has been five times in the last eight years, taxes were increased.

#90269u0948 09/26/1990 ~United Press International

CHICAGO (SEPT. 26) UPI - Increasing harvest activity and the lack of export

business pressured grain and soybean futures early Wednesday on the Chicago Board of Trade.

Midmorning prices were mostly lower in moderate trading.

The outlook for favorable weather the rest of the week will help reduce moisture levels in corn and benefit the soybean crop as it approaches maturity.

Corn harvest activity is expected to increase day by day.

Follow-through selling also weighed on corn prices and profit-taking kept a lid on soybean values, but losses in both were tempered by scattered buying at the lows.

Wheat was narrowly mixed in line with the weakness on the rest of the floor.

Country movement was light and basis levels were steady to weak.

The midmorning prices:

Corn Dec 2.26 3/4 off 1; Mar 2.36 off 1 1/4; May 2.41 3/4 off 1 1/2.

Soybeans Nov 6.14 1/2 off 3; Jan 6.29 off 3; Mar 6.41 1/2 off 3 1/4; May 6.50 1/2 off 3.

Wheat Dec 2.74 3/4 unch; Mar 2.80 3/4 off 3/4; May 2.96 1/4 up 1/4.

Oats Dec 1.13 1/4 off 1 1/4; Mar 1.23 1/2 off 1 1/2; May 1.31 off 1 1/2.

MIAMI (SEPT. 26) UPI - The mayor of Santo Domingo got a rude welcome from thieves when he checked into a Hialeah Gardens hotel during a promotional visit to Miami.

Someone snatched his burgundy leather briefcase, containing $5,200 in U.S. currency, jewelry and personal items.

Rafael Corporan de los Santos, mayor of the Dominican Republic's capital, was in Miami to plug his radio program, which is broadcast in his country and is scheduled to air in Miami soon, said the mayor's personal assistant, Pedro Julio Diaz.

The mayor and his assistant were checking into the Park Plaza Hotel Tuesday when someone took the briefcase off a luggage cart. It was lightning quick, Diaz said.

''We didn't even have time to see the man,'' he said.

Corporan de los Santos brought the $5,200 to do some shopping, Diaz said. He said the briefcase also contained personal documents more valuable than the money.

The robbery appeared to be a classic set-up, said Hialeah Gardens Police Chief Charles Rogers.

One man distracted the bellhop by asking him a question while another man grabbed the briefcase and ran. They jumped into a late-model car, with a driver and another man already inside, and fled.

No other suitcases were taken. Police don't know if the robbers singled out that briefcase because they knew it belong to the mayor.

''We're looking at all possible angles,'' Rogers said.

The mayor checked out of the hotel Wednesday, a hotel employee said.

#90269u0981 09/26/1990 ~United Press International

PAINESVILLE, OH (SEPT. 26) UPI - Jurors began deliberations Wednesday on whether to recommend a death sentence for Damon Lundgren, son of cult leader Jeffrey Don Lundgren, who was sentenced to death last Friday.

The seven-man, five-woman jury began deliberations shortly after prosecutors and defense lawyers delivered brief closing arguments.

The jury has the option of recommending death in the electric chair, life with no parole for at least 30 years or life with no parole for at least 20 years. Common Pleas Judge Paul Mitrovich will then rule on the jury's recommendation.

Lundgren, 19, was convicted of aggravated murder and kidnapping for helping his father kill a family belonging to the cult in April 1989 at the cult's farm in Kirtland.

Unlike his father, who delivered a five-hour defense of his actions at his sentencing hearing last week, Damon Lundgren Tuesday pleaded for his life.

''I don't want to die,'' he said. ''I would like to continue to live. I would like a chance to make up, if I can, for some of the things my father has done.''

Assistant County Prosecutor Joseph Gurley said in his closing argument Wednesday there was no question the aggravating circumstances outweigh the mitigating factors, a question the jury was deciding.

''He said he doesn't want to die; he wants to live his life,'' Gurley said. ''Certainly, that statement could be applied to every one of the Averys.''

In his closing argument, defense lawyer Charles Cichocki repeated defense contentions that Damon was under his father's influence.

''Now, whatever role you found Damon had (in the slayings), you know who was the principal offender,'' he said. ''That was Jeffrey Lundgren.''

Noting Damon had been beaten by his father since he was 3 years old, he said the younger Lundgren would not have had anything to do with the killings if he were not being dominated by his father.

-30- 2119

#90269u0991 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - Most students can't analyze what they read, can't handle moderately challenging math problems and have a limited understanding of American history, according to a bleak picture of student achievement released Wednesday by the Education Department.

The Nation's Report Card analyzed 1988 achievement of children in fourth, eighth and twelfth grades and compared it to student performance 20 years ago. Things haven't changed much.

Education Secretary Lauro Cavazos, calling the report a ''compendium of disappointment,'' said the results indicate where the problem lies.

''Many parents and educators have failed to insist that youngsters do some of the fundamental things that we know promote education,'' Cavazos said, citing more reading and writing at home, less time watching television and less reliance by teachers on ''passive learning'' techniques such as lecturing and

showing films.

The chairman of the National Assessment Governing Board, which oversees the achievement efforts, said too many parents mistakenly think their child and their child's school are doing well.

''This data ought to be a cold shower for America, but it seems everyone is walking around with their own umbrella,'' said Chester Finn Jr. ''Unless the cold water drips on Mr. and Mrs. Smith and on Johnny and Jessica, we're not going to get out of this problem.''

The findings come exactly one year since President Bush met with the nation's governors in Charlottesville, Va., to set educational goals for the year 2000.

''Taken in total, the results of The Nation's Report Card provide evidence that we have a daunting challenge before us if we are to reach our national student achievement goal by the 21st century,'' the report said.

''Cummulative evidence shows that, for any curriculum area, only about half of our high school seniors may be graduating with the ability 'to use their minds' to think through subject-related information in any depth,'' it said.

Samuel Sava, executive director of the National Association of Elementary School Principals, said the results show schools need more money, the school day and the school year need to be lengthened and parents must be more involved.

While most of the data was dismal, the report did find minorities' performance has improved over the years, especially for reading. Also, children seem to be learning the basics, yet they generally showed no improvement as they got older.

Among the key findings:

-Reading and writing:

Most students get the gist of what they read but have ''considerable difficulty'' analyzing and synthesizing what they have read.

Many students have difficulty communicating effectively in writing, with less than half of students producing at least adequate informative and persuasive writing samples.

Compared to 20 years ago, overall reading is about the same today, or slightly better, and writing achievement has remained stable.

-Mathematics:

Only 21 percent of the 9 year olds and 73 percent of the 13 year olds displayed a firm grasp of basic addition, subtraction, multiplication and division and of beginning problem-solving. Half of the high school students could not handle moderately challenging math material.

Compared to 20 years ago, recent performance shows gradual, yet somewhat uneven, improvement.

-Science:

Students' knowledge of science and their ability to use what they know ''appear remarkably limited.''

Compared to 20 years ago, science achievement is worse today.

-History and civics:

Students have a ''moderate'' understanding of some historical events, but far from displaying a coherent grasp of how the events interacted to shape the nation. For example, 56 percent of fourth graders knew the names of Columbus's ships, but only 36 percent knew why he sailed to America.

As for civics, only 51 percent of seniors knew that religious freedom is guaranteed in the Constitution, while virtually all knew that the accused have a right to an attorney.

Student civics achievement was better 20 years ago, the report said.

-Geography:

High school seniors demonstrated ''generally low performance.''

#90269u0998 09/26/1990 ~United Press International
(SEPT. 26) UPI - There are NO reports of damage or injuries after an earthquake rolled through portions of southeastern Missouri and Southern Illinois this morning. The latest estimates put the earthquake at four-point-six on the open-ended Richter Scale. The quake along the New Madrid Fault was felt as far north as St. Louis.

Jordan reportedly will let two more Iraqi passenger jets land in Amman today... this after one Iraqi Boeing 707 was given permission to land earlier today. It was the first violation of yesterday's U-N-approved embargo of Iraqi air traffic. Jordan says it let the plane land for humanitarian reasons.

Orders for defense items in August helped to keep overall durable goods orders from falling more than they actually did. The Commerce Department figures show durable goods orders down eight-tenths of one percent last month. That would be a one-point-six percent drop if defense orders are NOT counted.

The Commerce Department reports that personal income was up three- tenths of one percent in August. But that is the smallest increase since April's two-tenths of one percent hike. At the same time, the savings rate dipped from July's four-point-five percent to four-point-three percent.

President Bush has sent letters to Congress that formally open the way for talks with Mexico about building a free-trade zone between the two countries. Canada also has expressed an interest in joining the talks and that could result in a three-way trade zone covering all of North America.

-30- 1683

#90269u1010 09/26/1990 ~United Press International
(SEPT. 26) UPI - President President Bush today submitted for Senate ratification a maritime agreement between the United States and the Soviet Union that was signed on June 1st. The agreement reaffirms the maritime boundary between the United States and the Soviet Union, originally set in conventions signed in 1967.

Jury selection continues for a third day in Cincinnati in the obscenity trial of the Contemporary Arts Center and its director. One woman said she saw a show of photographs by the late Robert Mapplethorpe and would have NO problem viewing the pictures during the trial. She was dismissed as a prospective juror.

The F-B-I is undertaking a high-priority search for two defendants in the 1983 Wells Fargo robbery in Connecticut. The two are suspected of jumping bail in Puerto Rico to pursue separatist activities. The F-B-I says a large contingent of agents in Connecticut and Puerto Rico has been ordered to search for the two men.

Health officials in New Brunswick, New Jersey, say an 11-year-old girl has died of Lyme disease... possibly the nation's first reported case of a fatality caused by the tick-borne illness. Lyme disease symptoms include fever fatigue, headache and stiffness in the neck. Later on in the disease the patient can also suffer swelling and pain in the larger joints.

-30- 1483

#90269u1065 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - The median income of households in 1989 rose by 1.3 percent after adjusting for inflation, but the nation failed to make progress in fighting poverty, as 31.5 million people - 12.8 percent of the population - remained officially poor, the Census Bureau reported Wednesday.

Nearly 40 percent of the 31.5 million poor were children under 18 and another 10.7 percent were over 65. Nearly 20 percent of American children are poor.

The annual report, ''Money Income an Poverty Status in the United States: 1989 '' was based on a survey of 60,000 households in March 1990 - before the recent downturn in the economy.

It showed the overall median household income at $28,910, up about $265 from 1988, fueled largely by a 5.1 percent rise in the inflation- adjusted income of black households, to $18,080. The incomes of white households, at $30,410, and Hispanic households, at $21,920, were statistically unchanged from 1988.

Asian and Pacific Islander households had a median income of $36,100 in 1989, the bureau said, attributing the higher level than white households in part to the larger size of Asian and Pacific Islander households.

Households include all versions of living units, including singles and other unrelated individuals.

For families, the median income was $34,210, up 1.4 percent from 1988 and for married-couple families, the median was $38,550, a 1.1 percent increase over the past year. For women family heads with no husband prersent, the median income was $16,440, unchanged from 1988.

The Census report also showed that per capita income increased 2.2 percent, to 14,060, an all-time high, and that the inflation-adjusted earnings of women working year-round and full-time also rose to $18,780, a 1.8 percent increase, while those of men declined by 1.8 percent, to $27,430.

This was the second consecutive year in which earnings declined for men and allowed women to narrow the wage gap so that they now make 68 cents for every $1 earned by a man, up from 60 cents in 1980.

The report showed that despite the growing economy over the past several years

poverty remains stubbornly persistent, especially among children.

The average poverty threshold for a family of four was $12,675 in 1989 and $12,091 in 1988.

While both the poverty rate and the numbers of people in poverty have declined since the peak of 1983, when the rate hit 15.2 percent and 35.3 million people were poor, it is still significantly above the most recent lows in 1978, when the poverty rate was 11.4 percent and 24.5 million were poor.

The poverty rate for whites was 10 percent, for blacks 30.7 percent and for Hispanics, 26.2 percent, all unchanged since 1988. Asians and Pacific Islanders had a 14.1 poverty rate, a decrease of 3.2 percent from 1988.

Among families, the overall poverty rate was 10.3. unchanged from 1988. It was lowest for married-couple familes, 5.6 percent, who were 43.2 percent of all poor families, and highest for families with a female householder, who have a poverty rate of 32.2 percent.

The report also confirmed other studies that have shown a rise in income inequality over the last two decades. In 1989, the highest 20 percent of households received 46.8 percent of the total income received by all households, 3.8 percent higher than 1969.

-30- 3564

#90269u1071 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - Republican leaders who met with President Bush Wednesday indicated Bush is ready to yield on his demand for a capital gains tax cut if some economic growth incentives are in the final deficit reduction plan.

As a Monday deadline approaches for up to $105 billion in automatic spending cuts, assistant House Republican leader Newt Gingrich of Georgia said he would introduce a bill giving Bush seven days emergency powers to prevent federal workers involved in health and safety from being furloughed.

Gingrich said Bush supported his plan to let the president ''shift money around'' within the automatic cuts to keep air controllers, meat inspectors, emergency medical workers and other essential federal employees working.

The leaders, taking several jabs at Democrats, spoke to reporters after a 45-minute meeting in the Cabinet room with Bush before he left on a five-city political swing through the Midwest.

At the meeting, Bush was flanked by Senate Republican leader Robert Dole of Kansas and House GOP leader Bob Michel of Illinois. Both have broken with Bush over capital gains by urging that the tax cut Bush wants not be part of a $500

billion, five-year deficit reduction package negotiators are trying to craft.

Failure to reach a deal before Monday, the first day of the 1991 federal fiscal year, would trigger $105.7 billion in automatic spending cuts designed to force the $168.8 billion deficit down.

While Bush did not completely tip his hand on capital gains, Dole said Bush ''wants to get an agreement and he wants some growth components in the package.''

''We're not going to rush to agreement,'' he said. ''We've been very flexible. We've been very forthcoming. There are a couple of points where Democrats have to move. They can't have it all their way either. It's in the growth area.''

Sen. Thad Cochran, R-Miss., told reporters at the White House Bush ''is anxious to achieve an agreement.''

''I think he's willing to negotiate every item that's been advanced,'' said Cochran, adding, ''The economy needs immediate attention. I'm saying that everything is negotiable.

''He wants an agreement that includes more growth items in it and he certainly wants more attention involved in reductions in spending,'' Cochran added.

He said, ''It is important to get an agreement to try to keep the train from wrecking. The automatic cuts in spending across the board are to be avoided if it's at all possible.''

Bush, speaking with reporters aboard Air Force One before take off, tried to put pressure on Democrats to come to terms and rejected suggestions he is inflexible on capital gains.

''I would now say that the Democrats in Congress have to come forward with a package,'' the president said. ''And we're still working hard in a good bipartisan spirit. ... We're getting down to the wire.''

Asked if he believed automatic spending cuts could be avoided, Bush said, ''It can be avoided if they (Democrats) get doing what they should. It's the Congress.''

The president again ripped into Democrats for trying to delay the Oct. 1 deadline for reaching a deficit reduction agreement and imposition of automatic cuts if there is not agreement.

House Democratic leaders on Tuesday cleared the way for floor consideration of a temporary spending bill to keep the government running until Oct. 20 and prevent automatic cuts from occurring until then.

''This concept that they tried (Tuesday) - just move it down the road, kick the can down the road ... is not fair to the American people nor to the economy,'' Bush said.

Bush said he was not concerned that Michel and Dole had suggested that capital gains not be in the budget aggreement.

Dole recently proposed that capital gains and other money losers, such as new child care programs Democrats want, be in a separate bill or that Republicans consider higher income taxes on the rich, which Democrats have demanded as the price for a capital gains cut they say favors the wealthy.

Michel on Tuesday said the price for getting the tax cut was ''too steep'' both in terms of Democratic demands and in the public relations beating the GOP is taking for appearing to favor the rich.

He said the administration is ''exploring some options that border on'' dropping capital gains and that ''there are certainly other ways of stimulating the economy than ... being hung up on a capital gains reduction.''

#90269u1096 09/26/1990 ~United Press International

MANAGUA, NICARAGUA (SEPT. 26) UPI - The Nicaraguan government, facing a growing economic crisis, has found itself trapped this week between foreign creditors demanding payment of arrears and a population demanding to be fed.

Government representatives flew to Washington to meet with representatives of the International Monetary Fund and World Bank on the sidelines of the organizations' annual meeting.

Sources close to the talks said President Violeta Chamorro's government is hoping to arrange a payment scheme for the approximately $200 million in overdue payments it owes the bank, and to secure a new bridge loan to help stabilize the economy.

In Managua, the opposition Sandinista Front is leading the charge against immediate servicing of Nicaragua's $10 billion foreign debt, arguing that Chamorro must first take care of the tens of thousands of unemployed the government has created since taking office Apr. 25.

Most of Nicaragua's foreign debt is owed to private foreign banks, European governments and to multilateral agencies.

Former Sandinista President Daniel Ortega, a long-time opponent of IMF lending policies, warned Chamorro against becoming reliant on the organization, saying it was synonymous with being reliant on the United States.

He said such agreements would bring back ''the economic model of former dictator Anastasio Somoza.'' The government, he said, is trying to ''legitimize the economic intervention of the United States and to make the rich richer and the poor poorer.''

The Sandinistas inherited a $1.65 billion debt from Somoza when they ousted him in 1979 after years of corrupt rule that increased Somoza's wealth while impoverishing the country.

After more than a decade of rule, nine years of fighting the Contra rebels and defense expenses that often topped 50 percent of the national budget, the Sandinistas left Chamorro with a debt of close to $10 billion - the highest in Central America.

In a speech last week outlining the government's economic recovery plan, Finance Minister Silvio de Franco said one of the most important parts would be ''a renegotiation of the foreign debt, beginning with a payment of arrears and a negotiation of new financing.''

He added that the debt was currently 40 times as much as the country's annual export earnings, and that the value of last year's imports was 2.5 times that of exports.

''To pay the $10 billion in debt with exports alone would take a tremendous amount of time,'' said Jose Villegas, a representative in Managua for the Inter-American Development Bank, which is observing the negotiations in Washington.

Nicaragua is $60 million behind on payments for the $400 million it owes the IDB. Both the IDB and the World Bank have said Nicaragua must be up to date on its arrears before they will approve new loans.

''They also have to create the conditions for more savings and investments,'' Villegas said. ''If they could get $500 million in aid from foreign donors right now, or even $300 million, they could open the door to loans from these organizations.''

Foreign financial sources have said new loans are unlikely to come out of this week's meetings in Washington, but that another meeting between Nicaragua and its creditors is scheduled for late this year in London, which could produce results.

LONDON (SEPT. 26) UPI - Stock prices sqeezed out a small gain Wednesday on the London International Stock Exchange, with investors ignoring the Tokyo Stock Exchange's fall in favor of bargain-hunting buying in blue-chip issues.

The Frankfurt Stock Exchange staged a partial recovery for Tuesday's sharp sell-off.

In London, the blue-chip Financial Times 100-stock index, which added 8.9 points Tuesday, closed up 0.8 point at the 2,000.0 level. The narrower top 30 industrial average gained 6.0 points to 1,532.6.

Volume amounted to around 410 million shares, vs. the 412 million that changed hands Tuesday.

Analysts said stocks moved higher because of improving sentiment from a weakening crude oil price and good performance on other European markets.

But the London market's trend remained bearish, in spite of the bargain-hunting in well-performing stocks, as a result of recessionary fears, Persian Gulf tensions and long-term increases in oil prices, analysts noted.

Among the most widely traded stocks, oil issues weakened. British Petroleum fell 9 cents to $6.39 a share, Enterprise Oil lost 15 cents to $11.70 and Shell lost 16 cents to $8.25.

In the blue chips, Imperical Chemical Industries gained 16 cents to $15.06 and Glaxo climbed 36 cents to $13.53.

Whitbread gained 21 cents to $7.20 on the company's planned sale of a drink-dispensing subsidiary.

Among some of the day's other highlights, advertising holding company WPP Group tumbled 83 cents to $6.65 on investor worries of a downturn in the advertising sector.

Countryside Props eased 12 cents to $1.13 on a continued slump in the property market.

British Aerospace added 11 cents to $9.88 on the strength of hopes for an order from Swiss Airbus.

Allied Leisure gained 6 cents to $1.69 on favorable profit reports on its bowling complex expansion.

In West Germany, stock prices rebounded on the Frankfurt Stock Exchange in active trading.

The closely watched German Stock Index, which plunged 62.65 points Tuesday to its lowest close in 16 months, rebounded 28.59 points to 1, 381.99, a 2.1 percent gain.

Traders said the Frankfurt market opened slightly lower as investors took their cue from Tokyo - which suffered a 4.7 percent decrease - but turned higher amid some strong buying in some blue-chip stocks by local and foreign investors.

#90269u1104 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - Whether its inconvenience or unemployment, the threat of bad food or reduced benefits, just about everybody in America will suffer if the fight over the federal budget is not resolved before Monday.

Automatic spending cuts caused by the failure of Congress and the Bush administration to strike a budget deal would trigger furloughs for 1.1 million federal workers and could produce a ripple effect that, at the very least, would disrupt the daily lives of Americans.

In addition to furloughs, everything from train travel and airline flights to food inspection and programs for drug addicts could be affected if the automatic spending reductions kick in Oct. 1, the start of the 1991 fiscal year.

''People don't need this,'' President Bush said Wednesday, adding, ''I don't think they realize how serious sequestration is.''

The ''sequester,'' making across-the-board cuts to hundreds of government programs, is required under the Gramm-Rudman balanced budget law to hold down the federal deficit. Current estimates are that government spending in the 1991 spending year would be about $106 billion more than the deficit limit allows.

Possible reductions in weather forecasting and night airline flights are just two of the possible effects of the cuts and White House spokesman Marlin Fitzwater said, ''When you go through all the reductions in government services that are represented by a 40 percent budget cut, you're going to see a lot more dramatic and difficult things to deal with than night flights.''

Exempt from sequestration are Social Security recipients, whose checks would not be reduced; military personnel; the Post Service, which operates independently, and members of Congress. The president, vice president and top White House officials also won't be directly affected.

Medicare participants will see their benefits cut by no more than 2 percent in the short term, but would experience a much harder hit if subjected to a full sequester.

As congressional and White House negotiators continued their budget talks, officials of various departments detailed moderate and worst-case scenarios of

what would happen if there is no agreement, or if Monday's deadline is not extended.

The impact may vary greatly from agency to agency, depending on the length of sequester and how each department decides to implement furloughs and program reductions.

An Office of Management and Budget spokeswoman, who said she would have to take off 4.5 days from Oct. 1-15, explained agencies with more job vacancies may require fewer furlough days, since less money is spent on salaries. Of course, the agencies hardest hit by spending cuts will create the worst aftershock for the everyday American.

For instance, the Agriculture Department said it would have to furlough all 7,400 federal meat inspectors midway through the second week of October if the cuts are triggered.

The furlough would effectively close meat and poultry slaughterhouses and processing plants, which by law cannot operate without inspectors. Meat industry leaders estimate a shutdown would cost the economy $1 billion a day. Farmers would lose $2.8 billion in crop loans and payments if the automatic cuts remained in place for an entire year.

more

Kevin Moley, assistant secretary for management and budget at the Department of Health and Human Services, said drug treatment slots would be slashed by more than 30,000 and state and local health agencies would lose more than $580 million in federal aid.

The Food and Drug Administration would have to curtail inspection and review operations, ''opening the possibility of contaminated blood and delaying review of new drug applications,'' Moley said.

Reductions in Centers for Disease Control programs would result in no vaccinations for 1.6 million children or lead poisoning screening for 22,000 kids.

At the Transportation Department, the reduction of $19.5 billion over the entire year would have a devastating impact on air travel and the operations of Amtrak's rail passeneger service, which receives government subsidies, officials said.

Long-term furloughs of Federal Aviation Administration personnel would mean the cancellation of 6,000 flights each day, most involving 40 key domestic airports. That does not include of National Weather Service plans to close operations at most installations from 6 p.m. to 6 a.m., effectively preventing any commercial flights at night.

Amtrak would try to continue full service if Gramm-Rudman cuts appeared to be short-term. But a lengthy sequestration would result in a shutdown of Amtrak routes, a spokesman said.

Labor Department spokesman Paul Williams said job training and worker compensation programs would be reduced.

The Education Department said cuts would slash the student aid program. Also, there could be delays in federal payments to 58 agencies that guarantee student loans, to up to 12,000 lenders, including banks, savings and loans, credit unions, insurance companies and 36 other institutions participating in the guaranteed student loan program.

At the Department of Veterans Affairs, disability compensation, and pension and life insurance programs are be exempt from sequestration. Under a full sequestration, 13,800 full-time medical center employees would be furloughed, eliminating care for more than 83,000 in-patients and 1.7 million out-patients said spokeswoman Donna St. John.

The Justice Department said because of cuts in the U.S. Marshals Service, some court proceedings would be postponed and possibly could lead to the release of defendants under the Speedy Trial Act.

A spokesman said a sequester ''would significantly reduce the FBI's ability to thwart terrorist activity that may result from the current Iraqi crisis,'' as well as hamper the battle against organized crime and the war on drugs.

Energy Department officials said sustained cuts would slow efforts to fill up and improve the nation's Strategic Petroleum Reserve. They also said it would delay operation of nuclear weapons production plants and disrupt environmental cleanup and safety initiatives.

Furloughs at the Interior Department would require each of America's 50 national parks to be closed for two to three months at a time, or about two days a week, as well as the elimination of most visitor programs and the shutdown of all campgrounds.

Some 40,000 Indian children who attend schools run by the Bureau of Indian Affairs across the country would lose up to two months of classes, and all organized extracurricular activities likely would be cancelled.

Seismic monitoring of earthquake and volcano hazards by the U.S. Geological Survey would be sharply curtailed in states at greatest risk for such natural disasters.

At the U.S. Fish and Wildlife Service, 69 hatcheries would be mothballed, resulting in the elimination of entire production cycles for wild stock of

striped bass, Atlantic salmon and winter chinook salmon. All activities to list new endangered species would be suspended.

#90269u1109 09/26/1990 ~United Press International

(SEPT. 26) UPI - U-S troop strength in Europe will fall by more than 10 percent under orders given this morning by Defense Secretary Cheney. He wants to bring home 40-thousand of the estimated 300-thousand military personnel in Europe over the next 12 months. The orders to the Joint Chiefs of Staff come ahead of what is expected to be a mutual agreement with the Soviet Union on trimming conventional troop strength in Europe.

Jordan says it backs U-N economic sanctions against Iraq... but that did NOT stop it from allowing an Iraqi jetliner to land in Amman today. Two more Iraqi planes are expected to land in Jordan later today. All of this comes one day after the U-N Security Council voted 14-1 to extend the sea embargo against Iraq to aircraft flying to or from the country. Cuba cast the only negative vote. .

Terrorist leader Mohammad Abul Abbas promises in a published interview in France a terrorist ''war without limits'' if Iraq is attacked by the world powers now drawn against it. Abbas is head of the radical Front for the Liberation of Palestine. He's believed to have organized the 1985 terrorist attack against the Italian cruise ship Achille Lauro. Abbas specifically threatens the United States and Western Europe.

Three liberal Democrats in the Senate say they will vote against the nomination of David Souter to the Supreme Court because he won't say how he would vote on the abortion issue. The senators include Frank Lautenberg and Bill Bradley of New Jersey and Barbara Mikulski of Maryland. But two other Democratic Senators, Alan Dixon of Illinois and Terry Sanford of North Carolina, say they will vote for Souter's confirmation.

#90269u1116 09/26/1990 ~United Press International

LONDON (SEPT. 26) UPI - Electric ''stun mats'' will be laid on the floor of a tunnel beneath the English Channel to keep rabid animals from France out of England, Eurotunnel officials Wednesday.

The system is to stun animnals and alert officials will then move in to trap them, and, if necessary, exterminate offenders, said John Weaver, spokesman for the Eurotunnel group.

Britain is considered a rabies-free area, along with Ireland, Sweden, New Zealand, Australia and some Pacific and West Indian islands, according to the American Public Health Association.

Critics of the channel tunnel, the high-speed rail link being constructed by Britain and France under the English Channel and known often as the ''Chunnel '' have argued that when it opens in 1993 Britain could be besieged by rabid dogs, foxes, rats and other animals from continental Europe.

''It's a traditional British chestnut, the fear of rabies,'' Weaver said. ''The electric grid we plan to implement will show people we are approaching the problem from a very practical point of view.''

He said the electric mats will only stun, not kill, trespassing animals.

Other precautions include a 9-foot fence around both tunnel entrances and more fences around the immediate openings of the tunnels.

''It will be a very hostile environment with little incentive for animals to enter,'' said Anthony Crowley, a former head of the government's veterinary service rabies unit.

The main remaining problem will be bats because they can fly over the mats and the fences and are a protected species. Eurotunnel officials planned to mount patrols for signs of bats.

Britain uses strict port vigilance and penalties including prison sentences for people who import infected animals to keep the country virtually rabies free, health officials.

''The only rabies cases we have involve people being bitten by animals abroad, and then developing the disease after they have arrived here,'' said John Murphy, a Department of Health spokesman.

#90269u1120 09/26/1990 ~United Press International

(SEPT. 26) UPI - NO injuries or serious damages have been reported in a mild earthquake that shook the nation's midsection today. The temblor measured four-point-six on the Richter Scale when it rattled east- central Missouri along the Illinois border. The U-S Geological Survey says the quake was centered about 10 miles southwest of Cape Girardeau , Missouri... along the New Madrid Fault. The quake was felt as far north as St. Louis... as far south as Caruthersville in southeastern Missouri... and as far east as Paducah, Kentucky, and Tennessee.

An expert panel recommends that virtually all packaged foods should have labels that explain their nutritional content- including meals served in fast-food restaurants. The recommendations go one step farther than recent government proposals. In addition to nutritional labeling, the panel calls for development of new federal regulations for labeling fresh produce, meat, fish

and poultry, and restaurant meals... particularly those served by fast-food chains. The report comes from the Institute of Medicine, which is part of the National Academy of Sciences.

#90269u1135 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - The median income of households in 1989 rose by 1.3 percent after adjusting for inflation, but the nation failed to make progress in fighting poverty, as 12.8 percent of the population remained officially poor, the Census Bureau reported Wednesday.

Nearly 40 percent of America's 31.5 million poor were children under 18 and another 10.7 percent were over 65. Nearly 20 percent of the nation's children are poor.

The annual report, ''Money Income and Poverty Status in the United States: 1989,'' was based on a survey of 60,000 households in March 1990 - before the recent downturn in the economy.

It showed the overall median household income at $28,910, up about $265 from 1988, fueled largely by a 5.1 percent rise in the inflation- adjusted income of black households, to $18,080. The incomes of white households, at $30,410,

and Hispanic households, at $21,920, were statistically unchanged from 1988.

Asian and Pacific Islander households had a median income of $36,100 in 1989, the bureau said, attributing the higher level than white households in part to the larger size of Asian and Pacific Islander households.

Households include all versions of living units, including singles and other unrelated individuals.

For families, the median income was $34,210, up 1.4 percent from 1988 and for married-couple families, the median was $38,550, a 1.1 percent increase over the past year. For women family heads with no husband present, the median income was $16,440, unchanged from 1988.

The Census report also showed that per capita income increased 2.2 percent, to 14,060, an all-time high, and that the inflation-adjusted earnings of women working year-round and full-time also rose to $18,780, a 1.8 percent increase, while those of men declined by 1.8 percent, to $27,430.

This was the second consecutive year in which earnings declined for men and allowed women to narrow the wage gap so that they now make 68 cents for every $1 earned by a man, up from 60 cents in 1980.

The report showed that despite the growing economy over the past several years poverty remains stubbornly persistent, especially among children.

The average poverty threshold for a family of four was $12,675 in 1989 and $12,091 in 1988.

While both the poverty rate and the numbers of people in poverty have declined since the peak of 1983, when the rate hit 15.2 percent and 35.3 million people were poor, it is still significantly above the most recent lows in 1978, when the poverty rate was 11.4 percent and 24.5 million were poor.

The poverty rate for whites was 10 percent, for blacks 30.7 percent and for Hispanics, 26.2 percent, all unchanged since 1988. Asians and Pacific Islanders had a 14.1 poverty rate, a decrease of 3.2 percent from 1988.

Among families, the overall poverty rate was 10.3 percent, unchanged from 1988. It was lowest for married-couple families, 5.6 percent, who were 43.2 percent of all poor families, and highest for families with a female householder, who have a poverty rate of 32.2 percent.

The report also confirmed other studies that have shown a rise in income inequality over the last two decades. In 1989, the top 20 percent of households received 46.8 percent of the total income garnered by all households, 3.8 percent higher than 1969.

-30- 3556
#90269u1143 09/26/1990 ~United Press International
WASHINGTON (SEPT. 26) UPI - Turkish President Turgut Ozal said Wednesday he would commit his 800,000-man army to war against Iraq if the United Nations backs it, and he advised remaining firm against Iraq's occupation of Kuwait.

He also said Turkey's cutoff of Iraqi oil pipelines placed his nation squarely ''on the side of the West'' and asked for the right to increase exports to Europe and the United States to compensate for the resulting economic losses.

''There will be a whole new order for the whole world if we keep tight,'' he told reporters at a breakfast at the Turkish Embassy. ''If we don't keep tight it will be a kind of jungle.

''I don't know if war is inevitable but we should be firm. Otherwise the new world order with the Soviets will be faced with small dictators.

''If the United Nations decides on armed intervention, we will not be against it.''

He said that in talks Tuesday with President Bush, ''We have not talked about any military action - it was not discussed.'' Turkish military movements since the Aug. 2 Iraqi takeover of Kuwait have been minimal - ''mainly the air force mainly looking at what is going on on the other side of the (Turkish-Iraq) border,'' he said.

Asked what Turkey would do if Iraq attacked Israel, Ozal said, ''That would be the biggest mistake, the suicide for the Iraqi people. Israel would blast them.''

Indicating a preferance for tight embargo enforcement rather than military action agaisnt Iraq, Ozal said ''this is the first time we have this experience'' of imposing a worldwide boycott to punish an aggressor nation.

''We have to be patient if you do not want to have war,'' he said.

''You have to wait two, three or four months to see the results. The only thing against the West is the oil price.''

Turkey was long considered vital to Western defense of Europe against a Soviet attack - its NATO forces were poised for a blow at what Ozal called ''Russia's soft belly.'' But with the end of the Cold War, Turkey feared its importance to the West was undermined. Ozal said that while Turkey's request to join the European Community was shelved at the end of 1989, former communist nations such as Czechoslovakia, Hungary and Poland were geting ''more favorable treatment.''

Citing losses of $1 billion a year in trade with Iraq and Kuwait, Ozal appeared hopeful his decision to back the embargo ''shows very clearly Turkey is on the side of the Western world.''

''Since we were neutral in the Iran-Iraq war, and had relations with both sides, I think it was misunderstood,'' said Ozal. ''We could not be on the Iraqi side (after the Kuwaiti invasion).''

Ozal downplayed the overall economic impact of the embargo on Turkey. With a growth rate over 10 percent last year, the Turkish lira convertible with Western currencies and a solid record of paying off its $40 billion foreign debt, Ozal said his biggest fear was not that $300 million in aid promised by Gulf nations would be late or minimal.

''We are afraid the media puts us in the same basket as Jordan and Egypt ... our credit may be endangered. The banks look more at the media than the economic situation in a country.''

He admitted that trade losses and rising oil costs would slow economic growth. But he said that even in the six weeks since the Iraqi invasion of Kuwait, Turkey had a positive trade balance.

In Washington, Ozal publicly sought ''trade not aid.'' Bush said he would seek greater import quotas for Turkish textiles as a reward for Turkey's allowing U.S. fighter-bombers to be deployed in Turkey near Iraq and for leading the way in compliance with the U.N. embargo on Iraq by cutting the Iraqi oil export pipeline.

Ozal also debunked reports that Turkey sought to take over mainly Kurdish and oil-rich northern provinces of Iraq should there be a war. ''We have no intention of having anybody's soil,'' he said.

-30- 4124

#90269u1149 09/26/1990 ~United Press International

BOGOTA, COLOMBIA (SEPT. 26) UPI - Gunmen killed 18 people on a luxurious ranch in what police said Wednesday appeared to be the latest episode in the war between two rival cocaine gangs.

Another four people were wounded when some 30 gunmen dressed in military uniforms entered the Los Cocos ranch near the city of Cali, 200 miles southwest of the capital, said National Police Col. Rodrigo Millan, commander of the Valle de Cauca Department.

The murders Tuesday appeared to be the renewal of a war of bombings and murders between the rival Medellin and Cali cocaine cartels. Leaders of the two cartels earn millions of dollars by controlling most of the world's cocaine traffic.

''Everything appears to point to a vendetta between citizens of Cali or a group from Cali,'' Millan told reporters. ''It appears that with the evidence we have that this action came from the Department of Antioquia (Medellin).''

One official described the ranch as ''luxurious,'' with lighted soccer fields and tennis courts.

The massacre came during an informal soccer game at the ranch's playing field. But Millan said the dead appeared to be workers at observing the game and not the soccer players who managed to flee when the killings began, leaving behind expensive automobiles.

Officials said 17 people died at the ranch and one other at a local hospital. The four wounded were under police guard, Millan said.

The Medellin cartel and the Cali cartel, the world's biggest suppliers of cocaine, have been at war off and on for several years. The war began when the Cali cartel bombed an apartment building in Medellin where Medellin cartel kingpin Pablo Escobar was staying.

Officials at the time said it appeared the two cartels were disputing the profitable New York City cocaine market. Since then, the Medellin cartel has accused the Cali traffickers of assisting police in trying to capture or kill Escobar.

The war has included a series of bombs and murders in Medellin and Cali by the rival cocaine operations.

Caicedo said officials had discarded the possibility the murders Tuesday were committed by leftist guerrillas or common criminals.

''What you saw (in the ranch) was an overwhelming wealth,'' he said.

The Tuesday incident was another disturbance in what has been a relative period of peace since President Cesar Gaviria took office Aug. 7. Seven journalists and the sister of a prominent political figure also were kidnapped or have been reported missing in recent weeks.

Gaviria recently offered traffickers reduced jail sentences and immunity from extradition to the United States if they surrender and confess their crimes. Few people have taken advantage of the offer so far, officials said.

The nation has been at war with the Medellin cartel since a series of assassinations by cocaine hitmen in August 1989. At least 500 people have died in a series of bombings and murders.

#90269u1169 09/26/1990 ~United Press International
MOSCOW (SEPT. 26) UPI - Soviet authorities closed down the second of two new Pizza Hut restaurant in Moscow Wednesday in a dispute over local rules that highlights problems facing Western firms in the still highly regulated Soviet economy.

Last Thursday the local sanitary authority closed the flagship Soviet Pizza Hut 10 days after it opened. That restaurant was allowed to reopen on Saturday but Wednesday the other Moscow Pizza Hut was closed down by the same department.

The official Soviet news agency Tass quoted a sanitary inspector Tuesday saying Pizza Hut did not submit plans to the proper local department before opening and the kitchens violated several regulations, including a rule on the distance between raw vegetables and prepared foods.

But Andrew Rafalat, deputy director of the joint venture running the Soviet Pizza Huts, said plans had been approved by other local authorities and there were no sanitary problems. He blamed the closures on misunderstandings between various rival local officials and a lack of communication.

''There are so many authorities around, there was confusion over requirements '' Rafalat said. ''Some of what we do doesn't fall within their rule book. But often the rules are ill-defined, and nobody ever put the rule book in front of us.''

He said the allegations of unsanitary conditions were ''a joke.''

''Anybody who wants to can come look at the restaurant, we are very proud of our standards,'' Rafalat said. ''To us there is no issue of standards. Unfortunately there are a lot of very restrictive regulations.''

He said some of the Soviet regulations are outdated and unworkable for a Western business, such as the requirement for several large separate sinks for washing dishes - despite the presence at the Pizza Huts of automatic dishwashers.

The two Pizza Hut restaurants, run by a joint venture between Pizza Hut parent company PepsiCo Inc. of Purchase, N.Y., and the Moscow city council, opened with much fanfare and five-hour lines Sept. 12.

''This is an experimental thing for us,'' Rafalat said. ''We'll all lose if everybody starts closing things down whenever there is a dispute. This kind of disappoints us.''

He said the flagship restaurant on Kutuzovsky Prospeckt was operating normally since its reopening Saturday and he expected the second restaurant, on Gorky

Street, to be back in business in one or two days.

WASHINGTON (SEPT. 26) UPI - The Senate voted Wednesday to reduce the salaries of Vice President Dan Quayle, Congress and the Cabinet and high-level administration officials if a government-wide spending reduction goes into effect next week.

President Bush, who earns $200,000 a year, was excluded from the proposal.

The pay cut was added on a 96-1 vote as an amendment to a family planning bill that has no chance of clearing Congress before the weekend. Sen. Richard Lugar R-Ind., voted against the amendment.

Sen. Larry Pressler, R-S.D., acknowledged the amendment would not become law but said he would offer it to other legislation passing through the Senate during the rest of the week.

Under the requirement of the Gramm-Rudman law, spending must be cut by 32.4 percent beginning Monday unless Congress and the admistration reach a budget agreement.

On an annual basis, Quayle's $124,000 salary would be trimmed by $40, 176 and the $98,400 pay of members of Congress would be slashed by $31, 822.

Pressler said his amendnment would put ''the decision makers in the same category as civil servants.''

''Congress should be included,'' he said. ''Congress is responsible for this budget. Congress shoud be held accountable.''

Sen. John McCain, R-Ariz., said the ''Draconian'' spending cut ''will fall on federal employees ... who played no role in situation that exists today.''

''I see no reason we in the legeislative branch should not share in the pain '' he said. ''Some would argue if we were sent on furlough, there may be more progress than in the past. We can assure those people we will be sharing an equal burden of pain.''

Sen. Arlen Specter, R-Pa., said the amendment was a ''step in the right direction. We were sent to Washington to be leaders, not to be followers.''

But Specter said failure of a budget agreement will not mean just a pay cut ''but the fact that 535 of us are going to be tossed out of Washington.''

#90269u1174 09/26/1990 ~United Press International

DETROIT (SEPT. 26) UPI - Industry analysts from Wall Street to the West Coast said Wednesday the nation's Big Three automakers will report significantly lower third quarter earnings, with Chrysler Corp. expected to post its second quarterly loss since 1982.

Analysts said profits at all three carmakers, which also include industry leader General Motors Corp. and second-ranked Ford Motor Co., were broadsided during the quarter that ends Sept. 30 by the heavy cost of buyer incentives that continue to cut profit margins.

''Put it all together and there is profit margin erosion caused by an effort to keep sales up in the face on what's going on in the Persian Gulf,'' said Ronald Glantz, of Dean Witter Reynolds in San Francisco. Glantz noted that many buyer incentives apply to 1991 models that are just beginning to appear in showrooms.

Automakers are to report third-quarter earnings in late October. But a poll of seven financial analysts, many of which recently lowered their earnings estimates, shows No. 3 Chrysler is expected to post third- quarter losses ranging between $1 and $1.20 a share, with a net loss of as much as $270 million.

Chrysler posted a loss of $644 million, or $2.90 a share, during the fourth quarter of 1989, its first loss since 1982, but managed to regain profitability during the first half of 1990.

Part of Chrysler's latest loss will be because of retooling for its first major redesign in seven years of its profitable minivans. The $600 million program caused the company to temporarily close its two minivan plants in Canada and Missouri, losing about 60,000 sales during the changeover.

But analysts also said Chrysler's losses are aggravated by earlier than anticipated rebates on 1991 models, a $2,500 price cut in its profitable Jeep Cherokee models to keep it competitive with new entries, and the initiation of an early retirement program as part of its massive cost-cutting efforts.

Also hurting Chrysler are commercial paper downgrades by several investment rating firms that caused the company's stock to hit an eight- year low this week, closing Tuesday at $10.125 a share on the New York Stock Exchange.

Chrysler's stock was trading at about $10 a share in early Wednesday afternoon trading on the NYSE.

Analysts say GM will earn between 50 and 70 cents a share, or between $300 million and $420 million in net income, for the third quarter. That compares with 72 cents a share, or $517 million, earned by GM during the third quarter

of 1989.

''GM has very costly incentives that are squeezing its margins,'' said Jay Leopold, of Legg Mason Wood Walker Inc., in Baltimore. ''They may also have costs associated with the acquisition of Saab last year, as well as start-up costs with New Venture Gear, its joint venture with Chrysler.''

Ford is expected to earn between 60 cents and $1 a share, or net income ranging from $275 million to $420 million. Most analysts are at the low end of those projections, which compare with $1.03 a share, or $477 million, earned in the year-ago quarter.

''Ford lost some production to the Canadian Auto Workers strike, but mainly had heavy rebate and heavy new product spending,'' said David Healy, of Barclays BZW in New York.

''Their European operations will also be down, and overseas they may have made little or no money,'' he said. ''They have also gone to a little bit of cash on hand, so interest earnings are down.''

#90269u1186 09/26/1990 ~United Press International

TORONTO (SEPT. 26) UPI - The Canadian Auto Workers union on Wednesday set midnight Oct. 10 as the deadline for reaching a new three-year deal with General Motors of Canada Ltd., with local issues expected to crowd the bargaining table.

CAW President Bob White said the union expects GM Canada to meet the pattern set last week in a CAW deal with Ford Motor Co. of Canada. But he added ''we should not fall into a false sense of security that we don't have to deal with any other issues.''

White said a large number of working condition, seniority, transfer, and health and safety issues would have to be dealt with before a settlement is reached.

''We don't want to have a strike here, but we could easily have a strike on local issues, if we don't get those issues addressed,'' White added.

GM Canada, a subsidiary of the U.S. auto giant, employs 36,500 CAW workers at 12 assembly, fabrication, trim and engine plants and a parts warehouse in Ontario and Quebec. The main complex in Oshawa, Ontario includes assembly plants for the Chevrolet Lumina, Buick Regal, light duty and full-size trucks, plus two parts-making facilities.

GM Canada's top negotiator, Rick Curd, said the company was glad to start fashioning an agreement with the CAW.

Curd called the settlement between Ford Canada and the CAW as ''an expensive proposition .... acceptable only if a company makes progress in areas that will help it become more competitive.''

Curd said the company wants to improve cost competitiveness, increase workplace flexibility and reduce absenteeism.

Ford Canada's nearly 13,000 workers voted Sunday to accept a deal and end a nine-day strike. The deal will give them raises of 3 percent in the first year and 2 percent in each of the second and third years, plus a cost-of-living allowance.

White said GM Canada was expected to meet the basic economic elements of the Ford Canada deal, but that provisions for additional holidays and the worker job security program would need to be adjusted.

Under the Ford Canada settlement, the company agreed to give one year notice on any plant closing, and six months notice on any job lost due to technological change or contracting work out.

Ford Canada will set up an $85 million fund to deal with related job losses with provisions for early retirement, salary supplements for up to 36 months and severance pay ranging from $21,250 to $55,250.

White said the union wanted to talk about GM Canada's announced plans to close its Scarborough van plant in 1992 and the outsourcing of work at its Windsor trim plant. There are 2,700 workers at the the van plant and 2,500 workers at the trim plant, 700 of whom could lose their jobs within the next year due to contracting out, the union said.

''We're going to fight like hell to keep every job we can at the trim plant,'' White said. But he added if some jobs are lost, the union wants to know how to apply the worker security program.

Also as part of the Ford Canada settlement, workers will receive an annual $425 vacation bonus and more time off the job, with three additional holidays a year.

In addition, Ford Canada will contribute to a CAW social justice fund, and a child care fund.

The CAW also represents 11,300 workers at Chrysler Corp.'s Canadian subsidiary.

#90269u1200 09/26/1990 ~United Press International
BY LEE STOKES - UPI

CAIRO, EGYPT (SEPT. 26) UPI - Apologists for Saddam Hussein say he is no better or worse than Arab nationalists such as Gamal Abdel Nasser, but while the late Egyptian leader succesfully exploited superpower confrontation, Saddam is faced with superpower cooperation.

''After Nasser nationalized the Suez Canal (in 1956), his action provoked an Israeli invasion in the Sinai Peninsula and an Anglo-French invasion of the Canal Zone,'' said one Iraqi diplomat in the Middle East who asked not to be named.

''But Nasser knew his cause was right. After many difficulties and sufferings, he emerged victorious and he was a leader of the Arab world. He was respected for his struggle. We believe (Saddam) is doing exactly the same thing as Nasser - standing up for what is right - and he will also emerge victorious.''

Unlike Nasser, who was able to exploit differences both within the Western camp and between the superpowers and emerge from the Suez Canal crisis an Arab hero, Saddam is confronting a united world and a quarter- million multinational troops near his border.

And according to one Soviet correspondent in Cairo, there is also another important difference between Nasser and Saddam: ''Nasser was Egyptian but Saddam is Iraqi. It makes a difference.''

So what makes Saddam stubbornly refuse to get out of Kuwait?

Some analysts believe President Bush pushed Saddam into a corner and left him with no choice other than to sit tight or lose face.

''Bush administration officials have hinted that Washington would be willing to sit down and talk with Saddam if he pulled out of Kuwait,'' said one Palestinian official in Cairo. ''But they must know that Saddam cannot simply surrender and lose face.

''What the Americans could suggest is a face-saving formula: one idea is to give Saddam a pledge that if his troops left Kuwait, then every effort would be made to solve the Palestinian issue in accordance with U.N. resolutions that call for an Israeli pullout from the occupied territories.

''Given the present level of superpower cooperation and the emphasis being placed on obeying U.N. resolutions, there is no reason why Bush could not link withdrawal from Kuwait with withdrawal from the territories,'' the Palestinian added.

''That would give Saddam a chance to proclaim victory without a war. But the question is, do the Americans want Saddam to survive this conflict as a hero and become potentially more dangerous to Western interests in the future, or

do they want to humiliate him and cause his downfall now.''

Others believe the Iraqi leader is determined to consolidate his illegal territorial gain at any price and is willing to risk war and destruction in the hope of slowly turning Arab and Third World opinion to his side.

''Rightly or wrongly, Saddam believes Kuwait is an integral part of Iraq that the British divided'' during the colonial era, said Ian Jones, a Cairo-based writer on Mideast affairs.

''We have a number of other such examples, such as the (1974) Turkish invasion of northern Cyprus. But Saddam did not imagine the United States would lead the world to react in the way it did. There were no signals from Washington beforehand warning him of the consequences. He thought he could get away with it.''

Egyptian newspapers dismiss any comparison between Nasser and Saddam, pointing out that the Iraqi leader swallowed a sovereign Arab and Moslem state for no reason other than greed and political ambition.

''In the final analysis we're talking not only about political interests but about the whims of one man (Saddam),'' commented one Cairo daily. ''Who is to know his mood tomorrow?''

#90269u1210 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - The Persian Gulf crisis dominated discussions Tuesday during the annual meeting of the International Monetary Fund and World Bank as finance officials grappled with the reality of rising oil prices and Middle East tensions.

Some of the toughest talk yet came from John Major, England's chancellor for the exchequer, who firmly stated Iraq will not be allowed to profit from its Aug. 2 invasion of Kuwait.

''If we allow Iraq to profit from the invasion and annexation of her neighbor, no small country will feel secure,'' Major said. ''We must not let that happen. And together, I am sure we will not.''

During an address to banking and finance officials from 152 nations, Major said governments must play a role in reducing the stress placed on the world's economy from rising oil prices, which have doubled since the invasion.

Major said inflation cannot be avoided initially from the oil shock, but he stressed that governments can prevent inflation from becoming permanently entrenched.

''If this means that interest rates in some cases have to be raised, or in others, have to be kept higher for longer than would otherwise have been necessary, then this is what we must do,'' he said.

U.S. Treasury Secretary Nicholas Brady said the Persian Gulf crisis, which already is forecast to slow economic growth in much of the industrial world, will make it more difficult to navigate between the twin risks of higher inflation and slower growth.

''We need to maintain a careful balance between continued growth, which is essential to achieve our shared objectives, and price stability, which is essential to protect the gains we have made and to ensure that the growth process is not illusory,'' Brady said.

''The gulf crisis has complicated this task, and it will test our ability to steer a course which was already narrow.''

Brady also said that the economic strength of the members of the IMF and World Bank ''must be mobilized to demonstrate collective resolve and make clear our intention not to yield to aggression.''

Brady also discussed President Bush's plans for a U.S.-led multilateral group to coordinate commitments and contributions made by donor nations to help boost the economies of countries hardest hit by higher oil prices.

He called upon the IMF and World Bank to ''extend their hands'' to assist those most affected by skyrocketing oil prices.

Brady suggested the lending agencies adjust their access policy; speed disbursements from the Compensatory and Contingency Financing Facility; widen compensation coverage to include pipeline, transit, transportation and construction fees and expedite disbursements to help countries immediately adjust to higher oil costs.

Karl Otto Poehl, president of the Deutsche Bundesbank, West Germany's central bank, focused his remarks on next week's unification of East and West Germany - a topic largely overshadowed during much of the meeting.

''We have no illusions about the magnitude of the task,'' he said, adding that ''nobody should be surprised to find that decades of economic mismanagement cannot be put right overnight.''

Poehl said the conversion of East Germany into a market economy should serve to inspire other Central and Eastern European nations ''to persevere on the difficult road to reform.''

''It will promoted progress toward economic and political freedom and higher living standards, and this certainly not only in Germany,'' he said.

#90269u1213 09/26/1990 ~United Press International
(SEPT. 26) UPI - Defense Secretary Cheney issued a momentous order today in anticipation of a troop reduction agreement with the Soviet Union by the end of the year. Cheney told the Joint Chiefs of Staff to bring home 40-thousand American troops from Europe during the next 12 months... beginning Monday. It's believed to be the largest U-S military withdrawal from Western Europe since World War Two. About 330-thousand U-S military personnel are in Western Europe and surrounding waters at present.

An Iraqi Airways plane landed in Amman today... dropped off some passengers... and then flew back to Baghdad loaded with cargo and Arab passengers. That makes Jordan the first country known to violate the U-N Security Council's new air embargo against Iraq. A Western diplomat in Amman says there were some British women and one British diplomat aboard the Boeing 707. .

Jordan admitted allowing the Iraqi jet to land despite earlier assurances by the kingdom that it would abide by U-N sanctions against Baghdad. One Jordanian government official was quoted as saying the plane was allowed to land ''for humanitarian reasons.'' The official said two other Iraqi planes also would be allowed to land in Amman.

The Pentagon's needs for military equipment in August were NOT enough to keep overall durable goods orders from falling by eight-tenths of one percent, wiping out July's two-point-seven percent increase. The figure was down on weaker demand for metals and non-electrical machinery. Analysts now expect to find even higher levels of military orders in the months to come as the Persian Gulf crisis continues.

#90269u1232 09/26/1990 ~United Press International
TALLAHASSEE, FL (SEPT. 26) UPI - A $200 investment in lottery tickets paid off Wednesday for the ten members of a family pool who stepped forward with the fourth winning ticket in Florida's $106.5 million Lotto jackpot.

It was the largest single investment made thus far by the appropriately named ''Happy Ten Group,'' who also routinely plays the Pennsylvania lottery, said family representative Eileen Cernansky during a news conference at lottery headquarters.

''We are just happy,'' she told reporters.

That leaves two of the six winning tickets unaccounted for in the Sept. 15 jackpot, which was the second largest ever awarded in the United States. The largest was, ironically, a $115.6 million Pennsylvania lottery payout shared

by 14 people in April 1989.

The Happy Ten's share of the Florida jackpot amounts to $17.75 million, payable in annual installments of $887,500.

Members of family syndicates from Miami, Longwood and New Smyrna Beach have already stepped forward to claim their shares of the jackpot. The remaining two tickets were sold in Coconut Creek and Winter Haven.

Cernansky said it took so long to come forward because she had to get all the members of her pool together. She stashed the ticket in a bank safe deposit box ''until some of the hype cooled down,'' she said.

She said she has not been back to her job at a Venice insurance agency since learning of her win the Monday morning after the drawing. She had been traveling and that was her first chance to check the winning numbers in the newspaper.

Other family members winning a share were Kathryn Hallisey of Lake Worth, Michelle McMichael of Altamonte Springs and Margaret Smith of Gainesville. They also included Patricia Carlson, Richard Katcher, Carol Tierney, James Tierney and Tim Tierney, all of Pennsylvania.

Family friend Eleanor Lipp of Pennsylvania also will share in the prize.

Other jackpot winners were Richard and Jeanne Piasecki of New Smyrna Beach, siblings Kathy and Scott Smith of Longwood and Margaret Karis of Miami.

The winning numbers were 5, 6, 21, 34, 35 and 45.

This week's Lotto jackpot is worth an estimated $10 million.

(SEPT. 26) UPI - A Massachusetts court has handed down a 27-toyear prison sentence to a 57-year-old man charged as an ''untreatable'' sex offender who allegedly videotaped a number of his assaults on children. James Newell Senior was known as ''Papa'' to residents of Plainville, Massachusetts. Only later did they learn that he used candy, toys and games to lure young girls to his home. Newell is eligible for parole in 18 years.

New Jersey health officials report what they feel is the nation's first death attributed solely to Lyme disease, spread to humans by infected deer ticks. More than 14-thousand cases have been reported in 43 states since 1980, but the deaths that followed were caused by some underlying factor. This was NOT the case in the death of 11-year-old Mandy Schmidt of Sayreville, New Jersey.

Italian author Alberto Moravia is dead, the apparent victim of either a stroke or cardiac arrest. He was 82. Moravia had undergone a medical check-up as recently as Monday and had been considered to be in good health. He was one of the most translated writers in Italian history, gaining world-wide fame in 1949 with his novel ''Women of Rome.''

#90269u1257 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - Faster winds may help offset the global warming many scientists think will occur due to increased emissions of carbon dioxide and other ''greenhouse'' pollutants, a study showed Wednesday.

British scientists said they think it is likely atmospheric warming would boost wind speeds over the ocean, which would lead to more particles of sea salt being swept into the sky.

Salt particles act as ''seeds'' around which water vapor condenses to form clouds. So a greater number of particles should mean more low-lying clouds, which in turn would lower temperatures by blocking the amount of sunlight reaching Earth, researchers said.

The greenhouse effect occurs when carbon dioxide and other gases, acting like the glass windows of a greenhouse trap heat in Earth's atmosphere and prevent it from escaping back into space. Many experts believe the world will grow warmer as a result of increasing pollution, like car exhaust, aggravating the greenhouse effect.

According to estimates by various climate scientists, the continued build-up of greenhouse pollutants could raise global temperatures anywhere from 4 degrees Fahrenheit to nearly 10 degress Fahrenheit over the next 50 to 75 years.

In a study published in the journal Nature, John Latham and M.H. Smith of the University of Manchester Institute of Science and Technology estimate wind speed increases between 16.5 feet to 33.0 feet per second could compensate for currently predicted levels of global warming.

The researchers cautioned that their projections are ''highly simplistic,'' and may not hold up when other factors, like uneven distribution of wind speed over oceans, are taken into account. However, they said the work does show wind is ''a possibly important feedback process associated with global warming and should therefore be incorporated into climate models.''

In addition to the research article, Nature published a letter from Latham, in which he speculates it may be possible to control global warming by artificially releasing cloud-forming sea salt particles into the atmosphere.

#90269u1303 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - The design of U.S. coins has been unchanged for at least a quarter century, but Congress may be on the verge of authorizing new designs and picking up some extra revenue in the process.

A new quarter, bearing a design on the tail side that commemorates the bicentennial of the Constitution, could be in circulation as early as 1991 if the legislation is approved.

New half dollar coins, nickels, dimes and pennies would be phased in over the next six years under the plan now under consideration.

There is widespread support in both the House and Senate for new coins, and authorization for the change is contained in a half-dozen bills. The biggest obstacle is time as Congress pushes toward adjournment, but supporters are confident of success this year.

In addition to delighting coin collectors, new coin designs would bring in as much as $1 billion for the U.S. Treasury, officials have told Congress.

The profit results in part from the difference between the face value of coins and the costs of making them. It costs the U.S. Mint just 2.5 cents to produce a quarter, but the coin is then sold to the Federal Reserve for 25 cents.

Additional profit results from the fact that millions of coins would become souvenirs and be taken out of circulation.

U.S. coins have been changed 33 times in the nation's history, but not recently. The tail sides of the quarter and half dollar were last changed in 1976. The dime was changed in 1946, the nickel in 1938 and the penny in 1959.

''The United States has dragged behind other nations in coin design. There's no reason other than the inertia, the reluctance to change,'' says Rep. Henry Gonzalez, D-Texas, chairman of the House Banking, Finance and Urban Affairs Committee. ''It's overdue. ... Coin design is something that should have happened a long time ago.''

The proposed redesigns would only affect the tail sides of the five coins. The head sides would continue to bear the images of past presidents - Lincoln, Jefferson, Franklin Roosevelt, Washington and Kennedy - but would be modernized. In addition, all present inscriptions, such as ''In God We Trust '' and ''E Pluribus Unum'' would remain.

The new designs for the tail sides of the coins would relate to the U.S. Bill of Rights. The first coin to be changed, the quarter, would bear a temporary two-year design commemorating the bicentennial, and then would be given a new

theme dealing with the Bill of Rights.

All existing coins would remain in circulation. The government never recalls coins, but in the course of time older coins usually disappear as people add them to their coin collections. And that adds to the government's profits as new coins must be minted to keep the overall supply sufficient.

The public also holds on to new coins when they first appear. ''When new coins come out the American public has a habit of keeping them for souvenirs,'' says Diane Wolf, a former member of the U.S. Commission on Fine Arts. ''The American public will keep, on average, 10 coins per person per denomination, as souvenirs.''

''It's proven money'' for the government, says Wolfe, one of the chief advocates of coin redesign. ''It costs this country money not to change our coins.''

Wolf says prospects for passage of the legislation this year are ''very good.'' The measure has been made an amendment to several bills, including the omnibus housing bill and a bill to curb money laundering. Both are top priority measures that congressional leaders want to see passed before adjournment.

#90269u1304 09/26/1990 ~United Press International

NEW YORK (SEPT. 26) UPI - Students at both private and public colleges are paying up to 8 percent more for tuition this year, and the hikes can be blamed in part on a drop in enrollment of college-age students, the College Board reported Wednesday.

On the bright side, the report said public and private financial aid to defray the increases has also reached a record high of $28 billion, the College Board reported Wednesday.

The study said almost half of all college students receive public or private assistance.

Students at four-year public colleges are paying an average of $1,809 for tuition and fees this year, up 7 percent. Those at two-year public colleges are paying an average of $884, up 5 percent, the survey showed.

At four-year and two-year private colleges, students are paying an average of $9,391 and $5,003 respectively for tuition and fees, reflecting an 8 percent increase.

The average figure for tuition and fees charged by private colleges last year was $7,685.

The report, also prepared for the American Council on Education, said limited state funding, particularly early in the decade, was one of the causes of higher tuition costs at public colleges and universities during the 1980s.

Donald M. Stewart, president of the College Board, said he was concerned that news of the increases would alarm parents and frighten students away from seeking higher education.

''The tendency to focus on the cost of a relatively small number of high-priced colleges simply adds to the confusion and may lead students and parents to panic if they overestimate the cost of college,'' Stewart said.

''About half of all four-year colleges charge under $5,000 for tuition and fees.''

He said low-income families tend to overestimate the costs and underestimate the help available, while higher income families do the reverse.

''In neither case are they well prepared,'' Stewart said.

-30- 2128

#90269u1323 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - Defense Secretary Dick Cheney said Wednesday there are no current plans to use the U.S. military to enforce the air embargo against Iraq and he doesn't expect President Bush to order such action.

''At this point, we don't have any specific directions to use U.S. military force to enforce an air embargo,'' Cheney said in response to a question from a member of the National Association of Business Economists following a speech.

The United Nations approved a resolution Tuesday calling for an air embargo of Iraq in retaliation for its Aug. 2 invasion of Kuwait, but the measure contained no specific enforcement provisions.

U.S. and other naval forces already are carrying out interdiction operations in the Persian Gulf, the Gulf of Oman and the Red Sea to enforce an earlier U.N. resolution imposing a trade embargo against Iraq and Iraqi-occupied Kuwait.

But U.S. military officials said it is much easier and less dangerous to get commercial ships to stop for inspection of their cargo than it would be to try to force down aircraft suspected of trying to break the embargo.

Cheney told the business audience, ''I think the intention in terms of how it will operate, is that the nations around Iraq will deny overflight flights that are headed for Baghdad - headed inside Iraq - and that all of the nations

who are members of he United Nations are now, by virtue of that resolution, where they should deny landing rights in their countries to Iraqi aircraft, or aircraft headed to Iraq.''

''There is always the possibility of using U.S. military force to try to enforce an air blockade, but we've not been given any such instructions (from Bush), and I don't expect that we would be,'' Cheney said.

''That would be a different kind of operation than we currently have on the high seas, where we can stop ships, board them if necessary, inspect their cargo, look at their manifest, and satisfy ourselves that they're not in violation of the blockade, and then send them on their way. And that's a different operation, obviously, when we're talking about the air.''

In another area, Cheney sharply criticized the defense authorization bill recently approved by the House as ''crazy.''

''It asks me to cut 130,000 active-duty military personnel from the force. It forces me to keep all the bases open, but cut personnel,'' he said. ''I can't think of a dumber policy.''

-30- 2642

#90269u1332 09/26/1990 ~United Press International

NEW YORK (SEPT. 26) UPI - Carnegie Hall opened its centennial season Wednesday with a gala concert by the Los Angeles Philharmonic, the first of more than 150 events celebrating the nation's best known concert hall.

The first event featured the Philharmonic under the baton of Andre Previn performing Beethoven's Leonore Overture, Schuman's Symphony No. 3 and Itzhak Perlman playing Sam Barber's Violin Concerto, Opus 14.

The day began in the morning with the renaming of 57th Street and Seventh Avenue ''Carnegie Corner'' and was scheduled to end with a $1, 000-a-ticket dinner at the Metropolitan Club.

The opening festivities will continue Thursday with a second concert by the Los Angeles orchestra including the first of 14 works commissioned for the centennial, Steven Stucky's ''Angelus,'' and Emanuel Ax playing Beethoven's Piano Concerto No. 3.

The commissions are the most ever made by an American musical organization for one season and will be highlighted by venerable British composer Sir Michael Tippett's ''Byzantium'' for orchestra and a new piano concerto by Italian composer Luigi Nono performed by Maurizio Pollini and the Ensemble Intercontemporain conducted by Pierre Boulez.

''It's the most extraordinary season any concert hall has ever had,''

commented violinist Isaac Stern at the street renaming. Stern saved Carnegie Hall from the wrecker's ball 30 years ago and has been its president ever since.

''We think its an appropriate celebration for the center from which the entire development of American music came.,'' he added. ''Carnegie has been the crown proving place for every single orchestra, every conductor, every pianist, singer, violinist, cellist, jazz player, comedian, and pop singer in this century.

''It's an enormously powerful hall and gives even average performers a glamor and power they wouldn't have in other halls. It is the place you come to prove whether you belong or not. There isn't a career of any stature that didn't come through Carnegie Hall.''

The centerpiece of the centennial is a series of festival concerts beginning next April 26 and ending May 5, 1991, the anniversary date of the hall's opening by the New York Symphony Society and the Oratorio Society of New York under the baton of Peter Ilyich Tchailovsky.

The April 26 program is a concert by the Boston Symphony led by Seiji Ozawa with Mstislav Rostropovich as soloist.

A day-long program is planned for May 5 beginning with a massed choral concert conducted by Robert Shaw and afternoon and evening performances by the New York Philharmonic, who made its home at Carnegie until 25 years ago, conducted by Leonard Bernstein and Zubin Mehta.

A dozen major artists will perform including Jessye Norman, Leontyne Price, Marilyn Horne, Placido Domingo, Rudolf Serkin, Pinchas Zukerman, Yo-Yo Ma and Stern.

The year also will bring improvements in backstage and office space made possible by the construction next door of Carnegie Tower, a skyscraper apartment house whose lower floors will be occupied by Carnegie Hall. The tower also will provide space for a new museum of Carnegie Hall memorabilia including programs, posters, and artists' photographs and personal mementos.

ST. PAUL, MN (SEPT. 26) UPI - The manager of comedienne Roseanne Barr says she is considering a move of the entire production of ''Roseanne'' to Minnesota to escape the ''loony bin'' in southern California.

Barr's husband Tom Arnold, who is also manger of his wife's highly- rated ABC-TV situation comedy, told the St. Paul Pioneer Press Dispatch in a story published Wednesday that the move could be made as soon as next season.

Arnold said the couple is in the process of buying a house in the Twin Cities of St. Paul and Minneapolis. He said Barr liked the way she was treated at her RiverFest appearance last summer in St. Paul.

He said the show - set in a fictional blue-collar small town in downstate Illinois - could be produced at Paisley Park, a studio complex owned by rock star Prince, in suburban Chanhassen.

From the ''Roseanne'' offices in Burbank, Arnold said: ''We're trying to work out the move. Everyone here is very excited about it. Rosie and I are, I know. We've talked to people out at Paisley Park. That's where we would shoot the show. They are interested. Obviously there are still a lot of things to work out. Things like how much room our sets would need, scheduling, that kind of thing, but yeah, we want to do it. This is nuts the way it's been lately.''

Even if they meet unforseen resistance to the move, Arnold said, he and ''the missus'' are in the process of buying a house in Minnesota. He said they need relief from what he calls ''the loony bin'' in the greater Los Angeles area.

''Logistically it's not a problem,'' Paisley Park spokesman Jim Willis said. ''It's all a matter of scheduling. It'd be tough if they wanted to do it next Monday morning, but we can work it out.''

Arnold said Barr got an appreciative audience on her appearance in St. Paul last August and a ''reasonable'' press, compared with being ''assaulted'' by the tabloid press in Los Angeles.

Barr and her husband have been the frequent targets of screaming headlines in celebrity-watching supermarket tabloids, which maintain a heavy reportorial presence in and around Hollywood.

This past summer, the star also found herself on the front pages of the mainstream press and on network TV newscasts due to the controversy that erupted following her singing of the ''Star Spangled Banner'' at a San Diego Padres game. Barr was roundly criticized for having allegedly sung the national anthem in a disrespectful manner and later issued an apology.

''It's just been crazy,'' Arnold said. It's a bad environment for us. For anyone, if you ask me. But we want to have a family. We're trying to have a family. But you can't live with what we have to live with if you ''live with what we ha

Arnold said they decided to move after a tour in the Midwest.

''It is something we really want to do. I think it's hard for anybody else to understand what it has been like, with these tabloid reporters and photographers crawing all over you. It just won't be as crazy back there.''

''But what if it is?'' reporter Brian Lambert asked.

''Oh, how could it be?'' Arnold said. ''Nothing could be as bad as it is out here. It's just nuts. This place just breeds looniness. You get here and you can't escape it.

''Rosie and I just got back from nine days in Iowa. Minneapolis and St. Paul are a lot different than Iowa, I know, but it convinced us again that it was something we have to do.''

WASHINGTON (SEPT. 26) UPI - Oil prices have skyrocketed on fears of a Mideast war, the Energy Department told Congress Wednesday, but U.S. energy supplies are adequate for a ''normal winter'' - barring no major refinery problems.

Calvin Kent, administrator of the Energy Department's Energy Information Administration, said American energy supplies are generally sufficient for the approaching winter.

He said the biggest problem is propane, which is used for heating - particularly in the cold Northeast and Midwest. Propane also is used for drying crops and as a base for many chemicals.

''There is the possibility of a propane problem this winter,'' Kent told a House Banking, Finance and Urban affairs subcommittee examining U.S. energy preparedness after Iraq's invasion of Kuwait.

Other than the potential propane shortfalls, Kent testified there are generally adequate U.S. supplies of petroleum and heating oil, and refinery capacity is sufficient.

The supply of jet fuel ''deserves watching,'' Kent testified, because of the ''increased demand for military purposes.'' The American military ''is not having difficulty obtaining jet fuel now,'' he said, and ''we expect that this demand can be met by refineries in the Gulf region itself.''

The world oil market lost 4.3 million barrels per day from Iraq and Kuwait, Kent testified, and ''these losses will continue through the winter.'' By the end of the fourth quarter, he said, replacement supplies should total 3.3 million barrels a day.

Some lawmakers at the hearing strongly criticized U.S. oil companies for the sharp rise in gasoline prices and asked Kent why prices had risen so quickly.

''There is no fundamental supply or demand reason for the price of oil to be

as high as it is,'' Kent said. ''The price has basically been bid up by speculative activity based on the fear of war.''

The price of oil ''is well above'' what it should be, absent speculation, Kent said.

Rep. Mary Oakar, D-Ohio, said of the oil companies: ''I think they see an opportunity to make a lot of money,'' adding that Congress ''may have to do something.''

Oakar also criticized President Bush, saying his administration has failed to produce a national energy policy while American imports of foreign oil rose dramatically.

''The president, who was also vice president for eight years, is overdue on this assignment - by our reckoning, 30 months late,'' Oakar said.

Kent said the Energy Department believes ''there will be a normal winter.''

He outlined the following administration views on various energy stocks and refining capacity:

-Gasoline: ''Although gasoline inventories are somewhat low, they are growing'' and currently are at ''the highest level since April, when the summer driving season began.'' With the driving season now over, ''stocks should be adequate.''

-Home heating oil: ''Stocks are high, stocks are rising. They are particularly high on the East Coast,'' where winter demand is greatest.

-Jet fuel: ''This situation deserves watching.'' Stocks are high ''but there is increased demand for military purposes.''

-Propane: The biggest U.S. energy problem and ''there is the possibility of a propane problem this winter,'' particularly if it is very cold. The government previously raised a ''yellow flag'' about propane problems and ''we can change the color of that flag from yellow to, perhaps, red.''

-Crude oil: ''While crude oil stocks are declining, there is no current concern that they will become inadequate during the fourth quarter.''

-Refinery capacity: ''There is, in our opinion, adequate refinery capacity in the United States and worldwide.'' U.S. refineries are running at 98 percent of capacity, increasing the risk of plant breakdowns, but barring major problems crude oil can continue to be processed at current levels.

Kent also said the oil stored in the Strategic Petroleum Reserve in Louisiana is of higher quality than oil imported into the United States and can be

refined easily if Bush gives the order to begin drawing down the emergency supply.

He disagreed with ''some suggestions that this oil is of such low quality that it could not be refined,'' saying that opinion is ''simply not correct.''

#90269u1350 09/26/1990 ~United Press International

KATMANDU, NEPAL (SEPT. 26) UPI - King Birendra has eliminated a national holiday from the calendar that his father established and substituted his own birthday instead, the government said Wednesday.

The king said Nepalis would no longer celebrate Dec. 15, the day in 1960 his father, King Mahendra, staged a coup and dissolved the country's first government chosen in multi-party elections. Many considered it a black day in Nepalese history.

The system Mahendra instituted was overthrown earlier this year in a popular uprising that left scores dead.

The government said Dec. 28, Birendra's birthday, would henceforth be a day of national celebration.

Nepal's new multi-party government earlier this year decided that Queen Aishwaryaa's birthday on Nov. 8 should continue to be a national holiday, but without the obligatory march to the royal palace by thousands of subjects to wish her a happy birthday.

#90269u1356 09/26/1990 ~United Press International

UNITED NATIONS (SEPT. 26) UPI - Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze, the new odd couple of the post- Cold War period, met for nearly four hours Wednesday discussing new ways to cooperate in the Persian Gulf crisis and other areas.

The two men came up with so many possibilities of cooperation that they agreed they would have to meet again within the next week while both are attending the annual session of the U.N. General Assembly.

Baker said they discussed future prospects for cooperation in dealing with the Persian Gulf situation, as well as other forms of possible cooperation ''within the context of the United Nations.''

''Frankly we ran out of time,'' Baker said, adding the two men planned to meet again in New York within the coming week.

Shevaradnadze agreed, suggesting there were so many issues to be resolved that more than one other meeting might be required.

Baker was lavish in his praise of Shevardnadze's handling of Tuesday's U.N. Security Council meeting, in which it was decided by a 14-1 vote to widen the embargo against Iraq to include banning airline flights except for humanitarian aid.

The Soviet Union, by normal rotation, was president of the Security Council for the unusual ministerial session.

In his speech to the General Assembly earlier Tuesday, the Soviet foreign minister warned that the situation in the gulf was perilously close to war, and cooperative action was required to head it off.

Shevardnadze, standing next to Baker on the sidewalk Wednesday, said, ''We made quite a lot of progress'' and that further meetings would be required to carry the agreement through to completion.

Baker said the talks Wednesday at New York's Waldorf-Astoria Hotel included discussions about ending the strife in Angola and Afghanistan, and negotiations about conventional and strategic arms reductions.

Both men were accompanied by arms control experts in the nearly four hours of talks.

Sessions between Baker and Shevardnadze have become so routine that there is a well-established personal relationship that permits informal exchanges by telephone. Such exchanges led to the ministerial session of the Security Council. Shevardnadze suggested the idea.

Baker called him last week to suggest that this was a good time to put it into practice as a means of emphasizing to Iraqi President Saddam Hussein the importance that the superpowers attach to the dangers of the situation in the Persian Gulf.

#90269u1359 09/26/1990 ~United Press International

OTTAWA (SEPT. 26) UPI - The tiny group of militant Mohawks that remained from a volatile 11-week standoff with armed soldiers over a land dispute in Quebec was ready to surrender, Mohawk leaders said Wednesday.

Terry Doxtator, spokesman for the Iroquois Confederacy's crisis committee that has been negotiating on behalf of the Mohawks, said in an interview that most of the 41 Mohawks, including 23 Warriors, would begin leaving the drug treatment center on the Kanesatake reserve as early as Thursday morning.

''The individuals have made a decision to leave the compound and go under the trusteeship of the military,'' Doxtator said.

He said, however, he was not sure if all Warriors, a militant faction of the Mohawk nation, would surrender and his committee was working on a plan to protect those who remained behind.

The land dispute began when Quebec police officers stormed a barricade erected by Indians around a proposed golf course expansion they claimed was an ancient burial ground. One officer was killed in the raid.

The dispute spread to the Kahnawake reserve south of Montreal where sympathetic Mohawks closed off major highways and a bridge linking the town of Chateauguay to Montreal.

#90269u1367 09/26/1990 ~United Press International

AUSTIN, MN (SEPT. 26) UPI - Meatpackers at the Geo. A. Hormel & Co. have approved a company offer giving the 900 workers a 30-cent pay increase over two years.

Local 9 president John Anker of the United Food and Commercial Workers Union said about 69 percent of the 896 workers voted Tuesday. About 65 percent of those voting, or about 400 workers, voted for the proposal, which gives them a 30-cent increase.

Anker said Hormel's proposal will increase the base salary of production workers to $11 an hour from $10.85, retroactive to Sept. 2, and an increase to $11.15 an hour Sept. 1, 1991.

Four years ago, a bitter, yearlong strike ended with the acceptance of a multiyear contract and virtually level wages. Meatpackers had struck in 1985 when the company offered $10.69 an hour.

#90269u1406 09/26/1990 ~United Press International

GREENWICH, CONN. (SEPT. 26) UPI - They can't have regular beer, but U.S. troops stationed in Saudi Arabia will be getting what may be the next best thing - non-alcoholic beer.

The Greenwich company that imports and markets Moussy announced Wednesday it has donated 6,000 cases of the non-alocholic beer to be sent to troops in Saudi Arabia.

The 6,000 cases have a wholesale value of roughly $100,000, officials said. Moussy is made in Fribourg, Switzerland, and imported to the United States and marketed by Sibra Products Inc.

Company officials said Moussy tastes like regular beer, which like all alcoholic beverages is prohibited in Saudi Arabia.

''The only difference is that the alcohol is removed after Moussy has been brewed to full fermentation, just like a regular beer,'' said Mark Cooper, president of Sibra Products.

Sibra Products offered to donate the non-alcoholic beer and the offer was accepted by the U.S. and Saudi governments.

Five containers holding the 6,000 cases of Moussy will be loaded Sunday onto the merchant ship Achiever at Port Elizabeth in New Jersey. The ship is scheduled to leave Monday and arrive in the Persian Gulf in late October.

#90269u1410 09/26/1990 ~United Press International

(SEPT. 26) UPI - A Painesville, Ohio, jury began deliberations today on whether to recommend a death sentence for Damon Lundgren, son of cult leader Jeffrey Don Lundgren who was sentenced to death last week. The 19-year- old Lundgren was convicted of aggravated murder and kidnapping in helping his father kill a family belonging to the cult in April 1989 at the cult's farm in Ohio.

Officials in Loganville, Georgia, say a landscaper has served three years and three months of a life prison term after being convicted of a 1986 rape-burglary he apparently did NOT commit. Anthony Echols of Loganville confessed yesterday to a crime for which Willie Frank Williams was convicted in June 1987. Echols was arrested after the case was reopened six weeks ago.

Colombian police say gunmen killed 18 people on a luxurious ranch in what appears to be the latest episode in the war between two rival cocaine gangs. Four other people were wounded when some 30 gunmen in military uniforms entered the ranch 200 miles southwest of Bogota yesterday.

Philippine police say rebels in cars exploded bombs at two soft drink bottling

plants in the Manila area early today... wounding one person and causing considerable damage. Officials say they believe rightist soldiers were responsible for the bombings, but they did NOT rule out communist guerrillas.

Federal tax officials have placed nearly 17-MILLION dollars worth of liens on singer Willie Nelson's real estate holdings and personal property in the Austin area. The liens apparently were filed to ensure payment of Nelson's six-and-a-half-MILLION dollars in delinquent income taxes. An I-R-S spokesman says there's NO deadline for seizing Nelson's property and selling it to satisfy the unpaid taxes.

-30- 1918

#90269u1413 09/26/1990 ~United Press International

EASTCHESTER, N.Y. (SEPT. 26) UPI - Rogue gubernatorial candidate Pierre Rinfret Wednesday stunned Republicans by demanding recognition as head of the state GOP in a power grab that could splinter a party already in disarray.

The unprecedented demand came as Republican county chairmen from around the state gathered in Westchester County for a meeting billed as a fence-mending session with Rinfret, who last week charged leaders of his own party were ''in bed with'' Gov. Mario Cuomo.

Rinfret at the last minute declined to attend the meeting and instead sent aides with a letter containing a resolution demanding county and state leaders name him ''undisputed head of the party,'' and pledging ''maximum direct financial assistance'' to his campaign.

The mood inside the meeting was described as angry when the demands became known.

Rinfret also said he had a helicopter waiting to take him from Manhattan to Westchester County and would head for the meeting the moment the resolution was adopted.

Rinfret said in a letter prefacing the demands that he was taking these actions because Senate Republican leaders allegedly offered him money to cease the verbal assualt he began on them last week.

''I was offered a grand total of $40,000 to shut up, go away and run a dismal campaign for governor,'' he wrote.

Rinfret's underdog candidacy against Gov. Mario Cuomo began to self- destruct on the Republicans last week when Rinfret sent a letter to party leaders saying he was broke, and if he did not get some help from the party he would stop campaigning.

He said $950,000 would be a good start.

Rinfret, a self-made millionaire, has never before run for political office. A recent poll indicated Cuomo was ahead of Rinfret by 45 points, with more Republicans saying they would probably vote for Cuomo than for Rinfret.

DENVER (SEPT. 26) UPI - The government's conflict-of-interest case against the president's son, Neil Bush, bogged down Wednesday in testimony by expert witnesses over legal ethics.

In the first public hearing into the failure of a savings and loan, an administrative law judge is considering government allegations that Bush, 35, acted improperly while he was an outside director of Silverado Banking, Savings and Loan.

Bush, who was a director from August 1985 to August 1988, did not appear during the first two days of the hearing. He and another former director of the failed thrift are expected to testify Thursday.

The collapse of Silverado in December 1988 is expected to cost taxpayers at least $1 billion. Besides being one of the largest savings and loan failures in the country, it has received increased attention because of the involvement

of the president's son.

The Office of Thrift Supervision has charged Bush with three violations of conflict of interest rules.

One charge says Bush failed to fully disclose his financial ties with developer Bill Walters while voting on $111 million in loans and transactions. The other allegations are that Bush failed to fully disclose his financial dependence on developer and Silverado borrower Ken Good.

Among those testifying Wednesday were Geoffrey Hazard, a law professor at Yale Law School and director of the American Law Institute, and Edward Conry, an associate professor of business law and ethics at the University of Colorado at Denver and former research fellow at Yale Divinity School.

Hazard testified that he believes Bush did nothing wrong while he was a Silverado director. But Conry said he thought Bush put himself in situations where his self interest was in competition with the best interests of Silverado.

Hazard testified that Bush was not a party to any transactions on loans between Silverado and Walters, and therefore did not breach Colorado conflict-of-interest rules. Colorado law also did not prevent Bush from seeking a $900,000 line of credit for Good, which was to be used for a joint venture between Bush and Good, the professor said.

''There is nothing inconsistent between Bush's actions and generally accepted ethical principles,'' Hazard testified.

Bush had told other directors that he had a business connection with Good, although a former senior official of the thrift testified Tuesday he was not fully aware of the relationship when he approved the $900,000 line of credit. Bush abstained from voting on the line of credit, which was never used.

Conry was questioned about his earlier written testimony, which said Bush had assumed the obligation of placing the thrift's interest above his own. The professor said Bush did not sufficiently disclose his relationships with Walters and Good.

Because Bush has a master's degree in business administration, Conry said he thinks Bush ''would have been aware of the legal and moral obligations which were the foundations of his position as a director of Silverado.''

''I conclude Mr. Bush was imprudent, unethical and fully culpable,'' Conry said.

Good and Walters defaulted on about $130 million in loans from Silverado.

A final decision in the case is not expected until next spring. If Bush is found guilty, he would be barred from similar actions if he ever became involved again in the thrift business.

The hearing is being held in Denver's largest courtroom, seating 150 people. It was crowded with reporters, sketch artists and the general public. Cameras have been barred from the proceedings.

#90269u1453 09/26/1990 ~United Press International

NEW DELHI, INDIA (SEPT. 26) UPI - Two youths doused their clothes with fuel and set themselves ablaze Wednesday while police shot and killed five demonstrators as violent protests against a controversial federal job quota program spread across northern India.

The widespread protests against the government quota scheme were the worst since Prime Minister V.P. Singh announced in early August that 27 percent of all federal jobs would be reserved for members of the so-called backward classes.

Under the caste system, Hindus are born into four basic levels of society, with the priestly Brahmins at the top and the untouchables, who are restricted to menial tasks, at the bottom. Traders, farmers and others belong to the two intermediate castes.

High-caste youths oppose the job reservation scheme because it will restrict their ability to find work in India's elaborate bureacracy, which includes not only government and military service but banks, railways and other forms of business.

The high-caste students also claim the job quotas will enshrine the caste system in law, increase government inefficiency by eliminating merit and fail to improve the social condition of the underprivileged.

''When I score 80 percent and another person scores 40 percent, why shouldn't I get the job?'' said one student. ''When I've worked so hard, when I've burned the midnight oil, why shouldn't I get it?''

But proponents of job reservation say it will give lower-caste citizens, who represent about 54 percent of India's 830 million people, a better opportunity to obtain government employment, which traditionally has been the domain of the upper castes. The latest decision will not affect the untouchables. Since the 1950s, 22.5 percent of all federal jobs have been reserved for them.

The violent protests prompted authorities to impose curfews on cities in several states, and Police Commissioner Vijay Karan issued an order barring public assembly, slogan shouting and demonstrations in several neighborhoods

of the capital.

Despite the violence, the prime minister defiantly rejected calls for his resignation, saying, ''I wish to assure my party and the millions who believe in what I am doing that I have no intention to shirk the responsibility that has been cast upon me.''

Singh, looking tired in a televised address, expressed ''profound anguish'' over the decision of several students to set themselves on fire, adding ''the goal of my government is to provide social justice, not to deprive anyone of employment opportunities.''

He appealed for students to open a dialogue with the government, but refused to back away from the quota program, saying, ''It gives me profound satisfaction that the National Front government has been able to bring a glimmer of hope to the eyes of those who have known only social oppression for centuries.''

Singh's remarks came at the end of a day when police clashed with protesters in the capital and at least six different states. Police fired at protesters in the city of Modinagar in Uttar Pradesh state, killing three people and wounding 20 others, the Press Trust of India reported.

Police also shot and killed a protester in Jammu, the winter capital of Jammu and Kashmir state, authorities said. Another 20 people were injured by tear gas and stones thrown by demonstrators, they said. Police also shot dead a youth in New Delhi.

The violence came as merchants in the capital observed a general strike called by a key political backer of the Singh administration to protest the heavy-handed use of police force against student demonstrators.

The incidents prompted former Prime Minister Rajiv Gandhi, the head of the opposition Congress (I) Party, to demand Singh's resignation, saying, ''Never before has the nation been so deeply divided and never before have the people been so deeply anguished.''

A wave of attempted self-immolations continued, with a youth pouring fuel on his body and setting himself ablaze on a bridge in central New Delhi. Chetan Gautam suffered burns on 50 percent of his body, police said.

Another student set himself ablaze in Madhaya Pradesh state south of New Delhi. Police identified the man as Mahesh, a 26-year-old college student who received burns over 40 percent of his body.

The youths were the seventh and eighth people to set themselves ablaze since last Wednesday in protest over the decision to reserve federal jobs for members of the backward classes. The death of another student who set himself

afire touched off the violent protests Tuesday.

BOSTON (SEPT. 26) UPI - Older women who get enough calcium in their daily diet can prevent much of the bone loss that makes many women prone to bone fractures after they go through menopause, researchers said Wednesday.

A two-year study involving 301 women found those who are six or more years beyond menopause can reduce loss of bone in their spines and hips by consuming the equivalent of three servings of calcium-rich food each day.

''This is the first study to show significant effects from calcium in reducing bone loss in the spine and hip,'' said Dr. Bess Dawson-Hughes of a Department of Agriculture nutrition research center at Tufts University in Boston.

The study shows ''older women can guard against bone loss simply by making sure they have a daily calcium intake of at least 800 milligrams.'' They can accomplish this with three servings of calcium- rich foods such as milk, yogurt, green leafy vegatables or fortified orange juice, she said.

''We are recommending first and foremost a calcium-rich diet. But for those women who cannot or will not get all the way to 800 milligrams with food sources, it would be better to get there with calcium supplements than not get

there at all,'' she said.

About one-fourth of all women who are beyond menopause, and thus no longer producing estrogen, experience the excessive bone loss that characterizes the disorder osteoporosis. It is estimated that osteoporosis causes 1.3 million fractures in the United States annually.

Prior research has produced conflicting information about the effectiveness of calcium in preventing bone loss, she said. ''Several studies of post-menopausal women failed to show any demonstrable effect from calcium. But our research showed that it depends who you are looking at. Our work makes it clear there is an effect in women with low calcium intake,'' she said.

Half the women studied had a daily intake of less than 400 milligrams of calcium, while the other half had intakes of between 400 milligrams and 650 milligrams.

One third of each group took a daily supplement of 500 milligrams of calcium carbonate, another third took 500 milligrams daily of calcium citrate malate and the remaining third received an inactive substance.

While calcium carbonate is commonly used in supplement tablets, calcium carbon malate, or CCM, is calcium combined with two naturally occurring fruit acids. It is commercially available in one type of orange juice.

Among the 234 women who were six or more years past menopause, those who took the CCM supplements had no statistically significant loss of bone in their hips, spines or forearms during the course of the study, Dawson-Hughes and colleagues reported in The New England Journal of Medicine.

The older menopausal women who took the calcium carbonate supplements experienced significant bone loss in the spine, but not in the hips or forearms.

The older group receiving the placebo had bone loss from the spine, and those in this group with low calcium intake also lost bone in the hips and forearms, the study found.

Significant loss was defined as at least a 1.6 percent bone loss from the spine, 2.4 percent from the hip and 2.6 percent from the forearm.

CCM apparently was more effective in reducing bone loss because it is better absorbed by the body, the researchers said.

Among the 67 women in the study who were less than six years beyond menopause, neither of the calcium supplements reduced the rapid 10 percent to 15 percent loss of bone density that typically results from cessation of production of the hormone estrogen, Dawson-Hughes said.

For reasons not fully understood by scientists, estrogen apparently inhibits the ability of large cells in the body called osteoclasts to break down bone tissue and absorb it. The study found calcium could not prevent the bone loss from lack of estrogen which occurs within several years of menopause.

A federal nutrition survey completed in 1980 found the average daily calcium intake for women over the age of 44 was only 475 milligrams - far less the recommended daily average of at least 800 milligrams, Dawson-Hughes said.

The research was partially funded by the Procter and Gamble Co. of Cincinatti which holds a patent on CCM.

#90269u1468 09/26/1990 ~United Press International

JERUSALEM (SEPT. 26) UPI - Parliament Wednesday debated the slaying of an Israeli soldier and the military's subsequent mass demolitions in a Palestinian refugee camp, with left-wing politicians warning against enlarging the gulf between Palestinians and Israelis.

Giorgio Giacomelli, commissioner-general of the U.N. Relief and Works, arrived to investigate the situation in the Gaza Strip's Bureij refugee camp. He said he worried whether the demolitions of more than three dozen homes and shops would change the recent relative quiet of the area. Giacomelli suggested the Israeli measures were disproportionate.

Army Radio quoted a senior military officer in Gaza as saying he believed the demolitions would not increase the violence of the 33- month-old Palestinian uprising. Palestinian underground leaders, however, have issued leaflets calling for confrontations with Israeli soldiers in solidarity with Bureij,

under curfew since the Sept. 20 slaying of reserve Sgt. Amnon Pomerantz.

''In this case, a severe reaction was needed and not a mumbling one to signal to the population of the strip that the Israel Defense Force will not just sit still after the murder of the soldier,'' the senior officer was quoted as saying.

Israeli military officials and government leaders, however, have consistently dismissed characterization of the demolitions as collective punishment, saying the camp's narrow main commercial road had to be widened for military reasons. At the same time, they have said those directly involved in the soldier's death would be punished.

In an effort to prevent disturbances in the wake of the demolitions and apparently to search for additional suspects, the military clamped curfews on at least four Gaza villages and refugee camps, confining more than 100,000 Palestinians to their homes. A general strike called in solidarity with Iraq also shut down the Israeli-occupied territories Wednesday.

Giacomelli visited the Bureij Palestinian refugee camp Wednesday, a day after the army completed the demolition of 26 shops and seven homes. On Tuesday, the Supreme Court reaffirmed the military's demolition orders, which army commanders said were issued to ensure greater security for military patrols who have been attacked along the narrow road, where Pomerantz was killed.

Defense Minister Moshe Arens told the Knesset's special session on the slaying that the ruling right-wing Likud Party did not support collective punishment. The measures that were taken ''to increase the security in the camp did not circumvent the country's laws.''

In reaction, Knesset member Binyamin Ben-Eliezer of the opposition Labor Party said, ''The reaction should be directed only against those that were directly involved in setting fire to Pomerantz.'' The Israeli reserve soldier, who mistook the entrance to Bureij for the entrance to his army base, was stoned and burned to death in his car by a Palestinian mob after he injured two teenagers while trying to escape.

''Enlarging the circle will only increase the fire and enlarge the number of demonstrations,'' Ben-Eliezer said.

Knesset member Dedi Zucker said, ''The murder grows on an earth of hatred that does not decrease.''

The U.N. Relief and Works Agency, which oversees Palestinian refugee camps and aid in the Middle East, estimated 23 refugee families were displaced by the demolitions. Estimates range from 130 to as many as 300 Palestinians who were affected in Bureij, where more than 19,000 people live.

The military has said it would provide land to build and the army would aid in construction of new structures. In the past, Palestinians have shied away from compensation by Israeli authorities to avoid the impression of acquiescing.

But Freih Abu Middain, chairman of the Gaza Bar Association, indicated Palestinians might accept the offers this time as long as they were not forced to accept land outside of Bureij. Abu Middain was allowed into Bureij Wednesday to provide legal advice to the homeless refugees.

''If it is a good offer, we will accept it,'' he said.

#90269u1469 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - Treasury Secretary Nicholas Brady, in a letter Wednesday, called on Congress to approve funding for the Resolution Trust Corp. or face a shutdown of the agency charged with selling assets of failed thrifts.

''We believe that Congress must pass legislation providing additional funds, if RTC is to continue to fulfill its mandate,'' Brady said in the letter to Rep. Henry Gonzalez, D-Texas, chairman of the House Banking Committee.

Brady said unless Congress takes action by mid-October, his department could be faced with the task of ''shutting down the resolution activity of the RTC '' which would run out of money by the end of December.

The Bush administration, which in the past underestimated the magnitude of the savings and loan bailout, has yet to request a specific amount of money for funding the thrift agency in fiscal 1991.

Congress, meanwhile, has not been willing to make any recommendations, although it is believed that at least $120 million is needed for the RTC to carry out its behemoth task.

Brady's letter was obtained by reporters as the White House and congressional leaders struggled to slash the government's fiscal 1991 budget to avert $105 billion in automatic spending cuts that take effect Monday.

In early August, the Treasury Department recommended Congress either pass a short-term funding bill to keep the RTC running in February, approve as much as $50 billion to cover losses from the sales of failed thrifts during the fiscal year, or provide ''a permanent and indefinite approach.''

Brady reminded Gonzalez his staff ''has been working closely with your staff on the banking committee and has provided draft legislation language for each of the three approcahes we have suggested.''

In a letter released Monday, Brady also warned Congress that the entire government could run out of cash by Thursday unless lawmakers agreed to increase the debt limit to $3.509 trillion.

Temporary legislation boosting the debt limit to $3.195 trillion expires at midnight Tuesday, and ''without an increase in the debt limit, all issuance of Treasury securities would cease,'' he said.

#90269u1516 09/26/1990 ~United Press International

MOUNTAIN VIEW, Calif. (SEPT. 26) UPI - Sun Microsystems Inc., the leading seller of computer workstations, introduced a printer and printing software Wednesday aimed at boosting its sales in office markets dominated by personal computers.

Sun introduced a $2,695 laser printer, called the Sparcprinter, that can print up to 12 pages a minute, compared with 8 to 10 pages a minute for comparable printers from other companies.

Perhaps more important, Sun introduced a $495 software package, called NewSprint, that will allow its workstations to work with printers from a number of different vendors, including market leader Hewlett- Packard Co., Canon, Versatec and others.

Analysts said the software was critical for Sun to expand its sales into the general office market, which demands computers that can work with existing equipment.

''It helps them cross that magic line,'' said Cliff Friedman, an analyst for Bear Stearns.

Sun leads the $6.1 billion market for computer workstations, used largely by engineers, but it has had a more difficult time penetrating the $34.6 billion market for personal computers used in most offices.

The company has steadily increased its presence in the office market, however, and has won over many corporate buyers with a steady stream of high-performance products. Many financial analysts currently use Sun machines.

''They are really making themselves a well-rounded computer company,'' said Laura Conigliaro, an analyst with Prudential-Bache Securities. ''I think the pressure is on any company that still is in the mode of thinking of Sun simply as a workstation competitor.''

Until now, Sun has bought and resold Apple LaserWriter printers modified to work with its workstations. With its new software, graphics and text produced on Sun workstations can be printed on virtually any printer, Sun said.

Most laser printers today use an industry standard software called PostScript, developed by Adobe Systems Inc. of Mountain View, Calif., to accurately print graphics and text.

With its new software, Sun has developed a clone of PostScript that is stored in the computer itself, not in the printer. Next Computer Inc. of Redwood City

Calif., has pursued a similar strategy, although its uses PostScript.

By storing the printing software within the computer, the cost of the printer goes down and the printing speed goes up, Sun said.

#90269u1535 09/26/1990 ~United Press International

MANILA, PHILIPPINES (SEPT. 26) UPI - Rebels tossed bombs at four American-linked multinational companies within 24 hours Wednesday, damaging three of the plants and slightly injuring one person, police said.

Police Col. Remy Macaspac said witnesses reported a blast at the Colgate Palmolive, Philippines compound after two cars sped by. The bomb hit a tree and exploded on the ground, slightly damaging a wall and smashing a glass window, he said.

The explosion was the third Wednesday and the 28th in or near Manila since Aug. 13. The previous incidents were blamed on rebel soldiers.

Earlier Wednesday, police said men exploded bombs at the Coca-Cola bottling plant near President Corazon Aquino's Malacanang Palace and at a Pepsi-Cola Bottling Company in suburban Quezon City.

Police reported severe damage to the soft drink companies. One person was injured at the Coca-Cola facility.

Two men riding on a motorcycle also tossed a bundle of dynamite at Motorola Philippines, Inc., a U.S.-owned electronics company, in nearby Paranaque town Tuesday night. The bomb landed at a chemical storehouse but did not explode, police said.

Police also found four unexploded molotov cocktails at a hospital parking lot in suburban Quezon City and searched a dormitory at the nearby state-run University of the Philippines after students reported a bomb threat.

The bombing at 4:15 a.m. at the Coca Cola bottling plant in the residential San Miguel district near the presidential palace tore down the wood and metal ceilings of the warehouse and damaged a plant generator, police said.

An employee was slightly wounded, they said.

Witnesses said they saw men in a speeding van toss the bomb over the compound's steel gate. Police bomb experts said the device might have exploded while in the air and indications from debris at the scene showed the bomb was made of dynamite sticks.

Twenty minutes earlier, men also hurled a bomb at the Pepsi Cola bottling

plant in Quezon City, shattering the metal door of the water pump, police said. No one was injured, they said.

Rightist soldiers were believed behind the bombings, but Maj. Gen. Rodolfo Biazon, deputy armed forces chief of staff, did not rule out the possibility communist guerrillas were involved.

#90269u1538 09/26/1990 ~United Press International

SANTA MONICA, CA (SEPT. 26) UPI - Defense attorneys for Marlon Brando's son sought Wednesday to have the charges against him reduced from murder to manslaughter, arguing that the shooting of his half sister's boyfriend was accidental.

The lawyers for Christian Brando also asked a judge to sever the murder count from a felony charge of illegal possession of a machine gun.

Santa Monica Superior Court Judge Robert Thomas was expected to rule on the motions later in the day.

Thomas was also to hear defense arguments to supress a tape-recorded statement Christian gave police the night of the slaying on which he says the killing was an accident that occurred during a struggle with the victim.

The lawyers say police did not properly read Brando his Miranda rights before he made the statement.

In arguing for reducing the murder charge, defense attorney Robert Shapiro said, ''The prosecution has failed to establish malice, a crucial element of murder. The charge of murder is unwarranted. This case is no more than manslaughter.''

In response, Deputy District Attorney Steven Barshop, said: ''Shooting someone in the face at point-blank range is murder.''

Christian, 32, allegedly shot and killed Dag Drollet, 26, in Marlon Brando's Hollywood Hills estate May 16.

Drollet was the boyfriend of Christian half sister, Cheyenne, and the son of an influential political figure in Tahiti.

In his statement to police, Brando said, ''I shot him man, but not on purpose.''

Prosecutors, however, contend Christian premeditated the slaying after Cheyenne told him Drollet had been abusing her.

Marlon Brando, whose recent announcement that his as-yet unwritten memoirs are on the auction block has set off a publishers' bidding war, was in court Wednesday.

The 66-year-old Academy Award-winning star, after a lifetime of guarding his privacy, is peddling his autobiography ''to set the record straight,'' he told Los Angeles Times. Already, a hurried offer of $2 million has been rejected as too low.

Attorney Belinda Frixou, Brando's general adviser for the past decade, denied the actor needs the money to pay defense fees for his son.

If convicted of murder, Christian could be sentenced to 25 years to life in state prison. He does not face a possible death sentence.

Barshop has said Drollet's body was found with a television remote control in one hand and a cigarette lighter in the other, indicating there was no struggle with Christian prior to the shooting.

In June, Cheyenne Brando, 20, told police that her half brother had spoken on numerous occasions about killing Drollet and that on the evening of the slaying, he had picked up the murder weapon at his girlfriend's residence.

Cheyenne, who was pregnant with Drollet's child at the time of the slaying, has since flown back to Tahiti, apparently to avoid testifying against Christian.

Prosecutors are attempting to subpoena her to testify at Christian's trial, scheduled for Oct. 9. A federal judge earlier this month turned down their request to ask French Polynesian authorities to subpoena her in Tahiti.

After spending three months in County Jail, Christian was freed in August when his father posted his $4 million estate as bail.

WASHINGTON (SEPT. 26) UPI - Yields rose on four-year notes Wednesday to an average of 8.53 percent, the highest since 8.58 percent March 28, the Treasury

Department announced.

The government said it auctioned $8.328 billion of the 8 1/2 percent interest rate notes at an average of $99.900 with 100 equaling the face value and one point representing $10 on each $1,000 investment. At the last auction June 27, the average yield was 8.50 percent.

NEW YORK (SEPT. 26) UPI - Newsweek and a Times Mirror Co. subsidiary said Wednesday they are working together in an effort to attract scarce advertising dollars by offering joint ad buys in 11 magazines that reach a total of 42 million adults.

The "Newsweek/Times Mirror Ad-Vantage" program is the first marketing package involving high-circulation consumer magazines to be offered by separate companies working together, spokesmen for Newsweek and Times Mirror Magazines said.

The program "will enable advertisers to reach 30 percent more adults than 'The Cosby Show' and ten times more men than ABC-TV's 'Wide World of Sports,"' said Peter Eldredge, Newsweek's publisher. Advertisers can reach 33 percent of the total U.S. male population, or 28.5 million men, as well as 42 million adults in all, Eldredge said.

Times Mirror Magazines' titles are: Field & Stream, Golf, Home Mechanix, Outdoor Life, Popular Science, Salt Water Sportsman, Ski, Skiing, and Yachting. The program also covers The Sporting News, which is a separate Times Mirror subsidiary.

"It's a very interesting and different arrangement," said Beth Rockwood, senior vice president and director of media planning for Young and Rubicam Inc., a leading ad agency. "Although the concept of a group buy is something we're all very familiar with, this is really the first time that two separate companies have arranged a group buy."

Rockwood described the program as "a share-building strategy" for both companies. "Since magazine spending in total is not really growing in terms of share of advertising dollars, everbody is fighting for share. This gives both companies entree to some new advertising dollars," she said.

Times Mirror Magazines Executive Vice President James Kopper said the program has four components: a network package offering advertisers substantial reach and penetration through multi-title buys; custom advertising supplements; extension programs including special events; and cross-media opportunities involving newspaper, radio, cable and television. Typical program options include joint advertising supplements or advertorials and special joint- or

single-sponsor publications.

Newsweek, a Washington Post Co. publication with circulation of 3.1 million, and the ten Times Mirror publications, with a combined circulation of 9.4 million, together would offer advertisers a total circulation of 12,507,261 for the first half of 1990,according to Audit Bureau of Circulations figures. The total readership figure of 42 million adults is based on the assumption that more than one person reads each issue of the magazines.

#90269u1589 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - Defense Secretary Dick Cheney ordered the withdrawal of 40,000 troops from Europe over the next 12 months in what will be the largest single U.S. troop cut in Europe since 1948, the Pentagon announced Wednesday.

Cheney's action was taken in anticipation of a successful conclusion of an agreement with the Soviet Union by the end of the year on reducing conventional forces in Europe.

''We have to begin the drawdown now to respond in an orderly way to changing security requirements and declining defense budgets,'' Cheney said.

Cheney directed Gen. Colin Powell, chairman of the Joint Chiefs of Staff, to reduce the number of U.S. forces in Europe by 40,000 during fiscal 1991, which begins Monday and ends Sept. 30, 1991.

Steve Lofgren, a historian at the Army's Center of Military History, said the 40,000 troop cut would be the largest single U.S. military withdrawal from Western Europe since 1948, when American troop strength settled at slightly more than 80,000 following the end of World War II.

The Pentagon said the United States has about 330,000 military personnel in Western Europe and surrounding waters. This includes about 215,000 Army, 85,000 Air Force, 30,000 Navy and 3,700 Marine personnel, though many of the sailors at sea have been sent into Middle East waters.

''Over the coming year, the U.S. Army will reduce its presence in Europe by 30,000 and the U.S. Air Force by 10,000,'' the Pentagon said.

''Although the personnel drawdown will begin in October, no units will be deactivated before Jan. 1, 1991, to allow the affected units planning time and to avoid placing excessive strain on the logistics system,'' it added.

Details on specific units and timetables for withdrawal will be announced by the headquarters of U.S. Army-Europe and U.S. Air Force- Europe as decisions are made, the Pentagon said.

''Military units normally require three to four months to close down, once a deactivation order is given,'' the Pentagon said. ''By taking these anticipatory steps, the reductions can be spread throughout the entire 1991 fiscal year, instead of waiting for an agreement to be signed and compressing the reductions into a fraction of a year.''

U.S. and Soviet negotiators at the Conventional Forces in Europe, or CFE, talks in Vienna are working on a proposal to reduce the number of troops to 195,000 each in Central Europe. The United States would be able to maintain an additional 30,000 outside the central region, such as in Britain.

President Bush's proposed budget for fiscal 1991, which begins Oct. 1, called for trimming the ranks of the 2.1 million U.S. troops by 38, 000, but it did not specify where the forces would be reduced.

A Pentagon spokesman said these 40,000 to be withdrawn from Europe are ''part of the effort to reduce (total military) end-strength by 40, 000 in fiscal 1991.''

#90269u1594 09/26/1990 ~United Press International
MOSCOW (SEPT. 26) UPI - Soviet aviation officials looking for new planes and technology and Western businessmen anticipating huge new markets said at a trade show Wednesday they are optimistic about future cooperation, but some major problems remain.

More than 250 companies from 17 countries were represented at the Moscow Aerospace 90 show that closed Wednesday, and nearly all of them were looking to do business.

Western aircraft giants Boeing, McDonnell Douglas, Aerospatial and British Aerospace joined Soviet manufacturers Tupolev, Ilyushin, Yakovlev and Antonov in the huge main hall of the Exhibition of Economic Achievements.

Also featured were major engine manufacturers and aviation equipment suppliers along with scores of smaller companies dealing in everything from ejection seats to baggage carts.

As young boys and engineering students looked wide-eyed at the latest Soviet and Western technology - some like the MiG-29 engine top-secret until recently - Soviet aviation officials and Western businessmen huddled in back alcoves discussing deals.

"This is the most gigantic market in the world," Samuel Casey of McDonnell Douglas said. "They have 8,000 airplanes, and not one is our product." Casey and other Western businessmen warned, however, that the Soviet shortage of hard currency, the lack of a convertible local currency and continued uncertainty in the Soviet economy will likely delay any large deals.

But the planned economic reforms, new openness from the Soviet side and the possible breakup of the Aeroflot monopoly on air travel in the Soviet Union had the Western salesmen nearly salivating over the potential market. "Every one of the 15 republics wants its own airline," Casey said. "And every republic has been in this booth looking for planes."

Alan Stafford-Brookes, marketing manager for Allied Signal Aerospace Co, said his firm already has a deal for electronic equipment on five Airbus 310s being purchased by Aeroflot, but like most of the companies at the show his was anticipating more long-term gains than short-term profit in the Soviet market. "To change the Soviet industry after it has been dormant for so many years is

going to be extremely difficult," Stafford-Brookes said.

He said that the Soviet Union will need Western technology to revamp its aviation industry to compete on the world market, and predicted after five to ten years of joint efforts with companies like his the Soviets would be worthy competitors. "Of course, the West is not doing this for love," Stafford-Brookes said. "It's self interest - but also mutual interest."

The Soviet aircraft enterprises, recently given much more freedom but told they must also be self-supporting after decades of simply filling state orders are restructuring and seeking Western help as they enter the open market.

Sergei Yakovlev, son of famed Soviet aircraft designer Alexander Yakovlev and chief designer at the enterprise his father began, said he was looking for a partner in the West to supply engines and avionics for the Yak-48 corporate jet and refitted Yak-40 passenger.

"There are areas where we lag behind," Yakovlev admitted with a candor that he said would have been impossible several years ago. "We need some help. We have the ability to develop what we need on our own, but it would take years. We need it now."

He said he was encouraged by the contacts he made at this week's trade show and was confident that through continued exchanges the Soviet aircraft industry would be able to survive on the world market. "We must be able to compete," Yakovlev said. "We have no other way."

Boris Eselson, an official at the Leningrad Klimov design association that for years was so secret it was referred to only by the number 117, said uncertainty in the country affected Soviet designers as well as Western companies.

"Under the old system, after the design was completed we delivered it to the manufacturing plant and that was that," Eselson said. "The state paid for the development, took care of the selling. We didn't have to worry about it.

"Now we have to think about marketing, about making it work. But we don't have the structure to do it. We don't have a law on property, to protect our author's rights for what we design."

He said his enterprise, which was displaying the engine from the sophisticated MiG-29 fighter for the first time at a trade show, was trying to expand its civil aviation business because of the recent cuts in military spending.

"We have much to learn, but we have much to show others also," Eselson said. "We have the ability, we must learn to compete. There is no other way."

#90269u1612 09/26/1990 ~United Press International
WASHINGTON (SEPT. 26) UPI - The government approved a new rule Wednesday to encourage airlines to adopt a ''bold, new approach'' in training cockpit crews to act as a team rather than individuals.

The Federal Aviation Administration, responding to a number of air crashes blamed on human error, said it now advocates alternate programs that incorporate the latest advances in training methods and techniques. The program emphasizes communication skills, coordination and decision- making, according to an FAA statement.

''This is a bold new approach to the training of flight crew members that is sorely needed and one which I believe will enhance safety and increase cockpit efficiency,'' said FAA Administrator James Busey.

More than 60 percent of fatal airline crashes are caused by cockpit communication breakdowns rather than mechanical problems or lack of pilot skills, the FAA said.

The new training method, called the Advanced Qualification Program, was developed by a government-industry task force and features use of new computer technology and educational devices.

It is designed to bring the professional qualifications of pilots and other crew members, aircraft dispatchers, instructors and evaluators to a level above that provided under present standards.

#90269u1623 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - The Senate voted Wednesday to require organizations accepting federal family planning funds to notify a parent 48 hours before an abortion is performed on their teenager.

The proposal, offered as an amendment to a five-year extension of the family planning program, was approved by voice vote after an attempt to kill it was beaten, 54-43.

The amendment, sponsored by Sen. William Armstrong, R-Colo., would require notification - but not consent - of one parent 48 hours prior to an abortion for any woman under 18.

The legislation would not override the law in states that require parental notification of abortions.

Armstrong said virtually every state requires parental consent for surgical and medical procedures and 35 states require parental consent for abortions.

''Any kind of medical or surgical procedure requires parental consent,'' he said. ''It even applies to routine procedures such as giving blood. And it is nearly universal custom that if you get your ears pierced you have to get parental consent.''

The five-year extension of the family planning program would authorize $177.4 for projects and training grants, research and a community based information and education programs. It includes $9.5 million for the ''chastity'' program designed to get adolescents to abstain from sex.

A motion to limit debate on the legislation was scheduled for later Wednesday.

President Bush's senior advisers have said they will recommend a veto of the bill and its prospects were jeopardized more when the Senate voted 65-35 Tuesday to approve an amendment allowing family planning programs to tell women that abortion is an option and to refer them to a place where the abortion could be performed.

The family planning program strictly prohibits the use of any federal funds for abortions or to encourage abortions.

Armstrong said although the 20-year-old law prohibits abortions by an organization getting family planning grants, in some cases the same groups that provide counseling also perform the abortions.

Sen. Orrin Hatch, R-Utah, said, ''They go right from the counseling office to get the abortion done.''

Armstrong said his amendment protects ''vulenrable young people'' who are not in a state of mind to make decisions ''for the child and for themselves.''

''We are not asking for parental consent, just notification so at least one parent will be able to give loving advice and counsel,'' Armstrong said.

WEST BERLIN (SEPT. 26) UPI - Radical youths planning violent protests could disrupt German unification ceremonies Oct. 3 capping a year of peaceful change in East Germany, Berlin police said Wednesday.

Hundreds of youths already went on the rampage, smashing shop windows, setting fire to a truck and chanting anti-German slogans in the streets of East Berlin Sunday in what officials said might be ''a dress rehearsal'' for a major riot next week.

West Berlin Senator Erich Paetzold said that an additional contingent of 1,200 policemen would be called into Berlin from other parts of Germany during the night from Oct. 2 to 3, but declined to say how many security forces will be deployed.

An announcement in a leftist West Berlin daily this week urged demonstrators to gather Tuesday night for a demonstration under the motto: ''Shut-up Germany.''

In recent months, Berlin - both East and West - has been the scene of violent demonstrations and clashes between leftists, neo-Nazis, foreigners, vigilante gangs and police.

Paetzold said he will ask the East German Interior Ministry to hand over responsibility for police operations to the West German authorities on Oct. 2 - a virtual unification of the two police forces one day before the merger of the two Germanys.

He said this was essential because the East German police force has little experience in such riots.

Last year, when tens of thousands of East Germans took to the streets in massive demonstrations that eventually ended fourty years of Communist rule, police faced only passive resistance when they arrested protestors.

Huge crowds are expected to attend Oct. 3 celebrations marking the unification of Germany after more than four decades of division. At exactly midnight fireworks will illuminate the Reichstag, the former German parliament, where the German flag will be hoisted.

West German Chancellor Helmut Kohl, President Richard von Weizsaecker and other leading German personalities are expected to attend the celebrations.

#90269u1677 09/26/1990 ~United Press International

CAPE CANAVERAL, FL (SEPT. 26) UPI - A powerful Trident 2 missile carrying a load of dummy warheads was successfully launched from a submerged nuclear submarine Wednesday in a routine test flight, officials said.

The three-stage, solid-fuel Trident 2, the most powerful weapon in the Navy's inventory, was successfully launched at 11:55 a.m. EDT from the USS Pennsylvania cruising submerged east of Cape Canaveral.

The Pennsylvania is the second fleet ballistic missile submarine certified to carry the upgraded Trident 2 missile, joining the USS Tennessee on operational status. The launch Wednesday was a routine ''demonstration and shakedown operation'' to test the crew's ability to handle the weapon system.

An Air Force spokesman said the flight was a success, but details about the launch were classified.

It was the ninth in a series of underwater launches, pushing the weapon's sea-launch record to seven successes and two failures. Including 19 test firings from a ground pad, the missile now has a record of five failures and 23 successes.

The Trident 2 has been protested by anti-nuclear activists since test firings began in January 1987 at the Cape Canaveral Air Force Station. Because of previous confrontations at sea, Trident 2 launches now are carried out in strict secrecy.

The first and third such submarine firings in March and August last year ended in spectacular explosions, apparently because designers underestimated the forces acting on the big rockets as they are being propelled to the surface by compressed gas.

The missile's nozzle system was redesigned as a result and tests since then have been successful.

The 44-foot Trident 2 is thought to have a maximum range of up to 6, 900 miles depending on how many warheads are carried, and it is believed to be so accurate it can deliver an independently targetable nuclear bomb to within about 400 feet of a target.

TOKYO (SEPT. 26) UPI - North Korea set aside 45 years of hostility toward Japan Wednesday as President Kim Il Sung greeted a delegation of visiting Japanese politicians.

A beaming Kim was shown on Japanese television telling senior Japanese politician Shin Kanemaru and vice chairman of the opposition Japan Socialist Party, Makoto Tanabe, that it was time for North Korea and Japan to be close in more than just geography. The two countries are separated by about 500 miles across the Sea of Japan.

The two sides are expected to discuss setting up liaison offices - one step below embassies - in their nations' capitals and air links, a Japanese Foreign Ministry spokesman said.

Kim also implied that North Korea would agree to free two Japanese seamen who have been imprisoned since 1983 in retaliation for Tokyo's granting of asylum to a North Korean defector.

Kim met the Japanese politicians at a North Korean mountain resort called Myohyangsan, about 95 miles northeast of the capital, Pyongyang, the Kyodo News Service said.

It was the first time Kim, the only leader communist North Korea has had in its 45 year history, had met a ranking member of Japan's ruling Liberal Democratic Party.

Kim held brief talks with Kanemaru and Tanabe, and was expected to meet with Kanemaru privately later Wednesday or Thursday morning, Japanese media reports said.

The contents of their conversation were not revealed, but Kanemaru was to deliver a letter from Japanese Prime Minister Toshiki Kaifu apologizing for Japan's harsh 35-year colonial rule of Korea up to the end of World War II.

Earlier in his five-day visit, Kanemaru made a personal apology for the hardships Japan inflicted on Koreans during the colonial period.

Amity could stumble over North Korean demands for reparations to follow Japanese apologies.

North Korean officials made reparations the focus of their discussions with the delegation before the meeting with Kim, Japanese reports said.

Kanemaru, whose visit is unofficial, has reportedly expressed willingness to consider repartations. But Japanese government officials said no negotiations on reparations could take place unless formal diplomatic relations were established, according to the Kyodo news report.

#90269u1775 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - EPA Administrator William Reilly, saying the

nation must aim its environmental cleanup efforts more effectively, announced a crash program Wednesday to cut the most dangerous toxic discharges by 500 million pounds within five years.

In a major policy speech at the National Press Club, the Environmental Protection Agency chief said the country must do a better job of determining which pollution problems posed the biggest health and ecological risks and then focus its cleanup efforts on those targets.

Toward that end, he released a study identifying four environmental concerns as meriting priority attention: indoor and outdoor air pollution, worker exposure to chemicals and drinking water contamination.

He also announced a major EPA effort to single out ''bad actor'' toxic chemicals for immediate reductions and promised new federal initiatives to encourage recycling, including a possible move to resolve confusion over ''recyclable'' and ''biodegradable'' consumer products.

More broadly, Reilly said with the United States now spending an estimated $90 billion a year on pollution control, ''It seems only prudent to ask ourselves: Are we spending all this money on the right things? Are society's resources being used in ways that will contribute most directly to the health and well-being of our citizens and our environment?''

Reilly said the nation had achieved some success by enforcing ''traditional'' environmental laws that separately addressed air pollution, toxic waste disposal or water contamination.

But he said that ''piecemeal'' approach did not enable the nation to determine if, overall, it was getting the biggest bang possible for its environmental buck.

Reilly compared the nation's environmental policy-making over the past two decades to the video game ''Space Invaders'' in which a player blasts away with unbridled abandon at enemy ships.

''Every time we saw a blip on the radar screen, we unleashed an arsenal of control measures to eliminate it,'' he told a packed house of reporters and industry lobbyists. ''Rarely did we evaluate the relative importance of chemicals.''

''All too often in the past, I think, the guiding principle for making environmental policy has been what has been referred to as the 'ready-fire-aim' principle,'' he said. ''I think the time has come to start taking aim before we open fire.''

To improve the EPA's aim, Reilly said his agency just completed a study identifying four pollution problems as posing ''relatively high risks'' to

health and the environment requiring priority attention from his agency.

The ''comparative risk'' study, based primarily on scientific evidence about public exposure to known toxic substances, said significant dangers were posed by smog, acid rain and other ''ambient'' air pollution; worker exposure to chemicals in industry and agriculture; drinking water contamination; and indoor air pollutants such as radon.

Reilly said the EPA already was reshaping its budget and enforcement priorities to better attack the four problems cited in the study.

Along those lines, Reilly said the EPA was conducting an agency-wide effort to identify the most health-threatening toxic chemicals - ''the really 'bad actors' in terms of health risk.''

Reilly committed his agency to achieving a one-third cut in total discharges of those targeted contaminants by October 1992. He called for a reduction of more than 50 percent by 1995.

NEW YORK (SEPT. 26) UPI - Fallen junk bond king Michael Milken deserves a ''substantial'' prison term for a web of crimes far beyond those he has admitted, prosecutors said in court papers released Wednesday.

Milken, who has pleaded guilty to six felony charges, was involved in a three-year string of crimes with Ivan Boesky, the former Wall Street arbitrageur turned government informant, prosecutors said in their pre-sentencing memorandum on Milken.

The former head of the high-risk, high-yield bond department at Drexel Burnham Lambert Inc., Milken also profited from several insider trading schemes, prosecutors said.

Milken, 44, pleaded guilty in April to six charges, including conspiracy and

mail fraud. His plea agreement allowed him to avoid the toughest charges in his 98-count indictment.

He is scheduled to be sentenced Oct. 1 and faces a maximum possible sentence of 28 years in prison.

Although Milken has pleaded guilty to six charges, four of them involving Boesky, they ''represent only a small portion of the criminal conduct in which he is engaged,'' prosecutors wrote.

''Milken's objectives were simple: power and wealth,'' the government wrote. ''With utter disregard for the law, Milken cheated many of his own customers and clients and the investing public and thereby corrupted the capital markets.''

Describing Milken as ''unreconstructed and unapologetic,'' prosecutors said, ''He should be sentenced to a substantial term of imprisonment.

''By its sentence, this court must demonstrate that no man - no matter how rich and how powerful - may make his own rules.''

In a reply released Tuesday, Milken's attorney said the government's report was ''grossly distorted'' and contained no evidence of Milken committing other crimes.

''If the government had wanted Mr. Milken sentenced for other crimes, it should not have entered into the plea agreement which it did,'' Milken's attorney wrote.

Prosecutors wrote that part of the criminal scheme between Milken and Boesky was captured in a conversation secretly tape recorded in a room at the Beverly Hills Hilton, prosecutors wrote.

On the tape, Milken ''was intent on providing Boesky with a false explanation'' for $5.3 million in payments he made to Boesky in their trading schemes, the government said.

''Milken and Boesky also assured each other that their subordinates would be reliable in the face of a governmental investigation,'' prosecutors said.

The conversation took place shortly after Boesky reached his plea bargain with the government, calling for him to plead guilty to one felony count, pay a record $100 million and cooperate with the government. He was sentenced to three years in prison.

As part of his plea bargain, Milken, who earned as much as $550 million a year while at Drexel, already has agreed to pay $600 million and to cooperate with the government after his sentencing.

However, prosecutors said their faith in Milken's intention to cooperate fully and honestly ''has waned.''

Prosecutors also hinted at Milken's responsibility for the demise of Drexel, which built its fortunes on junk bonds but was forced to file for bankruptcy protection earlier this year.

''There is no question that the excesses in Drexel's corporate culture that Milken fathered hastened the collapse of the company, corrupted many young professionals and occasioned the loss of thousands of jobs,'' the government said.

''Had more money been kept in Drexel rather than paid out to Milken and other members of the High Yield Department, Drexel undoubtedly would have had a greater chance to survive.''

Dozens of pages were deleted from the government's report to protect the names of unindicted co-conspirators in the case.

Milken was involved in insider trading schemes involving stock in Caesars World Inc., Viacom, Republic Airlines Inc. and Lorimar Inc., the government charged.

He also helped Boesky illegally conceal ownership of stock in Phillips Petroleum Corp., a takeover target in 1985, the government said.

Milken's attorney has asked that he be sentenced to probation and community service by working full time in drug and crime prevention programs at the Los Angeles Police Department.

WASHINGTON (SEPT. 26) UPI - U.S. talks with Peru over a proposed $35.9 million in military aid to fight drug trafficking collapsed because of Peruvian demands that economic assistance be included in the package, State Department officials said Wednesday.

The State Department has proposed reprogramming the money for military aid to Colombia and Bolivia, the two other legs of a drug war triad that forms the basis of a U.S. Andean strategy launched in February.

The negotiations collapsed in the Peruvian capital of Lima Tuesday even though agreement had been reached with the new government of President Alberto

Fujimori ''on many of the terms'' of the proposed aid, State Department spokesman Richard Boucher said.

''We do respect Peru's decision on this'' and intend to pursue an agreement for the next fiscal year, which begins Oct. 1, he said.

The collapse of the negotiations marked a sharp setback for the administration's three-pronged Andean drug war strategy. Peru is an essential element of the plan since 60 percent of the world's coca, from which cocaine is derived, is grown in the western South American country.

President Bush unveiled the strategy during a nationally televised speech and the leaders of Peru, Colombia and Bolivia signed onto it at a summit with Bush at Cartagena, Colombia, in February. Fujimori was not president of Peru at the time.

''We think we've got a good strategy and we're going to go ahead with that strategy,'' a State Department official said.

As part of that strategy, Colombia received $60 million and Bolivia $41 million in military aid this fiscal year.

The negotiations fell apart because Peru demanded that part of the $35.9 million be used to help farmers find an alternative to growing coca, State Department officials said.

But U.S. negotiators focused instead on the law enforcement aspects of the aid arguing that money could not be given to farmers living in areas controlled by drug traffickers until troops or police forced out the traffickers, the officials said.

''Large areas of Peru are dominated by narco-traffickers,'' an official said, speaking on condition of anonymity. ''We can't put economic aid into areas where we can't provide security.''

Part of the problem, the officials said, is that the negotiators ran out of time because the differences could not be ironed out before the expiration of the 1990 fiscal year Sept. 30.

''We have no doubt that the Fujimori administration wants to work with us,'' an official said. ''We think it's going to take more time. I don't think we're that far apart.''

#90269u1910 09/26/1990 ~United Press International

HAMILTON, Ontario (SEPT. 26) UPI - A man carrying a high-powered rifle chased a woman into a McDonald's restaurant Wednesday and held 12 employees hostage

for nearly four hours before killing himself, authorities said.

A woman screaming, ''I don't want to die'' ran into the fast-food eatery at 12:10 p.m. EDT, followed by a man holding a high-powered rifle with a telescopic sight, witnesses said.

Police said at least one shot was fired into the air outside the restaurant.

According to witnesses, the man said, ''I'm not here to hurt anyone, I just want the woman with the white hair.''

Patrons fled the store, while 12 employees moved into the basement for safety.

Just before 4 p.m., police heard one more shot. Officers dressed in riot gear entered the restaurant, and emerged minutes later with a grey- haired woman, believed to be the gunman's wife.

Minutes later, police escorted the McDonald's employees, mostly teenagers, from the scene in two groups.

Police said the gunman was found dead in the basement.

Police officials are not releasing his name, but said he had a history of violence. They said the incident was triggered by a domestic dispute.

During the dispute, Hamilton police blocked off the area around the restaurant and told proprietors of nearby stores to keep employees away from windows.

Police sharpshooters were spotted atop nearby buildings.

A gunman took 19 people hostage at a McDonald's restaurant in La Verne, Calif. Monday night, but all of the captives were freed when a special police squad stormed the eatery and captured the man Tuesday.

#90269u1965 09/26/1990 ~United Press International

NEW YORK (SEPT. 26) UPI - Stocks closed sharply lower Wednesday in moderate trading, pressured by another jump in the price of oil and jitters about the crisis in the Persian Gulf.

The Dow Jones industrial average, which climbed 32.67 Tuesday, slumped 25.99 to close at 2459.65. It was down about 40 points a couple of times during the session.

Among broader market gauges, the New York Stock Exchange composite index lost 1.68 to 167.52 and Standard & Poor's 500-stock index slid 3.02 to 305.06. The price of an average share dropped 29 cents.

Declines outpaced advances, 1,118-423, among the 1,988 issues crossing the NYSE tape. Big Board volume totaled 155,570,000 shares, down from 155,940,000 shares traded Tuesday.

Yet another steep rise in oil prices combined with some unconfirmed rumors about tensions in the Mideast sent stocks down Wednesday. The Dow industrials erased almost all of Tuesday's gains.

November oil futures closed up $1.14 to $38.67 a barrel, and topped $39 a barrel in late trading.

Analysts said two rumors about an escalation of hostilities also helped push stocks down Wednesday. Michael Metz, analyst at Oppenheimer & Co., said one rumor had Iraqi leader Saddam Hussein giving President Bush 24 hours to get United States troops out of Saudi Arabia and another claimed Iraqi troops had forcibly entered the U.S. embassy in Kuwait.

In Washington, the State Department denied the rumors concerning the purported invasion of the U.S. embassy in Kuwait, and said it had checked into several rumors over the last 12 hours or so. Similar rumors had sent Tokyo stocks plunging in overnight trading.

But analysts laid the decline more to the rise in oil prices than the rumors of heightened tensions.

''Anything that has to do with the Mideast has a negative effect, but it's always more the price of oil and the reaction in that market that either hurts or helps us,'' said Ron Doran, director of institutional trading at C.L. King & Associates in Albany, N.Y.

Doran said that other factors continue to dog the market as well - the failure thus far of budget conferees to agree on a deficit cutting plan and the failure of the Federal Reserve so far to respond to the faltering economy with an interest rate cut.

''But until the Mideast gets resolved, that being the number one priority, I don't think the market has much upside potential,'' Doran said. ''And there's an open window as far as the downside risk is concerned.''

On the trading floor, AT&T was the most active issue in dividend- related trading, down 3/8 to 31 1/2.

MCA followed, surging 7 1/4 to 61 1/4 on late rumors that Japan's Matsushita Electric is near agreement to acquire it. Matsushita confirmed Wednesday it is considering purchasing MCA. Citicorp was third, down 1 to 14 1/2 after reports saying Citibank plans to lay off 100 workers in its leveraged lending unit.

IBM was fourth, down 1 to 105 3/8.

Among the other blue chips, General Electric lost 5/8 to 55, Philip Morris eased 1/4 to 44 5/8, Eastman Kodak tumbled 1 to 39 1/8, Coca-Cola fell 1/2 to 38 3/4 and Merck eased 1 1/8 to 74 1/8.

The oil issues in the average couldn't buck the trend, even with higher oil prices Wednesday. Texaco fell 5/8 to 62 5/8, Exxon lost 5/8 to 49 7/8 and Chevron fell 1 1/8 to 76.

Elsewhere, Chrysler lost 1/4 to 9 7/8, setting yet another 52-week low and trading at its lowest levels in 8 years. Analysts were said Tuesday to cut earnings estimates and repeat negative ratings on the No. 3 automaker, saying that because of its industry position, it must undercut Ford and General Motors to compete successfully.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 187,437,100 shares, compared with 186,453,250 shares traded in the previous session.

Prices closed sharply lower in active trading on the American Stock Exchange.

The Amex Market Value index skidded 3.11 to close at 310.06. Declines led advances 400-166 among the 787 issues traded. The price of an average share lost 10 cents. Composite volume totaled 16,103,300 shares, vs. 14,807,100 traded Tuesday.

Salomon's put warrants on the Tokyo market's Nikkei index led the Amex issues, up 1 7/8 to 20.

The National Association of Securities Dealers composite index closed down 4.75 to 350.03.

NEW YORK (SEPT. 26) UPI - Average yields for money market mutual funds were higher or unchanged in the latest reporting week, while rates at competing savings and loan institutions were mixed, financial information services that track these yields and rates said Wednesday.

The Donoghue Organization, of Holliston, Mass., said average seven- day simple yields were 7.47 percent, up from 7.46 and 30-day simple yields were to 7.47, unchanged from the previous week.

The average maturity of fund portfolios was 46 days, unchanged.

The Bank Rate Monitor, of North Palm Beach, Fla., gave average rates as follows: money market deposit accounts, 5.88 percent, down from 5.89; Super-Now accounts, 4.97 percent, unchanged; six-month certificates of deposit 7.49 percent, unchanged; 1-year CDs, 7.59 percent, up from 7.58 percent; 2 1/2-year CDs, 7.69 percent, up from 7.67; and five-year CDs, 7.80 percent, unchanged.

The average rate for a one-year, adjustable-rate mortgage was 8.25 percent, unchanged.

The average rate on a 15-year, fixed-rate mortgage rose in the latest week to 9.76 percent, from 9.70; the average rate for a 30-year, fixed- rate mortgage also rose to 10.06 percent, from 10.01.

The average rate for a four-year automobile loan was 12.23 percent, up from 12.22.

#90269u2028 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - The National Institutes of Health has joined with a private firm to market techniques used in the recent ground-breaking attempt

at gene therapy, officials confirmed Wednesday.

Genetic Therapy Inc. recently signed a licensing agreement with NIH to market some of the techniques used in the first government-authorized attempt at gene therapy, said Lee Carter, chief of NIH's technology operations management branch.

Under the agreement, GTI receives exclusive rights to commercialize three patent applications it developed in conjunction with scientists from the NIH, the nation's premier biomedical research institution, Carter said.

A potential revolution in medicine got underway at NIH's Bethesda, Md., headquarters Sept. 14 when Dr. W. French Anderson and his colleagues inserted genetically corrected cells into a 4-year-old Cleveland girl suffering from a rare, immune system disorder. Researchers have said it will take months before they know if the gene therapy is helping the child.

Also at the NIH, Dr. Steven Rosenberg soon plans to begin another gene therapy experiment in which patients with a deadly type of skin cancer will receive cells that are genetically altered to produce a substance that has dramatically shrunk tumors in animals.

Under the licensing agreement, GTI would be allowed to sell products based on basic technologies for gene transfer, genetically modified bacteria and a type of cancer test, Carter said. Any medical uses of the products would still have to receive approval from the Food and Drug Administration before they could be used widely in patients.

Formed in 1987, GTI helped produce the crippled mouse virus, called a vector, that NIH researchers are using to insert foreign genes into human cells. The Gaithersburg, Md., firm was the first company to craft a ''cooperative research and development agreement'' with NIH, and now becomes the first to gain permission to market jointly developed medical techniques.

Carter described the venture as ''mutually beneficial'' to NIH and GTI. He did not know details of the licensing agreement, but said government agencies generally receive payments somewhat like royalties from firms that develop commercial products based on public-private research ventures. In addition, the government usually retains the right to make sure such products are not priced too high.

The signing of the gene therapy licensing agreement with GTI represents the first success of NIH's attempt to team with the private sector to move scientific advances more quickly into the marketplace.

''What we are hoping for is that many more of the inventions coming out of federal labs will eventually reach the general public,'' Carter said.

Also Wednesday, Washington Technology, a bi-weekly business publication, reported that GTI plans to register with the Securities and Exchange Commission for a public stock offering.

Jim Barrett, president of GTI, which employs about 40 people, told the publication his firm is considering a public stock offering and has submitted initial paperwork to the SEC.

Joan Loizeau, a lawyer with the New York firm, Hogan & Hartson, which handles GTI's corporate affairs, said the stock would likely be sold on the over-the-counter market. Mark Simon, an analyst with Robertson & Stephens & Co. in San Francisco, told Washington Technology he expects GTI's shares would sell initially for between $6 and $15.

David Talbot, an analyst with Arnold and S. Bleichroeder Inc. in New York, said GTI faces several obstacles. ''The problem with gene therapy is that we have so little to go on except newspaper clippings,'' Talbot said. ''They will still have to figure out how they will make it through the FDA and other regulatory hurdles.''

#90269u2036 09/26/1990 ~United Press International

(SEPT. 26) UPI - The government's conflict-of-interest case against Neil Bush today involved a debate over legal ethics. The trial is the first public hearing into the failure of a savings and loan... and involves Bush's conduct while an outside director of Silverado Banking, Savings and Loan. The president's son is expected to take the stand on his own behalf in the Denver courtroom tomorrow.

The Energy Department says fears of war have driven up the price of oil, but there still is NO reason to worry that supplies will dry up during the winter. A department official told lawmakers today that there's- quote- NO ''supply or demand reason for the price of oil to be as high as it is.'' The official explained that prices have been- in his words- ''bid up by speculative activity.''

The Senate voted today to require federally funded family planning groups to notify a parent 48 hours before his or her teen-ager gets an abortion. The proposal... which requires notification but NOT consent... is an amendment to a five-year extension of the family planning program. President Bush's advisers have said they will recommend a veto of the measure.

A Superior Court judge in Santa Monica, California, is expected to rule later today on a motion by defense attorneys for actor Marlon Brando's son. The lawyers want murder charges against Christian Brando reduced to manslaughter, saying the shooting of his half sister's boyfriend was an accident. The 32-year-old son of the famous actor allegedly shot and killed Dag Drollet on

May 16th.

Two youths set themselves ablaze in India today while police shot and killed five demonstrators during violent protests against a controversial federal job quota program. The widespread protests were the worst since Prime Minister V-P Singh announced in early August that 27 percent of all federal jobs would be reserved for members of the so- called ''backward'' classes.

-30- 2093

#90269u2060 09/26/1990 ~United Press International

(SEPT. 26) UPI - A storm of false rumors drove world crude oil prices up Wednesday after markets had fallen earlier on a U.S. industry report of rising gasoline supplies.

On the European spot market, where crude is bought and sold for cash, Britain's widely traded North Sea Brent crude edged up 10 cents over Tuesday to $40.05 a barrel. It had been down 95 cents earlier.

Brent, which has been leading the price surge on world markets, was quoted at $40.40 a barrel Monday, the first time crude has been quoted over $40 a barrel on world markets in 10 years.

On the New York Mercantile Exchange, the U.S. benchmark West Texas Intermediate crude for November delivery shot up $1.14 on the day to $38.67 a barrel, after being down as much as $1.05 in earlier trading.

''There were rumors flying all over,'' said Thomas Blakeslee, a trader with Pegasus Econometrics Group Inc. in Hoboken, N.J.

They included one that a U.S. warplane had been shot down in the Middle East, which the Pentagon denied.

Crude prices fell earlier in response to the weekly nationwide survey of the American Petroleum Institute showing a surprisingly large jump in gasoline inventories, but the decline was quickly reversed by the rumors.

''In this market, nothing compares with war hysteria,'' said James Steel, energy analyst with New York's Refco Inc.

Blakeslee said the rumors quickly persuaded the traders to abandon previously taken ''short'' sell positions.

''No one's willing to be short for more than a few minutes at a time. Only a 'white-knuckle' few,'' Blakeslee said.

The American Petroleum Institute reported late Tuesday after the Merc had closed that U.S. gasoline supplies last week rose 5.3 million barrels to 222.3

million barrels, the first time in months that stocks exceeded year-ago levels.

Traders had expected only a slight rise in gasoline inventories.

''The market is concentrating on selling gasoline because of the big build in supplies in the report,'' one trader said.

The API report also showed heating oil stocks last week rose 3.2 million barrels to 136.5 million barrels, one of the highest levels in recent years.

On the Merc, unleaded gasoline for October delivery ended the day down 1.95 cents from Tuesday's close to $1.001 a gallon, after trading as low as 98.7 cents a gallon.

October home heating gained 1.37 cents to $1.0257 a gallon, after being down 2.7 cents in earlier trading.

On the European spot market, the United Arab Emirates' Dubai Light, the key Middle East crude shipped mainly to the Far East, was quoted at $34.10 a barrel, a gain of 70 cents.

On the U.S. Gulf Coast spot market, prompt delivery WTI crude, rose 40 cents to $38.65 a barrel.

Marathon Oil Co., the Findlay, Ohio, unit of USX Corp., and Conoco Inc., Du Pont's Houston-based subsidiary, raised the posted price they will pay for crude at the wellhead by $1.25 a barrel to $37.50 a barrel for WTI.

Steel said there was good demand on the spot markets from the Far East, particularly Japan, for jet fuel and home heating oil.

Calvin Kent, administrator of the Energy Department's Energy Information Administration, told Congress that U.S. oil supplies were generally sufficient for the approaching winter.

Other than a potential propane shortfall, Kent testified there are generally adequate U.S. supplies of petroleum and heating oil, and refinery capacity is sufficient.

The supply of jet fuel ''deserves watching,'' Kent testified, because of the ''increased demand for military purposes.''

In Jakarta, Indonesia's oil minister was reported as saying world oil prices could soar out of control and exceed $60 a barrel if the Persian Gulf crisis developed into a war.

Mines and Energy Minister Ginandjar Kartasasmita told the Indonesian Observer that it is very difficult to predict the level to which prices would rise

should fighting occur in the Middle East.

''It might exceed $60 a barrel if war breaks out,'' the Observer quoted Ginandjar as saying.

McAllEN, TX (SEPT. 26) UPI - A federal bankruptcy judge Wednesday granted Greyhound Lines Inc. an extension until Nov. 19 to file its financial reorganization plan.

The nation's largest bus transportation company filed for protection under Chapter 11 of the federal bankruptcy law June 4, three months after a walkout by some 6,300 drivers. The drivers struck when negotiations broke down over a new contract.

Under federal law, the company originally had until Oct. 2 to file its plan of reorganization. The latest ruling by Judge Richard Schmidt extended that deadline by another 48 days to Nov. 19.

J. Michael Doyle, Greyhound's chief financial officer, said the company had made signfificant progress in its financial recovery during the summer.

''We appreciate the court's vote of confidence in giving us this brief extension,'' he said.

For the week ended Sept. 23, Doyle said, the company had ticket sales equal to 94.2 percent of the comparable week of last year.

Other Greyhound officers said the company does not expect to ask for additional extension and that it plans to file its reorganization plan by the current deadline.

#90269u2087 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - As budget talks went down to the wire Wednesday on a $500 billion deficit reduction plan, finger-pointing between President Bush and Democrats escalated over who's to blame for delaying a deal.

Bush, at a political fund-raiser in Akron, Ohio, blamed congressional Democrats for the long-standing impasse at the talks, which continued Wednesday with Bush's push for a cut in the capital-gains tax among the unresolved issues.

''The hang-up is not capital gains. The hang-up is with the Democrats on Capitol Hill,'' Bush said just five days before up to $105.7 billion in

automatic cuts in federal spending would take effect.

''We are still waiting for Democrats to commit to meaningful reform. Time and again, I've gone the extra mile and I believe the Republicans in Congress have gone the extra mile, and each time the other side said, 'It's still your move.'

''Well, it's not our move anymore. And if and when the ax falls, the Democratic Congress knows that it will be held accountable and I will take that message to every state in the union. It is their fault.''

Talking to reporters on Air Force One before leaving for Ohio, Bush said: ''I would now say that the Democrats in Congress have to come forward with a package. We're still working hard in a good bipartisan spirit. ... We're getting down to the wire.''

Bush's charge that Democrats had failed to offer a deficit-reduction package prompted angry responses from Democratic leaders on Capitol Hill, where House Speaker Thomas Foley, D-Wash., and Senate Democratic leader George Mitchell of Maine held a joint news conference to dispute Bush's claim.

Bush's charge ''is untrue and the president's chief of staff, budget director and secretary of the treasury know it's untrue,'' Mitchell said, referring to John Sununu, Richard Darman and Nicholas Brady, respectively - the three administration budget negotiators who have been meeting since May 15 with congressional bargainers.

He said Democrats had presented a series of deficit-reduction proposals and counterproposals as late as 2 a.m. Wednesday, shortly before talks recessed for the night after an eight-hour session. Talks between the five top congressonal leaders and the administration continued Wednesday.

''The president's statement creates a highly misleading and damaging impression about our participation in these negotiations,'' Mitchell said. ''It cannot stand unchallenged.''

Added Foley: ''We feel it's important that everyone understand that there are packages being offered.''

''Any implication of any kind that we are not proposing to provide a solution is simply incorrect,'' Foley said.

Earlier, House Democratic leader William Gray of Pennsylvania called Bush's comments ''false and counterproductive.''

''He has made it much more difficult to reach an agreement,'' Gray told a news conference. ''We've met the president more than half way.''

Gray told Bush to ''stop acting like a party chairman and start acting like a

president'' and urged him to ''get off the campaign trail'' and come back to Washington and join the budget talks as they enter their difficult final stage.

Gray said Democrats, in their offer early Wednesday, had gone ''more than half way'' in meeting Republican demands. He said both sides were ''pretty close'' to agreement except in one area - Bush's continued insistence on cutting the capital-gains tax on profits from the sale of assets.

But two Republican budget negotiators later disputed Gray's assertation that negotiators were close to a deal and rejected the idea that Bush should join the talks, saying that he was adequately represented by Sununu, Brady and Darman.

Earlier Wednesday, Republican leaders who met with Bush indicated he might yield on his demand for a capital-gains cut if other economic growth incentives are in the final deficit reduction plan.

#90269u2151 09/26/1990 ~United Press International

(SEPT. 26) UPI - Canadian authorities say a stand-off at a McDonald's in Hamilton, Ontario, ended with a gunman letting 12 hostages free before killing himself. Witnesses say the four-hour ordeal began when a woman screamed ''I doN'T want to die,'' as she ran into the fast-food restaurant, followed by a man with a high-powered rifle. Police say the incident began with a domestic dispute.

Just one day after a United Nations air embargo was imposed against Iraq... Jordan today allowed two Iraqi planes to land in Amman. One Boeing 707 dropped off some British hostages, and picked up passengers and cargo before returning to Baghdad. One Western diplomat in Amman called the flights ''a clear violation of the U-N embargo.'' But the British Foreign Office says there is NO evidence of a big airlift... though he said some ''seepage'' is expected.

The Pentagon today announced the biggest troop cuts in Europe since the days after World War Two. Defense Secretary Cheney says the move anticipates a successful conclusion of arms talks with the Soviet Union. By giving advance warning... the Defense Department hopes to spread the cuts throughout the 1991 fiscal year... rather than just a fraction of the year.

Military officials say a Trident-2 missile carrying dummy warheads was successfully launched from a submerged submarine today east of Cape Canaveral. The weapon's sea-launch record is now seven successes against two failures. Anti-nuclear activists have protested the test firings since they began in 1987. Because of previous confrontations at sea, the launches now are done in secrecy.

A-Annual; M-Monthly; Q-Quarterly; S- Semi-Annual

#90269u2182 09/26/1990 ~United Press International
WASHINGTON (SEPT. 26) UPI - International finance officials met Tuesday to establish procedures for the distribution of about $20 billion in pledges to assist countries hurt by the Persian Gulf crisis and rising oil prices.

The first meeting of the Gulf Crisis Financial Coordination Group, announced Tuesday by President Bush, reached no conclusions about amounts of money to be disbursed to individual countries, according to a senior Treasury Department official.

''It was not the purpose of this first meeting to settle numbers,'' the official said. ''The emphasis is on progress and movement, getting moving.''

Participants agreed that economic assistance to the most adversely affected countries, including the so-called front-line nations of Turkey, Jordan and Egypt, is critical to the global strategy of isolating Iraq President Saddam Hussein.

The meeting, which was chaired by David Mulford, the Treasury's under secretary for international affairs, focused on procedures for the disbursement of commitments.

The official said countries other than the front-line nations could receive financial assistance from donor nations, but he added that the group wants to keep the focus on those countries most severely affected by the recent increase in oil prices.

The group's goal is to coordinate commitments and contributions made by donor nations to help boost the economies of countries hardest hit by higher oil prices.

The group held its first meeting at the Treasury after Treasury Secretary Nicholas Brady met with Saudi and Kuwait representatives, who reportedly have balked at giving economic assistance to Jordan, one of the nations hardest hit by the crisis.

The resistance of Kuwait and Saudi Arabia was discussed by the group, but the official declined to say what conclusions, if any, were reached. The group will reconvene Oct. 12.

Brady, in an address to the joint annual meeting of the International Monetary Fund and World Bank, called upon the global lending institutions to ''extend their hands'' to assist those most affected by skyrocketing oil prices.

Brady suggested the lending agencies adjust their access policy; speed disbursements from the Compensatory and Contingency Financing Facility; widen compensation coverage to include pipeline, transit, transportation and

construction fees and expedite disbursements to help countries immediately adjust to higher oil costs.

A World Bank official later defended the institution's assistance plans, saying the bank has moved quickly and aggressively to respond to the crisis.

''As the crisis has prolonged, we've seen a greater threat to the gains of the 1980s and we're very keen that these gains not be derailed, '' said David Bock director of the World Bank's operation staff.

The annual meeting's second day was highlighted by tough talk about the Persian Gulf crisis.

Some of the toughest talk came from John Major, England's chancellor for the exchequer, who firmly stated that Iraq will not be allowed to profit from its Aug. 2 invasion of Kuwait.

''If we allow Iraq to profit from the invasion and annexation of her neighbor, no small country will feel secure,'' Major said. ''We must not let that happen. And together, I am sure we will not.''

During an address to banking and finance officials from 152 nations, Major said governments must play a role in reducing the stress placed on the world's economy from rising oil prices, which have doubled since the invasion.

Major said inflation cannot be avoided initially from the oil shock, but he stressed that governments can prevent inflation from becoming permanently entrenched.

''If this means that interest rates in some cases have to be raised, or in others, have to be kept higher for longer than would otherwise have been necessary, then this is what we must do,'' he said.

Brady said the crisis, which already is forecast to slow economic growth in much of the industrial world, will make it more difficult to navigate between the twin risks of higher inflation and slower growth.

''The Gulf crisis has complicated this task, and it will test our ability to steer a course which was already narrow.''

Brady also said the economic strength of the members of the IMF and World Bank ''must be mobilized to demonstrate collective resolve and make clear our intention not to yield to aggression.''

(SEPT. 26) UPI - It was NOT the big one that scientists have been predicting,

much to the relief of residents along the Illinois-Missouri border. Scientists say a mild earthquake registering four-point-six on the richter scale shook the Midwest today, re-inforcing concern about the New Madrid Fault. But today's quake... which did NOT cause major damage... apparently did NOT occur along the fault itself.

Government figures released today show that children are especially hard-hit by poverty. The Census Bureau says 31-and-one-half Million Americans- or nearly 13 percent of the population- were officially poor in 1989. The bureau says people under the age of 18 made up 40 percent of those living in poverty... while Americans over 65 made up another 10-point-seven percent of the figure.

An expert panel today recommended that the government demand nutritional labeling on almost all packaged foods. The report in Washington comes from the Institute of Medicine... part of the National Academy of Sciences. The group especially called for nutitional information at fast food restaurants. Consumer groups hailed the report... in particular, its call for nutrition information about red meat.

An Indiana tax preparer faces a possible five-year prison term after being convicted of helping customers file false income tax returns. Johnny Motley blamed his clients for his mistakes, telling a federal court in Indianapolis that he simply put down what his clients told him. In one instance, Motley listed a client's cat as a dependent, telling the client the cat was like a companion.

#90269u2186 09/26/1990 ~United Press International

SAN JOSE, Calif. (SEPT. 27) UPI - Growth in worldwide semiconductor sales will slow to just 1.5 percent in 1990 but return to a double-digit pace in the following three years, a leading trade association said Wednesday.

The Semiconductor Industry Association, which in May forecast a decline in 1990 chip sales, said it expects the worldwide semiconductor market to grow to $49.5 billion in 1990 from $48.8 billlion in 1989.

The trade group attributed the small increase to slower growth in end markets for semiconductors, which are critical components of computers, automobiles and a wide range of electronics products.

The projected increase in 1990 chip sales compares with a gain of 8.4 percent registered in 1989 and increases of more than 20 percent a year from 1986 through 1988.

The association said it expects semiconductor sales to take off again in 1991, with a projected 12.5 percent increase to $55.7 billion, and picking up to

19.5 percent increase to $66.6 billion in 1992. A 12.9 percent increase, to $75.2 billion, is anticipated for 1993.

Strong growth in Western Europe and Asia will be responsible for the increase this year, the association said. While the U.S. market will decline 2.3 percent and the Japanese market will slip 2.8 percent, European chip sales will jump 9 percent in 1990, according to its forecast.

''Rest of the world'' sales, which include Korea, Singapore, Taiwan and other markets, will leap 13.9 percent this year, the association said.

Sales of memory chips, the second largest semiconductor product segment, will be hurt the most this year, dropping 16.3 percent, while the largest product segment, logic chips, will climb 16 percent in sales, the group predicted.

#90269u2303 09/26/1990 ~United Press International

WASHINGTON (SEPT. 26) UPI - Iraq is likely to see severe food shortages by the end of the year, which will make food rationing and evasion of the world trade embargo key elements to its ability to get by, a report said Wednesday.

The report, written by the Library of Congress, cited a number of steps Iraq could take to substitute domestic production for the large volume of food it used to import. They include liquidation of livestock herds, making bread out of barley and eating more vegetables.

''Many (experts) anticipate that the population will be able to adjust its diet and, with smuggling that will likely occur, can get by,'' at least for a while, the report said.

''Successful rationing and embargo leakages are vital elements in the ability of Iraq to cope with the next six months.''

That period may be vital because it leads from this fall's vegetable harvest through winter and toward next spring's harvest of the fall- planted barley and wheat crops.

Most of the report was based on interviews with Agriculture Department officials.

Although the international embargo calls for a complete cut-off of trade, department analysts recently forecast Iraq would import 1.75 million metric tons of wheat, feed grains and rice, and 50,000 tons of soybean meal in the coming trade year. Some of the wheat may have arrived before the embargo took effect.

The projection is down by 1 million tons from an estimate in August and would

be only 35 percent of Iraq's imports in the preceding crop year.

Western analysts disagree over the amount of food on hand in Iraq when the embargo took effect. They generally agree Iraq had enough wheat for a few months, an ample supply of barley, from two to five months' worth of rice, and little sugar.

However, Iraq, the world's largest exporter of dates, could press its dates to extract a sweetener that could be used in place of sugar. Similarly, the report said potatoes could replace imported rice, vegetables could take a larger role in meals and fish could replace animal meat.

Agriculture Department economists ''expect drastic shortages by November or December,'' the report said. ''Extreme hardship will be apparent by the end of the year.''

With world wheat production at record levels this year, the report noted the potential for smuggling or for grain to slip through bordering nations and into Iraq.

#90269u2308 09/26/1990 ~United Press International
(SEPT. 26) UPI - There may be an end in sight to the 11-week-old standoff between Mohawk Indians and Canadian soldiers. Mohawk leaders say the tiny group of militant Mohawks holed up on a reserve near Montreal are ready to surrender. The process is expected to begin tomorrow morning. The dispute began in July when police stormed a barricade that the Indians had erected around land they claim as an ancient burial ground.

Three more potential jurors were rejected in Cincinnati today in the obscenity trial involving the Robert Mapplethorpe photographic exhibit. One young woman was the first prospective juror to say she had seen the exhibit last spring at the Cincinnati Contemporary Arts Center... which is on trial, along with its director. The woman said she would have NO problems seeing the photos. Prosecutors dismissed her.

Police in Auburn, Washington, say if toxicology tests are positive, charges are likely against a 14-year-old girl said to have been inspired by the movie ''Heathers'' to poison her playmates. Police reports say the girl fed rat poison and household cleanser to two friends to ''get even'' in a dispute. Neither victim was seriously hurt. The movie ''Heathers'' deals with a high school girl who turns murderous in competing with other girls for boys and social status.

Two more winners of Florida's 106-Million-dollar Lotto jackpot stepped forward today... leaving just one of the six winning tickets UNaccounted for. A farm family from rural Broward County claimed one ticket on behalf of a family

trust fund. ''Pete'' Beaty says they will keep farming ''until the money runs out.'' The other new winners are 10 members of a family pool that spent 200 dollars on tickets.

-30- 1882

#90269u2309 09/26/1990 ~United Press International

BOSTON (SEPT. 26) UPI - A man pleaded guilty Wednesday to charges he wreaked havoc aboard an airborne British Airways plane, assaulting some crew members and threatening to kill the captain, officials said.

John Holden, 32, of New Bedford, came close to shutting down an engine while the jet was 40,000 feet in the air at one point during the Nov. 29, 1989, incident, said U.S. Attorney Wayne Budd.

Holden pleaded guilty in U.S. District Court in Boston to charges stemming from the disturbance aboard British Airways Flight 215. The plane was carrying 221 passengers and 21 crew members to Boston from London's Heathrow Airport when the incident occurred, Budd said.

Prosecutors told Judge Joseph Tauro that Holden verbally, physically and sexually assaulted flight attendants aboard the jet and at one point entered the flight deck, threatening to kill the captain.

While on the flight deck, Holden came close to hitting the emergency lever that would have shut down the plane's engine while the aircraft was traveling at 40,000 feet, prosecutors said.

FBI agents arrested Holden when the plane landed safely at Boston's Logan International Airport.

Tauro ordered Holden to be held pending sentencing. The defendant faces a maximum sentence of 20 years in prison and $250,000 in fines.

#90269u2330 09/26/1990 ~United Press International

PAINESVILLE, Ohio (SEPT. 26) UPI - A jury voted Wednesday to spare the life of Damon Lundgren, convicted of helping his cult leader father slay a family that belonged to the cult and bury their bodies in the floor of a barn.

The seven-man, five-woman jury, recommended a sentence of life in prison with no parole for at least 20 years on each of four counts of aggravated murder, the lightest possible sentence possible.

Lundgren was convicted of helping his father kill Dennis Avery and his three young daughters in April, 1989. Avery's wife Cheryl also was slain, but the younger Lundgren was not charged in her death.

A separate jury last week recommended the electric chair for Jeffery Don Lundgren, the cult leader who ordered the killings.

The younger Lundgren, 19, sighed quietly when his sentence was read. Lundgren earlier wrung his hands as the jury filed into the courtroom to announce its decision.

Common Pleas Judge Paul Mitrovich said he would rule on the jury's recommendation Oct. 5 and prosecutors said they would request the sentences on four counts of aggravated murder be consecutive, so Lundgren would not be eligible for parole for 80 years.

Special Prosecutor Joseph Gurley said he was disappointed the jury did not vote for the death penalty. ''Our main goal was to make sure this fellow would not be a threat to society,'' he said.

In his closing argument, defense lawyer Charles Cichocki repeated defense contentions that Damon was under his father's influence.

Jeffrey Don Lundgren, once a lay minister for Reorganized Church of Jesus Christ of Latter Day Saints, was thrown out of church when he started reinterpreting biblical passages.

His wife Alice has been sentenced to five consecutive life terms for her part in the killings. Trials are pending for two other cult members.

-30- 2038

#90269u2369 09/26/1990 ~United Press International

CHICAGO (SEPT. 26) UPI - Moving to quell energy jitters, President Bush said Wednesday he would authorize a test sale of 5 million barrels of oil from the nation's strategic reserve of 590 million barrels.

The president also said he was taking the action in response to oil price gouging in the wake of Iraq's Aug. 2 invasion of Kuwait, which has sent shock waves through the world's oil markets.

''While the oil market is very tight, with little spare capacity, there is sufficient oil to meet current needs,'' Bush said in remarks prepared for delivery to a GOP fund-raiser in Chicago.

''The oil market has simply not taken into account the additional production coming on stream from a variety of sources nor the available commercial stocks '' Bush said. ''There is no justification for intensive and unwarranted speculation in oil futures.''

White House press secretary Marlin Fitzwater said the primary motivation for

Bush's action is concern over possible shortages of heating oil in the fourth quarter. ''We do anticipate that there could be shortages and we could need to rely on the SPR in a more permanent fashion,'' Fitzwater said.

Bush acted as pressure mounted in Congress to draw on the 590 million-barrel reserve now to calm oil markets before the Persian Gulf crisis leads to an actual energy shortage.

His decision also comes two days before the scheduled Paris meeting of the International Energy Agency, which is expected to discuss the possibility of a coordinated ''draw-down'' of strategic reserves by the United States and other industrialized nations, such as Germany and Japan.

Bush signaled his willingness to work with the agency, saying, ''Should the oil situation deteriorate, the United States, in concert with our partners in the International Energy Agency, is prepared to bring additional oil to the market. We must make sure that we can act quickly, if necessary.''

Bush, who signed legislation Sept. 15 giving him wider latitude to order emergency oil supplies drawn from the reserve, had been reluctant to make such a move absent a demonstrable shortage in commercial petroleum stocks.

Recent oil price spikes, accompanied by rising retail gasoline prices and home heating fuel, have been attributed more to market speculation than to actual shortages since Iraq's invasion of Kuwait. That situation has irritated Bush, a former Texas oilman.

''Today, it's especially important that America is economically healhty and militarily strong,'' Bush said. ''At home and abroad, let me caution those who might take advantage of the current crisis in the Persian Gulf, those who might seek profit by subverting the sanctions, or here at home, those speculators who might try to drive up the price of oil.''

Some energy analysts have suggested a modest release of oil from the strategic reserve would dampen speculation and prevent catastrophic price increases that would likely follow a severe disruption in supplies.

Following that logic, Bush Wednesday ordered the Energy Department to release 5 million barrels of oil from the reserve under ''test draw- down'' powers authorized by Congress, and sell it on the market to the highest bidder.

Rep. Philip Sharp, D-Ind., chairman of the House subcommittee on energy and powwer, called for a test draw-down in a letter sent last Tuesday to Energy Secretary James Watkins.

The strategic petroleum reserve was created in 1975 following the Arab oil embargo to ensure the United States a supply of oil in the event of an energy crisis caused by events overseas, natural disasters or acts of sabotage. It

has never been tapped.

The law reauthorizing the reserve expands the president's discretion to draw on it under a less severe circumstance ''that constitutes, or is likely to become, a domestic energy supply shortge of significant scope or duration.''

Oil for the reserve is stored in salt caverns along the Gulf Coast of Texas and Louisiana.

Under the terms of a test sale, there will be a notice that the oil is for sale, bids will be received, winning bids will be announced and then the oil will be delivered. The sale process takes as little as 15 days, with delivery in about 30 to 60 days.

''We want to make it clear to those speculators that we do have oil to put on the market,'' Fitzwater said. ''The purpose here is to be ready for shortages. It is a decision that the president came to reluctantly. Prudence indicated we get ready for some shortage in the fourth quarter.''

-30- 4772

#90269u2383 09/26/1990 ~United Press International

KINGSTON, MA (SEPT. 26) UPI - The next-door neighbor of a missing teenager, whose disappearance 11 days ago sparked a massive search, was charged with the girl's murder Wednesday, 90 minutes after police found a body buried in his basement.

The body had not been publicly identified and was ''not completely exhumed'' by Wednesday evening, but police said it was found in the basement of the home where the suspect, 52-year-old Henry Meinholz, lived.

''The identity of the body has not been established,'' said Plymouth County District Attorney William O'Malley, adding identification was being delayed ''because of the need to take care to preserve anything of evidentiary value.''

''At this time, we are going to await an order from the court which is in the process of being sought. When that is received, the body will be exhumed to identify (it),'' O'Malley said.

Despite the lack of positive identification, O'Malley said Meinholz was charged with the murder of 13-year-old Melissa Benoit, who lived with her mother one door down from his home on Main Street in Kingston, a quiet community of 4,300 residents 30 miles southeast of Boston.

Benoit, a soft-spoken eighth-grader, disappeared Sept. 15 after spending the afternoon watching television at another neighbor's house. She reportedly left that house, located 50 feet from her own, to visit the grave of her father, who died one year ago last week.

The disappearance was brought to a national audience Friday evening when Benoit's mother, Dianne Richard, appealed for her daughter's return on the television program ''America's Most Wanted.''

The case, which also sparked a massive search of southeastern Massachusetts involving self-described psychics and some 200 volunteers, began to break Wednesday afternoon.

Witnesses said a state police trooper with a search dog entered the Meinholz home twice, for five minutes each time, beginning about 2:30 p.m., emerging the second time visibly shaken. She was consoled by a fellow trooper.

Later in the day, investigators gathered at the house and Meinholz was reportedly questioned inside.

Police declined to say what led them to Meinholz's house, but said the psychics played no role in Wednesday's discovery.

#90269u2385 09/26/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - Adequate supplies of natural gas should be available to meet consumer demand this winter, but there could be isolated problems in some areas for short periods of time, the American Gas Association said Wednesday.

In a study assessing the natural gas outlook, the association also said about half the local gas distribution companies surveyed believed they would have to pay at least 6 percent more for supplies bought on the spot market in January 1991 than they did in the 1989-1990 winter.

However, association officials said it was unlikely consumers would see price hikes of that magnitude because the impact of spot purchases would be cushioned by cheaper gas from storage and other sources.

On a national average basis, the report said gas suppliers could meet expected demand, even if January 1991 is the coldest month in 50 years.

However, the report added: ''Transportation bottlenecks and sharp swings in gas demand associated with cold weather are likely to lead to price volatility on the spot market. During short periods in localized areas, this could even result in physical delivery constraints on receipt of gas.''

The report said there were some short-term supply problems last December due to rapid growth in natural gas demand in certain areas of the country, weather-related problems with Gulf of Mexico supplies and the failure to add planned pipeline capacity.

But it said the industry had addressed those problems by improving system flexibility, instrumentation and monitoring.

The report is based on survey responses from 69 local distribution companies, 23 pipeline companies and producers accounting for one-sixth of the nation's natural gas production.

The report also concluded:

-Natural gas from storage, from spot market sales and from new, longer-term contracts will supply 44 percent of local distribution company requirements.

-Pipeline ''system supply,'' or natural gas actually sold to a customer by a pipeline company, is expected to supply 56 percent of local distribution company needs in January 1991, compared with approximately 83 percent in January 1980.

-Peak supply capability for January 1991 is projected to be 2.45 billion cubic feet. This compares with the maximum monthly consumption of natural gas ever recorded, which was 2.4 billion cubic feet in January 1979.

#90269u2422 09/26/1990 ~United Press International

LOS ANGELES (SEPT. 26) UPI - The Motion Picture Association of America, responding to heavy criticism over its X movie rating category, scrapped the X Wednesday in favor of a ''NC-17'' designation for non-pornographic adult-oriented films.

Films rated NC-17 will be off limits to children under 17.

The change, which had been widely anticipated in some form, is designed to differentiate adult-oriented films from hard-core porn. Sex films have become synomous with the X rating under the MPAA's 22-year- old voluntary rating system.

''We believe that changing the name to 'NC-17 - No Children Under 17 Admitted' will restore this category to its original design,'' said Jack Valenti, president of the trade group.

To receive the NC-17 rating, a movie would have to be copyrighted by the MPAA, as are films given the G, PG or R rating. Despite the change, producers of hard-core porn films can continue to use the X rating for their non-copyrighted movies.

In two lawsuits this year and an ongoing debate, film producers had challenged the MPAA's X rating of such recent films as ''Tie Me Up! Tie Me Down!'' and

''The Cook, the Thief, His Wife & Her Lover.''

Many theater chains refuse to book X-rated films, while many newspapers and television stations won't accept advertising for such movies.

''I think that the hard-core producers will hold on to the X rating - they've already made that their eminent domain,'' producer Jack Haley Jr. said in an interview. ''But some major films (rated NC-17) will have a good shot at being advertised and played in theaters that would not accept an X movie.''

Major studios have not released an X-rated film in more than a decade.

Filmmakers say that, because of the X rating, they have been put in the position of either editing their movies to achieve an R rating - meaning restricted and requiring that children under 17 be accompanied by an adult - or hoping that the film would generate interest through word-of-mouth and attract audiences despite getting an X rating.

Earlier this year, independent studio Miramax sued the MPAA after it was unsuccessful in its appeal to overturn an X rating for ''Tie Me Up! Tie Me Down!'' A federal judge in New York upheld the rating, but blasted the system as ''an effective form of censorship.''

Valenti made the announcement in New York along with officials of the National Association of Theater Owners.

''We have concluded that over the years some people have come to endow the X film rating with a meaning it does not have, never has had, and was not intended by founders of the rating program,'' Valenti said.

''It is our objective that this 'No Children Under 17 Admitted' category return (the X rating) to its original intent, which simply meant that this was a film which most parents would choose to have off limits to their youngsters under 17 years of age.''

Shortly after the announcement, Universal Pictures said that it plans to release Philip Kaufman's ''Henry & June'' on Oct. 5 as the first film to carry the NC-17 rating.

The film, which is about author Henry Miller's relationship with his wife June and their affairs with writer Anais Nin had received an X rating from the MPAA and was due for a showdown Oct. 3 before the group's appeal board.

''I am happy that 'Henry & June' has served as a catalyst for this particular change to the rating system,'' said Tom Pollock, chairman of the MCA Motion Picture Group. ''Henry Miller stood for freedom of expression and waged a life-long battle against literary censorship.''

Valenti also announced that the MPAA will begin to release brief explanations as to why a film received an R rating.

The Writers Guild of America West issued a statement endorsing the new rating and the expanded action on R-rated films, saying that the announcement ''addresses and enhances the primary purpose of the system which is to effectively guide parents.''

Chuck Warn, spokesman for the Directors Guild of America, said the group endorsed the change. ''We can only wait and see how it works as a way of extending creative freedom of directors.''

The announcement also officially brushes aside a proposal from a blue-ribbon group of directors, who had asked this summer that a new rating, such as ''A'' for adults only, be created specifically for non- pornographic films.

''It's nice that they've gotten rid of the X, but it will only be a matter of time before some hard-core pornographic film gets an NC-17,'' said Mark Lipsky president of Silverlight Entertainment, which distributed the film ''Life is Cheap ... But Toilet Paper is Expensive.'' The movie also received an X rating from the MPAA this year.

#90269u2570 09/26/1990 ~United Press International

(SEPT. 26) UPI - Secretary of State Baker describes as ''repugnant'' Iraq's demand today for a list of personnel in the U-S Embassy in Baghdad. He says the Bush administration will NOT comply. Baghdad warns that NON-diplomats sheltered at the mission are guilty of spying and could face death.

In response to oil price gouging following Iraq's invasion of Kuwait, President Bush announced tonight in Chicago that he'll authorize a test sale of five-Million barrels of oil from the nation's strategic petroleum reserve.

Earlier, G-O-P lawmakers said President Bush may yield on his demand for a capital gains tax cut in order to reach agreement on budget reductions. But House Budget Committee Chairman Leon Panetta says as of tonight, Republicans had NOT offered a budget plan without a capital gains cut. The California Democrat says- ''We've gone beyond economics, this is religion.''

The federal government's 20-year-old family planning program was dealt a severe blow today when the Senate refused to kill a filibuster blocking passage of a five-year extension. The action means the bill is now UNlikley to come up for a vote until next year.

President Bush today proposed a compromise in hopes of speeding final passage of clean air legislation. In a letter to Congress, Bush identified what he felt were the ''best features'' of the House-passed and Senate-passed bills

and asked negotiators to roll them into one for his signature.

The 11-week standoff between militant Mohawks and the Canadian army seems to have ended. Without notice, the Indians tonight left the drug and detoxification center where they had been holed up near Montreal. The dispute involved land the tribe claimed was an ancient burial ground.

A man carrying a high-powered rifle chased a woman believed to be his wife into a McDonald's in Hamilton, Ontario, today and held 12 employees hostage. Police say the nearly four-hour standoff ended when the gunman killed himself.

#90269u2571 09/26/1990 ~United Press International

(SEPT. 26) UPI - A jury in Painesville, Ohio, today voted to spare the life of convicted killer Damon Lundgren and instead recommended that he be sentenced to life in prison. The 19-year-old Lundgren was convicted of helping his cult leader father kill a family of five last year.

A judge in Santa Monica, California, today refused to reduce the charges against the son of Oscar-winning actor Marlon Brando from murder to manslaughter. Christian Brando is charged in the May shooting death of his pregnant half-sister's boyfriend.

The disappearance of a suburban Boston teen-ager whose mother pleaded for her return Friday on the television program ''America's Most Wanted'' apparently has been solved. Police in Kingston, Massachusetts, tonight charged the girl's neighbor with murder after a body was found buried in his basement.

Authorities in Tucson, Arizona, say a malamute dog... a pet described as protective of a four-week-old girl... killed the baby this morning- apparently while the family slept. Police say the dog will be destroyed.

Police in Seguin, Texas, say a man who became upset after losing custody of his two children and then losing his job shot and seriously wounded two lawyers from the firm that represented his children in court. 34-year-old Albert DeLeon was arrested shortly after the shooting.

Health officials in New Brunswick, New Jersey, say Monday's Lyme disease-caused death of an 11-year-old girl may be the nation's first reported case of a fatality caused by the tick-borne illness.

#90269u2680 09/26/1990 ~United Press International

(SEPT. 26) UPI - Secretary of State Baker calls it ''repugnant'' and says the Bush administration will NOT comply with an Iraqi demand that it hand over a list of personnel in the U-S Embassy in Baghdad. State Department officials

say Iraq also warned that NON-diplomats sheltered in the embassy are- in Baghdad's eyes- guilty of espionage and could face a penalty of death.

President Bush says he will O-K a test sale of five-Million barrels of oil from the nation's strategic reserve of 590-Million barrels. Bush says he's responding to the oil price gouging that followed Iraq's invasion of Kuwait. Bush's move comes amid mounting pressure in Congress to draw on the reserve to calm oil markets before an energy shortage really happens.

The head of the Environmental Protection Agency today announced a crash program to cut the most dangerous toxic discharges. E-P-A Administrator William Reilly called for reducing those chemicals by more than half within five years. In a major policy speech at the National Press Club in Washington, Reilly called for focusing clean-ups on the worst health and ecological risks.

The State Department says talks with Peru over proposed military aid to fight drug trafficking have collapsed. The aid was part of an anti- drug agreement that President Bush signed with much fanfare at Cartagena , Colombia, last February. Peru wants part of the money to help farmers grow crops other than those used for cocaine. But U-S negotiators say money canNOT be put into areas controlled by drug traffickers.

#90269u2683 09/26/1990 ~United Press International

LOS ANGELES (SEPT. 27) UPI - MCA Inc. stockholders sued the entertainment giant Wednesday, claiming the reported $7.5 billion acquisition offer from Japan's Matsushita Electric Industrial Co. is not high enough.

In the Superior Court lawsuit against MCA and its officials, shareholders assert that MCA Chairman Lew Wasserman, Chief Operating Officer Sidney Sheinberg and others have negotiated the Matsushita takeover as part of a ''scheme'' to retain control of the company.

The suit accuses Wasserman and the others of ''negotiating on a preferential basis with Matsushita and failing to implement the auction or other bidding mechanisms'' to maximize the stockholder interests.

The suit claims the proposed buyout by Matsushita, one of the world's largest electronics manufacturers, means MCA's outstanding shares will be sold ''at a price substantially below their fair and intrinsic value.''

MCA's asset value has been estimated in the range of $80 to $90 a share, but, before news of the potential buyout, its stock suffered a decline in market value this year that the suit said was caused by the company's expansion plan.

Besides the movie studio, the company owns theme parks in Los Angeles and Orlando, Fla., several record companies, television station WWOR in Seacaucus,

N.J., Putnam Publishing Group and a 49 percent stake in the Cineplex Odeon movie theater chain.

The suit claims that, given those assets, the decline in stock value is reversible and that MCA's shares should be sold at higher prices than ''Matsushita reportedly is willing to pay.''

MCA on Tuesday confirmed it was holding acquisition talks, but declined to name a potential buyer. The report of a possible buyout prompted an immediate 57 percent jump in the stock's market value.

The announcement was the first time MCA, which is the parent of Universal Studios and generated nearly $3.4 billion in revenues last year, admitted it was in acquisition talks.

MCA stock was the second most active on the New York Stock Exchange Wednesday, closing up 7 1/4 points to 61 1/4 on trading of more than 1.8 million shares.

MCA issued a statement that said: ''In light of the unusual market activity in MCA Inc. stock just prior to the close of trading, the New York Stock Exchange contacted the company and requested that the company issue a public statement indicating whether there are any corporate developments which may explain the unusual activity.

''As MCA has previously stated, discussions with a major international company regarding a possible negotiated acquisition of MCA are continuing on a friendly basis. No agreement has been reached. There is no assurance that an agrement will be reached.''

Despite rumors that the 77-year-old Wasserman may be looking to get out of the business, the suit claims Matsushita has ''expressed a firm desire'' to retain MCA's current management.

Wasserman, who helped build MCA from a small booking agency, owns a 7 percent stake, while other directors control about 11 percent.

The suit seeks a court order for MCA to cooperate with other potential buyers who would maximize shareholders' interests and to eliminate any potential conflict of interest in MCA officials' negotitions of a buyout that would enable them to retain control of the company.

The suit also seeks unspecified potential damages in the event of a takeover.

Investors recently have been less than pleased with the performance of the company's $650 million Florida theme park, where rides have broken down. Some believe MCA paid too much in its $550 million deal for Geffen Records this year.

MCA's acquisition several years ago of an interest in the Cineplex Odeon chain has not turned out well, largely because of the Canadian company's huge debt load.

MCA's earnings for the first six months of this year were $76.4 million on revenues of $1.86 billion, up from earnings of $69.3 million on revenues of $1.53 billion for the year-ago period.

#90269u2696 09/26/1990 ~United Press International

(SEPT. 26) UPI - German officials are planning a unification party, but fear it might be crashed. Police say they think riots by radical youths in Berlin on Sunday were a ''dress rehearsal'' for a major riot at the unification celebration next Wednesday. An announcement in a leftist West Berlin daily this week urged demonstrators to gather that night for a demonstration under the motto- ''Shut-up Germany.''

Next month, American film lovers will have a new rating to contend with- ''N-C-17.'' The Motion Picture Association of America today responded to criticism of its rating category by scrapping the ''X'' rating and leaving it for porn movies. The rating will be replaced with ''N-C-17''- meaning NO children under 17. The rating is designed for NON-pornographic adult-oriented movies.

A critically burned eight-year-old Soviet boy is hospitalized in Anchorage, Alaska, where doctors hope to stabilize him before a 10-hour plane trip to Galveston, Texas. Doctors say the medical evacuation is the first from the Soviet Far East to the United States. The child- who was injured while playing with gasoline near a fireplace last week- was flown to the United States because the closest Soviet burn center was farther away than American help.

Congress may be on the verge of authorizing new designs for U-S coins and picking up some extra revenue in the process. Legislation is pending to approve a new quarter commemorating the bicentennial of the Constitution. New tail sides for the half dollar, nickel, dime and penny would also be phased in. Officials say new coin designs would bring in as much as one-BILLION dollars for the U-S Treasury.

#90270b0003 09/27/1990 ~Business Wire

EL SEGUNDO, CA (SEPT. 27) BUSINESS WIRE - International Rectifier Corp. (NYSE/PSE:IRF) Thursday announced the issuance on Sept. 25, 1990 of a U.S. patent that provides additional broad protection for its power MOSFET and IGBT power transistor technologies.

U.S. Patent 4,959,699 covers all cellular structures for power MOSFETs (Metal

Oxide Silicon Field Effect Transistors) and IGBTs (Insulated Gate Bipolar Transistors).

According to Dr. Alexander Lidow, president of IR's Electronic Products division, ''This one casts a long shadow, because we believe that virtually every power MOSFET and IGBT on the market uses the structure protected by this patent.''

IR's other major power MOSFET patents cover basic elements of device design, structure, and processing. International Rectifier has been granted more than 30 power MOSFET patents throughout the industrialized world, and additional patent applications are pending.

In April 1990, a Federal District Court in Los Angeles held five of IR's key power MOSFET patents valid and infringed by Siliconix Inc.

To date, five manufacturers have taken royalty-bearing licenses under the company's previously-issued power MOSFET patents: Hitachi, Toshiba, Matsushita, Siliconix, and Unitrode.

Introduced to the market in the late 1970s, IR's HEXFET (R) brand pioneered the commercial use of power MOSFETs and continues to lead that fast-growing market.

Penetration of the available $2 billion power transistor market by power MOSFETs is rising steadily, from 20 percent in June 1988 to 28 percent in June 1990, according to reported industry statistics.

Power MOSFETs are displacing bipolar power transistors and creating new applications in a wide range of motor control and power switching functions. Key market segments include industrial controls, computers/peripherals, automotive, aerospace/defense, telecommunications, appliances, and consumer electronics.

International Rectifier is a major worldwide supplier of power semiconductors and the international leader in power MOSFETs with its HEXFET line.

HONG KONG (SEPT. 27) BUSINESS WIRE - All Market Data Ltd., a wholly owned subsidiary of All Quotes Data Ltd. (VSE:AQD), is marketing a new financial information service in Hong Kong and has received an enthusiastic response from customers with orders nearing 100 units in just six weeks since the start of operations.

The company provides ''real-time'' stock, option and commodity trading information from the Hong Kong and North American exchanges. For a low monthly fee, an investor is provided with the computer hardware and program designed to access the data. The cost is 10 percent of the next lowest price service, and can be operated through a regular telephone line.

The All Market Data system is designed for individual investors who wish to have access to such information at home or office for their own personal use. All Market Data also sees hotels and clubs as potential users of the service and plans to expand to markets outside of Hong Kong in future.

The unit is able to access data from the following stock exchanges: Hong Kong, New York, Toronto, Vancouver, American, Montreal, Alberta, Pacific, Boston, Philadelphia and NASDAQ. Similarly, quotations can be accessed from the Chicago Board of Trade, Chicago Mercantile Exchange, Coffee Sugar & Cocoa Futures Exchange, Cotton Exchange and the New York Mercantile Exchange.

Supplementing the major exchanges, trading data from the Boston, Cincinnati, Midwest and Philadelphia exchanges is also provided.

All Market Data is a wholly owned subsidiary of All Quotes Data Ltd., a public company listed on the Vancouver Stock Exchange. AQD is owned (70 percent) and controlled by All Quotes Inc., a Delaware, U.S.A. public corporation quoted (OTC:ALQT).

SAN FRANCISCO (SEPT. 27) BUSINESS WIRE - Seishichi Itoh, 55, has announced that he will resign as president, chief executive officer and a director of Union Bank at the bank's October 24 board meeting.

It is expected that Taisuke Shimizu, 54, vice chairman and chief financial officer, will be elected at the same meeting to replace him.

Itoh plans to return to Japan for reassignment with The Bank of Tokyo, Ltd., which owns 77 percent of Union Bank's stock.

Jiro Ishizaka, 62, will continue as Union Bank's chairman, a position to which he was elected in September 1989. He is based in Los Angeles.

Also at the October 24 board meeting, it is expected that Kanetaka Yoshida, 52 will be elected to replace Shimizu as vice chairman and chief financial officer. He was elected to the position of executive vice president at the

board meeting on September 26.

Itoh began his banking career with The Bank of Tokyo, Ltd., in 1957 following his graduation from Osaka University. He came to California in 1972 to serve with The Bank of Tokyo of California, San Francisco, coordinating its 1975 merger with Southern California First National Bank. The resulting institution was named California First Bank. He returned to the Bank of Tokyo in Japan in 1976 and subsequently rejoined California First in 1983 as executive vice president, chief financial officer and head of the administration group.

Itoh became president and chief executive officer in 1985. He was largely responsible for the 1988 acquisition of the former Union Bank, Los Angeles, by California First Bank and, for the past two years, has presided over the merger of the two banks into today's Union Bank.

Shimizu, who is currently also a director of Union Bank, was a key member of the management team that oversaw the acquisition and merger.

Shimizu joined The Bank of Tokyo, Ltd., in 1959. He served as deputy general manager of the systems and methods division from 1977 to 1979, deputy general manager of the Brussels office from 1980 to 1982 and general manager of the Brussels office from 1982 to 1984. He was general manager of the Europe and Africa division in 1984 and 1985.

Union Bank, headquartered in San Francisco, has 177 offices throughout the state and five overseas facilities. It is the state's fifth largest commercial bank with $16 billion in assets.

DENVER (SEPT. 27) BUSINESS WIRE - Chemex Pharmaceuticals Inc. announced Thursday that its stockholders approved the sale of the company's proprietary product ACTINEX(R), a topical application of nordihydroguaiaretic acid (NDGA) for the treatment of actinic keratoses, to Block Drug Co. Inc. at its annual stockholders meeting on Sept. 26, 1990.

The sale transaction will provide up to a total $10 million to Chemex over the next three years. This cash infusion will allow the company to move forward with the development of other interesting compounds for which investigational new drug applications have been filed.

The agreement with Block Drug Co. also provides for the payment of royalties

on worldwide sales of Actinex after sales have reached a certain level.

At its meeting, Sept. 25, 1990, the board of directors elected Dr. Atul Khandwala executive vice president-research & development. During the past four years Khandwala has served the company in various research capacities.

Prior to joining Chemex he served on the faculty of the Yale University Department of Biochemistry and as the director of biochemistry at Revlon Health Care Group.

Chemex (NASDAQ:CHMX, temporarily trading under the symbol CHMXC) is an emerging pharmaceutical company engaged in the development of ethical drugs for the treatment of skin diseases and disorders.

SAN JOSE, CA (SEPT. 27) BUSINESS WIRE - In order to better serve its large Spanish-speaking clientele, Pacific Western Bank Thursday announced it has become the first local community bank in the state to offer system-wide automated teller machines with instructions in Spanish.

The bank currently offers a Spanish option at 20 of its 39 existing machines, with the remainder to be added by November.

Pacific Western, which operates 28 locations in Santa Clara, Santa Cruz and Monterey Counties has Spanish-speaking employees at almost every office.

''We are pleased to be the leader in introducing this important new service,'' said Phillip R. Boyce, chairman and chief executive officer of Pacific Western Bank. ''Our Spanish-speaking customers will now be able to make deposits and withdrawals 24 hours a day, seven days a week.''

''Pacific Western's customers closely parallel the large Hispanic population throughout our three county area,'' said Boyce. ''In Monterey County, for example, Hispanics make up more than 31 percent of the total population.''

Headquartered in San Jose, Pacific Western Bank is one of two major independent banks in Northern California. With $1.3 billion in assets, Pacific Western Bank is a subsidiary of Pacific Western Bancshares Inc., a bank holding company also based in San Jose.

LOS ANGELES (SEPT. 27) BUSINESS WIRE - The Santa Anita Companies, consisting of Santa Anita Realty Enterprises Inc. and Santa Anita Operating Co. (NYSE:SAR), Thursday announced that their boards of directors have amended the terms of The Companies' dividend reinvestment plan.

The amended terms will give The Companies latitude to direct purchase of shares on the open market for distribution to the plan's participants when it is in the best interest of The Companies and their shareholders to do so. Previously, the plan's needs were fulfilled solely with shares newly issued by The Companies.

Royce B. McKinley, chairman and chief executive officer of Santa Anita Realty, stated, ''The boards' action to amend the terms of the plan reflects the view that our shares represent an extremely attractive value at current reduced prices and that the share price is at an undesirable level at which to issue new shares.''

He noted that, in recent quarters, approximately 33,000 shares per quarter have been distributed to shareholders through the plan.

McKinley said plan participants will continue to receive a 5 percent discount from the current market price on shares purchased with reinvested dividends regardless of whether such purchases are made through issuance of new shares or through open-market purchase.

However, when shares are purchased on the open market in connection with either dividend reinvestments or optional cash payments for purchase of additional shares, participants will be charged brokerage commissions. McKinley noted that the charging of brokerage commissions on open-market purchases was made necessary by interpretations of the Internal Revenue Service applicable to real estate investment trusts.

The Santa Anita Companies comprise Santa Anita Realty Enterprises Inc. and Santa Anita Operating Co. The shares of the two Santa Anita companies trade on a ''paired'' basis on the New York Stock Exchange under the symbol SAR.

Santa Anita Realty Enterprises Inc., one of the nation's leading real estate investment trusts, owns the Santa Anita racetrack property, a 50 percent interest in the operation of Santa Anita Fashion Park and a 32.5 percent interest in Towson Town Center (major regional shopping centers), a number of neighborhood shopping centers and interests in an industrial park, three apartment projects and three office buildings.

Santa Anita Operating Co. conducts thoroughbred horse racing at Santa Anita Park through its subsidiary, the Los Angeles Turf Club Inc.

HOUSTON (SEPT. 27) BUSINESS WIRE - Bellwether Exploration Co. (NASDAQ:BELW) has reported earnings of $503,952 or 3 cents per share for the fiscal year ended June 30, 1990, a 21 percent increase over earnings of $416,121 or 2 cents per share for the fiscal year ended June 30, 1989.

Revenues for the fiscal year ended June 30, 1990 were $3,281,044 compared to revenues of $2,911,551 for the fiscal year ended June 30, 1989.

Bellwether also reported increases in its proved reserves at June 30, 1990:

	June 30,		
	1990	1989	Increase
Oil Reserves-Bbls	610,000	597,000	2 perc.
Gas Reserves-MCF	8,693,000	6,493,000	34 perc.
Present value of future net revenues based on SEC guidelines	$9,899,000	$9,218,000	7 perc.

The increases in earnings and revenues are primarily due to the acquisitions completed during fiscal 1989, the acquisitions completed in January and March 1990 and a 15 percent increase (up to $18.77 per barrel) in the company's average oil sales price during fiscal 1990.

The increases in reserves and present value were primarily the result of the recompletion in August 1990 of the Ledet No. 4 well in the Melodia Field, Lafourche Parish, La., one of the three producing gas wells acquired in March 1990 and the completion of the Steen Mixon No. 1, an exploratory well drilled on the Runge Prospect, Karnes County, Texas in June 1990.

The increase in present value was accomplished despite a 12 percent decrease (down to $17.15 per barrel) in the oil price which was used pursuant to SEC guidelines.

Bellwether Exploration Co., headquartered in Houston, is engaged in oil and gas exploration and development, and the acquisition of producing properties in the United States.

#90270b0073 09/27/1990 ~Business Wire

RANCHO SANTA MARGARITA, CALIF. (SEPT. 27) BUSINESS WIRE - Airline passengers may soon be able to watch movies on a personal video screen directly in front of them, order in-flight merchandise with a credit card from shopping channels on their personal screen, and make telephone calls directly from their seats.

Additional features such as real-time stock market reports and up-to-the-minute news highlights, including the latest sports scores, will also be available -- delivered by satellite directly to aircraft in flight.

These, and other features, are part of a combined cabin communications and passenger entertainment system being proposed for two new jetliners.

Sony Trans Com Inc., Hughes Aircraft Company's microelectronic systems division and Avicom International, a Hughes subsidiary, have formed a team to provide a completely integrated cabin entertainment and communications network for the new Airbus A330 and A340 aircraft.

The Sony Trans Com-Hughes/Avicom team has submitted a proposal to Airbus Industrie, the European aircraft manufacturing consortium, to qualify as a supplier of the in-flight entertainment and information system. This will enable the airline customers of Airbus to specify this new cabin communications system for their A330 or A340 aircraft.

Under terms of the teaming agreement signed this month, Sony Trans Com and Hughes/Avicom are combining their respective capabilities in producing in-flight entertainment, cabin management and service systems with new interactive communications functions to offer passengers on the new Airbus aircraft a wide range of services not presently available.

In addition, the existing worldwide service network of the team members will be available to provide complete support for the new system.

Sony Trans Com has supplied state-of-the-art on-board video and audio systems and programming services for a majority of the world's airlines for the past 20 years. The firm recently introduced innovative rear-screen projection systems and flat-screen television for aircraft application.

Avicom International, which was acquired by Hughes earlier this year, has specialized in in-flight interactive cabin management, video and audio equipment and programming services for over 25 years. Hughes' microelectronic systems division has been a major supplier of passenger entertainment and service systems since the advent of the widebody jetliner more than two decades ago.

These systems, using complex multiplexing techniques, have been sold both to aircraft manufacturers and to airline operators worldwide.

Sony Trans Com, based in Irvine, Calif., is a subsidiary of Sony Corp. of America. Hughes Aircraft is a unit of GM Hughes Electronics.

PALO ALTO, CA (SEPT. 27) BUSINESS WIRE - Hewlett-Packard Co. has signed a definitive agreement with the Ministry of Machinery and Electronics Industry (MMEI) in the People's Republic of China to jointly create and invest in Huapu Information Technology Co. Ltd. for the purpose of manufacturing workstations and developing software.

Financial terms of the agreement were not released.

Huapu will assemble and market HP's newest line of workstations, the HP Apollo 9000 Series 400, for the Chinese domestic market. In addition, it will develop software for use in computer-aided engineering and manufacturing for domestic and export markets. The company, to be based in Shanghai, is expected to begin operations by the end of the year.

Huapu, which is the only high-tech joint venture in China established to make workstations, is part of the government's long- range plan to develop the Chinese economy and to expand its computer industry. It is part of the Shanghai East-China Computer Corp., which is operated by MMEI.

The joint venture initially will employ 70 people -- all of them local -- about 40 of whom will work in software development. The remaining 30 will work in localization (adapting products to accommodate local languages), testing, assembly, installation and training.

Huapu is HP's second joint venture in China. The first, China Hewlett-Packard was established in 1984 when HP joined with China Electronics Import & Export Corp. to make analytical products, assemble HP 3000 minicomputers and operate a sales and service office. This operation employs about 350 people in Beijing, Shenzhen and Shanghai.

Shanghai East-China Computer Corp., established under MMEI in 1958, is a research institute that focuses on the research and development of large- and

medium-scale general-purpose computers, aerospace computers and special microcomputer systems, as well as computer software, networks and computer-aided design products. It has 1,400 employees and is regarded as the research base of computer science in South China.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 92,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

WINTERSBURG, ARIZ. (SEPT. 27) BUSINESS WIRE - The Nuclear Regulatory Commission (NRC) has proposed a $75,000 civil penalty against the Palo Verde Nuclear Generating Station for two apparent violations of NRC regulations.

The apparent violations stem from an NRC inspection and Palo Verde's assessment of the licensed operator medical examination program. Under that program, licensed operators are required to remain fully medically qualified for their duties, and to have a complete and documented medical examination biannually.

Palo Verde management notified the NRC of irregularities in the program in July, and a subsequent NRC inspection was conducted during July and August.

According to the NRC, the apparent violations involved ''(1) a failure to notify the NRC regarding licensed operators who had developed potentially incapacitating medical conditions; and (2) inaccurate certification to the NRC that candidates for operator licenses had received complete medical examinations.'' The apparent violations occurred between May 1987 and August 1990.

Palo Verde management, however, maintains that safe operation of the plant was not affected by the failure to meet these administrative requirements.

The NRC notice of violation also stated that Palo Verde management has since ''defined and implemented a medical records control program, which should provide a comprehensive system to effectively manage medical records for licensed operators'' in the future. However, the NRC stated that an independent, comprehensive review of the program should be conducted. A date for that review will be established in the near future.

Palo Verde management is studying the NRC notice of violation and has 30 days in which to respond.

DALLAS (SEPT. 27) BUSINESS WIRE - Oryx Energy Co. Thursday announced the sale of two of its producing fields to Union Pacific Resources Co. for approximately $109 million.

''This is part of our strategy to divest certain oil and gas properties and use the net proceeds for repayments on our debt. This sale should generate net proceeds of $74 million that will be applied to the debt and an after-tax gain of $45 million,'' said James E. McCormick, president and chief operating officer of Oryx Energy.

Oryx Energy will sell its interest in the Carthage Field in East Texas and the Echo Springs Field in Wyoming. Year-to-date through August, the two fields have combined daily production of more than 20 million cubic feet of gas and 300 barrels of liquids. About 2 percent of Oryx Energy's proved reserves are involved in the sale. Closing is scheduled for mid-to-late October.

Dallas-based Oryx Energy Co. is the largest independent oil and gas company in the world, with assets in excess of $5 billion and proved reserves of more than one billion equivalent barrels. Oryx Energy conducts its domestic operations through Sun Energy Partners, L.P., of which it is the managing general partner and 98-percent owner. Oryx Energy trades on the New York Stock Exchange with the symbol ''ORX'' and the partnership with the symbol ''SLP.''

SAN DIEGO (SEPT. 27) BUSINESS WIRE - Gensia Pharmaceuticals Inc. Thursday announced that Dr. David A. Shapiro has joined the company as vice president, clinical research, reporting to Dr. Walter Singleton, vice president of medical and pharmaceutical development.

Shapiro will be involved in directing, planning and executing Gensia's clinical research programs, said David F. Hale, president and chief executive officer.

Prior to joining Gensia, Shapiro was a director of clinical research for Merck Sharpe & Dohme Research Laboratories in Blue Bell, Pa. He was responsible for managing cardiovascular clinical research programs and led the hypertension clinical research group.

Shapiro served as project leader on the development of felodipine, a calcium antagonist that is pending FDA approval; he has worked extensively with several other cardiovascular compounds in clinical development; and has managed later-stage clinical support for VASOTEC and PRINVIL, angiotensin converting enzyme (ACE) inhibitors marketed by Merck.

''Dr. Shapiro's experience in managing and overseeing clinical research and development programs for cardiovascular drugs will be a tremendous asset to Gensia,'' Hale said. ''He will play an important role as Gensia continues the clinical development of Arasine and the ESA system.''

Gensia is currently in Phase 2 clinical trials in the United States and Europe with Arasine, a drug that shows promise in reducing tissue damage from ischemia, which is associated with coronary artery disease and with certain surgical procedures such as coronary artery bypass graft surgery.

The ESA System, which is also in Phase 2 clinical trials, combines a novel drug (arbutamine) and computer-controlled delivery system designed to aid in the diagnosis and evaluation of coronary artery disease.

Shapiro was awarded his M.B., ChB in medicine/surgery from Dundee University and Medical School in Scotland and underwent further training in Oxford, England, at the University hospitals before taking a position in the Department of Medicine at the University of Vermont in pulmonary medicine. His research activities in Vermont were, in large part, funded by the American Heart Association.

He is a member of the American Society of Hypertension, the American Society for the Advancement of Science, the American Thoracic Society, the British Medical Association and is a collegiate and professional member of the Royal College of Physicians of London.

Gensia is a San Diego-based biopharmaceutical company formed to discover, develop, manufacture and market novel pharmaceutical products for the treatment and diagnosis of human diseases.

FREMONT, Calif.-(BUSINESS WIRE)-Sensor Control Corp. (NASDAQ: SNCO) reported a loss of $3,680,700 for the year ended June 30, 1990. The loss was due primarily to the write-off of goodwill of $3,128,700 and the previously announced write-off of the investment in and loan to Presto-Tek Corp., as well as to additional accruals, aggregating $1,433,700.

In fiscal year 1990, sales were $6,938,300 compared to $4,695,600 in fiscal year 1989. Earnings in 1989 totaled $531,200 verses the loss in 1990 of $3,680,700. Excluding the Presto-Tek and goodwill write-offs, earnings before tax totaled $411,800 in 1990 verses $731,200 in 1989.

James B. Hawkins, president and chief executive officer of Sensor Control said: "The decision to write-down goodwill was based upon the lower than expected performance of the companies operating subsidiaries and our perception of business conditions in our target markets."

Sensor Control Corp. is comprised of five companies focused on the design, manufacture, and marketing of sensor instrumentation for the industrial and health/safety markets.

For further information, contact James. B. Hawkins, president, Sensor Control Corp., 49050 Milmont Drive, Fremont, (415) 226-9600.

WALNUT CREEK, CA (SEPT. 27) BUSINESS WIRE - Air Liquide America, a major manufacturer and distributor of industrial, medical, specialty and carbon dioxide gases, announces it will implement a surcharge on all delivered products due to the recent increase in oil prices and its impact on distribution costs.

This surcharge will be implemented by all divisions of Air Liquide America which include Big Three Merchant Gases, Liquid Air Corp. Merchant Gases,

Cardox, Alphagaz and Liquid Air Compressed Gases.

This surcharge, effective immediately, will be $7 per delivery, per 50 mile increment, from the delivery sources for all bulk products. Compressed cylinder gas products will also be affected and the surcharge will reflect the additional cost increases. The surcharge on compressed cylinder gases will be $2.50 per delivery for all deliveries within a 50-mile radius of the supplying location.

Air Liquide America said it anticipates further increases on all industrial gas products before year end.

SAN DIEGO (SEPT. 27) BUSINESS WIRE - Maxwell Laboratories Inc. (OTC:MXWL) announced record operating results for the fiscal year ended July 31.

Sales for the year were $83,961,000, a 17 percent increase over the $17,768,000 of last year. Net income for the fiscal year was $3,856,000, or $1.60 per share, compared with $3,557,000, or $1.43 per share, in the prior year, a per share earnings increase of 12 percent.

The increase in earnings is attributable to increased sales in both the commercial and technology program areas of the business.

Total backlog at July 31 was $100.9 million, of which $45.9 million was fully funded. This compares with total backlog at July 31, 1989, of $118.2 million, with $58.2 million being fully funded. Fiscal year 1989 was a year of record bookings, which included three major multiyear contract awards.

San Diego-based Maxwell Laboratories Inc. designs, develops and manufactures pulse power equipment and performs research and computer-based analysis for defense, energy, industrial and environmental markets.

FREMONT, CALIF. (SEPT. 27) BUSINESS WIRE - SyQest Technology, the industry's leading supplier of removable-cartridge Winchester disk drives, has filed suit against Microtech International Inc., East Haven, Conn., for non-payment of approximately $850,000.

SyQuest ceased shipment to Microtech effective Sept. 1.

The suit covers non-payment for SyQuest 44-Mbyte 5 1/4-inch cartridge drives and cartridges supplied to Microtech for use in data storage subsystems supplied by Microtech to the Macintosh marketplace.

The suit additionally seeks return of all SyQuest products currently in the hands of Microtech. Additionally, SyQuest is seeking damages for false and misleading statements made by Microtech.

''This suit was initiated very reluctantly,'' said SyQuest vice president of marketing, Joel Levine. ''We have tried over a period of many months to settle the payment issue with Microtech, but we have not been able to reach a satisfactory payment arrangement with them. At this point, we feel that legal action is our only recourse.''

Microtech is only one of a number of integrators that use SyQuest Winchester disk cartridge drives in data storage subsystems sold into the Apple Macintosh market.

''These drives are readily available and have become widely accepted in this marketplace,'' Levine said. ''They have become the de facto standard for this class of data storage device, and this year alone we will ship over 150,000 of these drives and will provide users with more than 700,000 data cartridges.''

SyQuest will continue to honor all warranties for its products sold through Microtech.

SyQuest was founded in 1982 to build removable cartridge disk drives based on Winchester technology. The drives are extensively used in personal computers small-business systems and workstations, and to date, approximately 450,000 have been shipped.

The company has also shipped 1.7 million cartridges. SyQuest maintains production and administrative facilities in Fremont, Calif., and manufactures drives in Singapore. The company also has advanced engineering facilities in Colorado.

SANTA CLARA, CA (SEPT. 27) BUSINESS WIRE - Kubota Pacific Computer Inc. (KPC) Thursday announced that its manufacturing facility is now fully operational.

The 55,000 square foot facility, located at 2630 Walsh Avenue in Santa Clara, will manufacture graphic supercomputer products for Kubota's strategic partner Stardent Computer Inc., and begin to ship products to customers by the end of September. Kubota Pacific will continue the development of several products based on Stardent's existing technology.

The new company was formed in July after Stardent announced the closing of its manufacturing facility in Sunnyvale. More than 90 former Stardent employees, including engineering, manufacturing and administrative personnel, have joined KPC. The company expects to hire an additional 50-100 engineers and manufacturing personnel within the next several weeks.

KPC will handle the final assembly and testing for all Stardent products, operations previously accomplished by Stardent in Sunnyvale. In addition, KPC will support the development and porting of third-party software for Stardent products, as well as R&D activities to enhance and support current Stardent products. KPC also will develop new products and technologies.

Kubota Pacific also announced the finalization of new agreements between Kubota and Stardent that cover financial, technology and distribution arrangements as well as manufacturing. The agreements, which reflect Stardent's product and operating plans through 1991, will provide in excess of $50 million in additional financing to Stardent by Kubota over the next two years, subject to Stardent's achievement of certain operating benchmarks.

Kubota Corp., established in Osaka, Japan, in 1890, in a global enterprise

with more than 2,000 products, ranging from tractors, pipes and housing materials to sophisticated electronics equipment, sold in more than 130 countries. Kubota's strategic investments in several high technology companies in the United States include MIPS Computer Systems, Exabyte, Akashic Memories and Mycogen.

LOS ANGELES (SEPT. 29) BUSINESS WIRE - Teradata Corp. (NASDAQ:TDAT), the leading manufacturer of high-performance relational database computer systems, Thursday announced it anticipates a loss on lower-than- expected revenues for the quarter ending Sept. 30, 1990.

''Following the European summer holiday period, demand in our two principal European markets -- England and Germany -- has not returned to previous levels as quickly as we expected,'' said Kenneth W. Simonds, Teradata's chairman and chief executive officer. ''In particular, one of our largest European customers is undergoing a reorganization that has resulted in the postponement of expected revenues.

''At the same time, while U.S. demand continues strong in most of our markets, we have experienced lower-than-expected ordering among our Banking customers, particularly in the Northeast. In addition, while we do not believe the new IBM products announced in the last month pose any significant new competitive challenges, some of our customers may have deferred ordering while they analyse those announcements. As a result, we believe our consolidated revenues for the September quarter will be in the $50 million range, and we will record a loss per share of approximately 40 - 50 cents.''

Simonds continued, ''As usual, most of our business is occurring at the end of the quarter. During the summer quarter, we have a low level of visibility on the quarter's business until the end of the quarter. While we had identified enough business to meet our expectations, the order closure rate we normally see at the end of the quarter has failed to materialize.

''We are taking a number of actions to significantly reduce planned operating expense levels in anticipation of lower-than-expected revenue growth for the full fiscal year. Some of these actions will result in a modest restructuring charge that will be included in the first quarter results.

''We intend these actions to reduce our operating expense levels sufficiently to provide year-over-year earnings growth in fiscal 1991. Based on our

assessment of the current economic situation and demand outlook, we believe we can achieve such growth.

''In conclusion,'' said Simonds, ''while these factors have influenced the short-term picture, the fundamental soundness of our business has not changed, and we believe strongly in our ability to continue our successful growth. The actions we are taking will help us continue to achieve that success.'' Los Angeles-based Teradata designs, manufactures and markets high-performance systems and related products and services for relational database management.

WOODLAND HILLS, CA (SEPT. 27) BUSINESS WIRE - New Image Industries Inc. (NASDAQ:NIIS) Thursday announced it plans to implement in the near future a stock repurchase program whereby up to 500,000 shares of its common stock may be purchased from time to time in the open market or negotiated transactions.

New Image's decision to purchase shares and the number of shares will depend upon price, market conditions and other factors. New Image currently has 4,074,444 shares of common stock outstanding.

Robert Gurevitch, president, said, ''Our board of directors and management believe that an investment in our stock would be beneficial to New Image and its stockholders.''

Shares repurchased will be retired.

The repurchase program is not intended to cause the common stock to cease to be authorized for quotation on the NASDAQ System.

LOS ANGELES (SEPT. 27) BUSINESS WIRE - Argonaut Group Inc. (NASDAQ/NMS:AGII) Thursday announced that 19,095 shares of its common stock were acquired at $71 per share in response to its offer to purchase shares of its common stock from shareholders who, as of Aug. 9, owned 50 or fewer shares of Argonaut Group Inc. common stock.

Argonaut Group also announced the extension of this offer. Details of the

extension were mailed on Sept. 26 to eligible shareholders and allows them to sell their eligible shares without being charged any brokerage commission.

Shareholders who elect to participate in this offer must sell all of the eligible shares they own. Partial tenders will not be accepted and there are no withdrawal rights. Participating shareholders will be paid the highest of the closing prices during the period from Sept. 26 to Oct. 25, as reported in The Wall Street Journal.

Many shareholders received their shares in 1986 when Teledyne Inc. spun-off Argonaut Group Inc. to the shareholders of Teledyne Inc. Argonaut Group Inc. is making the offer primarily to provide its smaller shareholders the opportunity to sell their Argonaut shares without incurring any brokerage costs.

Also, this offer will enable Argonaut Group Inc. to reduce its administrative costs associated with servicing their small shareholder accounts.

The manager of the offer, Shareholder Communications Corporation, and Argonaut Group Inc., make no recommendation as to whether or not shareholders should participate in the offer.

Argonaut Group Inc. is a holding company whose subsidiaries are engaged primarily in the selling, underwriting and servicing of workers compensation and other lines of property-casualty insurance.

BOCA RATON, FL (SEPT. 27) BUSINESS WIRE - Arvida Co. announced the formation of a new division and two major promotions Thursday.

Effective Oct. 1, a new Special Projects Division will be formed and headed by Don DeCastro, according to Ernest ''Bud'' Miller, president of the national real estate development firm.

As president of the new division, DeCastro will immediately assume responsibilities for all commercial activities in the company. Additionally, effective Nov. 15, the complete operations of Arvida's Sarasota projects will be added to this new division.

DeCastro will also remain in his current role as chief financial officer until Nov. 15, according to Miller.

On Nov. 15, Vince Donahue will take DeCastro's position as Arvida's chief

financial officer. In his new role, Donahue will have responsibility for financial planning and control, treasury and information systems.

''These moves allow us to make optimal use of Don's and Vince's expertise,'' said Miller.

Arvida, founded in 1958, is a developer of premier resort, residential, and business communities nationwide. Arvida has created more than 50 master-planned communities in Florida, Georgia, North Carolina and Texas.

DeCastro received his bachelor's degree in accounting finance from Florida State University. He was employed with the accounting firm of Deloitte Haskins & Sells for more than 10 years, becoming a partner in 1985.

DeCastro joined Arvida in 1986 as the corporate controller. After becoming the vice president of financial planning and control in June 1987, he was then promoted to vice president and chief financial officer in January 1989.

Donahue has been employed with Arvida for more than 10 years, most of which was involved in managing Arvida's treasury operations. In early 1989 he was promoted to vice president of acquisitions.

Prior to joining Arvida, Donahue was a financial analyst at Ford Motor Co. in Dearborn, Mich. While at Ford Motor Co., he held various positions in the treasurer's and controller's offices. He received a bachelor's degree in economics from the College of Holy Cross in Worcester, Mass., and a master's degree in finance from Columbia University School of Business.

RANCHO CORDOVA Calif. (SEPT. 28) BUSINESS WIRE - Insta Cool Inc. of North America (NASDAQ:KOOL), manufacturers of ultra-rapid freezing equipment for the freezing of human blood plasma, Thursday reported flat fourth- quarter sales and a decrease in annual sales.

Sales for the fourth quarter ended June 30, 1990 were $387,000 as compared with $389,000 for the quarter ended June 30, 1989. In addition, the net loss widened to 3 cents per share for the 1990 quarter as compared with 1 cent per share for the 1989 quarter, according to the company.

The rise in the loss per share was primarily attributable to the increase in interest expense related to the recent issuance of $1,095,000 of convertible notes, and to higher costs for marketing and research and development for new markets and products, said Philip Coelho, chief executive officer of the company.

Annual sales for the year ended June 30, 1990 slid to $1,059,000 from $1.23 million for the year ended June 30, 1989, and the net loss widened to 7 cents per share as compared with 5 cents per share, respectively.

MILPITAS, CA (SEPT. 27) BUSINESS WIRE - Xicor Thursday reported results for the 12-week third quarter which ended on Sept. 9, 1990.

Revenues for the 12-week third quarter of 1990 were $22,545,000, compared with $21,223,000, for the third quarter of 1989. During the third quarter of 1990, Xicor incurred a loss of $1,833,000 (10 cents per share), compared with net income of $863,000 (5 cents per share) for the comparable quarter of 1989.

For the 36-week period of 1990, Xicor's revenues were $62,717,000, with a loss of $13,589,000 (76 cents per share) compared with revenues of $65,171,000, and net income of $6,049,000 (33 cents per share) for the comparable period of 1989.

The results for the third quarter and 36-week period ended Sept. 9, 1990 include the receipt of insurance proceeds of $950,000 from a business interruption claim resulting from the failure of an electric transformer at Xicor's fabrication plant during the fourth quarter of 1989.

According to Raphael Klein, president, ''The results of the third quarter represent an increase of 10 percent in revenues and a reduction of 42 percent in the loss (excludig the insurance proceeds) compared with the second quarter of 1990.

''The reduction in the loss is principally due to continuing improvements in yields and productivity and increased utilization of the factory during the third quarter of 1990.

''Aided by the successful ramp-up of assembly and test operations at Xicor's contractor in Taiwan, unit shipments reached a record high during the third quarter. During the third quarter we continued to invest heavily in research and development.

''While design activity at our customers for use of our products is at an all-time high, bookings of customer orders were sluggish during the summer months.

''Since our production has operated efficently during the third quarter at a level significantly above our shipment level, we have been able to build a very strong finished goods inventory position and are now able to respond

quickly to the short delivery times required by today's market.

''To slow down inventory build-up and reduce costs, in mid-August we temporarily reduced and/or suspended hiring, salary increases, overtime and non-critical expenditures and instituted a partial shutdown during the two weeks which ended Sept. 16.

''During the last several month, we also analyzed our manufacturing and engineering operations with the goal to improve them through a more efficient organization and shorter communication channels. As a result, on Sept. 17, 1990, we put in effect a much stronger manufacturing and engineering structure.

''In wafer fab, since our new 6-inch line is proceeding past the infancy stage and is generating initial limited revenue from 512K and 1 Megabit EEPROMs, we have consolidated the management, manufacturing operations and engineering of the 4-inch and 6-inch lines.

''This is the first step toward the gradual conversion over several years of the whole wafer fab to a 6-inch operation. We have also consolidated the product, reliability and quality engineering functions to place full responsibility in one group with a combined higher level of expertise.

''As a result of this reorganization, and by eliminating non-essential positions, the company has reduced its workforce by 36 people. Until we see substantial improvements in bookings, we will temporarily reduce work hours for a large portion of the workforce by up to 25 percent in order to reduce inventory build-up and to match expenses with revenues.

''One the basis of expected signficant bookings and resultant sales growth, we had previously anticipated regaining profitability during the latter part of 1990. Because of the slowdown in the world economy, the expected strenghthening of orders after the usual slow summer period may not materialize this fall.

''Unless bookings for quick turn deliveries increase significantly in the near future, we will not be able to attain profitability in 1990. Although we will decrease operating costs, the reduced operations level will not be sufficient to cover all fixed costs, principally depreciation expense.''

Klein concluded: ''Overall the company is well positioned to grow further as market demand picks up.''

Xicor, a semiconductor manufacutrer, is the leading supplier of proprietary devices which retain their information content without power yet can be easily reprogrammed in the system.

These advanced products, based on a technology called ''full-featured EEPROM '' enable customers to manufacture systems with reduced service costs,

improved readiness, automatic self-calibration capability and simpler end-user customization.

Xicor products are now widely accepted in all the traditional markets which use semiconductors: computers and peripherals, consumer products, telecommunications, industrial controls, the military and transportation. Xicor's customer base encompasses many of the top-tier electronics companies in the United States, Europe and the Far East.

Xicor offers its customers the most complete EEPROM capabilities in the industry: products with high quality and reliability, a wide range of densities, interfaces and package configurations, proven wafer fabrication and product testing, advanced CMOS and NMOS technologies with a clear path to the future and highly competent on-site technical customer support.

SAN DIEGO (SEPT. 27) BUSINESS WIRE - US Sprint and IBM Corp. Thursday successfully completed a joint demonstration showcasing US Sprint's capability to provide 384 kbps transmission over its all-digital, fiber-optic network.

The demonstration reinforced US Sprint's overall ISDN strategy -- working with third-party vendors in designing and supporting new ISDN applications and services.

In the demonstration, the IBM AS/400 (tm) ISDN Access provided the capability to communicate with a remotely located IBM AS/400 in Rochester, Minn., and US Sprint's ISDN Primary Rate Service.

AS/400 applications have the ability to control ISDN voice calls using IBM's new CallPath (tm) Services Architecture available with the CallPath/400 (tm) Licensed Program Product. In addition the AS/400 also can collect network problem determination data, and generate call detail information for accounting purposes. ISDN access allows current IBM Token Ring LAN applications to communicate using ISDN to remotely connected token rings.

The AS/400 product -- combined with the IRX9000 (tm) ISDN Resource Exchange Switch supplied by Teleos Communications, Inc., based in Eatontown, N.J. -- provides a fully integrated, advanced-application platform permitting AS/400 customers to access services using ISDN functionality.

''This demonstration not only highlights the high-quality transmission capability of US Sprint's network, but also the direction of application development using ISDN services,'' said Gerry Canavan, US Sprint's director of enabling technologies.

The demonstration was conducted at the Tele-Communications Association Trade Show which was held this week in San Diego.

IBM, Application System/400, AS/400, CallPath, CallPath/400 are trademarks of International Business Machines Corporation.

LOS ANGELES (SEPT. 28) BUSINESS WIRE - The Kushner-Locke Company Inc. (NASDAQ:KLOC) announced Thursday that it intends to offer $10 million

principal amount of its convertible subordinated debentures through a public offering of two series of debentures having varying interest rates and conversion prices.

The company intends to file a registration statement with the Securities and Exchange Commission for the offerings in October. The net proceeds of the offerings are expected to be used for general corporate purposes, including expansion of the company's television production activities.

Founded in 1983, The Kushner-Locke Company is an independent television production company engaged in developing and producing television series, pilots, movies for television, mini-series and animated programming.

This media release shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of the securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. Any such offering will be made only by means of a prospectus.

FREMONT, CALIF. (SETP. 27) BUSINESS WIRE - SatisFAXtion, a newly announced PC-based multifunction fax board by Intel's Personal Computer Enhancement Operation (PCEO), featuring direct faxing from any application that can print, will offer the Intel Hand Scanner, a Logitech-designed and manufactured hand-held scanner, as an optional add-on available for $399.

With support for 256 gray levels and custom-designed analog and digital microprocessor chips, the Logitech product brings high-end capability to the hand-held scanning environment.

''We're very excited about the potential of the Intel product, and about our OEM relationship with Intel,'' said Logitech president, Pierluigi Zappacosta. ''Increasingly, users need to communicate with both images and text.

''The Hand Scanner will streamline this process while producing excellent quality. Through their cooperative efforts, Logitech and Intel have brought powerful technology within the reach of every user.''

Over the past few years, Logitech has emerged as a market leader in hand-held scanners and currently holds the largest share of the domestic market. The company is very active in promoting hand-held scanning standards among hardware and software vendors, with the goal of growing the market overall.

In July, Logitech and The Complete PC announced a hand-held scanner application program interface (SAPI), slated to ship in early October. The Intel Hand Scanner and SatisFAXtion products will support SAPI, which has already been accepted by several additional manufacturers and software developers.

Based in Fremont, Logitech designs, manufactures, and markets desktop tools -- a product category that includes input and pointing devices, and stand-alone software applications. With manufacturing facilities in Fremont; Cork, Ireland; and Hsinchu, Taiwan; the company is an international market leader in input technology.

Intel PCEO, a division of Intel's Systems Group, develops and manufactures a broad line of PC fax and modem products, as well as the NetPort print server, AboveBoard memory boards, Inboard accelerator boards and math coprocessors. Intel Corp. is an international manufacturer of microcomputer components, modules, and systems.

MOUNTAIN VIEW, CA (SEPT. 27) BUSINESS WIRE - ASK Computer Systems Inc. (OTC:ASKI) announced Thursday that a lawsuit has been filed in Delaware by James P. Lennane, a holder of approximately 9.7 percent of the outstanding stock of ASK, against ASK and its board of directors.

The suit seeks to enjoin the proposed sale of $60 million of ASK common stock to EDS Corp. and the Hewlett-Packard Co. until the proposed sale of stock is submitted to and approved by ASK's stockholders. The complaint alleges that consummation of such sale without stockholder approval would be a violation of NASD rules applicable to issuers of National Market System securities and, as a result, a breach of fiduciary and contractual duties.

ASK stated that it believes that this NASD rule is not applicable to the proposed equity transaction; and, in any event, ASK does not believe it has any obligation to maintain its stock as a National Market system security.

Accordingly, ASK indicated that it intends to vigorously defend the lawsuit and proceed with closing the proposed sale of stock to EDS and HP as planned, as well as the previously announced acquisition of Ingres Corp. for $110 million in cash.

Lennane also stated in a filing with the Securities and Exchange Commission

that he had filed preliminary proxy materials to be in a position to seek to obtain control of ASK's board of directors through solicitation of proxies for the company's 1990 annual meeting of stockholders scheduled for Oct. 26.

CUPERTINO, CA (SEPT. 27) BUSINESS WIRE - Apple Computer, Inc. Wednesday announced it has reached a major milestone in the development of its System 7.0.

Apple will begin initial shipments of beta-quality versions of System 7.0, the next version of Macintosh computer system software, to Macintosh third-party developers in October.

Apple will hold the beta cycle open to solicit thorough developer feedback and to allow them to begin developing applications to assure a wide array of System 7.0 applications for customers when the new version of system software ships.

To meet Apple's exacting quality standards, they have revised estimates for customer shipments of System 7.0 from the end of 1990, to the first half of calendar 1991. ''Our commitment is to produce the highest quality system software for our developers and customers,'' said Roger Heinen, vice president of software engineering. ''Apple's internal standards for software testing are extremely rigorous, and with the additional feedback from our developers we are confident System 7.0 will shatter traditional notions of what personal computers can do.''

System software controls the way the computer works and provides a foundation for applications software such as word processing and spreadsheets. Macintosh system software is best known for producing the distinctive graphical user interface that set standards for all computing environments. System 7.0 represents the most significant enrichment to the Macintosh since its inception in 1984.

LOUISVILLE, KY (SEPT. 27) BUSINESS WIRE - Vencor Inc. (NASDAQ/NMS:VCOR) Thursday announced that it has received regulatory approval to purchase Lindell Hospital in St. Louis.

Closing of the acquisition is expected within the next several weeks. The hospital, to be renamed Vencor Hospital St. Louis, will be operated as a 60-bed facility specializing in providing long-term hospital care to patients suffering from catastrophic illnesses.

W. Bruce Lunsford, chief executive officer, said that the extensive remodeling planned for the newly acquired hospital would begin immediately.

He remarked, ''The purchase and renovation planned for Vencor Hospital St. Louis will represent a total investment of approximately $3.5 million. We expect to start operating the hospital during the second quarter of next year.''

Lunsford noted that this is the fourth hospital which Vencor has acquired during 1990. He said, ''This not only represents our twelfth hospital but also marks our entry into a ninth state. The addition of Vencor Hospital St. Louis will bring the total number of licensed beds in our system to 780, up 85 percent since the start of 1990.

Vencor specializes in providing long-term hospital care for patients who suffer from catastrophic illness. The company will now have 12 hospitals located in Arizona, Colorado, Florida, Georgia, Illinois, Indiana, Louisiana, Missouri and Texas. Vencor's common shares are traded on the NASDAQ National Market System under the symbol VCOR.

#90270b0640 09/27/1990 ~Business Wire

KANSAS CITY, MO (SEPT. 27) BUSINESS WIRE - Stuart Hall Company, Inc. (NASDAQ Symbol: STUH) Thursday announced record sales and earnings for the third quarter and nine months ended August 31, 1990. The company noted that earnings for the latest third quarter increased 52 percent on a 28 percent sales gain (Table follows).

Stuart Hall Company also announced today that it anticipates that the demand for the Company's products could exceed its earlier forecast of $156 million for fiscal 1991.

The Company further said it will add production capacity to support an $80 million increase in sales volume by December 1990 and that it will introduce a broad line of office supply, school supply, and writing paper products made from 100 percent recycled paper within the next 30 to 45 days.

Commenting on these developments, Stuart Hall Chairman and Chief Executive Officer, Charles Hanson, stated, "The new record sales and earnings achieved during the latest third quarter and nine months resulted from growing demand across the full range of our office supply, writing paper and school supply product lines and were achieved in spite of some of the most drastic discounting we have ever encountered in the industry. Both sales and earnings

were adversely impacted by the extent of this negative competitive environment.

"Based on the gratifying results we were still successful in generating, the current favorable trends in demand, and the production capacity expansion that we have under way, we are optimistic that we could well surpass our earlier forecast of record sales of $123 million for the current fiscal year," Mr. Hanson concluded.

STUART HALL COMPANY, INC. OPERATING RESULTS (Unaudited)

Nine Months Ended Aug. 31:	1990	1989
Gross sales	$98,237,816	$80,365,828
Net sales	89,151,879	72,651,513

#90270b0643 09/27/1990 ~Business Wire
ATLANTA (SEPT. 27) BUSINESS WIRE - Zenox Inc. (NASDAQ: ZENO) announced Thursday that Soyuz International Corp., the US-Soviet joint-venture in which Zenox holds a 40 percent equity stake, has reached agreement with its Soviet partners to greatly expand its business activities in the USSR.

Currently Soyuz International owns the Payless Car Rental franchise for the entire USSR market, and has entered agreements with Aeroflot Airlines and the Moscow Airport authorities for opening the franchise by December, according to Richard English, Zenox's president and director of Soyuz.

Expanded Soyuz business activities will include construction and renovations of hotels and office complexes; fast food franchising in pizza, hamburger, chicken, and roast beef product lines; cola bottling in partnership with existing Soviet bottlers: manufacturing ventures in chemical, plastics, and pharmaceutical industries; and counter-trading operations through their subsidiary Sovamtorg Inc., according to Anatoly Davydov, Soyuz president of USSR operations.

Zenox is a diversified USA holding company with existing USA subsidiaries engaged in manufacturing, healthcare, communications, car rental franchise operations, investments, and construction industries. Zenox has undergone significant growth in the past 16 months, and the expansion of their interests into the Soviet Union is meant to further enhance revenues, earnings and long-term growth for the company.

#90270b0649 09/27/1990 ~Business Wire
GRAND PRAIRIE, TX (SEPT. 27) BUSINESS WIRE - Craftmade International, Inc. (NASDAQ: CRFT), Thursday announced results for the year ended June 30, 1990.

For the year ended June 30, 1990, sales were $12,499,200, an increase of 25% from $10,023,192 in the year ended June 30, 1989. Net income for 1990 rose 45% to $468,110 or $.20 per share from $323,407 or $.14 per share in the prior year.

Earnings per share calculations for the fiscal year ended June 30, 1990 were based on weighted average shares outstanding of 2,398,662 as compared to 2,246,224 shares outstanding in the prior year. The increase in the weighted average number of shares outstanding was principally the result of the Company's initial public offering in February 1990.

James R. Ridings, President, commented, "Fiscal 1990 was a year of rapid growth for our Company as the sale of CraftmadeR ceiling fans and lighting kits rose nationwide. Higher sales during the year reflect our commitment to providing consumers with high quality, energy efficient ceiling fans which compete favorably in the marketplace.

"We've also successfully focused on increasing sales of our complementary lighting kits and accessories. Record net income for fiscal 1990 is particularly gratifying, as it reflects the effective management of overhead expenses associated with our higher sales levels, new manufacturing facilities and improved pre-tax profit margins."

Ridings added, "In July, 1990, Craftmade acquired D.M.I. Products, a specialty lamp manufacturer based in Fort Worth, Texas. D.M.I.'s customer base includes major specialty retail chains. Its GEI division is a manufacturer of computer components and other electrical accessories.

"Our acquisition of D.M.I. demonstrates Craftmade's intention to rapidly expand sales in the lighting market, while at the same time, further penetrating the ceiling fan industry. To that end, we recently signed a licensing agreement with one of the country's foremost designers for a line of ceiling fans for the upper level market. Models for this line are expected to be available in January."

Looking ahead, Ridings noted, "We entered the new fiscal year in a strengthened financial position. Sales in the first quarter of Fiscal 1991 are continuing the growth trend demonstrated over the prior year. We expect revenues and net income to continue to climb over the course of the year."

Craftmade International, Inc. is engaged in the design, distribution and marketing of ceiling fans, light kits and accessories manufactured to its specifications.

The Company currently markets 87 basic models of ceiling fans and 32 lighting fixture models under its CraftmadeR brand to over 1,000 retail outlets. The Company's D.M.I. Products, Inc. subsidiary is a specialty lamp manufacturer.

HORSHAM, PA (SEPT. 27) BUSINESS WIRE - Advanta Corp. (NASDAQ: ADVN) announced Thursday that its wholly own subsidiaries, Colonial National Bank USA and Advanta Mortgage Corp. USA, sold $60.3 million of Class A Certificates in a private placement underwritten by Prudential-Bache.

The certificates represent ownership interests in Advanta Home Equity Loan Trust 1990-3, which holds fixed-rate, closed-end home equity loans. The certificates are rated ''AAA'' by Standard & Poor's and ''Aaa'' by Moody's and are insured by Financial Guaranty Insurance Corp.

Advanta Mortgage will maintain the servicing and customer relationships of the home equity loan accounts.

William Kaiser, senior vice president of Advanta Mortgage said, ''This offering is our seventh securitization of home equity loan receivables bringing the total of securitized home equity loans to over $350 million.

''Packaging real estate loan receivables and selling them in the secondary market will continue to be an ongoing method of financing for Advanta Corp.'s subsidiaries.''

Advanta Corp. is a financial services holding company which services assets in excess of $2 billion at June 30, and operates through its subsidiaries to market credit cards, home equity loans, equipment leases, credit insurance and deposit products to consumers nationwide.

HOLBROOK, NY (SEPT. 27) BUSINESS WIRE - CYBER DIGITAL INC. (OTC) Thursday reported that net income for the quarter ended June 30, 1990 increased to $240,868, equal to 2 cents per share, compared with a net loss of $72,901, or loss of 1 cent per share, for the same quarter previous year.

''The improved profitability is due to extinguishment of certain debt and

increase in sales volume,'' said J.C. Chatpar, chairman and chief executive officer.

Sales increased 101% to $218,007 in quarter ended June 30, 1990 from $108,488 in quarter ended June 30, 1989.

Total working capital increased by $271,821 to $717,922 for quarter ended June 30, 1990 from $446,101 for period ended March 31, 1990. The current ratio increased to 6.4 to 1 as at June 30, 1990 from 2.0 to 1 as at March 31, 1990.

CYBER DIGITAL INC. designs, manufactures, markets and services data and voice telecommunication switching equipment.

SUNNYVALE, CA (SEPT. 27) BUSINESS WIRE - ZyMOS Corp. (NASDAQ/NMS:ZMOS), announced Thursday volume shipments of its new high performance controller chip jointly designed with Compaq Computer Corp.

The Universal Peripheral Controller - P-222 is a high integration implementation of the primary IBM PC AT peripherals including two 8259A programmable interrupt controllers, two 8254 programmable interval timers, and two 8237 DMA controllers.

ZyMOS' newly developed Universal Peripheral Controller allows manufacturers to gain an advantage over standard chip sets by using the chip to create personalized features. ZyMOS is currently the only source shipping this chip in production volumes. ZyMOS' advanced SuperCell technology made it possible to meet the high performance requirements of Compaq.

In addition to PC applications any industrial control application based on Intel microprocessors such as the 80286 or 80386 will greatly benefit from the use of the ZyMOS Universal Peripheral Controller. Substantial future revenue is expected from this new product.

PAINESVILLE, OH (SEPT. 27) BUSINESS WIRE - Obron Atlantic Corp. has reported the conclusion and disposition of all legal proceedings surrounding allegations of government contract fraud made last year by two of its former employees, James Owen and Kristen Phelps.

In October 1989, Owen and Phelps filed a complaint in Federal Court in Cleveland alleging claims under the Federal RICO and Ohio Whistleblower statutes and for wrongful discharge and the intentional infliction of emotional distress. The claims asserted by Phelps and Owen in their lawsuit centered around allegations concerning the events which led to the termination of their employment in April 1989 and their allegations of irregularities in connection with the testing of brass flake powder used in grenades manufactured for the United States Army.

The complaint named as defendants Obron Atlantic and certain employees of Obron Atlantic and its West German affiliate, Anthony McHugh, Roland Heckel, Carl Eckart, Bruno Dachlauer and Wolfgang Glueck. The defendants denied the allegations of the complaint, and Obron Atlantic, McHugh and Heckel filed counterclaims against Owen and Phelps. The counterclaims against Phelps included counts for fraud, libel and slander, and the counterclaims against Owen included counts for libel and slander and for breach of contract and fiduciary duty in connection with Owen's employment as the vice president and general manager of Obron Atlantic.

The parties agreed to a settlement calling for the dismissal of the plaintiffs' claims and the counterclaims asserted in the Phelps and Owen lawsuit. As part of the settlement, Phelps and Owen have also agreed to pay each of the defendants one dollar. On Sept. 10, the United States District Court in Cleveland entered an order dismissing the Phelps and Owen lawsuit.

In addition, an agreement was reached and finalized earlier this week to settle civil fraud claims under the federal qui tam statute which were asserted by Owen and Phelps as relators on behalf of the United States of America. The settlement calls for the dismissal of the qui tam case and for Obron Atlantic to pay the United States $54,000 and an agreed upon sum for the fees and expenses of the relators' attorneys.

Although Obron Atlantic has denied the allegations made in the qui tam case, it was determined that the cost of continued litigation justified the settlement. Previously, the United States Justice Department declined to exercise its statutory right to participate in the qui tam case brought by Owen and Phelps. A stipulation of dismissal with prejudice signed by attorneys for the United States, Obron Atlantic and the relators was filed

yesterday with the United States District Court in Cleveland.

The conclusion of these cases also comes after investigations were conducted by the United States during 1989 and early 1990. Obron Atlantic cooperated with the government in its investigation and was advised by the United States Attorney's office in Cleveland that the United States has declined any criminal prosecution based on the Owen and Phelps allegations.

Jon Fisher, the vice president and general manager of Obron Atlantic, said, ''Obron Atlantic and its employees who were accused of wrongdoing feel vindicated by the resolution of these matters and are very pleased to put these matters behind us. We felt that a press release announcing the successful conclusion of these matters was appropriate in light of the publicity given the Phelps and Owen allegations when they filed their lawsuit last October.''

Obron Atlantic has been represented in these matters by Jones, Day, Reavis & Pogue.

COPIAGUE, NY (SEPT. 27) BUSINESS WIRE - TII Industries Inc. (ASE:TI) announced Thursday a delay in the filing of Form 10-K for the fiscal year ended June 29 with the Securities and Exchange Commission.

Accordingly, the release of all fiscal 1990 financial information to the company's stockholders is expected to be delayed by up to 15 days.

This delay resulted because of the imminent completion of management's negotiations with its lender banks to restructure the company's bank loan agreements.

TII Industries Inc., with executive offices and R&D facilities in Copiague and plants in Puerto Rico, Dominican Republic and Haiti, is a high technology company specializing in the design, manufacture and sale of surge protection and specialized electronic devices, principally for use in the telecommunications and computer industries.

SALT LAKE CITY (SEPT. 27) BUSINESS WIRE - ''It is unworthy of excellent men to lose hours like slaves in the labor of calculation.'' Gottried Wilhelm von Liebnitz (1646-1716)

Salt Lake City-based MicroMath Scientific Software is drastically reducing this ''labor of calculation.'' People involved in a wide range of scientific research and engineering are utilizing powerful new software for the personal computer.

Scientists have traditionally had just two ways to solve problems such as determining the properties of chemical mixtures in water, or the distribution of drugs in an organism. The extensive medical calculations could either be done by hand, or the researcher could spend days writing and debugging a mainframe or mini-computer program.

Recent increases in the capabilities of personal computers have made the use of scientific software on the personal computer a viable alternative. By employing easy-to-use software on the personal computers in their own laboratories, scientists are able to focus on the nature of the problem instead of the calculations.

Agricultural engineers at the USDA are using MicroMath's LAPLACE program to quickly solve problems posed in their crop protection research. Their goals include making plant sprays more effective while using fewer chemicals that might impact crops, people, or the environment.

Researchers are using the newly-released 2.0 version of EQUIL to do chemical equilibrium calculations describing the composition of human saliva in studies determining the effect of laser irradiation in preventing tooth decay.

In another example, scientists at Upjohn are using MINSQ, RSTRIP, and GRAPH in their drug distribution studies. Their research teams have been able to make use of these computational resources to enhance the results of their studies, which have the potential to affect millions of people worldwide.

MicroMath was founded by two scientists who have firsthand knowledge of researchers' needs. Myles Lamson and Jeffrey Fox place top priority on developing powerful programs that are also easy to learn and use.

The software development team is comprised of scientists, two thirds of whom hold doctorate degrees in the areas of chemistry, applied mathematics and physics. These programmers represent a selection of top intellectual talent from the United States and China.

The company plans to continue to reduce the labor of calculation by introducing programs designed for the new Microsoft Windows environment. With the addition of this exceptionally easy-to-use graphical interface, the software can be operated with a mouse, much like a Macintosh system. Through

this development, and the pending release of a combination spreadsheet and graphing program, more people will be able to realize the full potential of today's personal computing power.

FORT WORTH, TEXAS (SEPT. 27) BUSINESS WIRE - Pier 1 Imports Inc. (NYSE:PIR) a specialty retailer of decorative home furnishings and related items, announced Thursday that the company achieved record sales and reduced earnings for the second quarter ended Sept. 1.

Sales of $149,593,000 were the largest quarterly sales in history, up 10.9 percent from last year's $134,855,000. Net income available for common shareholders was $2,505,000 vs. last year's $7,227,000.

Earnings per share were 7 cents down from last year's 20 cents.

For the six month period, sales of $288,023,000 were 15.8 percent ahead of the prior period's $248,785,000 and net income available for common shareholders was $10,179,000 compared with last year's $13,888,000 for the like period. Earnings per share of 29 cents compared to last year's 39 cents.

Clark A. Johnson, chairman and chief executive officer commented, ''The company's second quarter was adversely affected by a drastic slowdown in store traffic in the month of August as troubles in the Mideast proved to have a dampening effect on consumer spending.''

Pier 1 Imports opened 34 new stores in the first half and expects to open an additional 32 units prior to Christmas.

The company operates 541 stores in 44 states and Canada.

FREMONT, CA (SEPT. 27) BUSINESS WIRE - DSP Technology Inc. (NASDAQ:DSPT) announced Thursday the receipt of two orders, together valued at over $550,000.

The first contract exceeds $400,000 from Martin Marietta, a large aerospace company in Denver. The order is for a turn-key data acquisition system used to monitor acceleration and pressure data during Titan IV lift-off. The data will be used to model and improve the performance of the lift-off suppression system, enabling more complex payloads to be launched. Shipment of this system is expected in the current fiscal year.

The second order, valued at over $150,000, was received from the National Institute of Aviation Research at Wichita State University, Kansas. This turn-key data acquisition system will be used in safety testing of airplane seats and should be delivered early in fiscal 1991.

F. Gil Troutman, president of DSP Technology, said, ''Both orders represent progress towards our goal of increased participation in space launch and other aerospace programs.''

DSP Technology Inc. designs, manufactures and markets electronic instrumentation and data acquisition systems to automobile manufacturers, major research and development laboratories and government-funded national and university research laboratories.

Its products enable research and product development engineers to capture data from occurrences lasting millionths of a second or spanning several days.

FORT LEE, NJ (SEPT. 27) BUSINESS WIRE - On-Line Software International Inc. (NYSE:OSI) Thursday announced that in its first quarter ended Aug. 31, income before extraordinary gain increased to $299,000 (5 cents per share), compared to $193,000 (3 cents per share) for the comparable period last year.

In contrast to last year's first quarter which included an extraordinary gain from the acquisition of the company's covertible subordinated debentures, of $151,000 (3 cents per share), there was no extraordinary gain included in the current quarter.

Revenues for the first quarter were $21.9 million, an increase of 9.5% from last year's $20.0 million. Increases in international revenue more than offset a decline in domestic license fee revenue compared with last year's quarter.

''We are excited with the results from our new products introduced during the first quarter,'' stated Jack M. Berdy, chairman and chief executive officer of On-Line Software. ''Both ShareOption/5 and InterTest/Batch performed well.''

''Our attention continues to be directed towards the strengthening of our sales channels and the marketing of our new products,'' added William G. Nelson, president and chief operating officer of On-Line Software.

On-Line Software International Inc. is a NYSE listed company (OSI) headquartered in Fort Lee. The 21-year-old firm combines consulting and educational services with CICS, DB2 productivity software, and development systems products that enhance the productivity of IBM computer systems users. As a charter vendor member of the International DB2 Users Group and a founding member of R/AD, the International User Group for Repository and AD/Cycle, On-Line Software supports the IBM user community. With 16 domestic and international offices, On-Line Software's distribution network services over 30 countries. The company is an IBM Business Partner that has products and professional services utilized by all Fortune 100 IBM mainframe sites.

#90270b0687 09/27/1990 ~Business Wire
WILLOUGHBY, OH (SEPT. 27) BUSINESS WIRE - September 27, 1990 -- Figgie International Inc. today announced election of Dr. Harry E. Figgie, III, as Vice Chairman of Technology and Strategic Planning.

Dr. Figgie, 37, will become part of a newly created Office of the Chairman

which will also include Chairman and Chief Executive Officer Harry E. Figgie, Jr., 66, and President and Chief Operating Officer Vincent A. Chiarucci, 60. Dr. Figgie will join the Company on a gradual basis over the next 18 to 36 months as his replacements integrate themselves into his medical practice.

Dr. Figgie has enjoyed a dual career as a world renowned orthopedic surgeon and as President and Chief Executive Officer of The Clark-Reliance Corp., a Cleveland-based manufacturer of valves, controls and instrumentation. The company is recognized as a leader in world class manufacturing, and is credited with the development of new techniques in numerically controlled machining technology. Under Dr. Figgie's direction, Clark-Reliance's sales have grown from $4 million to nearly $35 million.

In addition to his degree in medicine, Dr. Figgie holds an undergraduate degree in bio-medical engineering and a masters degree in what is now factory automation. He also holds a degree in accounting.

He is regarded as one of the founding specialists in custom-fit joint replacements for the human body, and has pioneered in the technique of cementless joints which have enjoyed a remarkably high success experience.

Dr. Figgie is an Assistant Clinical Professor of Medicine at Cleveland's Case Western Reserve University's School of Medicine, and is a visiting scientist at The Hospital For Special Surgery in New York City. He practices at University Hospitals of Cleveland and has headed the Hospital's Cost Reduction Committee, which was responsible, in part, for the Institution's cutting some $35 million out of its operating budget in less than 24 months.

According to Dr. Figgie, ''I have been privileged to follow dual careers for nearly 20 years. The decision on which career to follow for the future has now become a family decision and thus an easy and very happy one to make.''

A director of Figgie International Inc. since 1985, he also has served the Corporation, over a 15-year period, in a variety of special assignments in finance, manufacturing and engineering.

Chairman Figgie stated that ''Harry's unique experience in manufacturing technology is strongly needed to expedite the conversion of our industrial divisions to available state-of-the-art technology.''

Figgie International is a diversified Fortune 500 company serving consumer, technical, industrial and service markets worldwide. Sales in 1989 were $1.3 billion.

BETHESDA, MD (SEPT. 27) BUSINESS WIRE - Survival Technology Inc. (NASDAQ: SURV) announced Thursday that the Food and Drug Administration has approved a New Drug Application for the company's Morphine Auto-Injector (Morphine Sulfate Injection).

The Morphine Auto-Injector is designed to deliver 10 mg of morphine sulfate in a sterile solution for intramuscular injection for the management of pain. This auto-injector is intended to replace the morphine syrette currently used by military medical personnel in the treatment of pain from battlefield injuries. The company is also exploring commercial applications for this product in emergency treatment of pain.

Survival Technology Inc. provides innovative pharmaceutical delivery systems and cardiac monitoring services for the treatment of emergency medical problems. The company's products include automatic injectors for self-administration by the military, as well as injectors such as the EpiPen auto-injector containing epinephrine for severe allergic reactions and the LidoPen auto-injector (lidocaine) for treatment of cardiac arrhythmias.

Survival provides complete sterile parenteral contract filling and packaging services for prefilled syringes, including pharmaceutical research and development. The company also operates a transtelephonic cardiac monitoring service for high-risk heart patients and markets the CardioBeeper ECG transmitters.

BOSTON (SEPT. 27) BUSINESS WIRE - Stephen J. Sweeney, who guided Boston Edison Co. through some of its best and some of its most difficult years, has announced that he is retiring as the company's chief executive officer, effective Dec. 1, 1990.

He will remain Chairman of the board of directors.

Succeeding Sweeney as chief executive officer will be Bernard W. Reznicek, who has served as president and chief operating officer since joining Edison in October 1987.

In making his announcement, Sweeney said ''the goals I have set for the corporation over the past several years to restore its financial health and prepare it for the 1990s have been accomplished. Boston Edison now has one of the strongest management teams in the utility industry and is prepared to face

the competitive challenges of this decade.''

Specifically, Sweeney cited as major accomplishments:

-- Assembling a new management team to guide the company into the future;

-- Restoring Pilgrim Nuclear Power Station to operation and putting it on a path to operational excellence;

-- Resolving major regulatory and financial uncertainties, which accompanied the 1986 shutdown of Pilgrim, and several critical regulatory decisions in the mid-1980s; and

-- Building constructive working relationships with government officials, public interest groups, labor unions representing Boston Edison employees and customers.

Sweeney especially credited the new management team, which he recruited beginning in 1987, for the company's turnaround.

Sweeney said that in addition to working with Reznicek through the transition, his immediate plans call for devoting time as Chairman of the Greater Boston Chamber of Commerce ''to building public and private partnerships between the business community and the new state administration, which takes office in January.

MARKHAM, ONTARIO (SEPT. 27) BUSINESS WIRE - International Semi-Tech Microelectronics Inc. (''ISTM") Thursday announced the financial results for the first six months ending July 31, 1990.

Net income increased 26 percent to $8,766,000 or 68.2 cents per share (67 cents per share fully diluted) compared to $6,950,000 or 61.5 cents per share (60.1 cents per share fully diluted) for the same period last year. Revenue figures are not comparable with last year's figures as the Company now accounts for its Hong Kong subsidiary on an equity basis.

STM Systems Corp., the company's information technology operations, continues to perform to plan. With the acquisition of Manitoba Data Services ("MDS") from the Manitoba Government now completed, STM Systems Corp. is now the leader in the growing market of information processing ''outsourcing.''

The Company's retail operations, SSMC Inc. ("Singer") and Consumers Distributing (U.S.A.), continued their trend of strong quarterly improvements over previous years. Retail sales in Mexico, the Caribbean, the Pacific Rim and South America were well ahead of plan in the second quarter.

ISTM also announced that its Hong Kong subsidiary, now named Semi-Tech (Global) Limited, announced its six month results today. Revenues doubled over the same period last year to HK$3,346 million with net profit up 2.5 times to HK$188 million. Earnings per share rose to HK 5.8 cents for the first six months.

International Semi-Tech Microelectronics Inc. is a Canadian public company headquartered in Markham, Ontario whose shares are listed on the Toronto Stock Exchange trading under the symbol ISE. Semi-Tech (Global) Limited is a Hong Kong public company whose shares are listed on the Hong Kong Stock Exchange, symbol 448. SSMC Inc. is a U.S public company whose preferred shares are listed on NASDAQ, symbol SSMCP.

GERMANTOWN, TN (SEPT. 27) BUSINESS WIRE - John D. Ferguson, chairman of the board of directors of Community Bancshares Inc. (NASDAQ:CBOG), Thursday announced the resignation of Donald E. Russell, effective immediately.

Russell most recently served as the president and chief executive officer of Community Bancshares Inc. and its wholly owned subsidiary, Community Bank of Germantown. In accepting his resignation, Ferguson cited the former president's 15 years of service and valuable contribution to the corporation.

Russell's resignation came in light of the bank's decision today to announce a special provision of $2.4 million to the allowance for credit losses as a result of management's ongoing review of the bank's loan portfolio.

Recent downturns and uncertainties in the local and national economy led management to identify additional reserve requirements. The addition will increase the allowance to approximately $4.2 million, or 2.6 percent of loans outstanding, and capital will remain in excess of 8 percent.

A search will begin immediately for a new president and chief executive officer. Until that search is complete, Ferguson will serve as chief executive officer for both Community Bancshares Inc. and Community Bank of Germantown.

Community Bancshares Inc. is a bank holding company headquartered in Germantown, a separately incorporated municipality adjacent to Memphis.

Community Bancshares' principal subsidiary is Community Bank of Germantown, which serves Germantown and the Memphis area through seven branch locations.

TOKYO (SEPT. 27) BUSINESS WIRE - Matsushita Electric Industrial Co., Ltd., of Osaka, Japan, has developed the world's first voice-interactive VCR that can provide users with voice-synthesized programming instructions and respond to spoken commands.

Matsushita, which is known for its Panasonic, Technics and Quasar brands, will display the voice-interactive programming VCR in Tokyo at the Japan Electronics Show '90 from October 2-6. Marketing plans and pricing have yet to be announced.

This advance comes in response to growing consumer demand for simplified VCR programming. Matsushita has used its advanced voice recognition and synthesis technology to develop a new technique called Continous Linear compression/expansion Matching alpha (CLM alpha) and applied it to interactive voice programming. The method makes it possible for the VCR to recognize spoken commands from a speaker whose speech pattern hasn't been ''pre-registered.''

The process of programming the Matsushita voice-interactive VCR starts with a synthesized voice instruction from the remote control. The user then responds with a voice command. This voice interaction continues through each phase of the input process, including channel selection, day of the week and starting and ending times. The results are verified by the unit's liquid crystal display (LCD) readout.

Established in 1918, Matsushita Electric Industrial Co., Ltd. (MEI) is the world's leading manufacturer of consumer and industrial electronics products. Annual sales for the fiscal year ended March 1990, reached $37.75 billion. MEI has more than 190,000 employees worldwide, with 122 factories, sales and other offices in 38 countries. Matsushita's 14,000 different electronic products are marketed under the Panasonic, Technics, Quasar and National brand names.

ELMSFORD, NY (SEPT. 27) BUSINESS WIRE - AFP Imaging Corp. (NASDAQ: AFPC) announced Thursday that it has signed an exclusive agreement for the worldwide rights to commercialize a new Bone Density Scanner which will be used in the diagnosis and treatment of Osteoporosis.

This common condition is defined as a loss in bone density or strength which is widely recognized as a leading cause of fractures in the elderly. The technology AFP licensed has been developed and tested by a leading international university and medical center over the past ten years.

Recent advances and product announcements by the pharmaceutical industry have encouraged the diagnostic community that there are now new drugs available which are potentially more effective than in the past, in reducing bone loss, in the treatment of Osteoporosis.

This has also intensified AFP's and the clinical market's interest in this equipment. Bone Densitometers utilize x-rays or other radiation beams to measure a patient's bone density.

Therefore, physicians buying these devices are prime customers for AFP's existing distribution network. It is estimated that there are currently 1,000 densitometers installed worldwide. Typical systems sell for approximately $80,000.

AFP's goal is to place a number of Beta sites in the next six to nine months upon FDA approval and full production thereafter. The company believes it has a significant market opportunity to supply Bone Densitometers based on its exclusive technology and the potential for the new treatment methods.

LONDON (SEPT. 27) BUSINESS WIRE - Sept. 27, British Gas (NYSE:BRG) Thursday announced the acquisition of three oil producing areas in the San Jorge region in southern Argentina, at a cost of US$89 million.

The three fields, Las Heras, Piedra Clavada and Canadon Minerales, comprising some 203,000 acres, were offered as part of the Argentine government's Petroplan, under which certain state-owned fields were put out to tender.

British Gas is in partnership with CADIPSA, a private Argentine company, and together they are jointly formulating plans for additional development of proved reserves.

CADIPSA has experience in operations in the eastern San Jorge region, having been successful in increasing both production and reserves from acquired

fields, and will be the Operator. The Houston office of British Gas will be responsible for management of British Gas' interests in these newly acquired properties.

British Gas views Argentina as an attractive area for further upstream E & P investment. It already has an interest in the North West Basin in Argentina.

This acquisition of producing assets with significant development potential in Argentina is consistent with British Gas' continuing effort to enlarge its international upstream presence.

British Gas, headquartered in London, is the largest integrated gas company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer service to domestic gas customers.

British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to ten ordinary shares.

MADISON, NJ (SEPT. 27) BUSINESS WIRE - Schering-Plough Corporation and Sandoz Pharmaceuticals Corporation Thursday announced the filing of a marketing application in the European Economic Community for 'Leucomax', the two companies' brand of granulocyte macrophage colony stimulating factor (GM-CSF).

GM-CSF is one of a group of natural proteins known as hematologic growth factors that stimulate the growth of white blood cells, a key element of the body's defenses against infection. The compound is being jointly developed by Schering-Plough and Sandoz Pharmaceuticals and will be co-marketed by the two companies.

The European joint application has been submitted for consideration to the EEC's Committee for Proprietary Medicinal Products (CPMP), which represents the United Kingdom, France, Germany, Spain, Portugal, Belgium, Netherlands, Luxembourg, Denmark, Italy, Greece and Ireland. As the first step in the EEC review process, the application was filed on Aug. 17, 1990, with the CPMP and

the Medicines Control Agency, Department of Health, of the United Kingdom.

The application is based on controlled studies in cancer and AIDS patients, as well as patients with other bone marrow failure states. It requests approval for use of 'Leucomax' in the treatment and prophylaxis of low white blood cell counts.

Schering-Plough and Sandoz have also filed applications for marketing approval of 'Leucomax' in the United States and Canada. In the United States, the companies filed a Product License Application with the U.S. Food and Drug Administration on Jan. 31, 1990. In Canada, a New Drug Submission was filed with the Health Protection Branch on June 21, 1990, which granted 'Leucomax' fast-track review status.

In November 1988, Schering-Plough, a pioneer in biotechnology, formed a joint venture with Sandoz, a leader in immunology research, to accelerate the product development and availability of 'Leucomax'. Schering-Plough and Sandoz are research-based companies engaged in the discovery, development, manufacturing and marketing of pharmaceutical products worldwide.

#90270b0747 09/27/1990 ~Business Wire

LONDON (SEPT. 27) BUSINESS WIRE - British Gas (NYSE:BRG) is pleased to announce the completion of an agreement with BP Gas Marketing Limited to transport gas from the Bacton terminal to industrial and commercial sites in Great Britain.

The contract will start October 1, 1990, when BP will have gas available from the Welland field. Welland is the first gas field to come on stream of which British Gas has purchased only 90 percent, in line with its undertaking to the Office of Fair Trading.

This is one of three transportation contracts which British Gas has signed in connection with gas from the Welland field.

The other contracts are with Mobil Gas marketing (UK) Ltd. and Agas Ltd.

A transportation contract was signed earlier this year between British Gas and Quadrant Gas Ltd, a joint venture of Shell and Esso, covering the transportation of gas from St. Fergus in Scotland.

British Gas accepts that competition in the contract gas market is necessary and has taken a number of steps to give independent suppliers ready access to the market.

Once it can be demonstrated that real competition has emerged British Gas will seek to have the constraints of its published price schedules removed in favor of market pricing.

British Gas, headquartered in London, is the largest integrated gas company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain.

Important support activities to its marketing efforts include appliance trading and customer service to domestic gas customers. British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore.

Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to ten ordinary shares.

WILMINGTON, MA (SEPT. 27) BUSINESS WIRE - Dynamics Research Corp. (NASDAQ:DRCO) Thursday announced that net income for the 12 weeks ended Sept. 8, 1990 was $679,000 or $.14 per share, on net revenues of $20,569,000.

This compares to net income of $668,000 or $.13 per share on net revenues of $19,710,000 for the corresponding period in 1989.

For the 36 weeks ended Sept. 8, 1990, revenues were $61,430,000 and net income was $1,914,000, or $.39 per share, compared to revenues of $59,571,000 and net income of $1,882,000 or $.37 per share for the comparable period in 1989.

Albert Rand, president and chief executive officer said, ''We are pursuing our plans of expanding our business base, and have had some successes in developing new customers across all our product lines. These efforts, plus the competitive pressures on pricing our products and services, have impacted our operating income. However, our financial condition remains very strong.''

Dynamics Research Corp. provides a wide range of specialized technical services to the Department of Defense and also manufactures components for

industrial measurement and control.

TRENTON, NJ (SEPT. 27) BUSINESS WIRE - Versus Technology Inc., a world leader in the design and manufacture of telephone-based data transport networks and automatic meter reading equipment, and Landis & Gyr, a leading manufacturer of meters for electric utilities, have formed a marketing partnership for the sale of automatic meter reading (''AMR'') equipment and services to utilities in the United States and Canada.

Versus and Landis & Gyr announced the signing of a sales and marketing accord on Sept. 13, 1990. Under the provisions of this long-term exclusive agreement Landis & Gyr will market and sell Versus telephone-based automatic meter reading systems to electric utilities throughout the United States and Canada. Versus has had similar marketing agreements with Sensus Technologies and Equimeter Inc., BTR plc companies, for water and gas utilities since 1989.

Initially, Landis & Gyr will adapt and market two of its standard product lines for use with the Versus telephone-based AMR system. These lines include the new, SSM-2 family of all solid-state meters and the MS-II line of singlephase watthour meters. Development of other Landis & Gyr products for AMR applications will take place on a continuing basis.

Through its association with Versus, Landis & Gyr will cooperate with Sensus Technologies and Equimeter in the sale and marketing of the Versus telephone-based AMR System to its utility customers. Versus Technology will continue to work closely with telephone companies to assist them in applying its products to permit the offering of telephone-based AMR to utilities.

#90270b0779 09/27/1990 ~Business Wire

BELLEVILLE, NJ (SEPT. 27) BUSINESS WIRE - Faradyne Electronics Corp. (NASDAQ: FARA), the parent company of Total-Tel USA, announced Thursday that net sales for the second quarter ended July 31, were $3,357,679, compared to $3,694,852 for the same period a year ago.

Net earnings for the quarter, including a gain on the sale of the net assets of discontinued operations, were $439,700, or 27 cents per share, compared to $330,160, or 20 cents per share for the same period a year ago. Earnings for continuing operations were $214,660, or 13 cents per share, compared to $402,560 or 25 cents per share for the same quarter last year.

The company said the drop in sales and earnings for continuing operations, principally its Total-Tel USA division, can be attributed mainly to lower long distance rates driven by increased competition.

The company said, however, that the outlook for Total-Tel USA is strong as the division begins to benefit from the recent installation of fixed cost facilities and expansion of its sales and marketing department.

Total-Tel USA, Faradyne's major operating division, is an expanding discount long distance telephone company with established operations in the Northern New Jersey and New York City markets. Total-Tel USA offers a variety of communications services, including mixed-use T-One, fiber-optic FX and nationwide 800 services.

BOSTON (SEPT. 27) BUSINESS WIRE - The management of Psychemedics Corp. (NASDAQ/OTC: PCMC) of Boston said Thursday that they know of no significant business development which would account for the recent stock price decline.

Dr. Lawrence Kaufman, CEO, said, ''We believe it resulted from a single brokerage house selling our stock on behalf of its clients. Since Psychemedics has a small float, the price decline most likely reflects that reality.''

Dr. Kaufman further stated, ''We are pleased with our sales progress and optimistic about the future. We believe that the Psychemedics proprietary drug testing method (RIAH) using hair instead of urinalysis, will continue to gain acceptance.''

Psychemedics Corp. is engaged in drug testing using a proprietary method which analyzes hair for drugs of abuse. Hair testing using Psychemedics technology

is currently being used successfully by more thand 80 corporations throughout the United States. Psychemedics is traded on NASDAQ/Over-the-counter under the symbol ''PCMC.''

STOCKHOLM, SWEEDEN (SEPT. 27) BUSINESS WIRE - Setemer Ericsson and Finmeccanica, majority and minority shareholders respectively of FIAR, have reached an agreement providing for greater integration of FIAR activities with those of the Finmeccanica Group.

According to the agreement, Finmeccanica will become the principal shareholder of FIAR from Jan. 1, 1991, reaching an initial holding of approximately 40 percent. Finmeccanica will assume management control.

The agreement also permits Finmeccanica to purchase successively the remaining Setemer holdings within five years.

''This is a logical step toward restructuring the Italian and European defense industries. It means that Ericsson will concentrate its defense activities to Ericsson Radar Electronics in Sweden in the future,'' said Dr. Lars Ramqvist, Ericsson president and CEO.

FIAR - Fabbrica Italiana Apparecchiature Radio - elettriche S.p.A. is headquartered in Milan, Italy. FIAR employs 1100 people and had net sales of $128 million in 1989. Organizationally, FIAR has belonged to Ericsson's Defense Systems business area.

Ericsson is an international leader in telecommunications. Ericsson is recognized for its advanced systems and products for wired and mobile communications in public and private networks. Ericsson is also a leading supplier of electronic defense systems.

WALTHAM, MASS. (SEPT. 27) BUSINESS WIRE - Input Output Computer Services Inc. (IOCS), a leading provider of high-performance interactive voice response systems, Thursday announced the nationwide availability of its IVRS (IOCS Voice Response Service) Aviation Weather Briefing Service beginning Oct. 1, 1990.

Using AT&T's 900 Information Services Network, pilots can now call IVRS directly at 1-900-370-2424.

IVRS is an example of the Federal Government's goal of ''privatization'' of government sponsored projects. This service is the commercial extension of a highly successful program, which was developed and operated by IOCS and certified by the FAA. Since 1985, IOCS has provided preflight weather information to pilots in 24 local metropolitan areas. In 1989 alone, IVRS provided more than one million pilot briefings. ''After recognizing the wide acceptance of IVRS by the aviation community, we decided to continue providing this proven and reliable weather briefing service which could be used by all pilots -- anywhere, anytime'' said Thomas A. Farrington, president of IOCS.

The IVRS network utilizes IOCS' leading edge voice response system, VOICE-NET. The system continuously receives and stores aviation weather from the National Weather Service. This information is then voiced to the caller through a prompted dialog session. For experienced users, IVRS can be switched into a ''non-prompted'' mode. This saves time by allowing multiple requests to be strung together in advance, reducing the time required to receive the desired briefings. IOCS also maintains a 7-day, 24-hour toll-free support line, 1-800-FOR-IVRS.

IVRS is a low-cost alternative to the traditional Flight Service Specialist. At $1.00/minute pilots can now receive fast, accurate briefings. The ease of use and portability of IVRS are unsurpassed, allowing access to the network from any touch-tone phone. Unlike on-line personal computer alternatives, IVRS requires no initial hardware, software, or modem investment - only the phone.

IOCS was founded in 1969 to provide computer software and systems-integration solutions to government and private-sector organizations. Since the early 1980's, IOCS has offered high-quality voice-response solutions for transaction-processing environments, including banking, insurance, healthcare, and transportation.

IOCS is a privately held corporation. Headquartered at 400 Totten Pond Road in Waltham, Mass., the company has offices nationwide. The telephone number is 617/890-2299.

PONCE, Puerto Rico (SEPT. 30) BUSINESS WIRE - Miguel D. Lausell, chairman of the board of Ponce Federal Bank, F.S.B. (NASDAQ:PFBS), announced Thursday that the Office of Thrift Supervision (OTS) has formally notified the Bank that it has approved the board's appointment of Hans H. Hertell, Esq. as president and chief operating officer of the bank.

Hertell was named president and chief operating officer following the retirement, in August, of Ponce Federal's President and Chief Executive Officer, Ramiro L. Colon Jr., Esq.

Hertell was also approved to serve as a member of the board of directors of the bank.

Hertell, age 39, is an attorney and former partner in the San Juan law firm of Goldman, Antonetti, Ferraiuoli, Axtmayer & Hertell. He is a member of the board of directors of the Federal Home Loan Bank of New York where he has served on both the Executive and Audit Committees. He also served as a director of Ocaso S.A. Compania de Seguros y Reaseguros, a leading reinsurance company headquartered in Madrid, Spain.

Hertell earned his undergraduate degree in 1973 at Fordham University, attend the College of Insurance in New York and received his J.D. degree from the University of Puerto Rico in 1977.

He is a member of the Bar Association of Puerto Rico, the Federal and American

Bar Associations of the United States and has been admitted to practice before the U.S. District Court, District of Puerto Rico; the U.S. Court of Appeals, First Circuit; the Court of International Trade and the U.S. Tax Court. He is a member of the National Association of Bond Lawyers and has also served as a delegate to the American Center for International Leadership in Moscow.

Ponce Federal Bank, F.S.B., with assets of $1.3 billion, is the second largest thrift institution in the Commonwealth of Puerto Rico. The bank is a federally chartered, full-service financial institution headquartered in the southern coastal city of Ponce.

As of June 30, the bank had both tangible and core capital ratios equal to 4.62 percent of adjusted total assets and a risk-based capital ratio equal to 8.10 percent of risk-weighted assets, all of which are in excess of the minimum OTS requirements of 1.5 percent and 3.0 percent of adjusted total assets and 6.4 percent of risk-weighted assets, respectively.

The bank maintains an Island-wide network of 26 branches as well as executive offices in both Ponce and Hato Rey, the financial center of metropolitan San Juan.

LAS VEGAS (SEPT. 27) BUSINESS WIRE - Jackpot Enterprises Inc. (NYSE:J) Thursday reported results for the fourth quarter and fiscal year ended June 30 1990.

For the 12 months ended June 30, 1990, the company reported record revenues of $41,470,000, compared to $37,475,000 for fiscal 1989. Net income for the year was $2,855,000, or 55 cents per share, compared to $4,971,000, or 91 cents per share for the last fiscal year.

Revenues for the quarter ended June 30, 1990 were a record $11,911,000, compared to $10,157,000 reported for the fourth quarter of the prior year. Net income for the fourth quarter of 1990 was $1 million, or 20 cents per share, compared to net income of $924,000, or 17 cents per share, for last year's fourth quarter.

All per share results have been adjusted to reflect a 5 percent stock dividend paid July 31, 1990.

At June 30, 1990, the company had 2,500 gaming machines in operation, compared to 2,051 machines that were operational at June 30, 1989.

The company's working capital ratio at June 30, 1990 was approximately 7 to 1 and its cash, temporary investments and cash equivalents, including those reserved for gaming acquisitions, totalled approximately $26 million.

Jackpot Enterprises Inc. owns and operates coin-operated gaming machines in Las Vegas, Reno and many other Nevada locations. In addition, the company operates stand-alone casinos in Reno and Battle Mountain, Nev. and joint ventures in Deadwood, South Dakota gambling halls.

VANCOUVER, BRITISH COLUMBIA (SEPT. 27) BUSINESS WIRE - Construction of the Phase I Ivanhoe Joint Venture Gold Mine, which commenced in March 1990, has been completed. Mining and processing have begun. The Ivanhoe Mine is a 50/50 venture between Galactic Resources Ltd. (AMEX,TSE,ME,VSE:GLC) and Cornucopia Resources Ltd. (TSE,VSE:CNP)(NASDAQ:CNPGF)

The initial 20-foot high layer of crushed oxide gold ore is being placed on the heap leach pad on a regular production schedule. Leaching of the ore commenced during the week of Sept. 17.

Ivanhoe's first gold bullion pour, expected in October 1990, will commemorate the production startup of the newest gold mine on Nevada's Carlin Gold Trend.

Galactic produces gold with joint venture partner The RTZ Corp. PLC in South Carolina, and at its wholly-owned Summitville Mine in Colorado. Galactic also has precious metal development projects in California, Nevada, Canada, China, and the Philippines.

Galactic Resources Ltd. American Stock Exchange quotes in U.S. dollars are listed daily in The Wall Street Journal under American Stock Exchange Composite Transactions.

#90270b0839 09/27/1990 ~Business Wire

POMONA, N.Y. (SEPT. 27) BUSINESS WIRE - Barr Laboratories Inc. (AMEX:BRL) has released financial results for the fourth quarter and the year ended June 30, 1990:

Net sales in the fourth fiscal quarter of 1990 were $17,255,000, as compared to $17,871,000 for the comparable quarter last year, which represents a 3 percent decrease.

Net earnings for the quarter ended June 30, 1990 were $58,000 or 1 cent per share as compared to a net (loss) of ($202,000) or (3 cents) per share for the comparable quarter last year.

The major reasons for the return to profitability are an improved product mix, which has yielded greater gross margins, and the effects of certain cost reduction programs.

Net sales for the year ended June 30, 1990, aggregated to $70,306,000 as compared to $69,068,000 for last year, which represents a 2 percent increase. Net income for the year ended June 30, 1990, was $1,077,000 or 14 cents per share, as compared to a net (loss) of ($3,333,000) or (44 cents) per share for last year.

Barr Laboratories is a prime manufacturer of a broad range of multi-source pharmaceutical products with manufacturing facilities located in both Northvale, N. J., and Pomona.

HOUSTON (SEPT. 27) BUSINESS WIRE - Daniel W. Douglass has joined the Wyoming-California Pipeline Co. (WyCal) as vice president, marketing.

Douglass has opened a WyCal office in Los Angeles to service transportation customers who will be shipping natural gas on the pipeline, which is currently under development.

Construction on the 670-mile Wyoming to California pipeline is expected to begin late this year. When completed, the WyCal system will provide gas to local distribution companies, electric utilities and other industrial users in the California market.

Douglass had spent the past 15 years of his career with Pacific Enterprises and its subsidiary, Southern California Gas Co. (SoCalGas). He held management positions in gas supply and marketing and was instrumental in conceiving and developing the company's spot market gas purchase program.

Most recently he had directed the implementation of the SoCalGas transportation program to serve the gas needs of commercial/industrial, utility electric generation, wholesale and enhanced oil recovery customers.

Douglass earned a bachelor of arts degree in political science, a law degree and a master's degree in business administration from the University of California at Los Angeles.

The new Los Angeles office for WyCal is located at 21550 Oxnard St. in Woodland Hills, phone 818/596-2301.

WyCal is owned by subsidiaries of The Coastal Corp., a Houston-based energy holding company. Coastal has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

ROCKVILLE, MD (SEPT. 27) BUSINESS WIRE - Ronald B. Cooper has been appointed President, General Electric Consulting Services Corp. (GE Consulting) effective Oct. 1.

Cooper will report to Eugene F. Murphy, senior vice president, GE Communications and Services.

Headquartered in Rockville, GE Consulting provides consulting and software services to assist clients in the planning, design, implementation and support of business information systems. Major areas of focus include technology migration, software support and a comprehensive range of support services for PC users.

Cooper joined General Electric in 1988 as manager, Business Development and Strategy. Since June, 1989, he has served as Staff Executive in the Corporate Executive Office. Prior to joining General Electric, Cooper was a vice president and partner in Strategic Planning Associates, a consulting firm in Washington, D.C.

Cooper holds a Bachelor of Arts degree in International Relations/Political Science from the Univeristy of California, and a MBA from the University of Chicago.

TRENTON, NJ (SEPT. 27) BUSINESS WIRE - Versus Technology, Inc. (NASDAQ: VSTI) Thursday announced the closing of its agreement with Taihan Electric Wire Company, Ltd., of Korea. Previously announced in February 1990, the agreement had been pending approval by the Government of Korea, which was received earlier this month.

Under the terms of the Agreement, Versus will realize an aggregate of $1,000,000 through the private placement of 250,000 shares of Versus Common Stock at $3.00 per share, and its grant of license rights for the VerSuS Derived Channel Alarm Reporting System for an initial payment of $250,000 with royalty payments to continue in the future.

Taihan Electric is a major manufacturer and distributor of gas and electric meters and electric wire and fiber optic products. Taihan currently represents Versus' Automatic Meter Reading Systems to gas and electric utilities in the Far East.

Donald M. Hooton, President of Versus Technology, Inc., commented, "This purchase of Versus common stock and the licensing of our proprietary telemetry technology by Taihan reflects that company's confidence in our products and in the future success of our Company. We look forward to a long and mutually beneficial relationship with this strong marketing partner."

Versus Technology, Inc. designs, manufactures and markets data transport networks that allow telephone companies to offer such new services as automatic meter reading, energy management and alarm reporting. These services can be carried over existing telephone lines without interrupting other uses of the line.

Versus is the world leader in this innovative technology, with networks deployed on three continents (North America, Europe and Australia) in over 40 major cities worldwide. VerSuS equipment is used by more than 100,000 end users who are connected to networks providing automatic meter reading or alarm transport services.

Versus is teamed with industry leaders and some of the world's largest utility meter manufacturers, telephone equipment makers and alarm equipment suppliers, as well as major telephone companies on these three continents.

NEW YORK (SEPT. 27) BUSINESS WIRE - American International Group, Inc. (AIG) announced Thursday its intention to repurchase from time-to-time in the open market shares of its Common stock, depending upon market conditions.

The Board of Directors has authorized the repurchase of up to 10 million shares.

AIG further stated that it knows of no reason for the recent decline in the price of its Common shares other than the general decline in the market.

AIG is the leading U.S.-based international insurance organization and the nation's largest underwriter of commercial and industrial coverages. Its member companies write property, casualty, marine, life and financial services insurance in over 130 countries and jurisdictions, and are engaged in a range of other financial services.

American International Group, Inc.'s common stock is listed on the stock exchanges in New York, London, Paris and Tokyo.

CHICAGO (SEPT. 27) BUSINESS WIRE - John R. Oltman, Andersen Consulting's managing partner of Integration Services has named managing partners for three new worldwide integration services line leadership positions.

John W. Bunnell, 43, has been appointed to the new position of managing partner of integrated business solutions. An integrated business solution is comprised of software, hardware, and services focused on meeting a specific vertical market requirement.

His worldwide role will include responsibility for the organization's Business Integration Partnership program which seeks alliances with third-party providers of information leadership products and services.

Bunnell will also be responsible for Andersen Consulting's business integration centers, which house exhibits demonstrating how to effectively

combine state-of-the-art technologies in work environments ranging from supermarkets to hospitals. Andersen Consulting's nine Business Integration centers are located in Atlanta, Chicago, Evanston, Ill., Dallas and Sao Paulo, Brazil.

Gerald J. Rydberg, 53, has been named to the new position of managing partner of deal services. Major deals are large scale long term business arrangements representing value-added strategic partnerships with clients. His worldwide responsibilities will include leading major deal development and building the organization's major deal capabilities. Multi-year, multi-million dollar projects represent a significant amount of the organization's new business.

Robert J. Ahern, 48, has been appointed to the position of managing partner of strategy and practices. Ahern's worldwide responsibilities will include strategies for the integration market, tools, and techniques to successfully deliver integrated systems solutions, and coordinating resource building and utilization across the organization's worldwide distributed network of Integrated Services practice units.

WASHINGTON (SEPT. 27) COMTEX - The 10-Q report filed at the NASD shows Riverside Capital lost $136,128, at an unknown price per share, on no revenues for the quarter ended March 31, 1990.

This compares with a loss of $175, at an unknown price per share, on no revenues for the same period in 1989.

The company reports that it has limited operations and no revenues have been generated by Riverside except interest income.

The company anticipates operational costs will be limited until such time as significant evaluation work is undertaken regarding prospective mergers or acquisitions.

Riverside's executive offices are located at 6160 South Syracuse Way, Suite 310, Englewood, CA, and its telephone number is (303) 741-0400.

WASHINGTON (SEPT. 27) COMTEX - The 8-K report filed at the SEC shows Sherwood Corp.(TICKER: SHRW) on Sept. 17, 1990, dismissed its independent accountant, KPMG Peat Marwick, and engaged Borek, Stockel & Co. to be its accountant, effective Sept. 18, 1990.

-30- 408
#90270c0014 09/27/1990 ~Comtex
WASHINGTON (SEPT. 27) COMTEX - The 8-K report filed at the SEC shows Sherwood Corp.(TICKER: SHRW) on Sept. 17, 1990, dismissed its independent accountant, KPMG Peat Marwick, and engaged Borek, Stockel & Co. to be its accountant, effective Sept. 18, 1990.

For the previous two fiscal years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

-30- 628
#90270c0015 09/27/1990 ~Comtex
WASHINGTON (SEPT. 27) COMTEX - The 8-K report filed at the SEC shows on Sept. 18, 1990, Caprock Corp.(TICKER: CPRK) and Coopers & Lybrand came to a mutual decision to terminate the engagement of Coopers as Caprock's accountant.

The decision was based on a dispute concerning fees for the most recent audit completed for the fiscal year ended March 31, 1990.

For the previous two fiscal years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

-30- 737
#90270c0016 09/27/1990 ~Comtex
WASHINGTON (SEPT. 27) COMTEX - The 8-K report filed at the SEC shows Farmers Capital Bank Corp.(TICKER: FFKT) announced Sept. 20, 1990 that it intends to repurchase up to 200,000 shares of its outstanding common stock over the next six months, as market conditions permit.

Such acquisitions are intended to occur either in open-market transactions or privately-negotiated, off-market transactions, the company reports.

As of Sept. 20, 1990, there were 3.89 million shares of corporation common stock outstanding.

-30- 687
#90270c0018 09/27/1990 ~Comtex
WASHINGTON (SEPT. 27) COMTEX - The 8-K report filed at the SEC shows Kansas City Life Insurance Co.(TICKER: KCLI) on Sept. 18, 1990, engaged the firm of Ernst & Young as independent accountants.

The company dismissed its former accountant, KPMG Peat Marwick, on the same date.

For the previous two fiscal years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

-30- 653
#90270c0019 09/27/1990 ~Comtex
WASHINGTON (SEPT. 27) COMTEX - The 8-K report filed at the SEC shows Chattem Inc.(TICKER: CHTT) settled a dispute with a former employee in regard to a

demand for compensation, damages, benefits and certain expenses arising out of a contract of employment between the company and the former employee.

The dispute was scheduled to be arbitrated, but was settled prior to the arbitration hearing.

The company reports the terms of the settlement will not have a material adverse effect on the consolidated operating results or financial position of Chattem.

-30- 703

#90270c0020 09/27/1990 ~Comtex

WASHINGTON (SEPT. 27) COMTEX - The 8-K report filed at the SEC shows GBI International Industries Inc.(TICKER: GBII) in 1988 moved its principal offices to Dallas, Texas, and engaged Hein & Associates to be the company's independent accountant.

In September, 1988, GBI moved its principal offices to Tulsa, Oklahoma, and engaged Arthur Andersen & Co. as its principal accountant.

On Sept. 6, 1990, GBI and Arthur Andersen mutually agreed to terminate their client-auditor relationship.

A portion of the audit fees for the year ended March 31, 1989, remain unpaid.

As a result, Arthur Andersen would be deemed as not independent, pursuant to Rule 2.01 of Regulation S-X, and would be precluded from being GBI's prinicpal accountant.

During the most recent fiscal year and interim period for which Arthur Andersen & Co. was engaged, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

WASHINGTON (SEPT. 27) COMTEX - The 8-K report filed at the SEC shows Railroadmen's Federal Savings and Loan Association of Indianapolis, (TICKER: RRMN) on Sept. 18, 1990, announced that it has decided to adopt a plan of merger with Archer Federal Savings and Loan Association in Chicago.

The merger plan would be part of an agreement to convert Archer Federal to a stock-chartered thrift and merge it with Railroadmen's.

Railroadmen's had $439 million in assets and $15.7 million in stockholder's equity, as of June 30, 1990.

Archer Federal had $59 million in assets and a net worth of $7.6 million as of June 30, 1990.

-30- 801

#90270c0022 09/27/1990 ~Comtex

WASHINGTON (SEPT. 27) COMTEX - The 8-K report filed at the SEC shows Asarco (TICKER: AR) and M.I.M. Holdings Ltd.(TICKER: MIMA) agreed in September, 1985, to amend their stock purchase agreement, dated June 24, 1981.

Asarco reports it and M.I.M. wish to extend to July 17, 1993 certain provisions of the 1985 agreement, due to expire Sept. 30, 1990.

Those amendments to be extended include an agreement by M.I.M. that it will not permit any member of the M.I.M. Group to acquire shares or dividends or other distributions available to holders of common stock, if after giving effect to such acquisition M.I.M. and all members would together beneficially own more than 33 1/3% of all shares of common stock.

In that same agreement, Asarco and its members may not acquire shares of M.I.M. except stock dividends or other distributions available to holders of ordinary shares of M.I.M. generally, if Asarco and members of the Asarco Group after acquisition of these shares would together beneficially own more than 40% of all ordinary shares of M.I.M.

#90270c0024 09/27/1990 ~Comtex

WASHINGTON (SEPT. 27) COMTEX - The 8-K report filed at the SEC shows Agnico-Eagle Mines Ltd.(TICKER: AEAGF) announced Sept. 20, 1990, that it will proceed with an underground exploration program on the Vezza Deposit held under option from North American Rare Metals Ltd.(TICKER: NARM) and Dundee-Palliser Resources Inc.

The optioned Vezza property forms part of a 25,625-acre project area controlled and managed by Agnico-Eagle in Vezza, Cavelier and Noyon townships in Quebec.

-30- 655

#90270c0026 09/27/1990 ~Comtex

WASHINGTON (SEPT. 27) COMTEX - The 8-K report filed at the SEC shows River Forest Bancorp (TICKER: RFBC) filed a plan to acquire Madison Financial Corp. and its wholly-owned subsidiaries, Madison National Bank and Trust of Chicago, Madison National Bank of Niles and the First National Bank of Wheeling by cash merger.

By the terms of the agreement, Madison and subsidiaries were to be merged into a wholly-owned subsidiary of River Forest.

Because of delays incurred by Madison, the merger could not become effective prior to Sept. 30, 1990, the date provided in the purchase agreement.

Based partly on increased costs resulting from the delay and Madison's continuing decline in recent results of operations, River Forest proposed a reduction in the purchase price per share, rather than a termination of the merger agreement, from $8.35 per share, subject to adjustments, with a minimum of $8.15, to $7.35 per share with a minimum purchase price of $7.15 per share.

Madison's board of directors approved the amendment to the purchase agreement.

The agreement also extends the date on which the purchase agreement can be terminated from Sept. 30, 1990, to Dec. 28, 1990.

The merger is expected to close early in the fourth quarter of 1990.

-30- 1437

#90270c0027 09/27/1990 ~Comtex

WASHINGTON (SEPT. 27) COMTEX - The 8-K report filed at the SEC shows Relm Communications Corp.(TICKER: RGCY) amended its stock registration statement on form S-8, Registration number 2-75066, to include a section on indemnification of liabilities.

The statement says that insofar as indemnification for liabilities may be permitted to directors, officers and controlling persons of the company, Relm has been advised that in the opinion of the SEC, such indemnification is against public policy and is unenforceable.

-30- 669

#90270c0028 09/27/1990 ~Comtex

WASHINGTON (SEPT. 27) COMTEX - The 8-K report filed at the SEC shows the order by the Iowa Utilites Board (TICKER: IUTL) on Sept. 14, 1990, approved a rate increase of $1.3 million, or 3.9% increase in natural gas rates.

The Iowa Southern Utilities Co. had requested an increase of $1.2 million in November, 1989, and amended its filing to $1.7 million at a later date.

The company currently is collecting a $311,000 temporary increase on an interim basis.

The higher rate is expected to be in effect no sooner than 60 days from the date of the order.

OSAKA, JAPAN (SEPT. 27) - Nomura Trading Co., an Osaka-based Japanese trading company, said Thursday it has set up a joint venture in Laos with the Thai importer-exporter Saeed and with Laotian entrepreneurs.

Nomura is the first Japanese company to establish a joint venture in Laos.

Nomura officials said the joint venture Santi Phap was capitalized at 30 million yen (219,000 dollars) -- 50 percent owned by Saeed, 30 percent by Nomura and the remaining 20 percent by Laotian entrepreneurs.

The Vientiane-based company will employ about 15 people and engage in exporting wood and farm products to Japan, Thailand and other Southeast Asian countries, they said.

TOKYO (SEPT. 27) - The 141 Japanese hostages Iraq is using as human shields are being kept on the move, taken from one part of the country to the other, press reports here said Thursday.

The reports quoted Kunio Katakura, the Japanese ambassador in Baghdad, as saying the group was "experiencing serious mental exhaustion."

Mr. Katakura reported that he had recently received a letter, written in Japanese and English, from three employees of a Japanese firm who were believed to be detained in a camp in northern Iraq.

The men wrote that they had been separated from another group of three Japanese on August 30 and had lost all contact with the outside world after the Iraqi authorities confiscated their radio.

There are currently 340 Japanese citizens stuck in Iraq, with 141 of them being used as shields against the eventuality of a U.S. military strike in retaliation for Baghdad's August 2 invasion of Kuwait.

Takako Doi, president of the main opposition Japan Socialist Party (JSP), Wednesday met Iraqi Ambassador Rashid al-Rifai in a bid to obtain the release of elderly and ill Japanese hostages, party sources said.

She also asked the Iraqi authorities to allow a JSP delegation to visit Iraq in early October, they said.

TOKYO (SEPT. 27) - Japan has no immediate plans to follow a U.S. decision to release part of its crude oil reserves, Japanese officials said Thursday.

The United States decided Wednesday to sell five million barrels of crude oil from its 590 million barrel reserves to try to calm panicky financial markets.

International Trade and Industry Ministry officials said they believed the U.S. decision was intended only to test its effect in containing the rise of oil prices.

The ministry has decided against tapping into reserves here until there is an actual shortage of oil in the domestic market, the officials said.

The Natural Resources and Energy Agency reported Thursday that Japan's crude oil reserves at the end of August totaled 521.5 million barrels, the equivalent of 142 days' consumption.

The reserves were almost unchanged from the month-before level of 519.2 million barrels.

PARIS (SEPT. 27) - Consumer prices in France rose 0.6 percent in August compared with 0.3 percent in July, the statistical office INSEE said Thursday.

This brings price rises since the beginning of the year to 2.5 percent and inflation is now running at an annual rate of 3.5 percent.

Manufactured products showed a sharp 1.1 percent rise in August, caused chiefly by the rise in oil prices due to the Gulf crisis. Food prices rose 0.3 percent while services rose only 0.1 percent.

TEHERAN (SEPT. 27) - Leading Iranian hardliner Ali Akbar Mohtashemi Thursday

called on the country to prepare for holy war against the United States and urged people to join in a massive demonstration here.

"From this moment, we must begin to organize the holy war and the struggle against America," the Teheran MP and former interior minister told the Abrar newspaper.

Mr. Mohtashemi urged people to "take part in a massive way" in a demonstration called for Friday in Teheran by the Islamic Propagation Organization to protest the deployment of U.S. troops in Saudi Arabia.

"Tomorrow the people must denounce the aggression of the United States and its allies against the maritime borders of Iran, and they must take part in the holy war called forth by the guide of the Islamic revolution," he said.

Spiritual leader Ayatollah Ali Khamenei said September 12 that popular Islamic resistance to the U.S. presence in the Gulf amounted to holy war.

His statement was seen as a challenge to the government of President Ali Akbar Hashemi Rafsanjani, which has sought to open up to the West.

Washington has deployed more than 140,000 troops in a bid to dissuade Iraq from attacking Gulf states after its invasion of Kuwait and to enforce sanctions ordered against Baghdad by the U.N. Security Council.

On Wednesday Foreign Minister Ali Akbar Velayati, in New York for the U.N. General Assembly, distanced himself from the demonstration called for Friday, saying the government had not organized it.

The Islamic Propagation Organization is considered however to be a government agency.

Mr. Velayati also told U.S. television that Iran opposed the "permanent" presence of foreign forces in the Gulf, a hint that the government would accept a temporary build-up despite the opposition in hardline circles.

Iran has condemned the Iraqi invasion of Kuwait and pledged to respect the U.N. embargo. But Mr. Velayati said that if the sanctions failed, "there is no solution but a military solution."

An Islamic delegation led by the chief of Jordan's Moslem Brotherhood Mohammed Abdel Rahman Khalifeh arrived here Thursday to take part in the demonstration.

SYDNEY (SEPT. 27) - Australia's unadjusted current account deficit for August reached 1.81 billion dollars (1.5 billion U.S.), a two percent rise on the

previous month, the Bureau of Statistics reported Thursday.

The unadjusted merchandise trade balance recorded a deficit of 359 million dollars (297 million U.S.) slightly below July's deficit of 375 million (310 million U.S.).

Imports rose three percent in August to 4.57 billion dollars (3.8 billion U.S.) while exports rose four percent to 4.21 billion dollars (3.5 billion U.S.).

The current account deficit was higher than the revised 1.77 billion dollar (1.5 billion U.S.) shortfall recorded in July, but within the forecasts of financial analysts.

The Australian dollar failed to budge from its pre-announcement level of 82.90 U.S. cents, which was slightly below Wednesday's close of 83.3 U.S. cents.

Treasurer Paul Keating said in his August budget speech that Australia would post a current account deficit of 18 billion dollars (14.9 billion U.S.) in the year to June 30, 1991 compared with a 20.7 billion dollars (17.1 billion U.S.) shortfall in the previous 12 months.

The bureau said the cumulative current account deficit for the first two months of fiscal 199091 stood at 3.6 billion dollars (three billion U.S.) compared with 4.5 billion dollars (3.7 billion U.S.) for the same period last year.

The seasonally-adjusted current account deficit was 1.50 billion dollars (1.2 billion U.S.), about 17 percent higher than the revised 1.28 billion dollar (1.1 billion U.S.) deficit recorded in July.

The bureau said the seasonally adjusted merchandise trade balance for August showed a deficit of 45 million dollars (37 million U.S.) after an 84 million dollar (69 million U.S.) surplus in July.

The current account measures the difference in value between ingoing and outgoing transactions in goods, services, income and transfers.

Manila (SEPT. 27) - Washington's ambassador to Manila Thursday warned American citizens in the Philippines ''to be careful'' in view of escalating bomb attacks on the branches of U.S. multinational concerns in the country's capital Manila.

Ambassador Nicholas Platt, speaking to reporters, said the latest attacks could be the work of rightist or leftist extremists.

Three more bombs went off in overnight attacks on two U.S.-dominated pharmaceutical firms and the American-Philippine Colgate Palmolive branch in Manila's Makati business district. The blasts caused damage but no injuries. A fourth bomb hurled from a car at the Boston bank branch failed to go off.

On Wednesday bombs blew up at a bottling plant of the multinational soft drink concern Coca Cola and at a plant owned by Pepsi Cola.

Philippine authorities have blamed the attacks on renegade soldiers trying to topple President Corazon Aquino.

Platt said Philippine Defence Minister Fidel Ramos had told him that he shared Washington's concern over the recent bombings which began in mid-August.

At least four suspects have been arrested in connection with the attacks.

Colombo (SEPT. 27) - Rebels of the Liberation Tigers of Tamil Eelam (Ltte) moved into a main military camp in northern Sri Lanka hours after government troops vacated it, an official said here Thursday.

The government had invited the International Committee of the Red Cross (Icrc) to take over the Jaffna Fort after the troops moved out on Wednesday, but the Tamil rebels had already moved in, the official noted.

An advisor to the Sri Lankan president on international affairs, Bradman Weerakoon, said that the Icrc was presently holding negotiations with the Ltte ''to get them out of the fort.''

Deputy Defence Minister Ranjan Wijeratne had said on Wednesday that over 1,000 troops in the fort had withdrawn and that the Icrc was expected to take over the site, enabling the reopening of the hospital situated a kilometre away.

Wijeratne said that the main purpose of the operations around the Jaffna Fort was to rescue about 200 security personnel and policemen who had been under siege for over three months and to resume the functions of the hospital which has been shut down since fighting broke out between the Tamil rebels,

fighting for an independent homeland in the north east for the minority Tamils, and government troops on June 11.

In two separate incidents in the eastern province, three suspected Tamil rebels were shot dead by government troops, military officials said Thursday.

#90270d1070 09/27/1990 ~French/German News Agency
WELLINGTON (SEPT. 27) - New Zealand Lands Minister Peter Tapsell said Thursday he had refused a Japanese company permission to buy one of the country's top golf courses.

Mr. Tapsell said he was not influenced by recent "unwarranted criticism of purchases of New Zealand land by Japanese" in refusing the sale of the Wairakei International Golf Course and the adjacent Wairekei Hotel.

Japan Golf Systems Company Ltd. said August 28 it was to purchase Wairakei for an undisclosed sum from the U.S.-based South Pacific Hotels Corp.

Mr. Tapsell said he welcomed Japanese investment but conceded that his decision could be seen as xenophobic.

The Japanese firm's announcement on the course, which is in Mr. Tapsell's own electorate, had resulted in large amounts of mail opposing the sale, he said.

"I have not been persuaded that the sale would serve the greater public good," Mr. Tapsell said.

The hotel and golf course, which are 300 kilometres (186 miles) south of here, had been part of the state-owned Tourist Hotel Corp. which was privatized earlier this year. All sales of land need government approval.

Japan Golf Systems had not proved that the sale would be in both the local and national interest and would provide significant long-term benefits to the country, the lands minister said at a press conference.

Mr. Tapsell declined to say what specifically led him to turn down the application, adding that the application was "deficient in general principle."

But when pressed, he said the golf course was "of special significance to New Zealanders and was the flagship of golf courses in New Zealand."

Asian investment in New Zealand would continue provided it met statutory conditions, the minister said.

He also said he was concerned at what he saw as unwarranted resentment of purchases of New Zealand land by Japanese. The increase in foreign ownership of New Zealand land was "infinitessimal," he added.

Applications from foreign interests to buy land rose from 5,529 hectares (13,656 acres) in 1984 to 17,310 hectares (42,755 acres) in 1990, Mr. Tapsell said.

Approvals granted increased from 4,917 hectares in 1984 to 9,114 hectares in

1990.

#90270d1120 09/27/1990 ~French/German News Agency
TOKYO (SEPT. 27) - Tanifuji Machine Industries Co. Ltd., a medium-sized Japanese electronics maker, Thursday announced the sacking of an executive for manipulating sales figures totaling four billion yen (29.2 million dollars).

Tanifuji officials said in a report to the Tokyo Stock Exchange that the executive in charge of electronic equipment was found to have given false figures of sales between May and August this year, forcing the company to revise its projected sales and profits during the 12 months to next March sharply downward.

They said Tanifuji, listed on the second section of the Tokyo Stock Exchange, had revised its projected sales during the period from 23 billion yen (168 million dollars) to 17.4 billion yen (168 million dollars).

Net profits were now estimated at 410 million yen (three million dollars), down 80 percent from the projected two billion yen (14.6 million dollars), the report said.

The company is considering filing a damage suit against its former executive, depending on the result of further investigations, they said.

#90270d1170 09/27/1990 ~French/German News Agency
LONDON (SEPT. 27) - High winds at sea, possibly enhanced by the so-called "global warming" effect, trigger the release of natural chemicals into the atmosphere which help produce an opposite cooling effect, Nature magazine reported Thursday.

Nature said it was "well established" that whitecaps and sea bubbles produced by high winds release natural aerosols into the air which then form droplets in clouds and increase their ability to screen some radiation from the sun.

"Our calculations indicate that an increase in wind speeds ... would produce an increase in cloud albedo sufficient to compensate for predicted levels of global warming," the article stated.

It added that the sea-salt aerosol particles generated on the ocean surface by high winds could have "important influences" on climate and the marine atmosphere.

Ironically, the higher winds which help release the natural aerosols may themselves be a direct result of global warming in certain areas.

-30- 1159
#90270d1190 09/27/1990 ~French/German News Agency
TAIPEI (SEPT. 27) - Despite government efforts to bail out the sagging stock market, share prices continued to slide during this shortened trading week amid deepening worries over a domestic recession and the Gulf situation.

An 8.6 billion Taiwan dollar (315 million U.S.) labor pension fund, which started entering the market Monday, failed to boost activity on the Taiwan Stock Exchange where the weighted price index has lost 78 per cent in seven months.

Following the previous week's 10.6 per cent plunge, the 216-issue index surrendered 406.4 points, or 13.1 per cent, to finish the week Thursday at 2,705.01 points.

The bourse was to be closed Friday and Saturday for public holidays.

Most investors still hestitated to step into the depressed market, bringing average daily turnover down to 522 million shares, compared with the 601 million issues the previous week.

The daily value of counters traded averaged 13.67 billion Taiwan dollars (501 million U.S.), down 25.8 per cent from 18.03 billion Taiwan dollars (660 million U.S.) one week earlier.

The market got off to a bearish start Monday with the benchmark index nosediving 191.17 points while the injection of the labor pension fund appropriated by the Finance Ministry failed to improve the pessimistic mood.

Soaring crude oil prices, weakening foreign stock markets and languid economic activity had driven investors away from the once-booming bourse, leaving it defenseless against steep falls, analysts said.

The index saw other setbacks of 125.12 points Tuesday and 105.06 points Wednesday, prompting local business leaders to seek help from authorities to bail out the flagging market.

Heartened by the government's reiteration to save the market and a rumored reduction of the 0.6 per cent stock transaction tax, the sensitive index recouped 108.22 points Thursday.

The cabinet passed Thursday a proposal by the Finance Ministry to allow qualified private brokerages to finance stud feed 50 billion Taiwan dollars (1.83 billion U.S.) into the liquidity-starved stock market.

But in the face of the grim economic picture most analysts were pessimistic,

predicting that the index would test the resistance barrier of 2,500 points next week.

#90270d1220 09/27/1990 ~French/German News Agency

Bangkok (SEPT. 27) - The 12-member European Community (E.C.) has lodged a protest with Burma's military government complaining about recent arrests and intimidation of its diplomatic staff, a senior Western diplomat said here Thursday.

''We have finally gotten fed up, and we made strong protests,'' said the Rangoon-based diplomat, who requested anonymity.

The E.C. protest was lodged Friday with Rangoon's military-led State Law and Order Restoration Council (Slorc) which has ruled the country since the military seized power in an September 1988 coup.

The note came after Burmese employed by the U.S., Australian, British and West German missions were dragged from their homes for interrogation by the military intelligence. They were questioned about the political opinions of the diplomats at their misssions.

The protest note complained about arrests of Burmese politicians, the trend away from democracy, arrests and harassment of locally hired embassy staff and ''illegal incursions into diplomatic compounds by armed soldiers''.

''An increasing number of governments view with horror what is continuing to happen in Burma,'' said the diplomat, adding that the United States, Australia,

New Zealand, Japan, Sweden and Canada had also endorsed the protest.

#90270d1240 09/27/1990 ~French/German News Agency

NEW DELHI (SEPT. 27) - Police fired at thousands of demonstrators in the capital Thursday, killing one and wounding three others, as violent protests against a caste-based job quota scheme continued unabated in northern India.

The Press Trust of India (PTI) news agency said police here opened fire when the crowd, protesting an August 7 government decision to allocate nearly half of state jobs to deprived lower castes, went on a rampage torching vehicles.

The shooting in the Shakarpur lower midddle class residential area in the eastern part of New Delhi raised to five the toll in police firing here in the past three days. One more person was killed by police in northern Jammu city.

Two suicide attempts, one by a girl, were reported, along with street battles

and arson in other parts of New Delhi and more than a dozen towns and cities in northern India, where caste divisions are most acute and the anti-quota campaign has taken its most violent form.

A 13-year-old student, Sachin Kumar, killed himself late Wednesday by taking poison in public in the Hapur area of Modinagar, which is under an indefinite curfew after clashes between police and student protestors, PTI said.

Army troops moved into Jaipur city in the north western after students enforced a successful "people's curfew" Wednesday, but reports from the region Thursday said the situation was quiet.

But in Meerut, some 60 kilometers north of here, demonstrators torched two trains as three people wounded in police firing in the area Wednesday died of their injuries early Thursday.

The violence also gripped Prime Minister Vishwanath Praptap Singh's hometown of Allahabad, where students blockaded rail traffic and burned government buildings.

A student tried to burn himself alive in Tikri Kalan, in west Delhi Thursday, but he was rushed to hospital by police, PTI said. It gave no further details.

In the Haryana state capital of Chandigarh a girl student identified only as Archana tried to commit suicide by an overdose of pills, and was also rushed to hospital, the agency said.

Pitched street battles raged in the capital Wednesday during a strike called by the anti-quota agitators, virtually crippling normal life in the city.

In Haryana state adjoining Delhi one person was killed and 26 injured in a clash between those for and against the quotas, before police broke up the fight in Kalanwali, Sirsa district.

#90270d1270 09/27/1990 ~French/German News Agency
SEOUL (SEPT. 27) - South Korea's trade with the Soviet Union has rocketted this year as the two countries move closer to establishing full diplomatic ties, officials here said Thursday.

Officials of the Trade and Industry Ministry said South Korea's exports to the Soviet Union for first seven months to July amounted to 229 million dollars, a more than sixfold increase on the same period last year.

South Korea's imports from the Soviet Union, however, decreased 12.2 percent to 187 million dollars during the same period.

An official said the increase was because local business firms shipped huge amounts of electronic and textile products to the Soviet Union in the hope of ensuring a future market share, despite possible arrears on payment from Moscow.

South Korea and the Soviet Union are expected to announce the establishment of diplomatic ties when their foreign ministers meet in New York on Sunday.

South Korea's trade with East European countries also soared during the same period, with exports amounting to 281 million dollars, up 136.1 percent, against imports of 105 million dollars, up 34.6 percent.

Exports to China decreased by 5.9 percent to 850 million dollars for the seven months to July but imports increased 12.5 percent to 1.1 billion dollars.

During the same period, South Korea's overall exports to all countries reached 35.25 billion dollars, up 2.3 percent, as imports hit 37.96 billion dollars, up 10.7 percent.

#90270d1300 09/27/1990 ~French/German News Agency

Jakarta (SEPT. 27) - China officially re-established its diplomatic mission in Indonesia Thursday with the hoisting of its national flag in of its interim Embassy in the Borobudur Intercontinental Hotel in Jakarta.

China and Indonesia normalised diplomatic ties last month after more than 23 years of suspension which followed charges by Indonesia that China had been involved in an abortive communist coup here in 1965.

Intensive efforts to normalise the relations began last year at a meeting in Tokyo between Indonesian President Suharto and Chinese Foreign Minister Qian Qichen.

The Chinese embassy here started functioning last Monday with the appointment of Consul Liu Xiensheng as interim charge d'affaires. The embassy is currently staffed by six people.

Liu said his government would soon appoint a permanent ambassador to Jakarta to coincide with the appointment of an Indonesian ambassador to China.

The Indonesian government has offered China a plot of land in an elite foreign diplomatic areas in the Kunmingan neighbourhood in central Jakarta.

The city municipal government had demolished the former Chinese embassy building to help meet the pressing demand for more space for business activity in Jakarta.

#90270d1330 09/27/1990 ~French/German News Agency
LONDON (SEPT. 27) - British building materials firm Redland said Thursday its taxable profit rose 3.7 percent in the first half of this year to 108 million pounds (203 million dollars), up from 104.1 million (196 million dollars).

The figure was in line with market forecasts of profit of between 105 million and 120 million pounds, and Redland shares were up 15 pence at 506 after the news in a rising London market.

Sales were up 11.8 percent over the first half of last year at 776.4 million pounds (1.46 billion dollars) against 694.0 million (1.3 billion dollars).

Earnings per share fell to 24.0 pence from 25.7 while interim dividend was set at 8.25 pence, up from 7.5.

-30- 855
#90270d1350 09/27/1990 ~French/German News Agency
BERLIN (SEPT. 27) - Thousands of East Germans are rushing to have their names removed from Church registries before a religion tax takes effect following German unification next Wednesday, authorities said here Thursday.

"The rush was so bad yesterday that we had to close for an hour," said one of the officials processing them in East Berlin.

More than half the population is officially listed as having a religion.

From January 1, every East German who has been baptized will have to pay a religion tax equivalent to nine percent of their income tax, as is now the case under West German law. The sum goes into Church coffers.

The only way to escape is by officially declaring one has left the Church, a process carried out free of charge by East German public notaries until Tuesday.

After that date, the process must be done privately by West German officials at a cost of about 180 Deutsche marks (112 dollars).

Official statistics list 46 percent of East Germans as Protestant and seven percent as Roman Catholic.

-30- 1227
#90270d1420 09/27/1990 ~French/German News Agency
LONDON (SEPT. 27) - Brent North Sea crude oil prices fell back in London on Thursday morning, following U.S. President George Bush's announcement that

five million barrels of crude from U.S. strategic stocks were to be sold.

Brent for November delivery was quoted at 36.85 dollars a barrel mid-morning against 37.55 dollars at Wednesday's close.

The fall was largely due to the news of the U.S. stock sales, but "the amount involved is almost insignificant" and is unlikely to influence the market for long, said Richard Jones, an analyst wih County NatWest.

The outlook remained bullish because of the risk of a war in the Gulf, but in the short term prices could fall back to around 34 to 35 dollars a barrel, he added.

Profit-taking sparked when prices hit their highest level in 10 years at the beginning of the week, and encouraged by American Petrol Institute (API) figures out Tuesday and showing a rise in U.S. petrol and domestic fuel stocks were likely to continue, Mr. Jones said.

"The initial wave of buying" after Iraq's invasion of Kuwait on August 2 was drying up "as there is no actual shortage of products and no cold weather," he added.

#90270d1530 09/27/1990 ~French/German News Agency

TEL AVIV (SEPT. 27) - An old Jewish manuscript writen by a Rabbi in 1935 predicted an apocalyptic Mideast war in October 1990, the ultra-orthodox Yom Hashishi weekly reported Thursday.

"The war will break out in the (Jewish holiday) tabernacles in 1990," wrote renowned Jerusalem kabbalist Rabbi Ha'im Shvili in 1935, referring to the festival which runs from October 6 to 10. "The war will not be long but will be crushing. Arabs will fight one against the other, and strange and different coalitions will be formed," the mystic predicted in a book entitled "The Accounts of Redemption".

The war of 1990 will be apocalyptic he wrote, "with real germ warfare, electric bombs and deadly atomic weapons, thought these will not be used. God will protect his sons and the land of Israel in an amazing way from the bombs and the gas. The enemy airplanes will blow up in the skies, and a huge commotion will break out in the enemy camps, with one killing the other out of madness."

Despite the mass killings Israel would benefit from the war, the rabbi predicted. "Jerusalem will be calm, peace will flood through the area, and no enemy will dare attack."

#90270d1760 09/27/1990 ~French/German News Agency
BANGKOK (SEPT. 27) - Buddhist monks are excommunicating members of Burma's armed forces in a show of protest that may have far-reaching consequences in the military-ruled and mainly Buddhist nation, a senior Rangoon-based diplomat said here Thursday.

He said the movement was started by senior abbots in the central city of Mandalay, home to up to 80,000 monks, but had spread to Sagaing, to the north, and Rangoon to the south.

"This is having a very major impact on the rank-and-file of the military, on the simple soldier," said the diplomat, who asked not to be named.

Burma's generals seized power in a bloody coup two years ago to crush a nationwide pro-democracy movement that swept the country of about 41 million people, of whom 85 per cent are Buddhist.

The junta held promised elections in May which were won by the main pro-democracy party, the National League for Democracy (NLD) despite its leaders, including Aung San Suu Kyi, the charismatic daughter of independence hero General Aung San, being detained since the middle of last year.

The military have so far refused to hand over power and arrested several more NLD and pro-democracy leaders.

The diplomat said there had been recent reports of almost daily anti-junta demonstrations in Mandalay, where students, their parents and headmasters had been detained or held for questioning.

Several senior abbots in Mandalay have signed a letter saying "they are turning down their (begging) bowls -- that is, not accepting alms from military families," the diplomat said.

This was in effect excommunication, denying soldiers and their families the possibility of earning merit in keeping with Buddhist practice. Monks were also refusing to attend such crucial, major ceremonies as funerals or weddings for

military families, he explained.

He added that the excommunication movement was supported by most monks in Mandalay where the Buddhist clergy has a long history of political activism and had spread to Sagaing and at least two monasteries in Rangoon.

The diplomat said that some officers in Burma's 200,000-strong armed forces "are becoming deeply disquieted by the way things are going."

They were "more particularly disturbed by the way the religious bodies of the country, particularly the monks, have started to show that they are prepared to enter the political arena."

ATHENS (SEPT. 27) - Greek airport officials said Thursday that 200 international and domestic flights would be cancelled in the evening because of an air controllers' strike, but that a stoppage scheduled for Friday had been called off.

The only planes taking off from Greece would be those flying to the Gulf states, and official and military flights, officials said.

Industrial action by airport staff has disrupted air travel inside and out of Greece intermittently for the past two weeks, against a wider background of recurrent general strikes.

Air controllers union chairman Georges Bissias said the 477 controllers want to be allowed to retire after 30 years of service, instead of 35.

Meanwhile private and public sectors remained paralysed on the second day of a 48-hour strike, the third in three weeks, called by two leading union federations to protest an austerity programme proposed by the conservative government to overhaul the social security and pension systems.

Government ministries, industry, banks and public services have all been hit.

Although life was expected to return to normal Friday, some unions, including those covering electricity and telecommunications workers, were to discuss whether to remain on strike later Thursday.

The powerful banking federation, with 50,000 members, have already decided to stay out Friday, when parliament is to take a final vote on the proposed law.

The general strike is the sixth to hit Greece since the Conservatives took office in April.

MOSCOW (SEPT. 27) - Warning that a "considerable" portion of the Soviet Union's agricultural produce was under "direct threat of loss", the government on Thursday ordered the despatch of a wide range of workers to the fields to gather crops.

The decree covered manual labourers and office-workers, engineers and technicians, and said staff should be made available for farm work even if that meant closing down some businesses temporarily.

This year's output of grain, fruit and vegetables appears abundant. As is usual each year, the authorities mobilised many extra hands at the start of summer, but society's generally disorganised state plus the onset of autumn rains has made the response patchy.

In some regions, a state of emergency has been declared to force factory workers into the fields.

The military is helping out, with harvesting and transport. Defence Minister Dmitri Yazov said there were 23,000 soldiers at work in the Moscow region.

Collective and state farms have been told to sell their wheat to the state up to November 1, with the state ready to buy all available stocks, the decree said. As an encouragement to the farms to meet commitments, payment is being offered in the form of farm machinery of various kinds.

BUCHAREST (SEPT. 27) - Nicu Ceausescu, eldest son of executed dictator Nicolae Ceausescu, was released for three months for "medical reasons" here Thursday just six days after being sentenced to 20 years in prison.

The military court of Bucharest said it had decided "unanimously" to free Nicu 39, after hearing a report by a "senior medical committee". But he would have to "remain at the disposal of justice officials" during the period.

Nicu was sentenced to jail September 21 for "instigation of murder" for ordering security forces to open fire on anti-communist demonstrators in the central city of Sibiu, where he was the local communist party head, on December 21.

The massacre, which left 89 people dead, occurred during the uprising during which his father was overthrown and executed.

Tel Aviv (SEPT. 27) - Israel's best-loved and most elusive bank-robber escaped through the fingers of police yet again Thursday, riding away uncaught on a powerful motorbike from his 20th bank heist in 21 months.

Police reported that the robber on the red Suzuki motorcycle had held up a bank in Petah Tikva, just outside Tel Aviv, stealing some 7,000 shekels (3,500 dollars) from the bank clerk nearest the door.

Initial reports indicated that police had arrested a number of suspects, but Police Commissioner Ya'acov Turner later told Israel Radio that detectives were no closer to solving the mystery.

The Israeli press has for months been filled with good-natured speculation on the identity of the bank-robber (perhaps a former army officer or policeman) who has acted with such precision that the police have no clues except for a single finger-print which is not identified on their computers.

The robber also uses a motorbike which is unregistered, enters the banks for little more than a minute, never takes off his helmet, takes money only from the cashier nearest the door and always manages to leave long before the police arrive.

So far the bank robber has netted some 300,000 shekels (150,000 dollars), but more worrying for police is the acute embarrassment he has caused the crack Tel Aviv detectives investigating the case.

KUALA LUMPUR (SEPT. 27) - Pakistan bought 450,000 barrels of crude oil for October shipment from Malaysia Thursday, oil industry sources said.

The sources said that the oil was bought on the spot market, where Malaysia's Tapis benchmark crude was being quoted at about 30 U.S. dollars a barrel.

Azlam Iqbal, secretary to the Pakistani ministry of petroleum and natural resources, who is in town, was believed to have negotiated the price with officials of Petronas, Malaysia's national oil company.

Pakistan requested Malaysia in August to sell it between 15,000 and 20,000 barrels per day to help it make up for supply shortages caused by the United Nations embargo imposed on Iraq for invading Kuwait on August 2.

HANOI (SEPT. 27) - Trade between China's Yunnan province and Hoang Lien Son province in Vietnam has increased rapidly over the past two years, the official Vietnam News Agency (VNA) said Thursday.

VNA said trade had reached an estimated 12 billion dong (more than one million U.S. dollars) but added that up to now the transactions had been conducted only at local level.

The Sino-Vietnamese border was unofficially reopened for trade at the beginning of 1988 after being closed since China invaded northern Vietnam in February 1979.

VNA said Hoang Lien Son province would send a business delegation to Yunnan to study the market and ways of increasing trade between the two provinces.

Hoang Lien Son exports about 20 products to Yunnan and imports about 30, VNA said, without giving details.

Vietnam exports mainly foods and metals, while importing consumer goods, such as beer, electronic equipment and porcelain from China.

KUALA LUMPUR (SEPT. 27) - U.S. electronics companies operating here voiced concern on Thursday over the recent influx of investment which they say has caused an acute labor shortage in Malaysia.

"There may be a need to control the investment climate to create an environment appropriate for existing companies to grow and develop simultaneously with the country," the Malaysian-American Electronics Industry (MAEI) said.

The MAEI, grouping 15 U.S.-owned electronics companies, said in its annual status of the industry report that waste treatment in Malaysia had also caused many problems.

"Waste continues to build up as the companies expand and make waste centres essential if the companies are to function efficiently," the report said.

The MAEI said it saw a need for the problem to be addressed and resolved as quickly as possible to ensure a steady growth in the industry.

The report said that sales and exports by the MAEI companies were expected to top 7.6 billion dollars (2.8 billion U.S.) this year, up 13 percent from last year and would grow at least 14 percent next year.

Malaysia, the third-largest producer and the largest exporter of

semiconductors in the world, is enjoying an investment boom which is beginning to strain its skilled labor pool and infrastructure.

The Malaysian Industrial Development Authority approved investments worth 18 billion dollars (6.7 billion U.S.) in the first half of this year.

#90270d2260 09/27/1990 ~French/German News Agency

Wiesbaden (SEPT. 27) - Rising oil and petrol prices have triggered a sudden boost in the overall cost of living in West Germany, authorities said here Thursday.

The cost of living index jumped 0.4 percent in September compared to August as a result of the higher energy prices, the Federal Office of Statistics said in a preliminary report for September.

The office, basing its estimate on economic data from four key West German states, said the living costs hike has boosted annual inflation to 3.0 percent, the highest since last December.

#90270d2320 09/27/1990 ~French/German News Agency

Berlin (SEPT. 27) - Germans will mark their reunification on October 3 without pomp and ceremony. The festivities planned to celebrate the end of 41 years of separation - fireworks, bell-ringing, street parties, political and cultural events - are modest in view of the occasion.

''October 3 shall be more of an inward-looking celebration,'' West German Chancellor Helmut Kohl decided, not wanting to fuel fears of a powerful united Germany with exaggerated displays of nationalism.

Most people in the Federal Republic and the disappearing German Democratic Republic are happier about a day off work than about German unification anyway.

Almost a year after the fall of the Communist dictatorship in the East, euphoria has given way to worries about job security and the costs of unification.

Conservative Finance Minister Theo Waigel has chided his countrymen for their joylessness on the threshold of unification. ''There is a mood of timidity and anxiety,'' he said.

The West German government expects fewer people will take to the streets on the eve of unification than did when West Germany won the world football championship on July 8.

#90270d2350 09/27/1990 ~French/German News Agency
SYDNEY (SEPT. 27) - Australian energy producer Santos Ltd. announced Thursday a 7.3 per cent jump in half yearly net profit to 42.7 million Australian dollars (35 million U.S.) for the six months to June 30.

Gross operating profit surged 21.4 per cent to 86.2 million dollars (71 million U.S.) during the period.

Directors said improved oil prices and higher sales were responsible for the net profit rise from 39.8 million dollars (33 million U.S.) previously.

Total revenue surged 21.1 per cent to 329.4 million dollars(272 million U.S.) as the average selling price for oil was up 1.18 dollars to 24.44 dollars (20.20 U.S.) per barrel.

The group produced 17.4 million barrels of oil equivalent in the first half of 1990 compared to 16.6 million in the same period in 1989.

Directors predicted a solid second-half performance from the group, which has interests in Australia, the Timor Sea and Papua New Guinea.

"It is expected that Santos' financial performance in the second half of 1990 will represent a significant improvement on the results of the first half."

Higher production, rising oil prices since the Gulf crisis, changes to petrol taxes and reduced interest expenses would help boost the bottom line, they said.

#90270d2430 09/27/1990 ~French/German News Agency
BUCHAREST (SEPT. 27) - A military court ordered Nicu Ceausescu, youngest son of executed dictator Nicolae Ceausescu, set free for three months here Thursday "for health reasons", just six days after he was jailed for 20 years.

The court said it had decided "unanimously" to temporarily release Mr. Ceausescu, 39, after hearing a report by a "senior medical committee".

But he would have to remain in detention for five days, at a Bucharest clinic where he has been treated since August 28, to give the public prosecutor time to appeal the military court's decision.

Mr. Ceausescu also must remain available to court officials during the entire three-month period.

Doctors have said he has cirrhosis of the liver and enlarged veins in his

throat, which the medical panel described as "incurable" and said could have "unpredictable complications".

The military court which ordered him released was presided over by Lieutenant-Colonel Constantin Lucescu, the same officer who defended Nicolae Ceausescu and his wife Elena, who were sentenced and executed December 25 after a popular uprising.

The younger Ceausescu was handed a 20-year prison sentence last Friday for "instigation of murder" after he ordered security forces to open fire on anti-communist demonstrators December 21 in the central city of Sibiu, where he was communist party chief. The massacre left 89 people dead.

He was also sentenced to five years for breaking arms laws, but under Romanian law must serve only the longer sentence.

However the court agreed to a request from the defense to hear new medical evidence.

Before the new ruling was handed down, Mr. Ceausescu appeared in court looking thin and appealed to the judges not to send him to a prison hospital.

It was the second time he had been ordered temporarily released.

He was initially set free August 23, but five days later the decision was overturned on appeal by the public prosecutor.

FREETOWN (SEPT. 27) - Talks between leaders of warring factions in Liberia, scheduled to take place here, have been postponed indefinitely, a senior official of the Economic Community of West African States (ECOWAS) said Thursday.

Charles Taylor, head of the National Patriotic Front of Liberia, and the breakaway chief of the Independent Patriotic Front Alliance, Prince Johnson, were to have met at an ECOWAS-sponsored conference on Friday.

The official said a statement attributed to U.S. Assistant Secretary of State for African Affairs Herman Cohen was "mainly responsible for the decision to postpone the meeting".

Mr. Cohen said Wednesday in an interview with the BBC that a peaceful solution to the Liberian conflict would be impossible without the participation of Mr. Taylor.

The ECOWAS official called the statement "unhelpful and at variance with discussions with ECOWAS officials during his (Cohen's) stopover in Freetown" September 17.

BAGHDAD (SEPT. 27) - Hundreds of Iraqi children have greeted a 40-truck convoy bringing them food from Jordan in defiance of an international embargo, as Iraqi authorities grapple with how to respond publicly to the blockade.

The children, brandishing Iraqi and Jordanian flags along with portraits of President Saddam Hussein and PLO Chairman Yasser Arafat, welcomed the arrival Wednesday of tonnes of food, medicine and milk, collected by the General Federation of Jordanian Charitable Organizations.

Press reports here said it was the third such shipment since the Iraqi invasion of Kuwait August 2, which prompted the United Nations Security Council to approve a land and sea blockade on Iraq last month.

The council on Tuesday voted to expand the restrictions to cover air traffic to and from Iraq.

The Jordanian government has pledged to honor all the U.N. measures despite the fact that public sentiment in the country, as evidenced by the food shipments, is solidly behind Iraq.

Iraqi authorities meanwhile appear reluctant to define their attitude toward the effects of the blockade.

On one hand they have tried to minimize the consequences of the sanctions, stressing that food stocks are plentiful.

But they have also spoken of famine and looming economic catastrophe, comparing the blockade to a declaration of war and threatening to strike at Israel and at Gulf oil installations.

A similar contradiction is apparent in daily life here. While essential commodities at subsidized prices are rationed there are no signs of shortages in the capital.

#90270d2640 09/27/1990 ~French/German News Agency

LONDON (SEPT. 27) - Polly Peck International, one of Britain's top 100 companies before trading in its shares were suspended exactly a week ago, continues to hog the headlines in the British press despite a deafening silence from its beleaguered board.

The board promised a statement "in due course" after the suspension. Six consecutive days of meetings have so far failed to produce one.

The wave of rumours facing the group, whose activities range from electronics to fresh fruit distribution, prompted the Sunday Times newspaper at the weekend to headline "Polly Peck Scandal 'Greater than Guinness'"

It was referring to the illegal share support operation undertaken by the British brewer in 1986 which ended in the recent imprisonment of its former chairman and other top City figures.

The suspension of Polly Peck shares last Thursday followed a 55 percent slide in the share price.

The fall compounded earlier losses sustained after the withdrawal just five days after it was announced of a buyout plan launched by chairman and chief executive Asil Nadir.

Turkish Cypriot-born Mr. Nadir's action prompted harsh criticism from the Stock Exchange authorities. The group's activities are now under investigation by the Serious Fraud Office (SFO).

A request from the Polly Peck board for a Department of Trade and Industry enquiry into the whole affair has been rejected by the government department.

Mr. Nadir's declaration of intent to sue newspapers for their allegations has failed to dampen speculation over alleged foul play.

Rumours about the company ahead of the suspension included an imminent move to Switzerland, heavy losses for the company on the Turkish bond market, and even the death of Mr. Nadir himself.

The affair has cast a shadow over an already queasy stock market here, and a 10 percent slide in the share price of the Standard Chartered bank Wednesday was attributed to concern over its exposure to Polly Peck debt.

The National Association of Pension Funds, which groups many of Britain's big institutional investors, said Thursday it had written to regulatory bodies to complain at the delay in any announcement.

The latest development in the saga appeared on the Stock Exchange's own company news service screens on Wednesday.

It revealed that two blocks totalling 450,000 Polly Peck shares were sold by a Swiss company called Blade Exploration six weeks ago, two days after Mr. Nadir's bid to take the company private.

Before the transactions, priced at 410 and 417 pence per share, Blade held more than one percent of Polly Peck.

Under British takeover rules any holder of one percent or above in a company which is the target of a formal bid must disclose sales by noon the following day.

A spokesman for the stock exchange's Takeover Panel said Thursday "We are investigating why the disclosures were late".

Polly Peck International is a component company in the FT-SE index of 100 leading shares known as the Footsie index. The index's steering committee, due to meet tomorrow, could drop the company from the list.

#90270d2790 09/27/1990 ~French/German News Agency

ISLAMABAD (SEPT. 27) - An earthquake measuring 5.5 on the Richter scale jolted southwestern Pakistan on Wednesday, officials said Thursday.

Tremors lasting several seconds were recorded first at 15:34 GMT, said an official of the meteorological department in Quetta, the capital of Baluchistan province, contacted by telephone.

He said the quake's epicentre was on the edge of the Chaghi district of Baluchistan, "almost inside" Iran.

(A report from Teheran said a quake measuring 6.6 on the Richter scale was recorded in Sistan-Baluchistan province, with its epicentre estimated to be 1,500 Kilomters (900 miles) southeast of the Iranian capital.

(Iranian officials said the tremors could have caused heavy damage in an urban area.)

The official in Quetta said the population in the border region was scanty and no loss life or damage to property had so far been reported.

An earthquake measuring 5.0 on the Richter scale can cause considerable damage in a built-up area, while one measuring 6.0 can cause severe damage.

#90270d3070 09/27/1990 ~French/German News Agency

COLOMBO (SEPT. 27) - Iraq on Thursday freed 90 Sri Lankan workers it had detained along with several other migrant workers following its August 2 invasion of Kuwait, officials said here.

The Sri Lanka embassy in Baghdad had secured the release of the 90 Sri Lankan nationals held in jail by the Iraqi authorities and sent them by road to the Jordan border, an official communique said.

It did not give details on how the Sri Lankans came to be there, but Minister of State for Foreign Affairs John Amaratunga said that they were employees of an Iraqi oil company.

The brief foreign ministry statement said officials at Sri Lanka's consulate in Jordan would ensure the early clearance of these persons through the border and their early repatriation.

Thousands of Sri Lankan workers have been stranded in both Kuwait and Iraq since the invasion.

Large numbers of Sri Lankans have been fleeing Kuwait to Amman from where they hope to return home in one of several refugee flights organised by the U.N.-sponsored International Organisation for Migration (IOM).

Meanwhile, elaborate arrangements have been made to welcome more than 1,500 Sri Lankan refugees who are due to arrive here Friday on the first chartered ship bringing stranded workers to the country from Amman.

Press reports also said that Iraq had granted Colombo permission to airlift its remaining refugees direct from Kuwait but this could not be officially confirmed.

Officials said more than 15,000 Sri Lankans have been brought home since the beginning of the Gulf crisis. Some 70,000 more remain in Iraq, Kuwait and neighbouring states.

GLARIS, Switzerland (SEPT. 27) - Holderbank Financiere Glaris SA, the holding company of the world's biggest cement producer, is making a takeover bid for Queensland Cement Ltd (QCL), a major Australian cement producer, the Swiss group announced here on Thursday.

Holderbank said the bid was made through Holset, the group's Australian subsidiary, which has offered 3.80 Australian dollars (3.2 U.S.) for each share and convertible bond. It estimates the value of QCL at 270 million Australian dollars (225 million U.S.).

Holderbank already holds 25 percent of the Australian cement-maker, which has an annual production capacity of 1.5 million tons of cement and 30,000 tons of lime.

QCL had consolidated sales of 181.41 million Australian dollars (150 million U.S.) in financial 1989.

Glaris, present in 26 countries, had consolidated sales of 4.97 billion Swiss francs (3.8 billion dollars) in 1989. It has one company in the Philippines, and another in New Zealand.

#90270d3120 09/27/1990 ~French/German News Agency

CANBERRA (SEPT. 27) - Prime Minister Bob Hawke on Thursday described as "irresponsible and unfortunate" a strike now crippling Australia's domestic airline services.

Throughout the day, thousands of stranded passengers jammed interstate trains and buses or cancelled travel plans outright as the strike by aircraft refuellers slashed flights between capital cities.

Ansett Airlines said fewer than 70 flights were scheduled, about 30 percent of normal, and Australian Airlines said it had cancelled half its flights.

The tourist industry, still trying to recover from last year's strike by airline pilots, was said to be in turmoil.

The refuellers went on strike at midnight Tuesday over what was described as "a manning dispute", throwing the travel plans of more than 20,000 people into chaos.

The refuellers say they fear that one-man refuelling operations which have replaced two man crews in the West Australian city of Perth may spread to other cities and from small general aviation planes to larger commercial aircraft.

The strikers are due to attend mass meetings across the country Friday morning to consider a return-to-work recommendation by the national industrial relations court.

Opposition industrial relations spokesman John Howard pledged essential services legislation to deter action like the refuellers' strike if the opposition gained power.

Mr. Howard said the attitude of the Transport Workers Union was contemptible.

Speaking to journalists after a speech in the eastern city of Wollongong, Mr. Hawke said that although unions had the right to take industrial action in a democracy, this strike was an example of irresponsibility.

"You're going to have some exercises of that freedom which do appear to be irresponsible and I think in this case you can categorise the stoppage in that way," Mr. Hawke said.

"I think it's particularly unfortunate that it's occurred at a time which inflicts problems on kids and their holiday period."

#90270d3140 09/27/1990 ~French/German News Agency

PHNOM PENH (SEPT. 27) - French Secretary of State for International Cultural Relations Thierry de Beauce is due here Friday at the head of a high-powered delegation that will discuss political issues with Cambodian leaders, officials said.

Mr. de Beauce, the most senior Western goverment official to visit Cambodia in more than 15 years, will ostensibly be in Phnom Penh to open Sunday the Alliance Francaise branch, officials of the independent but government subsidised institute said.

His high-ranking delegation will include President Mitterrand's diplomatic adviser Loic Hennekine, head of the Foreign Ministry's Asia department Claude Martin and Leon Vandermeersch, head of the French School for Far Eastern Studies.

French sources here said the officials would almost certainly discuss political issues in planned meetings with Prime Minister Hun Sen and newly appointed Foreign Minister Hor Nam Hong.

They said the visit was recognition of the importance of the Phnom Penh government, which Paris does not recognise, in the peace process in a country torn by civil war. Vietnamese troops installed the current Cambodian government when they ousted the Chinese-backed Khmer Rouge in 1979.

Matters that could be raised included aid, the reconvening of the failed August 1989 Paris international conference on Cambodia and the current deadlock in talks between Phnom Penh and the tripartite resistance coalition on the formation of the Supreme National Council (SNC).

The SNC, grouping six representatives each from Phnom Penh and the resistance, is intended to represent Cambodian soverignty and hold the country's U.N. seat pending U.N.-organised general elections.

#90270d3180 09/27/1990 ~French/German News Agency

SEOUL (SEPT. 27) - Some 3,000 radical students and workers gathered Thursday at the Seoul National University campus to condemn the existing conservative political parties in the country and support the birth of a new dissident party.

After the rally, some 1,000 of them stormed out of the campus to fight the riot police deployed outside for an hour with Molotov cocktails before dispersing, witnesses said.

Riot police cars turned on powerful searchlights as the evening darkness enveloped the campus and fired a succession of tear-gas bombs to beat back the demonstrators.

The rally, which attracted students from more than a dozen universities, resolved that the new dissident party named Minjung (Peoples) Party must be elected to parliament now monopolized by two conservative political groups - the government party and the opposition.

The next parliamentary elections are set for 1992.

#90270d3190 09/27/1990 ~French/German News Agency

NAIROBI (SEPT. 27) - Kenyan opposition figures fear a new wave of arrests in the wake of a scathing attack by President Daniel arap Moi on supporters of multi-party democracy, dissidents said Thursday.

Anti-government riots that cost at least 22 lives erupted here in July after the detentions without trial of Kenneth Matiba and Charles Rubia, two former cabinet ministers who had spearheaded calls for political pluralism in one-party Kenya.

A number of other opposition figures were also detained, but most are now free except Mr. Matiba and Mr. Rubia.

On Wednesday Mr. Moi said their lawyer, Paul Muite, was "the engine behind all the moves to destabilise the country."

He also slammed teachers' union leader Ambrose Adongo, who has called for a strike to press demands for better conditions, as a "dissident" and a "fool".

He branded multi-party campaigners "stooges" of foreign powers, warning that he would not hesitate to take drastic action, including detentions, local newspapers reported.

A prominent dissident, speaking on condition of anonymity, told Agence France-Presse that opposition figures feared new arrests by early next week. "We're expecting another crackdown on dissent," he said.

Mr. Muite ducked out of sight for two weeks in July, apparently to avoid arrest. Asked how he felt about Mr. Moi's comment, he said: "It is not in the public interest or even prudent for me to make any public statement or to make any comment on any of these matters."

#90270d3220 09/27/1990 ~French/German News Agency

ANKARA (SEPT. 27) - Two young men were killed "by accident" overnight in a restricted area of a NATO base in western Turkey by guards who thought they were planning a terrorist attack, the local prosecutor said.

Haluk Cetinkaya, the prosecutor in Izmir Kemalpasa on the Aegean Sea where the North Atlantic Treaty Organization base is located, said the two men died from gunshot wounds after being rushed to hospital.

"It was an accident," he said after being contacted by telephone from here.

The prosector said the two and a third friend were heading back home after midnight on two motorcycles after a night of heavy drinking at a restaurant.

They took a shortcut that ran along the NATO base's restricted zone, but one of the cycles stopped quickly when one of the passengers got sick. The headlight was shining through the security fence, and was taken as some sort of signal by the guards, who have been put on heavy alert against potential terrorist attacks following the Gulf crisis.

The prosecutor said the guards ordered the young men to stop and identify themselves "three times", but the two men got back on the cycle and took off without answering.

The guards fired from inside the base, and though the third friend alerted another guard about the mistake it was too late, the prosecutor said.

#90270d3230 09/27/1990 ~French/German News Agency

BANGKOK (SEPT. 27) - Six Asian nations - Bangladesh, Burma, India, Indonesia, Nepal and Pakistan - have been labelled as "highest risk" countries for future environmental crises, a United Nations statement released here Thursday said.

The environmental risks facing the six are to be discussed at a U.N. ministry-level conference on Environment and Development in Asia and the Pacific (ESCAP) here next month, it said.

Afghanistan, China, Kiribati, the Solomon Islands and Sri Lanka were "high risk" countries, the statement said, adding that the two groups accounted for 83 per cent of the region's total population.

"The gap between the words and effective remedial action is growing fast," the statement said, adding that "time is running out."

The statement warned that unless governments hurry to adopt practical measures towards environmentally sound and sustainable development they would be unable to avert "successive calamities."

The statement accused governments of overestimating the costs of remedial action and underestimating the enormous enviromental costs they stand to incur by failing to act quickly.

#90270d3280 09/27/1990 ~French/German News Agency

HONG KONG (SEPT. 27) - A controversial repatriation plan sponsored by the United Nations High Commissioner for Refugees (UNHCR) for Vietnamese boat people here should work, Hong Kong's security chief said Thursday.

Alistair Asprey was commenting on a tripartite pact reached in Hanoi last week between the UNHCR, Vietnam and Britain for Vietnamese screened out as non-refugees in the British colony.

The new plan, aimed at sending back 1,000 Vietnamese a month from here to Hanoi, created a new category of boat people: those who have not volunteered to be repatriated but do not object to being flown back.

"There are, we believe, and the UNHCR believe, a large number of people who are ... sitting on the fence," Mr. Asprey said. "They have not brought themselves actively to volunteer to go back to Vietnam, nor are they in a

position to resist going back."

The message of the scheme was, Mr. Asprey said, that "there's no prospect of resettlement for these people, they will have to come to terms with the fact that ... they can't spend the rest of their lives in detention in Hong Kong."

The UNHCR has conceded that such a category of people could prove imaginary, while stressing that the new scheme would never amount to forced repatriation.

More than 50 boat people Thursday carried their hunger strike into the third day. A government prison department spokesman said "Down With The UNHCR" had been among slogans shouted by the protesting inmates at the suburban Whitehead camp, the biggest in the British colony.

Hong Kong suspended forced repatriation after its first operation, involving 51 Vietnamese sent back last December, stirred an international outcry.

SINGAPORE (SEPT. 27) - India, Pakistan and Bangladesh are turning to Singapore refiners after losing their oil supplies from Kuwait, industry officials said Thursday.

A singapore Petroleum Company spokesman said Pakistan had invited international tenders for diesel and kerosene supplies, and has asked selected oil refiners here to submit bids covering the last quarter of 1990.

The spokesman said India and Bangladesh had invited tenders for much-required oil products, supplies of which have been disrupted by the Gulf crisis.

Enrico Sismondo, Caltex Services' Managing Director, said that while supplies from Singapore to the Indian subcontinent had traditionally been low, they may increase in the near future because India, Pakistan and Bangladesh need alternative supplies of oil products.

LONDON (SEPT. 27) - Irish meat group Goodman International, which has filed for bankruptcy protection, said Thursday it had obtained supplementary credit totalling 30 million punt (51 million dollars) from its creditor banks.

The extra credit will enable Goodman to continue operations until December, carrying it through the busy autumn meat slaughtering season.

Goodman owes the banks 460 millon punt (793 million dollars) and has slightly more than three months of protection from creditors to try to reorganise its

operation.

The group's problems stem from a fragile financial structure and falling demand for meat as a result of the outbreak of "mad cow" disease in Britain this year, but it has also been hit by the international embargo on Iraq since Baghdad invaded Kuwait on August 2.

The group is owed 180 million punt (310 million dollars) by Iraq.

PRETORIA (SEPT. 27) - South Africa's state-controlled oil industry has moved closer to deregulation with the announcement by the National Energy Council (NEC) here Thursday that it had eliminated Treasury money from next year's budget.

The NEC, which co-ordinates the purchase of oil for the oil companies amid strict secrecy imposed by the Petroleum Act, said the Treasury contribution in 1989-90 was half of the previous year's subsidy, and had been dropped altogether from the 1990-91 budget.

In Thursday's annual report the NEC said investigations into deregulating the oil industry and coal exports would be completed next year.

#90270d3360 09/27/1990 ~French/German News Agency

BONN (SEPT. 27) - West Germany's centre-right coalition cabinet Friday will review a draft for a third supplement to the 1990 budget of some 20 billion marks (12.7 billion dollars), mainly to cover the higher costs of German unification, it was learned here Thursday.

The draft drawn up by Finance Minister Theo Waigel also includes additional costs posed by Bonn's contribution to the Gulf effort, sources said.

With the supplementary budget, Bonn's public debt is targeted to rise by 25.8 billion marks to reach a total of 66.8 billion marks. The extra figure accounts for both the Gulf and German unification costs as well as for declining tax revenues from East Germany.

The additional money is regarded by Bonn government officials as putting the 1990 budget figure up to within range of what the first pan-German budget in 1991 will reach.

With the supplementary funds, Bonn's expenditures for both East and West Germany in the 1990 budget are targeted to rise to 396 billion marks, compared to 376 billion marks previously.

The sources said that amid the econonomic slowdown in East Germany, Bonn now is reducing its tax revenue calculations there by 7.1 billion marks.

Almost all the additional 20 billion marks are for the costs of German unification. Some 860 million marks are earmarked for Bonn's contribution to measures dealing with the Gulf crisis. So far West Germany has pledged a total of 3.3 billion marks to the Gulf effort.

#90270d3470 09/27/1990 ~French/German News Agency
LONDON (SEPT. 27) - Japanese capital exports will fall by half this year to around 100 billion dollars from 192 billion in 1989, Japanese finance ministry special adviser Toyoo Gyohten said here Thursday.

"There is a good chance (that there will) be a considerable shift from dollar instruments to other instruments in the near future," and such a move was likely to benefit Europe, Mr. Gyohten said during a seminar organised by the IDEA economic study institute.

But he said that the Japanese current balance of payments surplus, which allows the financing of investment abroad, would fall by at least 30 percent this year to less than 40 billion dollars against 57 billion in 1989.

The fall would be due to slower growth for Japanese exports, a higher yen, more expensive oil imports and continuing investment abroad by Japanese industry, Mr. Gyohten said.

The rise in oil prices, now hovering between 35 and 40 dollars a barrel, could double Japan's oil bill, given that it totalled 21 billion dollars last year when the average price of a barrel of oil was 17 dollars, he added.

"Big corporations in Japan still have enough money to invest" and Japan would remain a major capital exporter, but this was not the time for speculative financial or property placements.

Japanese banks would now be forced to boost capital or reduce lending given the fall in their asset value linked to the dive on Japanese markets.

The ratio of capital to assets of major Japanese banks has fallen below eight percent -- a level which the Bank of International Settlements is to make obligatory in 1993 -- since the beginning of the year, he said.

#90270d3540 09/27/1990 ~French/German News Agency
ROTTERDAM (SEPT. 27) - The Rotterdam oil futures market is to close, less

than a year after it was launched, because it is losing money and there seems no prospect of turning it around, exchange officials said Thursday in a statement.

The Rotterdam Energy Futures Exchange (ROEFEX), Europe's second oil futures market after the International Petroleum Exchange (IPE) in London would be closed "as soon as possible" due to "pressure of circumstances," the statement said.

Contracts currently still open would be settled, it added.

The exchange is to ask shareholders -- the Amsterdam options exchange, the Rotterdam municipality and the city chamber of commerce, along with a number of financial institutions and oil companies -- to wind up the society, it said in a statement.

The ROEFEX was launched on October 30 last year and originally offered three types of dollar-denominated contracts over one or nine months on Brent North Sea crude oil, gasoil, and C quality bunker oil, the quality used for shipping fuel.

But two of the contracts were scrapped at the beginning of the year leaving only gasoil, and the exchange's turnover has been well below initial predictions of at least 1,000 contracts a day.

A total 268 deals were struck on the opening day, but this was the highest it ever reached, and even highly turbulent times on oil markets such as the current Gulf crisis failed to boost ROEFEX activities above around 100 a day against some 15,000 on the IPE.

Rotterdam is the world's leading transit port and one of the major oil refining and stocking centres. It has a spot oil market but this consists of a network of brokers in contact by telephone and computer with London, and has no headquarter premises.

#90270d3570 09/27/1990 ~French/German News Agency

PARIS (SEPT. 27) - Financial group Paribas reported Thursday that its group-share net profit jumped by 30 percent in the first half of the year, to 2.49 billion francs (475 million dollars), against 1.9 billion for the same period last year.

Gross profit was 3.55 billion francs, against 2.86 billion in the first half last year, a 24 percent increase.

The group said that the group-share net profit consisted of 2.3 billion francs in capital results, and 168 million francs in income. The latter figure

represents a big plunge from the first half of last year, when that component of net profit was slightly more than a billion francs.

The drop is due to higher interest rates, an increase in bank provisions, and a rise in interest costs in connection with growth of portfolio business, the group said.

The group's banking subsidiaries contributed more than a billion francs to the gross profit, and portfolio companies 1.4 billion francs.

Net transfers to banking reserves in the first half amounted to 2.3 billion francs, against 1.8 billion for the first six months last year.

Group stockholders' equity on an accounting basis on June 30 was 45 billion francs (excluding the half-year result), against 40.4 billion at the end of last year.

Group net assets were estimated at 68.7 billion francs at the end of the first half.

#90270d3580 09/27/1990 ~French/German News Agency

Berlin (SEPT. 27) - During the year preceding the start of the German monetary union in July 1990, the population of East Germany dropped by 410,000, according to the East German Department of Statistics.

Six days before unification, the East and West German departments of statistics jointly presented their yearbooks for the first - and last - time here Thursday.

In a united Germany, slightly more than 79 million people will inhabit an area comprising almost 357,000 square kilometres. In July 1990, the population of East Germany was 16.2 million.

The East German statistics show the country's continuing economic decline. During the second quarter of 1990, there were 2.96 million workers in East German industry. The figure was 3.2 million during the same quarter the year before.

The number of jobless rose from 7,400 in January 1990 to 361,000 in August. On the other hand, there was also a large increase in new businesses - 167,000 during the first eight months of 1990.

In West Germany, the number of employed persons reached 27.7 million, the highest level in the country's history.

Despite the huge differences in economic performance, the Germanys are already

''united'' in some respects. For example, 53 percent of the forests in the West and 54.3 percent in the East have been damaged by pollution.

#90270d3670 09/27/1990 ~French/German News Agency

NEW YORK, UNITED NATIONS (SEPT. 27) - Britain and Iran Thursday restored diplomatic relations which were broken off 18 months ago after Iranian leaders issued a death warrant against British writer Salman Rushdie.

"Effective today, the Islamic Republic of Iran and the United Kingdom have resumed diplomatic relations on the basis of mutual respect, and will reopen their embassies in London and Teheran within one month," according to a communique released simultaneously by the Iranian mission here and the Foreign Office in London.

A Foreign Office spokesman quoted Foreign Secretary Douglas Hurd as saying there would be "further discussion on the exact modalities," including numbers of diplomats to be exchanged and "outstanding bilateral problems."

Mr. Hurd also said that both sides felt these problems "would be more easily resolved with diplomatic relations than without them."

The decision to resume diplomatic ties came as Mr. Hurd and Iranian Foreign Minister Ali Akbar Velayati were in New York to attend the U.N. General Assembly.

The two governments severed official ties after Iranian authorities called for the death of Mr. Rushie, a British national of Indian origin, for his novel "The Satanic Verses," which Islamic authorities deemed as blasphemous.

-30- 1501

#90270d3690 09/27/1990 ~French/German News Agency

LONDON (SEPT. 27) - British author Salman Rushdie has given his first television interview since he went into hiding 18 months ago and said in extracts screened here Thursday that his life had been "hell" during that time.

The screening of the interview coincided with the announcement in New York that Britain and Iran had decided to restore diplomatic ties that were broken over the Rushdie affair.

"All I can say is that people have said that I ought to be punished," Mr. Rushdie said. "If punishment was the aim I've had some. I am fine and most of the time I say that even to myself, because that is useful, but actually it has been hell."

Mr. Rushdie, appearing on camera cleanshaven, without his spectacles and

wearing a light jacket and shirt, said he was "very sorry" if his controversial novel "The Satanic Verses" had insulted Moslems.

"I did not want to do that and I am sad that that should be the case," he told an interviewer from the independent station London Weekend Television.

Mr. Rushdie, who was born in India but is a British citizen, was forced to go into hiding in February 1989 after the late spiritual leader of Iran, the Ayatollah Ruhollah Khomeini, called on Moslems to kill him for writing the book.

According to the British domestic news agency Press Association, the interview was conducted in strict security at Mr. Rushdie's "secret hideaway" in southern England were he is under round-the-clock protection from Scotland yard.

"In a very ironic way I thought 'The Satanic Verses' was my least political novel. I thought it was actually very internal. I guess I was wrong," Mr. Rushdie said.

He added that his greatest regrets included being "reviled by the people I wrote about" and not being able to return to his birthplace in Bombay.

"There has been stress that at various times has been quite alarming." It has torn apart everything I ever thought about everything, which is probably not a bad thing for a writer but this is a rather extreme way of doing it," he said.

He added that "one of the strangest aspects of this is that I never expected to have so many chums in the Special Branch."

#90270d3730 09/27/1990 ~French/German News Agency

MANILA (SEPT. 27) - The Philippines government on Thursday scaled down earlier plans to trim the 1991 budget of government agencies by 20 percent, saying the targetted cuts could now be about 10 to 15 percent of the total.

Executive Secretary Catalino Macaraig said President Corazon Aquino originally sought a 20 percent average cut to save 2.33 billion dollars and shrink the growing budget deficit, but many department heads objected to across-the-board reductions.

He told reporters Mrs. Aquino subsequently asked the cabinet members to "look at their budgets and to submit what programs or projects they could defer." The proposed 1991 national budget is 10.3 billion dollars.

"The target is about 10 to 15 percent," Mr. Macaraig said.

The budget deficit has already hit 1.126 billion dollars as of August 22 and there are fears it would grow even further this year, pushing up an expected 15 percent inflation rate and rates of interest which are already above 30 percent for commercial loans.

Oil-dependent Philippines had originally forecast a budget deficit of 823.3 million dollars for 1990 through an economic reform program, involving the phaseout of an oil price subsidy, imposition of new taxes, a new tariff package, and tighter expenditures.

However, this was derailed by the Gulf crisis, congressional opposition and damage caused by a killer earthquake in July.

The Philippine Chamber of Commerce and Industry (PCCI), in its strongest statement ever to Mrs. Aquino, said Thursday that "perceived political instability", the Gulf crisis, and the July earthquake damages "will have serious repercussions on the economy."

They cited the rising cost of fuel and the repatriation of thousands of Filipino contract workers from the Middle East in the wake of Iraq's invasion of Kuwait, as well as threats of a new coup attempt and a bombing campaign in the capital.

The chamber also cited high interest rates, rising inflation and unemployment, a foreign exchange shortage and poor delivery of basic services which they said were "making people apprehensive."

"The root of many of these problems can be traced to the inadequacy of political will in both the executive and the legislative branches of Government to address these problems head-on," the PCCI added.

#90270d3790 09/27/1990 ~French/German News Agency

MANAMA (SEPT. 27) - Yemen put its economic interests ahead of Arab solidarity with Iraq on Tuesday by voting in the United Nations Security Council to back an air blockade on Baghdad, analysts said here Thursday.

The only Arab member of the 15-member Security Council, Yemen joined in the 14-1 vote for Resolution 670 -- with Cuba casting the sole negative vote -- to extend a land and sea blockade of Iraq to the air in response to Baghdad's August 2 invasion of Kuwait.

Yemen, which is closely allied to Iraq, did not support three of the previous seven Security Council resolutions, namely 661 which imposed the land and sea embargo.

Yemeni President Ali Abdallah Saleh had in fact voiced objections to an air

embargo one week before the latest vote, which he said increased the risks of catastrophe and war in the region.

He said such a measure was "extremely dangerous", as it was impossible to control the inspection operations of civilian aircraft.

Resolution 670 also calls on states to detain any Iraqi-registered ships that enter their ports and are found to be carrying to goods for Iraq.

The U.N. measures do not cover food, in humanitarian circumstances, and medicine.

The government in Sanaa, which has opposed the Iraqi invasion of Kuwait, said it would abide by the embargo and has repeatedly called for a peaceful solution to the Gulf crisis within an Arab framework.

General Saleh reiterated on Italian television on Sunday that his country respected the Security Council's resolutions.

But Yemeni media played down Tuesday's vote on Resolution 670 and did not give the actual tally or refer to the position adopted by its representative.

Yemen strongly opposes "the starving of the Iraqi people" and contends that the core of the problem is the existing international economic imbalance, which Gen. Saleh argued Tuesday pitted the haves against the have-nots and triggered the conflict in the Gulf.

#90270d3850 09/27/1990 ~French/German News Agency
MILAN (SEPT 27) - Computer group Olivetti and auto group Fiat reported Thursday that they had suffered declines in first-half profits by comparison with the year-earlier period.

Olivetti said here that its pre-tax profit was down by 41 percent for the year's first six months by comparison with the same period last year, despite a 5.8 percent rise in sales for the period.

The six-month pre-tax profit figure was 102 billion lire (about 86.8 million dollars), while sales were 4.17 trillion lire.

The announcement said the results, under "difficult conditions", were better than competitors' figures for the first half. It said the sales increase would have been 8.8 percent if the lira had remained steady against other currencies instead of rising.

In added that in Europe, Olivetti is the only computer-maker to enjoy a sales increase for the first half compared with the same period last year. Bull was

down by eight percent, Nixdorf 11, and ICL one percent, it said.

Meanwhile, Fiat Group announced in Turin on Thursday that it had a "satisfactory" first half, with a pre-tax profit of 2.45 trillion lire, against 2.81 trillion for the year-earlier period.

Group consolidated sales were up slightly, to 30.31 trillion lire, against 27.11 trillion for the first half last year.

#90270d3910 09/27/1990 ~French/German News Agency

BRUSSELS (SEPT. 27) - Plans by West German airline Lufthansa and Japanese concerns Japan Airlines (JAL) and Nissho Iwai to take a stake in express courier service DHL at first sight infringe rules on fair competition, the European Commission said Thursday.

The Commission stressed that it had not "at this stage taken a stance" on whether to officially take the matter further, but invited "all interested third parties" to inform it of their views within 30 days.

The agreement between Brussels-headquartered DHL and the West German and Japanese concerns announced in May in principle violates European Economic Community rules on free competition.

But the companies in July asked the European Commission for exemption, saying that the deal would offer consumers a better express courier service.

The market for such services is growing by 30 percent a year, guaranteeing intense competition, they said.

Under the agreement, Lufthansa and JAL are to each take a five percent stake in DHL International (DHLI), which has headquarters in Hong Kong and the West Indies, with the option of boosting their stake to 25 percent within 18 months.

Trading house Nissho Iwai would take a five percent stake with the option of

increasing it to 7.5.

At the same time, Lufthansa and JAL would each take one percent, and Nissho Iwai 0.5 percent, in DHL Corp USA, a subsidiary providing express freight services in the United States.

MOSCOW (SEPT 27) - The autonomous Soviet republic of Yakutia has declared itself sovereign, the Moscow news agency Interfax reported Thursday.

The supreme Soviet in the republic's capital of Yakutsk, eastern Siberia, made the move after three days' debate. The territory now has the status of a full Soviet republic within the Russian federation.

Yakutia is the fourth autonomous republic within the federation to declare sovereignty. Like the republics of Karelia, Tataria and Komi, Yakutia will now have sole right to its mineral reserves, largely diamonds, precious metals and natural gas.

-30- 794

#90270d3950 09/27/1990 ~French/German News Agency

MOSCOW (SEPT. 27) - President Mikhail Gorbachev on Thurday issued a decree on honouring contracts, his first since parliament voted him decree-making powers on Monday for the transition to a market economy.

Several enterprises have been refusing to honour contracts either for financial reasons or because of nationalist conflicts within Soviet republics, and the decree called for contracts between businesses in the different republics to be honoured, the TASS news agency said.

"It is inadmissible that organs of power disrupt economic links between enterprises," the decree said, and warned that the federal cabinet could introduce special regulations for the workplace in some cases, as is the case with the railways.

A law granting the right to strike passed last year does not allow work stoppages in key sectors of the economy, including the railways.

Parliament granted Mr. Gorbachev decree-making powers for 18 months to carry out the transition to a market economy after failing to reach agreement on a reform programme.

It had been faced with a radical project supported by the president and a rival, more moderate plan from the government of Nikolai Ryzhkov, who had had threatened to resign rather than implement the radical plan.

-30- 1453
#90270d3990 09/27/1990 ~French/German News Agency
MOSCOW (SEPT. 27) - Prime Minister Nikolai Ryzhkov proposed Thursday that negotiations between Moscow and Vilnius on Lithuania's bid for independence open here Tuesday, the semi-official news agency Interfax said.

Mr. Ryzhkov made the offer in a telephone call to Lithuanian Prime Minister Kazimiera Prunskiene on the instructions of President Mikhail Gorbachev, who met with Mrs. Prunskiene last Tuesday, the agency said.

Preliminary talks have been going on since late June, when the republic's parliament declared a temporary "moratorium" on its declaration of independence following a Moscow-imposed energy blocade.

Earlier in the day the republic's president, Vytautas Landsbergis, told a news conference in the Lithuanian capital that he believed the "Kremlin has realized" that Lithuania's "determination to gain full independence is unbending".

Asked about the sweeping new powers parliament gave Mr. Gorbachev last week, Mr. Landsbergis said he believed in the Soviet president's "political sense and good will".

In other developments, Latvian Prime Minister Ivars Godmanis met with Mr. Gorbachev at the Kremlin Wednesday and said afterwards he was pleased with their talks.

However cooperation between Riga and Moscow could take the form of an "economic association" only on condition Moscow first recognized Latvian sovereignty, he said.

#90270d4020 09/27/1990 ~French/German News Agency
Johannesburg (SEPT. 27) - Another 15 political prisoners were released Thursday under the terms of an agreement between the South African government and the black nationalist movement, the African National Congress (Anc).

The Justice Ministry referred to the 15 as ''security prisoners'', but other reports said they had been convicted of terrorism or illegal arms possession and had served at least half of their five to 20-year sentences.

The government and the Anc agreed during talks in August on the release of all political prisoners by April next year. Independent human rights groups put the number of such detainees at 1,500.

A first batch of 15 political prisoners was released on September 3.

-30- 875
#90270d4030 09/27/1990 ~French/German News Agency
PRETORIA (SEPT 27) - Law and Order Minister Adriaan Vlok has given approval to extreme-right leaders in South Africa to form defensive commando units, Afrikaner Resistance Movement (AWB) leader Eugene TerreBlanche said on Thursday.

Mr. TerreBlanche and Jaap Marais, leader of the Reconstituted National Party (HNP), told a media conference here that they had been summoned to Mr. Vlok's office on Thursday to discuss the paramilitary-type units.

Mr. Vlok had accepted assurances that the commandoes were a defensive force, they said, but when questioned the two would not rule out the possibility that the commandoes would be used for a first strike.

The leader of the AWB commandoes, Colonel Servaas de Wet, disclosed that within the past two months "literally thousands have joined the commandoes in several training camps" throughout the country, mainly in the Orange Free State and Transvaal.

"Men, women and even young children of 14 are being trained by professional instructors in the art of self-defence, handling light weapons and knives," he said.

Commandoes were nothing new to the Afrikaner people, who had for centuries used them when threatened as an effective means of defence, Col. De Wet said.

#90270d4060 09/27/1990 ~French/German News Agency
BUENOS AIRES (SEPT 27) - Argentina's privatization program will go into high gear next week with a second batch of state-run concerns going up for sale, President Carlos Menem said Thursday.

Mr. Menem said public water, power and gas utilities, as well as road construction, railroad and metro lines would go up for bidding next week as part of his "unswerving" privatization policy.

Speaking before taking off on a trip to Venezuela and the United States -- where he will attend the 45th U.N. General Assembly, Mr. Menem said his privatization policy was "running right along" and would take two to three years to complete.

However, he admitted that there were some problems which were being "overcome as quickly as possible."

The government's sale of Aerolineas Argentinas and the Entel telephone company have run into snags, with the bidders apparently meeting difficulties raising the hefty cash downpayments needed to seal the deals before upcoming deadlines.

The government Wednesday gave Spain's Iberia airlines three days to come up with its 130-million-dollar downpayment for Aerolineas Argentinas, while it considered pushing back the deadline for the sale of Entel to give U.S. Bell Atlantic more time to finance its 114-million-dollar deposit.

As part of the privatization program, the buyers also must purchase billions of dollars of Argentina's foreign debt on the secondary market.

Besides the airline and telephone companies, Mr. Menem has also sold off several oil fields in the 14 months he has been in office.

Mr. Menem warned that nothing would stop the privatization plan, part of a drastic austerity program the president launched in March to curb runaway inflation, bring down the budget deifict and revive Argentina's faltering economy.

Disgruntled unions, he said, "could call all the strikes they want, but there'll be no changes here."

Several public-employee unions have called 24-hour strikes this week to press for higher wages and better work conditions, with the teachers' union blasting the government for "behaving like a military dictatorship."

Mr. Menem said the government's privatization scheme would ultimately benefit "the public worker" through better salaries.

#90270d4070 09/27/1990 ~French/German News Agency

MONROVIA (SEPT. 27) - Charles Taylor, leader of the National Patriotic Front of Liberia (NPFL) rebels, on Thursday threatened to open fire on "all ships" entering Liberian territorial waters.

"Any ship entering our territorial waters after 1200 GMT will be taking its risks. We will open fire," Mr. Taylor told Agence France-Presse.

"The problem is that these people (West African peacekeeping troops of ECOMOG) have not come for peace," he added.

Reporters saw a ship early Thursday near Monrovia but could not make out its name or country of origin.

A Nigerian merchant vessel operating for ECOMOG (Economic Community of West

African States ceasefire monitoring group), the River Oli, had left Freetown in neighboring Sierra Leone for Liberia with 1,000 Ghanaian soldiers and a large supply of food aboard.

#90270d4140 09/27/1990 ~French/German News Agency

ROERMOND, Netherlands (SEPT. 27) - A court here has postponed until November 27 the murder trial of Paul Hughes, a suspected member of the Irish Republican Army (IRA), accused of killing two Australian tourists.

The court granted the postponement on the request of state prosecuting counsel and rejected a defence request that Mr. Hughes, 26, be freed because he was innocent.

Two Australian lawyers on vacation in the Netherlands, Nicholas Spanos, 28, and Stephen Melrose, 24, were gunned down in Roermond on May 27 by an IRA "hit squad" which apparently mistook them for British soldiers.

In requesting the postponement of the trial, the prosecution said that the case was "very complex".

Mr. Hughes has been charged with murder, being an accomplice to murder and criminal association.

Three other suspected members of the IRA arrested in May or June have also been charged in connection with the double murder.

Gerald Harte and a man calling himself Andrew Edward Thornton, but whose real identity is suspected to be Sean Hicks, were arrested in the Netherlands. No date has yet been fixed for their court appearance.

Donna Maguire was arrested in neighbouring Belgium and her extradition has been requested by the Dutch authorities.

Prosecuting counsel Mr. J. Laumen told the judge Mr. E. Bakermans that he needed more time to prepare the case against Mr. Hughes, notably because he had sought the judicial cooperation of Britain, Ireland, Belgium, West Germany and France.

For the defence, Mr. W. van Bennekom cited the sworn statements of three Irish people that his client had been at a football match and a party in Newry, Northern Ireland, on May 27, and therefore could not have taken part in the murder.

Mr. Hughes also firmly denied being a member of the IRA, counsel said.

#90270d4300 09/27/1990 ~French/German News Agency
PARIS (SEPT. 27) - The Paris Bourse enjoyed its second straight winning session on Thursday, thanks primarily to lower oil prices, operators said.

The CAC-40 stock price index ended with a rise of 1.65 percent on the day, after having up by as much as two percent during the session. It was up by 0.12 percent at the session's outset.

On Wednesday, the Bourse chalked up a 0.93 percent gain, following losing sessions on Monday and Tuesday.

Operators said the dip in oil prices following U.S. President George Bush's decision to release five million barrels from the U.S. strategic stock was largely responsible for new buying interest on the Bourse.

New Iraqi threats against Westerners did not worry French and foreign investors unduly, they said.

Sharp losses were suffered on Thursday by Cap Gemini Sogeti (5.8 percent), the La Cite Group (5.6), and Euromarche (5.2 percent), the latter having announced continued losses. Valeo, La Rochette and Imetal, all of whom reported lower profits, were also neglected.

Paribas Group surprised investors by reporting a 30 percent jump in first-half profit compared with last year, and the stock rose 1.8 percent. Distribution issues were popular, headed by La Redoute, which jumped 9.4 per cent.

LONDON (SEPT. 27) - Copper prices continued to rally on the London Metal Exchange (LME) Thursday.

Three-months metal was quoted at 1,488 pounds per tonne in after-hours kerb trading, against 1,483 in afternoon ring deals and 1,458 on Wednesday.

Traders said the metal was rallying strongly as a recent bout of selling came to an end.

Nevertheless the market is expected to encounter resitance Friday if it tries to break up above the levels quoted on the kerb, traders said.

Aluminium was also firmer, quoting at 1,943 dollars per tonne on the kerb against 1,950 dollars on the ring and 1,898 on Wednesday.

BAGHDAD (SEPT. 27) - Iraq is permitting farmers to cultivate plots near the border with Iran and Turkey which were hitherto off-limits, the army's daily Al Qadissiya reported Thursday.

Quoting a senior official at the Ministry of Irrigation and Agriculture, Abdel Sattar Salman, the paper said the decision-making Revolutionary Command Council (RCC) had recently authorized farmers to plant a strip of 10-20 kilometers (six to 12 miles), the length of the border with Iran and Turkey.

Iraqi authorities have also made plants and seeds available to the farmers, 80 percent of whom are to grow wheat, and has guaranteed the regular irrigation of those lands, Mr. Salman said.

Baghdad has stepped up efforts at food self-sufficiency in response to a United Nations air, land and sea embargo triggered by its invasion of Kuwait.

In the spring of 1989, Baghdad announced its intention to isolate itself behind a no-man's land of some 30 kilometers (17 miles) where all housing was destroyed and movement banned to prevent potential incursions by Kurdish guerillas.

Mr. Salman said agriculture in that region was "a sacred duty that would allow Iraq to face the aggression by imperialist-Zionist countries trying to strangle it."

The RCC recently exempted reservists working in the agricultural sector from joining others mobilized to take up arms against a possible foreign attack on Iraq.

Baghdad has also called on Iraqis to cultivate every part of their country.

TOKYO (SEPT 27) - North Korea Thursday warned against foreign military intervention to resolve the Gulf crisis, Japan's Kyodo News Service reported.

The North Korean warning came at a meeting of a visiting Japanese parliamentary delegation and officials of the North Korean ruling Workers' Party (KWP), Kyodo quoted Japanese delegation sources as saying.

Kyodo said that the North Koreans, led by the KWP secretary in charge of international affairs, Kim Yong Sun, told the Japanese that Pyongyang opposed Iraq's invasion of Kuwait but felt the crisis should be resolved among the Arab states.

"The use of military forces by third parties on the pretext of the (Iraqi) invasion of Kuwait is dangerous," a Japanese source quoted the North Koreans as saying, according to Kyodo.

KAMPALA (SEPT 27) - The Uganda Human Rights Activists (Uhra) group appealed Thursday to dissidents opposed to the government to stop excesses against civilians.

In its quarterly report, the Kampala-based organisation said such excesses tended to suggest criminal rather than political intentions.

The organisation commended efforts by the government to discipline soldiers who committed murder, rape, and destruction of property.

The report said that though the human rights situation is slowly improving, it still needs an effort to make the situation acceptable by international standards.

It said that in the northern and northeastern parts of Uganda, civilians continued to be targets of both government troops and rebel factions.

TOKYO (SEPT. 27) - Japan and the United States agreed Thursday to explore ways to speed up exports of U.S. autoparts to Japan at a meeting to be held in Cleveland, Ohio, in November, Japanese officials said.

The agreement came after the two countries ended two days of talks here on bilateral trade in automobile components, the officials said.

The meeting in Cleveland is scheduled for November 28-29.

#90270d4980 09/27/1990 ~French/German News Agency

PRETORIA (SEPT 27) - Chris Hani, Chief-of-Staff of the African National Congress's army, Umkhonto we Sizwe (MK), has been given renewed immunity from prosecution until the end of the year, an official said Thursday.

The Department of Justice said in a statement to the South African news agency SAPA that Mr. Hani had been given indemnity until December 31.

Mr. Hani, a member of the ANC's 38-strong National Executive Committee and the Central Committee of the South African Communist Party (SACP), was a key figure in the ANC's team for talks with the government.

But Justice Minister Kobie Coetsee refused to renew a three-month temporary immunity for Mr. Hani when it expired on August 19, apparently in retaliation for remarks Mr. Hani made casting doubt on the ANC's August 6 decision to suspend its 29-year-old armed struggle.

ANC leaders then nominated Mr. Hani to head their working party for talks with the government on the ramifications of the decision, but Mr. Hani himself refused a 41-hour indemnity that would have allowed him to come into the country from nominally-independent Transkei for more talks with the government.

In a statement Thursday the ANC said: "We look forward to his free and unhindered active participation in the work of the African National Congress."

Observers said the decision to renew immunity removed a potentially damaging obstacle to the fulfilment of preliminary talks leading to full negotiations on a new constitution to enfranchise the voteless black majority.

#90270d5000 09/27/1990 ~French/German News Agency

NEW YORK, United Nations (SEPT. 27) - The exiled emir of Kuwait told the U.N. General Assembly Thursday he was writing off the interest on his country's loans to poor nations to ease their debt burden.

As Sheikh Jaber al-Ahmad al-Sabah took the floor to a standing ovation, the Iraqi delegation stormed out of the conference hall.

The emir, who wore the traditional Kuwaiti full-length, white dress, also blasted what he called an "intense campaign of terror" by Iraqi troops occupying his tiny, oil-rich country since they invaded August 2.

Recalling that he had proposed from the same rostrum two years ago a

cancellation of the foreign debts of the poorest nations, the emir said: "Kuwait has decided, in line with our previous proposal regarding this issue, to write off all interests on its loans.

"In addition, Kuwait will consider with the poorest nations arrangements regarding the principal of its loans with a view to easing the burden of their debts," he added.

The emir also tallied the human cost of the invasion of Kuwait.

In addition to the hundreds of thousands of Kuwaitis and foreigners made homeless, he noted that hundreds of people had lost their lives.

"At this very moment, an intense campaign of terror, torture and humiliation continues unabated in that dear land.

"We receive daily reports of massacres and continuing systematic armed looting and destruction of state assets and individual property," the emir added.

Noting the key role by the U.N. Security Council in imposing draconian economic sanctions against Iraq, the exiled ruler told the assembly: "We trust that you will not waver in deciding on the measures needed to compel the invading aggressors to restore the legitimate authority and to put an end to their barbaric acts."

He pointed to the "adverse effects" of the Iraqi invasion on the Palestinian question and the Israeli occupation of southern Lebanon.

On the plight of Third World nations, the emir noted that his country was among the biggest donors of development aid.

"Kuwait's contributions represent the highest rate in the world in terms of gross national product, amounting to 8.3 percent of its GNP.

"This highlights Kuwait's genuine desire to contribute toward raising the standard of living in the developing nations. It also proves that Kuwait has been a leader in the efforts to improve the economic infrastructure of other countries," he added.

#90270d5140 09/27/1990 ~French/German News Agency

HELSINKI (SEPT 27) - Economic turmoil in the Soviet Union and Moscow's intention to end barter trade and switch to convertible currencies are upsetting Finnish-Soviet trade.

Soviet Vice-Prime Minister Stephan Sitaryan ended two-day of talks here Thursday with Finnish conservative Prime Minister Harri Holkeri but they

produced no concrete results. Main issues were sent back to working groups.

The Soviet Union has long been an important trade partner for neighbouring Finland but its share of Finland's total trade has fallen over the past decade.

Trade is bilateral and payment via a rouble-based clearing system which means that in the long run the imports and exports have to be in balance.

Earlier this year Moscow, however, announced that from the beginning of next year it will switch over to convertible currencies and to a credit system of foreign trade, a move which has caused near panic among some Finnish exporters who had secured markets in the Soviet Union.

At the talks here this week the Finns tried to persuade the Russians to accept a two-years period of transition.

Although the current system will certainly be dismantled, the Finns hope that at least energy imports -- about 70 to 80 percent of the total depending on the price of oil -- will be retained in the clearing trade during the transition.

After the talks here the two officials said they will meet again at the end of November and said they hoped the issues could be settled before the meeting.

"We agreed that our delegates should find out a pattern for a period of transition", Mr. Holkeri said.

But Mr. Sitaryan did not mention the word transition is his answers, observers noted.

#90270d5200 09/27/1990 ~French/German News Agency

BERLIN (SEPT 27) - The East German Communist Party on Thursday denied a West German newspaper report that it had illegally received funds of more than 150 million dollars from a bank controlled by the former Stasi secret police.

Bild-Zeitung, in its Friday edition, reports that the Party of Democratic Socialism (PDS) -- the successor to the Party of Social Unity, or Communist Party -- had received 480 million Ostmarks on April 24, more than three weeks after the Stasi was officially dissolved.

The sum, which Bild said was tranferred to the state-owned German Trade Bank, is worth 240 million Deutsche marks (155.8 million dollars) at the two-to-one exchange rate of Germany monetary union.

"After the Stasi-wealth was received, it was split up into smaller quantities and transferred to various accounts," Bild said, quoting confidential documents

held by the East German finance ministry and state audit office.

The PDS, in a denial, said that "at no time" did its account at the Integrated Bank for the Office of National Security have any connection with the Stasi, the East German news agency ADN reported.

It quoted a party spokesman as saying that a transfer from the account did take place on April 24, and involved the sum of 460 million marks (148 million dollars).

But, he said, the transfer involved legitimate assets that were sent to a new party account at another bank, as the Integrated Bank was scheduled to close on April 30.

Bild's allegation came in the runup to German unification next Wednesday, which will be followed by regional elections in East Germany on October 15 and all-German general elections on December 2.

The last East German elections, in March, were overshadowed by allegations that some of the candidates were former collaborators of the hated Stasi.

Furthering those allegations, the Berlin newspaper Der Morgen, in its Friday's edition, reports that 15 East German members of parliament had Stasi links.

Three of the 15 are ministers, the paper said, according to a report by ADN.

ACCRA (SEPT. 27) - The rebel National Patriotic Front of Liberia (Npfl) threatened Thursday to shoot at ships, planes or vehicles that enter the war-torn country without its permission.

The threat was made by Npfl spokesman Tom Woewiyu in an interview with the British Broadcasting Corporation monitored here.

Woewiyu said the Npfl would also fire on troops of the West African peacekeeping force who are in Monrovia to supervise a ceasefire in force since last Saturday.

The Npfl is opposed the peacekeeping force sent in by the economic community of West African states (Ecowas). Rebel artillery hit a Ghanaian navy ship with the force recently killing four people.

Woewiyu said the ceasefire with the other rebel group led by Prince Yormie Johnson and remnants of slain president Samuel Doe ''is good.''

Negotiations have been going on between the factions, he said. ''We are

pleased that everyone seems to be in agreement that the bloodshed should stop and we can discuss the future of the country,'' he added.

#90270d5260 09/27/1990 ~French/German News Agency

LISBON (SEPT. 27) - The governor of the Portuguese enclave of Macau said here Thursday that he had requested to be relieved of his functions but denied charges of corruption that have been levelled against him.

The governor, Carlos Melancia, arrived in Lisbon earlier Thursday from Macau, and was later to meet with the Portuguese President Mario Soares.

Shortly after his arrival, Mr. Melancia told a press conference that he would ask to be relieved of his functions.

He rejected the corruption charges however saying "I am convinced that the courts will find me innocent."

Mr. Melancia also complained that he was being unjustly put on trial by the Portuguese media.

The Macau governor had been subject to a corruption inquiry ordered by the Portuguese government into claims that bribes had been taken in handing out contracts for a new airport for Macau.

Macau is to revert to Chinese rule in 1999 under an agreement reached between the Chinese and Portuguese governments.

#90270d5320 09/27/1990 ~French/German News Agency

PARIS (SEPT 27) - French group Pechiney (packagings, aluminum and industrial components) reported Thursday that it made a net profit for the first half of the year of 1.25 billion francs (about 238 million dollars, up six percent from the first half of last year.

The group said that the results had been helped by the packaging activity, which offset the dollar's drop and lower aluminum prices.

In addition to the net profit, Pechiney also enjoyed some exceptional capital gains, made on the sale of its headquarters building in Paris (2.6 billion francs) and on opening 25 percent of Pechiney International to the public (575 million francs).

Including those factors, the total net profit was 3.9 billion francs.

Sales were only 40.1 billion francs in the first half, compared with 44.6

billion for the same period last year. The operating margin was 3.4 billion francs, against 4.8 billion.

#90270d5370 09/27/1990 ~French/German News Agency

JOHANNESBURG (SEPT. 27) - The white liberal Democratic Party (DP) on Thursday pulled out of a by-election in a constituency vacated by its former joint leader Wynand Malan, clearing the way for the ruling National Party (NP).

DP leader Zach de Beer said the decision not to contest the upmarket suburban seat of Randburg north of here would set no precedent, as the NP had ruled out an electoral pact, despite talks with DP leaders.

The move will ensure that the DP does not siphon off NP votes to the benefit of the far right Conservative Party, which strongly opposes the reforms introduced by the NP.

Mr. De Beer told Agence France-Presse the decision to withdraw was intended to serve as encouragement to Mr. De Klerk after his "excellent" speeches during his three-day visit to the United States earlier this week.

During his U.S. visit, Mr. De Klerk said, "Commitment to remove the last pillars of apartheid is final and irreversible."

#90270d5470 09/27/1990 ~French/German News Agency

MADRID (SEPT. 27) - Spain withdrew its last remaining diplomat from Kuwait City Thursday, the foreign ministry here said.

Charge d'affaires Juan Jose Buitrago left for Baghdad ''for reasons of force majeure'', the ministry said, emphasising that this did not mean the mission in Kuwait City was closed. Two Spanish staff who were in the embassy with Buitrago departed with him.

Buitrago was alone in the mission when Iraq annexed Kuwait and insisted that all foreign missions close because Kuwait City was no longer a capital. The accredited ambassador was on holiday. Iraqi troops cordoned off western embassies and stopped supplies to them.

The Madrid ministry said two Spanish women and three persons with dual Spanish nationality were still in Kuwait. All five had declined an offer to be taken out.

#90270d5580 09/27/1990 ~French/German News Agency

BOGOTA (SEPT. 27) - Gustavo Restrepo, a senior commander of Colombia's rebel People's Liberation Army (EPL), died of a heart attack Wednesday while participating in peace talks with government officials, the EPL announced here Thursday. He was 46 years old.

The EPL said Mr. Estrepo collapsed and died while attending a meeting in Antioquia province with representatives of the government of President Cesar Gaviria.

Mr. Restrepo was a member of the supreme command of the EPL, a Marxist movement with an estimated 1,500 guerrillas centered in northeastern Colombia.

The movement has been negotiating to gain legal political status before the end of the year.

He was the second Colombian guerrilla leader to die of heart failure in the past two months.

The historic leader of the communist Revolutionary Armed Forces of Colombia, Jacobo Arenas, 62, died August 10 of a heart attack.

-30- 1093

#90270d5610 09/27/1990 ~French/German News Agency

TEHERAN (SEPT. 27) - Iran on Thursday denied it had deployed forces in Saudi Arabia to join other troops defending the kingdom against any Iraqi attack, the official IRNA news agency reported.

IRNA quoted a Foreign Ministry official as categorically rejecting what it said were Western media allegations about the deployement.

"Iran's sending of troops to Saudi Arabia was never brought up before, during or after the visit to Teheran of Syrian President Hafez al-Assad," he said.

The spokesman was referring to a four-day visit by Mr. Assad to Teheran during which the Syrian leader held talks with his counterpart Ali Akbar Hashemi Rafsanjani on the Gulf crisis.

Mr. Rafsanjani said Tuesday during a press conference ending Mr. Assad's visit that "a decision was taken" on the possible deployment of Iranian troops to Saudi Arabia but he declined to elaborate on the matter.

But the foreign ministry spokesman said some segments of the Western media had misquoted Mr. Rafsanjani, adding that "such claims are totally baseless."

If Iranian troops were dispatched they would be joining thousands of American, British, French, Egyptian and Syrian forces, as part of a multi-national military buildup in the region to contain Iraq.

The buildup was triggered by Iraq's August 2 invasion of Kuwait.

While criticizing the Iraqi invasion and demanding an immediate troop withdrawal from Kuwait, Teheran has strongly condemned the foreign presence in the Gulf, particularly in Saudi Arabia -- site of Islam's two holiest shrines.

Spiritual leader Ayatollah Ali Khamenei said September 12 that popular Islamic resistance to the U.S. presence in the Gulf amounted to holy war.

-30- 1872

#90270d5620 09/27/1990 ~French/German News Agency

PARIS (SEPT 27) - The French aircraft carrier Clemenceau, currently in the Gulf, will "return to Toulon in the next few days", the ministry of defence announced here Thursday.

The vessel, sent from the French Mediterranean port of Toulon to the Gulf on August 13, would return "once it has finished its current mission in the Red Sea", a spokesman said.

The ministry statement said that while the Clemenceau was due back shortly, the French aircraft carrier Foch and its support group, "undergoing training exercises in the Mediterranean", could reach the Gulf "very rapidly if the order were to be given".

Forty-two Gazelle and Puma helicopters from the Clemenceau on Sunday took off for Saudi Arabia's Yanbu airport, and the ship subsequently disembarked 65 lorries and jeeps for French ground troops.

#90270d5650 09/27/1990 ~French/German News Agency

OTTAWA (SEPT. 27) - Canada's Parliament opened session this week facing the leftovers of a problem-filled summer launched in June with a constitutional crisis that revived separatist sentiments in Quebec and wound up Wednesday when militant Mohawk Indians ended an 11-week armed standoff with the army.

Prime Minister Brian Mulroney, returning from a summer-long reclusion at his vacation home, walked into a hail of criticism at the House of Commons, where he faced the traditional round of questions by members.

His absence from Ottawa during the difficult summer months appeared to deepen the controversy surrounding the Conservative leader, who was overwhelmingly elected in 1984 and 1988 but whose approval rating now has sunk as low as 12 per cent, according to some polls.

The crisis in June shook the foundations of the Canadian federation.

Despite lengthy negotiations between Mr. Mulroney and the 10 provincial premiers, a constitutional amendment recognizing French-speaking Quebec as a "distinct society" within a largely English-speaking country was not ratified by two small provinces, Manitoba and Newfoundland.

This failure, which Quebec resented as an affront by English Canada, unleashed a resurgence of nationalist feelings among French Canadians. Recent polls have shown that if elections were held now, voters would elect the Parti Quebecois (PQ), which advocates political "sovereignty" for the province in an economic association with the rest of the country.

A parliamentary commission was formed last month to study Quebec's constitutional future following an historic accord between Quebec's Liberal Prime Minister Robert Bourassa, who is disenchanted with federalism, and PQ leader Jacques Parizeau. The commission will soon begin its work.

Mr. Mulroney's government has announced it will take initiatives to guarantee national unity. The English-speaking provinces also have said they intend to make constitutional proposals.

Within the English-speaking provinces, a distinct split remains between the east and west. The western provinces of British Columbia, Alberta, Saskatchewan and Manitoba accuse Ontario and Quebec of being coddled by Ottawa.

Canada's recently politicized Indian minority made itself heard in June, when an Indian deputy from Manitoba, Elijah Harper, blocked his province's ratification of the amendment declaring Quebec a "distinct society" because the special status of Amerindians had not been taken into account.

Indian rights grabbed international attention nearly three months ago when Mohawks erected barricades at Oka, a Montreal suburb, to block a golf course expansion onto land the Indians claim as sacred. A July 11 clash with police left one policeman dead.

Canadian troops were called in to end the Oka protest and a sympathy blockage of Mercier Bridge -- a main entry point into Montreal.

The stand-off ended Wednesday when about 20 "Warriors" -- the armed wing of the Mohawks -- surrendered after being holed up at a drug and alcohol rehabilitation center near Oka since early September.

Following their surrender, which was marred by scuffles between Indians and troops, an Indian leader from western Canada, Phil Fontaine, said, "One can see how Canada really is, which is not the image it holds up to foreigners."

Mr. Mulroney, while denouncing what he called the "terrorist" activities of the Mohawk warriors, earlier this week announced a series of proposals to

satisfy some of the Mohawk demands, notably the speeding up of rulings in territorial disputes.

But he emphasized that Indians would not be given any form of sovereignty, although the native people have said their ancestral rights as the first nations on the American continent should be included in the Canadian constitution.

The conflict at Oka has also inspired other Indian tribes to a growing militancy. "One can expect a difficult decade," one Canadian commentator said.

Quebec, seeking to further develop its immense hydroelectric resources in James Bay, a territory belonging to the Cree Indians, runs the risk of sparking another conflict with the Amerindian community, observers said.

#90270d5810 09/27/1990 ~French/German News Agency

ROME (SEPT 27) - Italy has firmly rejected an Iraqi request to provide the names of Italian nationals currently harboured in the Italian embassy in Baghdad, the foreign ministry said late Thursday.

The Italian ambassador in the Iraqi capital had been instructed to pass the message on.

The ministry said that the request was "contrary to international norms regarding the status of embassies" and constituted "unacceptable interference in the functions and prerogatives of diplomatic legations."

Similar demands regarding the embassies of the United States and Britain have also been firmly rejected by their respective governments.

The total number of Italians in Iraq and Kuwait is 336, of whom 168 are in Baghdad, the ministry said.

The Italian embassy in Kuwait meanwhile remains under a total blockade mounted by Iraqi troops, who have prevented any supplies from entering since Wednesday the ministry added.

-30- 1127

#90270d5900 09/27/1990 ~French/German News Agency

VEREENIGING, South Africa (SEPT. 27) - Alleged Inkatha warlord Themba Khoza, who along with 36 others faces charges of attempted murder and illegal possession of weapons, was freed here on 2,000 rands (781 dollars) bail Thursday, police said.

Mr. Khoza, head of Zulu leader Chief Mangosuthu Buthelezi's Inkatha Freedom

Party youth brigade in Transvaal, was arrested after an alleged Inkatha attack on migrant workers' hostels in Sebokeng black township near this town south of Johannesburg on September 4 which left 43 people dead, police said.

He was allegedly found in possession of four AK-47 automatic rifles, but was arrested under the Public Safety Act, which in contrast to the draconian Internal Security Act, allows detention without charge for only 30 days.

Mr. Khoza and his 36 co-defendants are to appear in the Vanderbijlpark magistrates' court near here on October 31, police said.

Meanwhile, Chief Buthelezi attacked the black nationalist African National Congress's proposal for a constituent assembly to oversee negotiations for a new South African constitution.

He told visiting U.S. state legislators in Ulundi, capital of the KwaZulu tribal homeland, that it would be "suicidal" for the government to hand over power to such a body.

He said the world was pinning too much hope on talks between President Frederik de Klerk and ANC Deputy President Nelson Mandela, urging foreign politicians to see negotiations on enfranchising the voteless black majority as an all-party affair.

#90270d5980 09/27/1990 ~French/German News Agency

GUATEMALA CITY (SEPT. 27) - A human rights group Thursday charged two army officers with taking part in the murder of a U.S. national last June in a jungle area in northern Guatemala.

Four soldiers have also been charged this week with the torture-murder of former Peace Corps worker Michael Devine, but the army has not yet refuses to turn them over to the police.

The Mutual Support Group (GAM) charged Colonel Mario Garcia Catalan and Nito Cabrera, whose rank was not given, with the homicide, after meeting here with a U.N. representative who was given a list of human rights abuses committed in Guatemala, including details of Mr. Devine's murder.

The army has denied that any of its officers took part in the June 8 homicide

The United States demanded a thorough investigation of the murder, threatening to cut next year's military aid to Guatemala in half unless Mr. Devine's killers were brought to trial.

#90270d6460 09/27/1990 ~French/German News Agency
WASHINGTON, (SEPT 27) - A 70-million-dollar weather satellite which failed more than a year ago has been rescued from plunging to Earth, the National Oceanic and Atmospheric Administration (NOAA) said Thursday.

The satellite, known as NOAA-11, is the more important of two satellites that orbit the Earth pole-to-pole. They provide visible and infrared pictures to forecasters.

Despite two broken gyroscopes, the satellite is sending forecast data.

"We would have lost half of our capability" if the rescue effort had failed, said Russell Koffler, NOAA deputy assistant administrator.

Programmers at General Electric Astro Space Division in Princeton, New Jersey, wrote new computer instructions to allow the satellite to operate on a single gyroscope after one of the four gyros failed.

A second gyro failed last Friday. Three of the gyroscopes are for directional

control so the satellite won't tumble, and one is for backup.

The satellite is doomed if its remaining directional gyroscope fails because the other cannot be used to control the probe, NOAA said.

The satellite was launched September 24, 1988.

#90270d6500 09/27/1990 ~French/German News Agency

NEW YORK, United Nations (SEPT 27) - Cuban Foreign Minister Isidiro Malmierca Thursday accused the United States of using the Gulf crisis to control the oil wealth of that region and restated his country's opposition to the use of force to roll back the August 2 Iraqi invasion of Kuwait.

In a speech to the U.N. General Assembly's 45th session, Mr. Malmierca launched a blistering attack on the United States, which he described as a "self-appointed policeman of the world."

"The United States is taking advantage of this crisis as a self-appointed policeman of the world in order to realize its long-standing desire to establish itself in the Gulf region and control, at its whim, the oil wealth of the area," he added.

His stand was in marked contrast with that of his Soviet counterpart Eduard Shevardnadze, who told the Assembly earlier this week that Moscow would support the use of force by the U.N. if Iraqi troops did not withdraw from Kuwait.

Referring to the concentration of U.S. and other Western naval forces in the Gulf area, Mr. Malmierca also warned that "hostility might actually break out by accident or premeditated provocation given not only the existence of nuclear-powered vessels but also the reported presence of nuclear payloads on some of (the) vessels."

WASHINGTON (SEPT 27) - U.S. officials expressed outrage Thursday over Sudan's request for 150 million dollars in U.S. food assistance, saying the Sudanese military was bombing humanitarian relief sites in rebel areas.

"I think it's almost unimaginable that a government facing a (famine) disaster of epic proportions would have the audacity to bomb food shipments at the same time they are asking for more food assistance," said Andrew Natsios, head of the U.S. Office of Foreign Disaster Assistance.

Sudanese officials approached administration officials Thursday to ask the United States for food assistance, despite Sudanese air strikes on relief

sites, including a Red Cross food barge, the U.S. officials said.

The food barge was donated to the Red Cross by the Norwegian Government and was bombed on the Nile River, adjacent to the southern Sudanese town of Bor, a main transit point for relief supplies, officials said.

Sudan's Air Force has bombed Bor and other towns where international relief programs are operated by the United Nation's Children Fund (UNICEF) and the International Committee for the Red Cross, U.S. officials said.

Two officials, who discussed the issue on condition of anonymity, disagreed as to whether the relief operations or the rebel military encampments were the targets of the air raids.

"The objective is to run UNICEF out," said one official, who added that the Sudanese Goverment is eager to stop relief efforts in rebel-held areas.

Mr. Natsios said the areas that were bombed had been designated as off limits to military operations by the government and had been thought safe for relief operations.

Sudanese authorities several weeks ago asked the United States to provide 150 million dollars in food assistance for the fiscal year 1991 that begins on October 1 to buy 970,000 tons of wheat -- 10 times the amount sent last year.

Sudanese officials, in Washington for the annual meeting of the World Bank and the International Monetary Fund, again pressed U.S. officials for help to head off famine, State Department officials said.

#90270d6570 09/27/1990 ~French/German News Agency

NEW YORK, UNITED NATIONS, (SEPT 27) - The U.N. Security Council Thursday extended by two months the deployment of U.N. military observers along the Iraqi-Iran border.

Resolution 671, passed unanimously, extends the mandate of the United Nations Iran-Iraq Military Observers Group (UNIIMOG) in Iran and Iraq until November 30, when the mandate will again be considered.

The council requested that before the end of November U.N. Secretary General Javier Perez de Cuellar consult with the parties involved about the future of UNIIMOG and issue a report with his recommendations.

In a recent report, Mr. Perez de Cuellar said the mandate of the U.N. military observers -- the so-called "Blue Helmets" -- must be redefined in view of the Iraqi troop withdrawal from Iran and the prisoner exchange with Iran.

The group, made up of 425 military observers from some 20 countries, was established in August 1988 and given the responsibility of monitoring compliance with the Iran-Iraq ceasefire.

The group's mandate had been extended every six months.

WASHINGTON, (SEPT 27) - Bulgarian President Jelio Jelev said here Thursday his country was ready to contribute troops to the multinational military force in the Middle East.

Mr. Jelev told a press conference at the U.S. Chamber of Commerce that the Bulgarian contingent to the force aimed at keeping Iraq out of Saudi Arabia following Baghdad's August 2 invasion of Kuwait would consist exclusively of land forces.

He said the Bulgarian troops would join a multinational force already deployed to the oil-rich Gulf, but he offered no further details.

Mr. Jelev -- who spent two days here discussing with various U.S. officials Bulgaria's prospects for developing a market economy -- is to travel Friday to New York to address the U.N. General Assembly.

Amman (SEPT. 27) EFE - The Energy Ministry Thursday urged Jordanians not to hoard gasoline, asserting that the country will not suffer fuel shortages despite the recent cutoff of oil supplies from Saudi Arabia.

The ministry said Jordanians had begun to store up on gasoline after Saudi Arabia's announcement last week that Riyadh would cut off oil supplies to Amman until outstanding debts are paid.

A ministry statement said there were no indications of an imminent oil shortage, and warned Jordanians about the dangers of storing flammable fuel in their homes.

Jordan has claimed that events in the Gulf have severly undermined its economy and the government's ability to make payments on the country's dlrs 8.4 billion foreign debt.

Before the Gulf crisis, 85 per cent of Jordan's oil was supplied by Iraq, and the rest by Saudi Arabia.

NICOSIA (SEPT 27) EFE - The Iraqi government is giving the 270,000 citizens of Kuwait until the end of next month to acquire Iraqi nationality, Radio Baghdad reported Thursday.

In a broadcast monitored in Cyprus, Baghdad said the order did not affect any of the foreigners residing in Kuwait before Iraq invaded the country August 2 and subsequently annexed it.

Until it was seized by Iraq, the oil-rich emirate relied heavily on a workforce of expatriate laborers and technical specialists, including some 300,000 Palestinians and 120,000 Indians.

Last week, Iraqi authorities set a deadline of October 6 for Kuwaitis to exchange their savings for Iraqi currency on a one- to-one basis, although in international markets the Iraqi money was quoted at one-tenth the rate fetched by the Kuwaiti dinar.

#90270e0021 09/27/1990 ~Latin America New Agency
TOKYO (SEPT 27) EFE - Prime Minister Toshiki Kaifu Thursday announced details of a proposed bill which would allow Japanese troops to be dispatched overseas for the first time since World War II.

The bill, which must be approved by parliament, would enable Japan to contribute to the multinational force deployed in the Middle East to prevent further Iraqi aggression after its invasion of Kuwait.

Kaifu stressed in a televised news conference that any Japanese troops sent to the Gulf would not go as combatants but would have a supportive role in transport, communications, medical and peace-keeping activities.

The law, which is scheduled to be presented to parliament in mid-October, calls for the creation of a United Nations Cooperation Corps of military and civilian personnel to participate in U.N. peace-keeping operations.

The Japanese constitution, drafted by U.S. occupiers at the end of World War II, forbids the dispatch of troops that could be used in combat overseas and Kaifu assured his Asian neighbours that sending soldiers to the Gulf would not signal the rebirth of Japanese militarism.

The law proposes that Japan send about 1,000 men to the Gulf in the U.N. Corps who would not be allowed to fight and only permitted to carry light weapons.

Japan has already pledged dlrs four billion in aid to the multinational force and to frontline states in the Gulf hurt by the economic sanctions against Iraq.

But it has come under pressure from the United States to contribute personnel.

"We have made the maximum economic contribution that our budget allows this year but we must do more to avoid world criticism," Kaifu said.

Kaifu held his news conference on the day before a visit to the United States and a tour of the Middle East.

BANGKOK (SEPT. 25) EFE - The death toll from a gas truck explosion in the Thai capital earlier this week has risen to 59, officials said Thursday.

The truck overturned and exploded in the center of Bangkok Monday, engulfing dozens of nearby cars, shops and buildings in flames.

Only 34 of the 59 dead have been identified by family members, as many of the bodies were burned beyond recognition.

Some 103 people were injured, many of them badly burned. Several are expected to die in the next few days.

The driver of the truck that exploded is suspected to have been under the influence of alcohol when he sped through a green light that was about to change.

The Thai government has begun studying ways to increase security checks on the transport of dangerous materials.

RIO DE JANEIRO (SEPT 27) EFE - President Fernando Collor de Mello says he halted a secret plan by the military to adapt Brazil's nuclear energy program for the construction of an atom bomb, the daily O Globo reported Thursday.

The newspaper quoted the president at a lunch for Brazilian journalists in New York Wednesday as saying he immediately stopped the "parallel nuclear program" when he assumed the presidency last March.

The 1988 Brazilian constitution forbids experiments and research to build nuclear weapons and previously Brazilian governments and the military have strenously denied suggestions that the country was developing them.

Collor de Mello did not say how he learned of the military project called Solimoes -- named for a major tributary of the Amazon River. He said he had appointed two scientific experts to montior the nuclear program and ensure that it it did not contravene the laws.

In a related development, congressional deputy Fabian Feldmann of the center-left Social Democracy Party Wednesday urged parliament to impeach Air Force Minister Brig. Socrates Monteiro and Armed Forces Chief of Staff Gen. Jonas de Moraes Correia for concealing information on the nuclear program from Congress.

He accused the Armed Forces of giving Congress false information on May 30 on the use of two shafts at an air base in the Amazon.

Feldmann said the shafts were probably used for testing atom bombs and one of them, 330 metres deep, was sealed by Collor de Mello on September 17.

O Globo said the shafts were probably constructed for the eventual testing of nuclear weapons in the early 1980s during the rule of Gen. Joao Figueiredo, Brazil's last military president.

MOSCOW (SEPT 27) EFE - The Interior Ministry of the Russian Federation announced Thursday that the number of registered drug addicts in the republic has risen to over 51,000, the news agency TASS reported.

Some 13,500 acts of drug-related violence were committed over the past year in Russia, the Soviet Union's largest republic, the Interior Ministry said.

Sixty percent of the registered addicts are under 30 years of age.

The ministry added that their agents have seized 12 tons of illegal narcotics worth some 100 million rubles (dlrs 160 million) during the past year.

The drug pushers reportedly come from all levels of society, including doctors

chemists and health workers, groups which the Interior Ministry said are beginning to put synthetic drugs on the market.

The ministry added that their agents are finding it harder and harder to control the drug traffic in Russia as the drug suppliers are becoming well organized and have plenty of money.

On the black market, a kilogram of hashish costs about 1,500 rubles (dlrs 2,400), a kilogram of marijuana about 1,000 rubles (dlrs 1,600) and an equal amount of opium 100,000 rubles (dlrs 160,000).

#90270e0051 09/27/1990 ~Latin America New Agency

WASHINGTON (SEPT 27) EFE - The Peruvian government has successfully "rejoined" the international financial community and embarked on the long path to normalizing relations with lending institutions, financial experts said Thursday.

Requesting anonymity, they said that backing received during the annual assembly of the International Monetary Fund and World Bank, ending Thursday, amounted to "a declaration of Peru's rejoining of international financial system."

World Bank President Barber Conable said Thursday he trusted Peru would begin to pay the Bank more than dlrs 800 million in back payments.

Conable said the World Bank would support Peru in overcoming its difficult financial straits, but added that Peru had to show goodwill gestures.

Peruvian authorities and the World Bank began negotiations a week ago, and the government of President Alberto Fujimori has said that after October 15 they will renew payments to the World Bank and the Inter-American Development Bank (IDB).

With a foreign debt totalling some dlrs 17 billion, Peru owes the World Bank dlrs 600 million in arrears, and a further dlrs 300 million in back payments to the IDB.

Peruvian government officials said an IMF delegation would travel to Lima in October for negotiations which would serve as the basis for renewing ties.

Peru's arrears to the IMF total more than dlrs 700 million, but then-president Alan Garcia began to make payments at the end of last year.

In 1985, Garcia enraged international lending institutions by restricting debt payments to 10 per cent of export earnings.

IMF president Michel Camdessus said Thursday that despite the "difficult period" of relations with the former administration, the IMF had been working with Fujimori since July to design an economic stabilization program.

Camdessus has come out in support of Fujimori's economic austerity programs.

Peruvian officials have said that as international financial relations normalize, countries such as Japan, the United States, Britain, France and Spain were considering creating a support group to help Peru pay off arrears.

MADRID (SEPT 27) EFE - The Spanish government Thursday told the Iraqi ambassador to Madrid that four Iraqi diplomats must leave the country within one week, the Foreign Ministry said.

The move is part of the European Community's retaliation for raids carried out by Iraqi troops on several EC member nations' diplomatic premises in occupied-Kuwait earlier this month.

The diplomats are Abdul Khadim A. Mushin, Sadoun Abdul Aziz Ali - both third secretaries at the embassy -- and Ahmad F. Mishwah and Shems M. Aldin Ali, who were waiting for accreditation from the Spanish government when the expulsion order came through.

Mushin had been a diplomat in Spain since 1989 and Aziz Ali since 1985.

The Foreign Ministry told ambassador Arshad Tawfiq Ismail that the four must leave the country within a week.

The remaining seven Iraqi diplomats in Madrid have been told that they can not move outside a 50-km radius of the capital without the Spanish government's authorization.

Spain's military attache in Iraq, Col. Arturo Vinuesa, was expelled from Baghdad on September 21, four days after the EC decided to take retaliatory measures for the raids.

Iraq invaded Kuwait on August 2.

#90270e0056 09/27/1990 ~Latin America New Agency

MANAGUA (SEPT. 27) EFE - Nicaragua's leftist Sandinista Party leaders Thursday demanded that the government drop its policy of returning land and properties seized after the 1979 revolution to its former owners.

The demand came during talks with government officials aimed at restoring calm after five people were killed Monday in a land dispute in the north of the country.

Former president Daniel Ortega, leading the Sandinistas in the talks which began Wednesday, said his party had demanded "urgent measures to strengthen confidence and establish a minimum of national stability".

Five people were killed and four were wounded Monday when 40 leftist peasants and 150 former Contra rebels clashed in northern areas over disputed land.

After overthrowing late dictator Anastasio Somoza in 1979, the Sandinistas confiscated hundreds of private businesses, factories, homes and estates.

But rightist President Violeta Chamorro, who took office in April, has pledged to set up a free market economy and has demanded that some lands and businesses be returned to pre-revolutionary owners.

The Sandinistas have vowed to prevent the wholesale transfer of land, and also Thursday demanded the government take steps to distribute food to villagers in poor regions in the north of the country and on the east coast.

NAIROBI (SEPT. 27) XINHUA - UNLESS THE GROWTH OF AFRICA'S POPULATION IS CURBED, THE CONTINENT COULD BE POORER IN THE NEXT CENTURY THAN IT IS TODAY, A KENYAN ANTHROPOLOGIST WARNED.

THE "DAILY NATION" NEWSPAPER TODAY QUOTED PROF. SIMEON OMINDE AS SAYING ON WEDNESDAY THAT AFRICA'S FERTILITY RATE IS THE HIGHEST IN THE WORLD WITH MOST WOMEN BEARING MORE THAN SIX CHILDREN BEFORE THE END OF THEIR REPRODUCTIVE PERIOD.

THE ANTHROPOLOGIST TOLD THE SECOND PAN-AFRICAN ASSOCIATION OF ANTHROPOLOGISTS CONFERENCE WHICH OPENED HERE ON MONDAY THAT PROBLEMS ASSOCIATED WITH THE POPULATION EXPLOSION WOULD INCREASE BY THE END OF THE CENTURY.

TAKING KENYA AS AN EXAMPLE, HE SAID THAT THE EAST AFRICAN COUNTRY REGISTERED THE HIGHEST FERTILITY RATE OF EIGHT IN AFRICA, BRINGING THE EAST AFRICAN

COUNTRY A LOT OF PROBLEMS SUCH AS EDUCATION, EMPLOYMENT, URBAN CONGESTION AND ENVIRONMENTAL POLLUTION.

OF THE EXPECTED POPULATION OF 35 MILLION BY THE YEAR 2000, KENYA'S SCHOOL-AGE POPULATION AGED UNDER 14 WOULD HAVE INCREASED TO 16 MILLION, NOTED THE PROFESSOR.

HE ALSO WARNED THAT IF THE COUNTRY'S POPULATION GROWTH RATE OF 3.5 PERCENT DOES NOT DECLINE SUBSTANTIALLY, THE INDEX OF DE- PENDENCY WOULD RISE TO 114.1 BY THE TURN OF THE CENTURY.

AS A RESULT, HE ADDED, THE HIGH DEPENDENCY BURDEN WOULD HAVE A DIRECT IMPACT ON THE QUALITY OF LIFE OF KENYANS.

MEANWHILE, DIRECTOR OF THE INSTITUTE OF AFRICAN STUDIES PROF. GIDEON WERE ALSO TOLD THE DELEGATES TO THE FOUR-DAY MEETING THAT THE STANDARD OF LIVING IN THIRD WORLD COUNTRIES HAS DECLINED RAPIDLY OVER THE PAST 30 YEARS OWING TO THE HIGH POPULATION GROWTH RATE OF 3.3 PERCENT.

MANILA (SEPT. 27) XINHUA - ABOUT 200,000 RURAL POOR PEOPLE IN THE PHILIPPINES WILL BENEFIT FROM LOANS TOTALLING 58 MILLION U.S. DOLLARS AND A TECHNICAL ASSISTANCE GRANT OF 295,000 U.S. DOLLARS, BOTH APPROVED TODAY BY THE ASIAN DEVELOPMENT BANK.

ONE INTEREST-FREE LOAN OF SDR (SPECIAL DRAWING RIGHTS) 18.246 MILLION, EQUIVALENT TO 25 MILLION U.S. DOLLARS, WILL COME FROM THE BANK'S CONCESSIONAL ASIAN DEVELOPMENT FUND.

THE OTHER LOAN OF 33 MILLION U.S. DOLLARS, WHICH IS FROM THE BANK'S ORDINARY CAPITAL RESOURCES, IS REPAYABLE OVER 30 YEARS.

THE LOANS AND GRANT ARE ALL DESIGNATED FOR THE SECOND PALAWAN INTEGRATED AREA

DEVELOPMENT PROJECT.

WITH AN AREA OF ABOUT 1.5 MILLION HECTARES, PALAWAN IS THE LARGEST PROVINCE IN THE PHILIPPINES AND ALSO ONE OF THE POOREST. THE AVERAGE ANNUAL FAMILY INCOME IN THIS PROVINCE IN WESTERN PHILIPPINES IS ONLY HALF OF THE NATIONAL AVERAGE.

THE SECOND PALAWAN AREA DEVELOPMENT PROJECT AIMS AT DEVELOPING LAND AND WATER RESOURCES IN THE NORTHERN HALF OF MAINLAND PALAWAN AND THE ISLAND MUNICIPALITIES OF THE PROVINCE, IN ORDER TO RAISE THE LEVEL OF THE AGRICULTURAL PRODUCTION AND PRODUCTIVITY, CREATE EMPLOYMENT OPPORTUNITIES AND IMPROVE THE QUALITY OF LIFE OF THE SUBSISTENCE FARMERS AND FISHERMEN.

THE PROJECT WILL SUPPORT THE PHILIPPINE GOVERNMENT'S DEVELOPMENT GOALS IN THE RURAL SECTOR, THE MANILA-BASED BANK SAID.

TOKYO (SEPT. 27) KYODO - THE GOVERNMENT DECIDED THURSDAY TO RELAX CONTROLS ON EXPORTS OF FIVE PRODUCTS, WHILE AT THE SAME TIME TIGHTENING RESTRICTIONS ON EXPORTS OF A NUMBER OF DRUGS AND A CERTAIN TYPE OF CHLOROFLUROCARBON, SOURCES SAID.

THE GOVERNMENT DECIDED DURING A CABINET MEETING HELD EARLIER IN THE DAY TO LIFT RESTRICTIONS ON EXPORTS OF TUNGSTEN, CEMENT, SYNTHETIC ACRYLIC FIBERS, AND TWO OTHER PRODUCTS BY AMENDING THE EXPORT TRADE CONTROL ORDER, THEY SAID.

ON THE OTHER HAND, IT WILL BEEF UP CONTROLS ON FREON 115, A TYPE OF CHLOROFLUROCARBON, STIMULANTS, AND PSYCHOTROPIC DRUGS, BY INCLUDING THEM ON THE LIST OF RESTRICTED EXPORTS.

EXPORTS OF SUCH PRODUCTS AS TUNGSTEN AND CEMENT WERE BANNED AFTER WORLD WAR II BECAUSE THEY WERE NEEDED IN JAPAN TO RESUSCITATE THE WAR-RAVAGED ECONOMY.

BUT NOW THAT TIMES HAVE CHANGED, THE GOVERNMENT HAS DECIDED TO EASE EXPORT RESTRICTIONS ON THE GOODS SINCE THERE IS NO LONGER ANY NEED TO MAINTAIN THEM.

FREON 115, STIMULANTS, AND PSYCHOTROPIC DRUGS MUST GAIN APPROVAL FROM THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY BEFORE THEY CAN BE EXPORTED.

EXPORTS OF THE CHLOROFLUROCARBON WILL BE REGULATED TO ENSURE A STEADY SUPPLY OF THE SUBSTANCE FOR THE NATION IN THE WAKE OF INTERNATIONAL RESTRICTIONS OVER THE PRODUCTION OF OZONE-DEPLETING CHLOROFLUROCARBONS.

THE GOVERNMENT HOPES TO LIMIT EXPORTS OF THE DRUGS TO PREVENT THE MISUSE OF THE SUBSTANCE, WHICH IS NOW A GROWING SOCIAL PROBLEM, AND TO CHECK ILLEGAL INTERNATIONAL TRADE.

#90270k0122 09/27/1990 ~Japanese News Agency

TOKYO (SEPT. 27) KYODO - BOLSTERED BY SOUND FARM INCOME, THE AVERAGE ANNUAL GROSS INCOME OF AGRICULTURAL HOUSEHOLDS ROSE 7.2 PERCENT IN FISCAL 1989 FROM THE PRECEDING YEAR TO 7.98 MILLION YEN, THE GOVERNMENT SAID TUESDAY.

NET FARM INCOME, INCLUDED IN THE GROSS INCOME FIGURE, JUMPED 15.4 PERCENT TO 1.11 MILLION YEN PER HOUSEHOLD, POSTING DOUBLE-DIGIT GROWTH FOR THE FIRST TIME SINCE 1975, MINISTRY OF AGRICULTURE, FORESTRY, AND FISHERIES OFFICIALS SAID.

THE OFFICIALS SAID GROSS FARM INCOME INCREASED ABOUT 6.5 PERCENT DUE TO BUMPER RICE CROPS AND THE RISE IN THE PRICES OF FRUIT AND VEGETABLES, WHILE LOWER PRICES OF FERTILIZER AND PESTICIDES HELPED KEEP THE RISE IN FARM OPERATING COSTS, WHICH INCHED UP 1.5 PERCENT, WELL UNDER CONTROL, RESULTING IN THE NET INCOME GROWTH.

-30- 944

#90270k0123 09/27/1990 ~Japanese News Agency

TOKYO (SEPT. 27) KYODO - THE JAPANESE GOVERNMENT ON THURSDAY DECIDED TO OFFER A 5.4 PERCENT CUT IN SPENDING ON PROTECTION OF THREE AGRICULTURAL PRODUCTS, RICE, WHEAT, AND BARLEY, OVER SEVEN YEARS FROM 1990, OFFICIALS SAID.

THE PROPOSAL WILL BE CONTAINED IN A REPORT TO BE SUBMITTED TO THE SECRETARIAT OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT) AS EARLY AS FRIDAY. THE REPORT IS REQUIRED FOR FARM TRADE NEGOTIATIONS SLATED FOR EARLY OCTOBER IN GENEVA UNDER THE URUGUAY ROUND OF MULTILATERAL TRADE TALKS.

THE GOVERNMENT, HOWEVER, WILL NOT COMPLY WITH A U.S. DEMAND FOR THE CONVERSION OF NON-TARIFF IMPORT RESTRICTIONS INTO TARIFFS ON STAPLE FOODS, SUCH AS RICE, MILK AND OTHER PRODUCTS NOW SUBJECT TO DOMESTIC PRODUCTION ADJUSTMENT, THE OFFICIALS SAID.

THE PROPOSAL STEMS FROM TOKYO'S BASIC POLICY OF REDUCING THE TOTAL SPENDING ON THE PROTECTION OF DOMESTIC MARKETS FOR GRAINS, SUGAR, MILK, AND DAIRY PRODUCTS BY 30 PERCENT OVER 10 YEARS FROM 1986. THE EXPENDITURE IS TALLIED UNDER THE AGGREGATE MEASURE OF SUPPORT (AMS).

THE AMS USES PRICE SUPPORT MEASURES AND ALL TYPES OF FARM SUBSIDIES IN CALCULATING THE DEGREE OF DOMESTIC PROTECTION OF AGRICULTURE.

THE JAPANESE OFFER IS MOST LIKELY TO MEET WITH A STRONG OBJECTION FROM THE UNITED STATES AND OTHER FARM PRODUCT EXPORTERS, WHICH CALL FOR THE ''TARIFFICATION'' OF JAPAN'S NONTARIFF TRADE BARRIERS, OBSERVERS SAID.

JAPAN'S SPENDING ON THE PROTECTION OF RICE IS ESTIMATED AT 2.2 TRILLION YEN IN 1988 WHEN TALLIED UNDER THE AMS. THE AMOUNT ACCOUNTS FOR NEARLY 60 PERCENT OF JAPAN'S OVERALL AGRICULTURAL PROTECTION EXPENDITURE, ACCORDING TO THE ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT (OECD).

TOKYO (SEPT. 27) KYODO - KANZAKI PAPER MFG. CO. SAID THURSDAY IT HAS FORMED A JOINT VENTURE WITH ZANDERS FEINPAPIERE AG, A LEADING GERMAN PAPER MANUFACTURER TO PRODUCE THERMAL PAPER USED FOR FACSIMILIE MACHINES.

THE VENTURE, KANZAN SPEZIALPAPIERE GMBH, CAPITALIZED AT 148 MILLION MARKS, IS BASED IN DUREN, WEST GERMANY. KANZAKI AND ZANDERS PUT UP EQUAL AMOUNTS IN CAPITAL, COMPANY OFFICIALS SAID.

PRODUCTION IS EXPECTED TO BEGIN IN NOVEMBER OF NEXT YEAR, WITH ANNUAL OUTPUT PROJECTED TO REACH 25,000 TONS.

THE VENTURE WILL HELP KANZAKI MEET ITS GOAL OF ESTABLISHING PRODUCTION FACILITIES IN THE THREE MAJOR MARKETS OF JAPAN, EUROPE, AND THE U.S.

KANZAKI EARLIER ACQUIRED A PLANT IN THE U.S., WHICH HAS ALREADY BEGUN PRODUCTION.

THE FIRM PROJECTS PRODUCTION IN ALL THREE REGIONS TO REACH 80,000 TONS BY 1992 GIVING IT A 20 PERCENT SHARE OF THE WORLD MARKET.

KANZAKI IS TARGETING SALES FOR THE WEST EUROPEAN MARKET, BUT HOPES TO EVENTUALLY EXPAND TO THE SOVIET UNION AND COUNTRIES IN EASTERN EUROPE.

#90270k0125 09/27/1990 ~Japanese News Agency

TOKYO (SEPT. 27) KYODO - THE FIRST JOINT JAPANESE-CAMBODIAN ENTERPRISE IS TO BE ESTABLISHED IN CAMBODIA LATER THIS YEAR, INDUSTRY SOURCES SAID THURSDAY.

THE SOURCES SAID A MEDIUM-SIZE TOKYO LUMBER TRADING FIRM, OKADA CO., HAS AGREED WITH THE CAMBODIAN GOVERNMENT'S FORESTRY BUREAU TO SET UP A JOINT LOG-SAWING AND SAWN WOOD EXPORTING ENTERPRISE IN PHNOM PENH.

THE JOINT FIRM WILL BE CAPITALIZED AT 6 MILLION DOLLARS, OF WHICH 40 PERCENT WILL BE PROVIDED BY OKADA AND THE BALANCE BY THE HENG SAMRIN GOVERNMENT IN

PHNOM PENH.

THE NEW FIRM WILL SAW AND PROCESS PINE, CHINESE QUINCE AND RED SANDALWOOD, LOGGED IN NORTHEASTERN CAMBODIA BY THE FORESTRY BUREAU, AND ALL OF THE FACTORY'S PRODUCTS WILL BE EXPORTED TO JAPAN. THE JOINT COMPANY WILL BE GRANTED THE EXCLUSIVE RIGHT TO EXPORT LOGS AND SAWN WOOD, THE SOURCES SAID.

THE NEW ENTERPRISE WILL BUILD A PLYWOOD FACTORY NEXT SPRING, AND WILL EVENTUALLY TAKE OVER TWO FORESTS FROM THE FORESTRY BUREAU AND START TO FELL TREES DIRECTLY. THE FIRM WILL ALSO START REFORESTATION TO PROTECT THE ENVIRONMENT.

#90270k0140 09/27/1990 ~Japanese News Agency

OSAKA (SEPT. 27) KYODO - MATSUSHITA ELECTRIC INDUSTRIAL CO. SAID THURSDAY IT HAS DEVELOPED THE WORLD'S FIRST VOICE-INTERACTIVE PROGRAMMING VIDEO CASSETTE RECORDER (VCR).

THE NEW VCR IS CAPABLE OF PROVIDING VOICE-SYNTHESIZED PROGRAMMING DIRECTIONS AND RESPONDING TO SPOKEN INSTRUCTIONS, COMPANY OFFICIALS SAID. THEY ADDED THAT THE DEVELOPMENT OF THE NEW VCR HAS MADE IT EASIER TO PROGRAM VCR RECORDING, OR TIME-DELAY RECORDING.

THE VCR IS MADE UP OF VOICE RECOGNITION, VOICE SYNTHESIZING, AND CONTROL SECTIONS.

THE NEW PRODUCT WILL BE ON DISPLAY AT THE JAPAN ELECTRONICS SHOW 1990 IN TOKYO ON OCTOBER 2-6.

OFFICIALS INDICATED THAT THE CONSOLE VERSION OF THE NEW VCR WOULD PROBABLY GO ON SALE IN THE SPRING OF 1991. THE NEW VCR WILL BE PRICED 20,000 TO 30,000 YEN HIGHER THAN THE CONVENTIONAL VCR, THEY ALSO HINTED.

FOR THE PRESENT, ONLY THE JAPANESE VERSION WILL BE MARKETED. THE DEVELOPMENT OF AN ENGLISH-LANGUAGE VERSION, FOR EXAMPLE, IS NOT UNDER CONSIDERATION AT THE MOMENT, OFFICIALS SAID.

#90270m0001 09/27/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (SEPT. 27) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The Nikkei loses another 479 points. ... The FTSE is up 26 points at midday in

London. ... U.S. stocks trading overseas recover after opening sharply lower. ... The Dollar is up strongly against the yen. trading. ... Crude prices fall by more than $1.50 in overnight trading. ... The U.S. will sell five million barrels of oil from the STRATEGIC PETROLEUM RESERVE to rein in surging crude prices. ... Calling the action "unconscionable," a judge has ruled that GENERAL ELECTRIC hid serious doubts about its design of a nuclear containment vessel. The decision raises the firms exposure to potential damages. ... USAIR says it will delay indefinitely paying its quarterly dividend and will push back delivery of 16 jetliners. ... TREASURY SECRETARY NICHOLAS BRADY says the RESOLUTION TRUST CORP. will have to cease operations unless it gets more money by the end of the year.

WHAT'S AHEAD:

The LABOR DEPARTMENT is scheduled to release U.S. import / export prices at 10 a.m. EDT. ... OFFICE OF THRIFT SUPERVISION director TIMOTHY RYAN is scheduled to testify before the Senate Banking Committee today. ... The IMF/WORLD BANK annual meeting concludes today. ... The SEC wants to force companies to account for assets using more current rather than historical values. The banking industry is fighting the change. ... The CANADIAN AUTO WORKERS are hinting at a strike against GENERAL MOTORS.

FROM THE BULLS:

Insider buying has skyrocketed to the highest and most bullish level since after the 1987 crash, says NORMAN FOSSBACK, editor of "The Insiders." He says the current 78% insider buying rate is well above the normal 35% pace. (CNBC "World Business", 9/27)

"Technically, stocks are very oversold here," says A.C. MOORE, director of research at ARGUS RESEARCH. "They will respond favorably to any progress on the budget." (WSJ, 9/27)

FROM THE BEARS:

"Everyone is looking to get out now," says CHRISTOPHER PEDERSEN, director of trading at TWENTY-FIRST SECURITIES. "People are looking for 2200" on the Dow. (WSJ, 9/27)

"It's just a normal bear market," says MARSHALL ACUFF of SMITH BARNEY. "It's just been so long since we've experienced a typical bear market that I think people have forgotten how it is. ... Actually, we've been in a bear market now for more than a year. The advance-decline line peaked out in August of last year. Most stocks are well down. It's those stocks that have held up relatively well that are now getting crushed." Still, he says equities "are starting to generate more interesting values than they have in some time." (CNBC "Market Wrap-Up", 9/27)

"Stocks are being buffeted by events from the Mideast," says STEVEN EINHORN of GOLDMAN SACHS & CO. But he adds, "Our feeling is the market is headed lower, not so much due to the Mideast situation but to economic fundamentals." He foresees a bear market of at least six months duration, and says prices need to fall another 10% before he "starts nibbling." At the moment, Einhorn says, "our strategy is to sell into any rallies." ("Investor's Daily", 9/27)

"The Middle East crisis has unleashed a fearless, relentless bear on the financial markets," says CARMINE GRIGOLI, chief strategist for FIRST BOSTON. "Until the crisis is resolved, or the market moves to much lower levels, the bear will not be put back into its cage." (WSJ, 9/27)

STOCK MARKET:

Aided by lower oil prices, stocks should start today on a firm note, says NEWTON ZINDER at SHEARSON LEHMAN BROTHERS. Stocks have been sensitive to oil prices, which Zinder thinks have seen their "last gasp" highs. "I think we're going to have a better market than a lot of people expect over the next month or two," says Zinder. "I don't' think the bear market is over but I think we're going to get a good bear market rally which will make people think the bear market is over." (FNN "World Business Update", 9/27)

"I was one of those idiots who thought we'd have a rebound" in the last couple weeks, confesses RICHARD WHITTINGTON of KIDDER, PEABODY. He says he has been "lowering numbers helter-skelter" since he realized there would be no rebound. "It's clear there's no post- Labor Day pickup," concludes Whittington. ("Investor's Daily", 9/27)

"Tuesday and Wednesday were like the mirror of each other," says DAVID POLEN, president of POLEN CAPITAL MANAGEMENT. "There's no new news. And in these markets, the selling feeds on itself." ("USA Today", 9/27)

"The uncertainty emanating from the Iraqi Mideast crisis has caused gridlock in the equity marketplace," says MICHAEL MADDEN, co-head of investment banking at SHEARSON LEHMAN BROTHERS INC. (WSJ, 9/27)

ERIC MILLER, chief investment officer at DONALDSON, LUFKIN & JENRETTE, says that while stocks are "vulnerable to a rally," any advance would still be couched in the context of a bigger bear market. "I see no clear signs of a bottom." He also cautions that the continued decline in Japanese stock prices could hurt world markets by "giving extra impetus to a world monetary squeeze." (WSJ, 9/27)

"The crisis in the Middle East and the pressure on oil has been a catalyst rather than a cause [in the market decline], but emotion plays a very big part in the market. And, as long as emotion is tied to that oil price, I think you will see the effect on the indexes themselves if not the oil stocks specifically," says WALTER MURPHY of MERRILL LYNCH. (CNBC "Market Wrap-Up",

9/26)

"The market's catching up from being a little bit too high and not recognizing that a recession was going to happen," says MAUREEN ALLYN of SCUDDER, STEVENS & CLARK. She says we will be in a recession by next month at the latest, but says this downturn will take a different shape from recessions past. "The layoffs [will be] in the financial, lending area this time. That's a little bit different from production workers." (FNN "Marketwrap", 9/26)

Corporate profits are poised to fall further. "The key point is that pressure from oil prices will depress corporate profits across the board," says LAWRENCE KUDLOW, the chief economist of BEAR, STEARNS & COMPANY. "Although companies are going to try, it will be very difficult if not impossible, to pass those costs along to belt- tightening consumers who are themselves feeling the pinch." (NYT, 9/27)

STOCK TIPS:

"PEPSICO, and growth stocks like it, are the last to go, but when they go, they'll go fast," says HARVEY EISEN, president of SUN AMERICA ASSET MANAGEMENT CORP. "This is really a textbook 1973-1974 bear market." THOMAS GALLAGHER, managing director of capital commitment at OPPENHEIMER & CO., agrees, "There are a thousand reasons why people are selling [growth] stocks, but the main reason is that we are in a bear market. And there's the feeling that your first sale is your best sale." (WSJ, 9/27)

CHASE MANHATTAN's restructuring and CITICORP's announcement of financial trouble "certainly seems to be the beginning of a crisis," says BRENT ERENSEL of DONALDSON, LUFKIN & JENRETTE. He says there is a real possibility of dividend cuts from major banks. Erensel says the most alarming part of Chase's dividend reduction is that the company's "problems seemed to deteriorate so rapidly in 1990," since the company raised its dividend in January. (FNN "Marketwrap", 9/26)

Based on insider buying, UNC appears to be on the brink of a big earnings surge, predicts NORMAN FOSSBACK, editor of "The Insiders." The chairman of the company purchased nearly 50,000 shares on the open market late last month. Other stocks showing heavy insider buying: NWNL, VON'S SUPERMARKETS and CAESAR'S WORLD. (CNBC "World Business", 9/27)

DEER & CO. stock fell 3 3/8 to 45 3/8 yesterday after analyst MITCHELL QUAIN of WERTHEIM SCHRODER cut his earnings estimate. But THOMAS BURNS of GOLDMAN SACHS says: "The stock is cheap. We have a buy recommendation." ("USA Today", 9/27)

Software developer AUTODESK was off 1 to 42 1/2 yesterday, falling on rumors that the introduction of a long awaited software package might be delayed. But LAURA CONIGLIARO of PRUDENTIAL-BACHE SECURITIES INC. says there are more

concrete reasons for Autodesk's decline. "There's beginning to be some discussion about how fast a company like Autodesk can grow if we go into recession," explains Conigliaro. ("Investor's Daily", 9/27)

MARSHALL ACUFF of SMITH BARNEY says a long bear market has driven many stocks down to levels that make them good buys for the future, citing IBM as a prime example. He also likes PACIFIC TELESIS, USWEST and GTE. (CNBC "Market Wrap-Up", 9/26)

"There is profit margin erosion [for the Big Three automakers] caused by an effort to keep sales up in the face of what's going on in the Persian Gulf," says DEAN WITTER REYNOLDS' RONALD GLANTZ. Most analysts agree that all three automakers will post significantly lower profits, with CHRYSLER posting its second quarterly loss since 1982. ("Investor's Daily", 9/27)

Having traded at prices as high as 95 earlier this year, NIKE closed at 64 1/2 yesterday. Many analysts think the stock is a good buy, but perhaps not yet. "I think it could move back into the $80 level next year," says MIKE SHEA of BLACK & CO. "That doesn't mean it won't go down to 50 first." "I came away with no great urge to buy the stock,' says another analyst who refused to be identified. ("Investor's Daily", 9/27)

"Hurricane signals are flying everywhere: don't ignore them," advises the "Wellington Letter." "This is a long-term, serious bear market." Any rally now would end in a trap, offering another good short selling opportunity. The newsletter suggests shorting McCAW CELLULAR. (CNBC "World Business", 9/27)

-30- 10189

#90270m0002 09/27/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (SEPT. 27) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"The market doesn't have its own idea of where the dollar should be, so it waits for rumors or makes them up," says RALF WEIDENHAMMER, manager of treasury and foreign-exchange operations at COMMEREZBANK in Tokyo. (WSJ, 9/27)

"It was a rather lackluster day in terms of liquidity" in the currency market, says BANK OF BOSTON's SCOTT HOROWITZ. Many analysts say dealers were busy with paperwork yesterday. ("Investor's Daily", 9/27)

"I would be very surprised if the Fed doesn't lower interest rates within the next few weeks," says GEOFFREY BELL, president of GEOFFREY BELL & CO., a financial consulting firm. Mr. Bell also expects further interest-rate cuts later this year. He predicts the rate on federal funds will fall to 7% by

year end from its recent level of 8%. But even if the Fed does cut short-term rate, Mr. Bell says that long-term bond yields will not follow suit. "The long bond will dance to a different tune." By the end of the year he predicts long- term Treasury bonds will yield between 9% and 9 1/4%. (WSJ, 9/27)

"There was significant demand" from investors for the new four-year Treasury notes, says JOSEPH LIRO, a senior vice president at S.G. WARBURG & CO. "For the small investor, a yield above 8 1/2% for four years on a Treasury note is probably a fairly decent investment. That's a fairly attractive return on a riskless asset." (WSJ, 9/27)

THE ECONOMY:

"For all practical purposes, the whole economy is in a recession at this point " says JERRY JASINOWSKI, president of the NATIONAL ASSOCIATION OF MANUFACTURERS. "But I think this is likely to be a pretty mild recession." Jasinowski says the manufacturing sector is stronger than in the past and inventories are under control. "If we can get a budget agreement, bring down interest rates a bit and move forward on energy ... we can have a decline in growth in fourth quarter and the first quarter of next year of less than one percent." (CNN "Business Morning", 9/27)

"It's not going to be a good Christmas," says EDWARD YARDENI of PRUDENTIAL-BACHE RESEARCH. He predicts zero economic growth and only a "puny" rise in employment for the rest of the year. "The key to consumer spending is jobs, and a dramatic slowdown (in new jobs) began in July," says Yardeni. ("Investor's Daily", 9/27)

"We are definitely on the cusp, on the lip, on the fringe of a recession," says ROBERT STOVALL, president of STOVALL/TWENTY-FIRST ADVISERS. He notes that stocks usually turn down a few months before a recession begins, and turn up a few months before it ends. He says that it could easily be "a year before this is over with." (WSJ, 9/27)

"The decline in durable-goods orders provides further confirmation that the recession began in August," says GORDON RICHARDSON, an economist at the NATIONAL ASSOCIATION OF MANUFACTURERS. (WSJ, 9/27)

The durable goods report "is another sign that the economy is essentially dead in the water," says DAVID BLITZER, chief economist for STANDARD & POOR'S. "But it's not diving into recession. It's really standing still." ("Nightly Business Report", 9/26)

"I think that a recession got started last month and the personal income numbers and the spending numbers back up that feeling," says JAMES SOLLOWAY of ARGUS RESEARCH. (CNBC "Market Wrap-Up", 9/26)

SAMUEL KAHAN, chief economist at FUJI SECURITIES, says the personal spending

and disposable income figures released yesterday "are consistent with an economy that is dead in the water." DAVID BERSON, chief economist at the FEDERAL NATIONAL MORTGAGE ASSOCIATION, says the latest reports underscore "that the economy is pretty fragile." ("The Washington Post" and "USA Today", 9/27)

When adjusted for inflation, both personal income and consumption showed slight drops in August, under what economists had expected. These figures "clearly show the beginnings of a sharp compression in consumer purchasing power," according to STEPHEN ROACH of MORGAN STANLEY. He says purchasing power could decline by as much as 3% in the fourth quarter alone. (FNN "Marketwrap", 9/26)

"If you want to send a gift to a friendly retailer, send them some worry beads " says ALAN MILLSTEIN, publisher of "Fashion Network Report." LEONARD BERRY, director of the CENTER FOR RETAILING STUDIES at TEXAS A&M UNIVERSITY, says, "Any retailer that approaches the near future with a secure feeling is one that hasn't been seeing what's going on." ("USA Today", 9/27)

Durable goods orders were down 0.8% in August. "On the surface it seems to suggest that producers are wary about the economic outlook," says GILBERT BENZ an economist with the SWISS BANK CORPORATION in New York. "There's no way that producer investment won't be affected by oil prices, particularly if they stay above $35 a barrel." (NYT, 9/27)

"In my 30 years of being in the [real estate] business, it is probably the worst market I have ever been in," says BEN FLAMM, owner of AARON REAL ESTATE in Philadelphia. CHANDLER BARTON, head of COLDWELL BANKER's residential group says, "Except for a few select major cities, primarily in the Midwest, the real estate resale market is off about 20% from one year ago." ("USA Today", 9/27)

The CONFERENCE BOARD reports that its consumer confidence index was unchanged in September following its dramatic decline in August. That still means that consumer confidence is at its lowest point since the 1982 recession. FABIAN LINDEN, a Conference Board economist, says consumers remained uncertain because there was little progress in the Persian Gulf crisis. "People are increasingly concerned that inflation and interest rates will be rising." (NYT, 9/27)

"After seven years of economic recovery, the poverty rate was higher in 1989 than in any year in the 1970s, including the deepest recession years of that decade," says ROBERT GREENSTEIN, director of the CENTER ON BUDGET AND POLICY PRIORITIES, a nonprofit organization that researches poverty issues. "With the economy now running out of steam and a new recession threatening, the poverty rate is likely to start rising again." (WSJ, 9/27)

Oil prices declined sharply overnight, but independent oil analyst HUMPHREY

HARRISON this morning says crude is headed to $50 per barrel and could go higher. Exporters can increase production to meet consumption but not total demand from nervous dealers looking to increase their stocks, says Harrison. He puts the odds of a shooting war in the Mideast at ninety percent. (CNN "Business Day", 9/27)

IN WASHINGTON:

PRESIDENT BUSH "might be willing to compromise on capital-gains taxes," which have been one of the main sticking-points in the budget talks, says SENATE REPUBLICAN LEADER ROBERT DOLE of Kansas. (WSJ, 9/27)

"The hang-up [in the budget negotiations] continues to be taxes, and whether ... the wealthiest Americans ... will bear any burden," says House Majority Whip WILLIAM GRAY (D. - Penn.). (FNN "Marketwrap", 9/26)

"I'm highly concerned that if you take [sequestration's] piece out of the federal budget, you're going to see one more block pulled out of the foundation of this growth cycle," says PORTER WHEELER, chief economist at the JEFFERSON GROUP. He says failure to arrive at a budget agreement would push the economy "into more of a certainty of a recession. Unfortunately, Wheeler also thinks the chances for a deal are slim, saying, "There seems to be more of a stalemate this year." ("Investor's Daily", 9/27)

#90270p8695 09/27/1990 ~PR Newswire

MIAMI (SEPT. 27) PR NEWSWIRE - AT&T today announced it will reduce prices and introduce discounts on select in-state long distance services, representing nearly $20 million in savings for Florida AT&T customers. The savings will begin Oct. 1.

Basic AT&T Long Distance services will be reduced by an average of 5 percent on calls made during the day and evening time periods. AT&T Reach Out(R) Florida customers will receive an additional 5 percent reduction on calls during the same time periods.

Business customers using AT&T PRO(SM) WATS services will also see price savings of 5 percent during day and evening call periods, and AT&T 800 READYLINE users will enjoy a new 15 percent discount on evening calls and a 27 percent discount on night weekend calls.

Florida AT&T MEGACOM WATS prices will be reduced an average of 8.5 percent and MEGACOM 800 prices will be cut by 6.6 percent.

AT&T is passing along savings it will receive beginning next month as the result of a Florida Public Service Commission order requiring local telephone companies to charge long distance companies less for access to local networks.

CONTACT: Barry Johnson of AT&T, Miami, 305-662-6410 (office) or 305-251-0696 (home); or Randy Berridge of AT&T, Orlando, 407-660-4131 (office) or 407-788-3568 (home).

SYRACUSE, NY (SEPT. 27) PR NEWSWIRE - Edwin J. Lyons, president and chief executive officer of Community Bank System, Inc. (CBSI), a $640 million multi-bank holding company based in DeWitt, N.Y., announced today that the board of directors of CBSI has voted to consolidate its five affiliate national banks into one bank, thus creating a one-bank holding company. The five banks to be consolidated are: The St. Lawrence National Bank in Canton; Horizon Bank, N.A., in Waterloo; The Exchange National Bank in Olean; The Nichols National Bank in Nichols, and Community National Bank in Addison.

Lyons stated that the corporate reorganization and merger has been designed to accelerate achievement of the company's profitability objectives and strategic direction, and implementation will be consistent with the company's historically strong commitment to community banking throughout its market areas.

This corporate reorganization will require and is contingent upon regulatory approval, which is expected during the fourth quarter of 1990.

HAYWARD, CA (SEPT. 27) PR NEWSWIRE - Nellcor Inc. (NASDAQ: NELL) today

announced that it has granted a license under its sensor-coding patents to SpaceLabs Inc. to use Nellcor's oximetry sensors with SpaceLabs' new model 90489 pulse oximetry module.

"We are very pleased to have completed this agreement with SpaceLabs," said Ray Larkin, Jr., Nellcor president and chief executive officer. "The agreement expands the list of major patient monitoring companies -- including Hewlett-Packard, Siemens and Puritan-Bennett -- with whom we now have patent licensing agreements. These agreements testify to the advantages of Nellcor's proprietary sensor technology in a range of diverse clinical settings."

The agreement allows SpaceLabs to offer Nellcor's multiple-use and single-use, patient-dedicated oximetry sensors with the new 90489 module. The wide variety of Nellcor sensors increases the module's possible applications for neonatal, pediatric and adult patients. The module is compatible with all SpaceLabs' Patient Care Management System (PCMS) monitors and is also able to use other sensors, including SpaceLabs' sensors.

SpaceLabs Inc. is a leading manufacturer of clinical information systems, patient monitoring equipment, diagnostic monitoring products and semi-automatic defibrillators for the pre-hospital market.

Nellcor Inc. designs, manufacturers and markets electronic monitoring instruments for patient safety and management in operating rooms, recovery rooms, intensive care units and throughout the hospital. Nellcor is the leading producer of pulse oximeters used in hospitals for the continuous measurement of patient oxygen status.

#90270p8699 09/27/1990 ~PR Newswire

SAN JOSE, CA (SEPT. 27) PR NEWSWIRE - 88open Consortium Ltd. today announced the availability of the Executive Processor Interface Specification (EPIS), a description of the interface between hardware and an embedded systems application, typically a real-time kernel. This standard is the first such definition of an embedded systems interface and is receiving wide support from both kernel and hardware developers.

Prior to the existence of the EPIS, embedded systems applications had to be designed for a specific microprocessor implementation. With EPIS, real-time operating system developers can now create embedded systems independent of the target hardware -- systems that execute on multiple 88000 hardware implementations. This specification bridges the gap between hardware and real-time software. Telecommunications, avionics, military and other embedded systems can now be designed and built without relying on specific hardware.

Board vendors, end users and kernel developers were all represented in the creation of this specification. BBN Advanced Computers, Eyring Research, FORCE Computers, Motorola, Ready Systems, Software Components Group, and Wind River Systems participated in the development of EPIS.

EPIS documentation is available from 88open Consortium Ltd. Orders may be faxed to 408-436-0725, or call 408-436-6600 for more information.

The 88open Consortium, creator of the industry's first UNIX application binary interface, is an organization of software and systems suppliers supporting Motorola's 88000 family of RISC microprocessors. With more than 50 members worldwide, 88open focuses on the certification of software applications across a variety of 88000-based hardware platforms, including real-time systems, fault-tolerant systems, computer servers, workstations, personal computers and portables. The consortium provides member services and compatibility certification for software and systems based on the MC88000.

The consortium employs 25 people in the San Jose office, and maintains 88open International Centres at member-company facilities in Maidenhead, United Kingdom; Oslo, Norway; and Frankfurt, West Germany. Each location offers hardware use, porting and certification support at no charge to interested software vendors.

PHILADELPHIA (SEPT. 27) PR NEWSWIRE - Time Warner's (NYSE: TWX) newest publication has chosen VU/TEXT as its electronic library service and is now available for computerized access.

Entertainment Weekly is the first national consumer magazine covering all major areas of current entertainment including reviews and features, focusing on what's new and notable nationwide in TV, movie, video, print and music entertainment.

VU/TEXT subscribers will have access to the full text of the magazine which is primarily comprised of reviews. Editorial opinions are supplemented with an overview of what other critics across the country are saying, providing a balanced and regional perspective.

The Entertainment Weekly database covers entertainment industry news and the explosion of entertainment products and services. Like the magazine, the database contains regular sections such as:

-- TV, Movies, Videos, and Print -- with reviews and newsy tidbits; -- Tech -- reviews of home entertainment equipment in simple terms; -- Advertising -- a

look at new commercials for their entertainment value; and,

-- Kids -- entertainment for children rated for appropriate ages. The complete Entertainment Weekly database is online with VU/TEXT, code ENT, dating back to the first issue on Feb. 16, 1990. VU/TEXT serves as the magazine's electronic archives. Entertainment Weekly may also be accessed by using VU/TEXT's magazine global, code MAG, along with Time, People, Fortune, Money, Life, and Sports Illustrated. Cost to access either database is $1.80/minute for Option I and $2.20/minute for Option II.

VU/TEXT is the largest U.S. newspaper databank providing access to 65 newspapers, more than 160 business journals, and top newswires and magazines. For more information, call 800-323-2940.

CONTACT: Tonia Kimbrough of VU/TEXT, 800-323-2940, ext. 4469

#90270p8703 09/27/1990 ~PR Newswire

HONG KONG (SEPT. 27) PR NEWSWIRE - Hong Kong Telecom (NYSE: HKT) today announced it is to adopt the international standard for quality management, ISO 9000, making it the first major Hong Kong company to commit to the internationally recognized quality procedure.

"Quality management is a crucial issue for all Hong Kong businesses and will be key to the territory's future success," said Michael Gale, chief executive of Hong Kong Telecom.

Speaking at the IEEE Tencon dinner, Gale drew attention to the increasing role of quality in retaining Hong Kong's competitive leadership in world markets.

"It is becoming harder for us to compete on price alone. One answer has been to relocate labor-intensive industries, and for Hong Kong to concentrate more on associated service, like finance, marketing and design. Businesses have also moved 'up-market', competing on non-price elements, such as design, innovation, marketing and after-sales service. One of the most important elements underlying all these factors is quality," Gale said.

Noting the Hong Kong Government's Quality Awareness Campaign, Gale applauded the initiative. "Government has set up the Hong Kong Quality Assurance Agency to act as a center of excellence and advice, and is spreading the message about the need for quality management," added Gale.

Pointing to the need for quality in the telecommunications industry, Gale outlined Hong Kong Telecom's commitment to "Total Quality Management".

In order to put a quantifiable measure into quality, Hong Kong Telecom today committed to ISO 9000, the international standard for quality management

systems.

Under ISO 9000 a company must set quality standards and establish procedures by which those standards are met. It must monitor whether the procedures are working, improving them where necessary. Full documentation and implementation is mandatory, and compliance is audited by the Hong Kong Quality Assurance Agency.

#90270p8708 09/27/1990 ~PR Newswire

DANBURY, CT (SEPT. 27) PR NEWSWIRE - Union Carbide Corporation (NYSE: UK) today announced that its board of directors has approved management's proposal for a share repurchase plan. Carbide will commence a "Dutch auction" self-tender offer on October 1 for 20 million common shares, or approximately 14 percent of common shares outstanding.

"We regard the repurchase of our shares as an attractive investment," Robert D. Kennedy, chairman and chief executive officer, said. "Union Carbide has a prosperous future and we believe that our stock represents a considerable value at current prices."

Under the "Dutch auction" offer, each Union Carbide common shareholder will be invited to tender shares at prices specified by the shareholder, within the range to be announced October 1. The company will purchase 20 million shares at a price within that range. The offer will not be conditioned on any minimum number of shares being offered.

The tender offer, proration period and withdrawal rights will expire on October 29 unless extended by Union Carbide. On September 26 the closing price of the company's common stock was $14.25.

Neither the company nor its board of directors makes any recommendation to any shareholder as to whether to tender or refrain from tendering any or all of such shareholder's shares in the offer and has not authorized any person to make any such recommendation. Details of the offer will be mailed to all Union Carbide shareholders.

The dealer manager for the offer is Morgan Stanley & Co., Inc. The depository and information agent is First Chicago Trust Company of New York.

CONTACT: T. F. Sprick of Union Carbide, 203-794-6992.

#90270p8709 09/27/1990 ~PR Newswire
DANBURY, CT (SEPT. 27) PR NEWSWIRE - Union Carbide Corporation (NYSE: UK) today announced the establishment of an Employee Stock Ownership Plan (ESOP) in conjunction with its Savings Program for eligible employees, effective January 1.

The ESOP will be funded through an independently managed ESOP trust that will borrow $325 million to purchase shares of a new issue of convertible preferred stock from Union Carbide. The preferred stock will be placed in the ESOP trust for allocation to Savings Program participants. There will be no dilution of earnings caused by the formation of the ESOP, given the share repurchase initiative also announced today.

In conjunction with the establishment of the ESOP, Union Carbide is increasing the company match on employee Savings Program contributions to 50 percent, from 30 percent, effective January 1.

Union Carbide Chairman Robert D. Kennedy said the corporation is establishing the ESOP "to broaden internal ownership in the company by creating a valuable common ground of shared goals between the employee- owners and public shareholders. The increased match, in turn, makes Union Carbide's Savings Program more competitive, which is important to our ability to attract and retain talented employees, and also should help employees build a more secure retirement," said Kennedy.

#90270p8712 09/27/1990 ~PR Newswire
DANBURY, CT (SEPT. 27) PR NEWSWIRE - Union Carbide Corporation (NYSE: UK) today announced that its board of directors has approved a management proposal to complete the restructuring of the domestic retail packaged gases operations of the corporation's Union Carbide Industrial Gas Company Inc. subsidiary.

Under the plan, five independent regional companies will be formed after certain assets and businesses valued at approximately $55 million are divested and others are added to strengthen the market position of the remaining businesses. Employees of these companies will become majority owners. Employee equity in the new companies will be realized through Employee Stock Ownership Plans (ESOP) whose values will be finalized later this year.

Union Carbide will retain a significant minority interest in the new companies and will work closely with them to strengthen their market positions. Management of the new companies will also have an equity interest.

Packaged gases, chiefly oxygen, nitrogen, argon, acetylene and specialty

mixtures, are gases sold in cylinders from regional distribution centers around the country. Domestic sales last year for this segment of Carbide's industrial gases business amounted to $300 million. The restructuring is expected to be completed by mid-1991.

Robert D. Kennedy, Union Carbide chairman and chief executive officer, said that because the retail packaged gases business competes with independently owned distributors, it will do better as a group of regional companies outside Union Carbide's corporate structure. "Restructuring with significant employee ownership creates an environment for the business to become truly competitive " Kennedy said.

Restructuring will have a long-term beneficial effect on Union Carbide results he noted. UCIG will continue to supply the new companies with industrial gases and technical support. UCIG will continue to work with them in partnership to provide products and services to customers in the marketplace. Kennedy said that packaged gases staff reductions and other actions being taken to reduce costs would make a significant difference in the performance of the resulting companies.

#90270p8713 09/27/1990 ~PR Newswire

DANBURY, CT (SEPT. 27) PR NEWSWIRE - Union Carbide Corporation (NYSE: UK) today announced that discussions were in progress with strategic partners who are interested in an acquisition of up to 50 percent of the equity in UCAR Carbon Company Inc., a wholly owned subsidiary. Sales of the subsidiary in 1989 were $802 million.

Robert D. Kennedy, chairman and chief executive officer, said that the prospective sale and joint ownership would strengthen the business considerably. He said it would support Carbide's value-building strategy and the company's interest in creating long-term value for shareholders.

Kennedy said the completion of the sale, expected in the first quarter of 1991 should result in a substantial cash infusion for Carbide and serve to further reduce the company's debt. The transaction is expected to result in a non-recurring after-tax book loss estimated at between $70-90 million.

The management of UCAR Carbon will continue to operate the business, which will retain its present workforce. UCAR Carbon is the major international supplier of carbon and graphite electrodes to the steel and other industries, and specialties to the steel and metallurgical industries.

UCAR Carbon manufactures graphite electrodes in nine countries in North America, Western Europe and Brazil. The company also manufactures specialty

products, including Grafoil, a gasketing used as an asbestos substitute.

DANBURY, CT (SEPT. 27) PR NEWSWIRE - Union Carbide Corporation (NYSE: UK) announced today that KEMET Electronics Corporation, in which it holds 50 percent interest, will be sold for an undisclosed sum. The remaining 50 percent interest is held by General Electric Capital Corporation and KEMET management.

Union Carbide also announced plans to sell its remaining interest in Lincare Inc., formerly Linde's home oxygen service business. The remaining 50 percent of the business is held by Lincare management and others.

Robert D. Kennedy, chairman and chief executive officer, said the two businesses do not fit the company's strategic plans.

KEMET Electronics manufactures and sells high quality tantalum, ceramic and film capacitors to the electronics industry. Lincare provides home oxygen and other respiratory care services.

#90270p8715 09/27/1990 ~PR Newswire

BOXBOROUGH, MA (SEPT. 27) PR NEWSWIRE - At Interop '90, Racal InterLan Inc., a technology leader in LAN networking, will introduce an extensible LAN communications system that integrates 10BaseT concentrators, ASYNC terminal servers and Simple Network Management Protocol (SNMP) in the same chassis. The new product series, the INTERNExT 5000 Communications System (INX5000), enables users to manage a mix of PC and terminal connections at the facility, closet, and workgroup level.

Racal Interlan's INX5000 Communications System is designed for structured wiring system applications. It supports Ethernet connection on coax, twisted pair, and fiber optic media and is compatible with all popular building wiring schemes. Fiber Optic Inter-Repeater Link (FOIRL) support allows the use of fiber optic backbones between multiple INX5000 systems, which extends interchassis distances and positions the customer's network for Fiber Distributed Data Interface (FDDI) migration.

Much of the expanded functionality is derived from use of a midplane architecture instead of a backplane. The separation of intelligent logic modules and connectvity options via the midplane enables integration of dual

protocol terminal servers and 10BaseT concentrators in the same chassis.

The mid-plane design also incorporates a dual Ethernet bus for increased performance, reliability and maintainability. This dual bus architecture allows network administrators to set up logical and physical subnets within the same chassis.

Other unique features include:
-- A distributed linear power supply with optional redundancy and hot-swappable components
-- Non-volatile EPROM storage and multiple software bootload options
-- Fault tolerant power distribution, redundant management modules, and no central re-timing module eliminate single failure points in the system

There are also advanced fault isolation and repair features including on-board diagnostics, environmental sensors, and automatically generated alarms. Complete network, chassis, module, and port-level statistics are collected and accessed via one of three optional management tools.

Racal InterLan, Inc. designs and manufactures hardware and software solutions for standards-based local area networking at the workgroup, departmental, and premises levels. Headquartered in Boxborough, Mass., Racal InterLan employs 275 people in the United States and abroad. Racal InterLan is a subsidiary of The Racal Corporation, Fort Lauderdale, Fla., a company within the $550 million Data Communications Group of $3.2 billion parent corporation, Racal Electronics Plc.

WYOMISSING, PA (SEPT. 27) PR NEWSWIRE - VF Corporation (NYSE: VFC) today announced that orders and shipments at its Lee jeans division were running substantially behind plan in September. As a consequence, financial results for VF, particularly in the fourth quarter, are projected to be well below recent estimates. According to a spokesman, shipments through August, driven by solid levels of at-once business, were tracking estimates. September orders, however, ran well behind those of August and behind those of September of the previous year, leading management to be concerned about the overall back-to-school season for all jeans at retail. Management is unable at this time to quantify the downside for VF but is expressing serious concerns about general economic and industry conditions. Accordingly, several alternatives are currently being explored to respond to the unexpected shortfall. Thus far business at other VF divisions appears to be meeting expectations.

WATERFORD, MICH. (SEPT. 27) PR NEWSWIRE - Joe Lunghamer Chevrolet GEO, one of Michigan's largest-volume Chevrolet dealers, is experiencing "remarkably good" customer traffic at its newly opened $3.5 million retail store, according to its owner. Joe Lunghamer attributed the better-than-average volume to spiraling gasoline prices and expanded business hours of 9 a.m.-9 p.m. weekdays plus sales on Saturday from 10 a.m.-4 p.m.

The new, full-service facility, described by some as representative of dealerships of the future, is on 7-1/4 acres adjacent to the Summit Place Shopping Mall in this suburban Detroit community. It contains 50,400 square feet of space, or almost half a football field, under one roof. The bulk of the space, according to Mr. Lunghamer, is occupied by 45 service bays, a body shop and two downdraft paint booths, while the balance is devoted to a color-coordinated showroom-sales area and administrative offices.

"There is interest in our new facility," said Mr. Lunghamer, a University of Michigan architectural graduate who used his academic training in designing the new structure. "But the rise in gasoline prices and our new business hours are what's really motivating customers," he said.

Although it's too early to tell, Mr. Lunghamer noted that a trend may be developing in which some buyers "concerned about the economy and continued dependence on foreign oil" will buy smaller, more fuel- efficient cars than they have in the past.

The dealership, now in its 35th year, employs 90 and had been in the City of Pontiac.

The new facility is "state-of-the-art" equipped, including a programmed energy system for heating and cooling, to ensure maximum efficiency in its operation, maintenance and safety, Mr. Lunghamer said. The roof extends from the front of the building to provide sheltered space for up to 18 vehicles, while there is unsheltered space for another 680.

TROY, MI (SEPT. 27) PR NEWSWIRE - Kmart Corporation (NYSE: KM) announced

today the expansion of two of its subsidiary companies to Puerto Rico.

Sites have been selected for the development of 12 PACE Membership Warehouse and Builders Square stores on the island. Construction is to begin in early 1991.

PACE, headquartered in Aurora, Colo., is a membership warehouse which markets top quality merchandise at wholesale prices to its members. Product categories range from fresh meats, produce and bakery goods to auto supplies, apparel and office equipment. The 60 PACE Membership Warehouse locations are currently found in 16 states.

Builders Square, a warehouse-style home improvement chain with headquarters in San Antonio, Texas, operates 146 sites across the United States. Warehouse departments include lumber, plumbing, cabinets and furniture, paint and garden supplies, all sold at discount prices.

In addition to the introduction of PACE and Builders Square to Puerto Rico, the company is continuing the expansion of the Kmart store program on the island. A new Kmart opened in the community of Vega Baja in June, bringing to 12 the number of Kmart stores currently operating in Puerto Rico. Stores are now under construction in San German and Juana Diaz. Five additional Kmart stores have been approved for development during 1991-92.

"After several visits to Puerto Rico and a complete review of the potential business opportunity for these companies, we are enthusiastic about locating these warehouses there," said Larry M. Parkin, Kmart's executive vice president for warehouse and grocery operations. "In view of Kmart's over-30-year history of serving the residents of Puerto Rico, we are particularly pleased to announce the expansion of our Kmart store program and the introduction of PACE Membership Warehouse and Builders Square," he continued.

Approximately 1,900 new jobs will be created as these planned stores open.

Kmart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. Kmart, currently operating 2,330 Kmart stores, is also the parent company for Pay Less Drug stores, Builders Square, Waldenbooks, PACE Membership Warehouse, Inc. and The Sports Authority.

WALTHAM, MA (SEPT. 27) PR NEWSWIRE - Thermo Electron Corporation (NYSE: TMO) today reported that it has sold the assets and business of its wholly owned Perfection Heat Treating Company subsidiary in Detroit, Mich., for $1.2 million.

The operation was purchased Sept. 20, 1990, by Brannon, Samaddar & Brannon, Inc., a group led by former Perfection managers.

The purchase price was approximately the same as the operation's adjusted carrying value. The transaction will have no effect on Thermo Electron's third-quarter earnings.

Perfection is a commercial heat treating operation specializing in large batch processing of special fasteners for the automotive industry. The operation was idled in the fourth quarter of 1989 after Thermo Electron concentrated its metallurgical services businesses in Los Angeles and Minneapolis to principally serve customers in aerospace and other high-technology applications.

Thermo Electron develops, manufactures and markets environmental and analytical instruments, custom-engineered and pre-packaged cogeneration systems, industrial process equipment, biomedical materials and products, and fabricated biomedical and aerospace components. The company also provides metallurgical heat treating, water quality engineering, and analytical laboratory services.

MINNEAPOLIS (SEPT. 27) PR NEWSWIRE - Norwest Corporation (NYSE: NOB) has promoted John E. Ganoe to senior vice president and head of strategic planning and acquisitions. He was vice president and a director in the department.

In his new post, Ganoe takes over day-to-day management of the department from Leslie S. Biller, executive vice president and head of a newly formed South Central Community Banking Group. Ganoe will continue to report to Biller, along with Norwest's Community Banking regions in Iowa and Nebraska, Norwest Card Services and Norwest Mortgage.

Biller said the focus of the department for the next year or so will be on "in-market acquisitions in areas where we would like to have a stronger presence."

Ganoe has been involved in Norwest's acquisitions program since 1986, when Norwest had assets of $20 billion. Acquisitions since then, completed and pending, are expected to increase Norwest's assets to more than $35 billion.

Ganoe was born in Des Moines and graduated from high school in Adel, Iowa. He joined Norwest in 1983 as controller of its Iowa banking region, based in Des Moines, and was chief administrative officer of the region when he transferred to the corporate staff in January 1985 to a new position as manager of its policy, standards and procedures program.

Before joining Norwest, Ganoe was chief financial officer of Banks of Iowa, Inc.

He has bachelor's degrees in accounting and industrial engineering from Iowa State University, Ames, Iowa. While in Des Moines, he served on the Governor's Prison Industry Advisory Board.

Norwest Corporation is a $26.8 billion diversified financial services organization providing banking, banking-related and specialized financial services through more than 1,290 offices in 47 states and internationally.

WEST CHESTER, PA (SEPT. 27) PR NEWSWIRE - Roy F. Weston Inc. (NASDAQ: WSTNA) announced today it has been awarded the second of three one-year contract options by the U.S. Department of Energy (DOE) to provide technical support services to its Office of Civilian Radioactive Waste Management (OCRWM).

"This execution of the second option year of our contract is a strong endorsement by the DOE of the quality and timeliness of the work of the Weston team," said Robert E. Jackson, Ph.D., program manager for the project.

Valued at $16.4 million, the contract will require 330,000 man-hours of effort.

OCRWM, established by the Nuclear Waste Policy Act of 1982, is responsible for

the development of a total nuclear waste management system for the safe and environmentally acceptable disposal of spent fuel and high-level radioactive wastes from civilian reactors and DOE defense facilities. Weston has been under contract to OCRWM since 1983.

Weston will perform this work in the firm's Washington, D.C., office located in L'Enfant Plaza. They will be assisted by the following subcontractors: Engineering and Economics Research Inc., Vienna, Va.; ICF Inc., Washington, D.C.; Jacobs Engineering Corp., Pasadena, Calif.; United Engineers & Constructors Inc., Philadelphia; Williams Brothers Engineering Co., Tulsa, Okla., and Rogers & Associates, Salt Lake City, Utah.

Weston is a full-service environmental engineering and consulting firm providing nationwide analytical laboratory services, consulting and engineering, remediation, facility construction and operations, technical information management, and major program management services.

Weston's clients include many Fortune 500 companies and most major cities in the country. The company is a principal provider of services to the U.S. Department of Defense and the U.S. Department of Energy.

Headquartered in West Chester, Weston operates a network of four analytical laboratories and 44 offices, including Los Angeles, Houston, Chicago, Atlanta, Boston, New York and Washington.

ALLENTOWN, PA. (SEPT. 27) PR NEWSIWRE - William F. Hecht, executive vice president-operations for Pennsylvania Power & Light Co. (NYSE: PPL) was elected a director yesterday at the regular monthly meeting of the company's board of directors.

John T. Kauffman, PP&L chairman, president and chief executive officer, said Hecht's election as a director "adds additional depth to our board, and follows a longstanding tradition of having PP&L's executive vice presidents also serve as directors. Bill Hecht has a diverse background in the energy production and supply areas of our business, as well as the marketing and customer service functions. He also has considerable experience in the distribution engineering phases of our operations. He brings a wide range of experience and background to his additional duties as a director."

Hecht started with PP&L in 1964 as a graduate engineer trainee and was

promoted to project engineer in system planning in 1968. After serving in various assignments, he was promoted to manager-distribution planning in 1975 and a year later was named executive director of PP&L's Corporate Energy Planning Council.

He became manager-system planning in 1978 and five years later was appointed vice president-system power. In 1987 he was made vice president-marketing & customer services and early in 1989 was appointed vice president-power production & engineering. He was senior vice president-SP&E and a member of PP&L's corporate management committee from September 1989 to June 1990, when he assumed his present position.

He is a registered professional engineer in Pennsylvania and is a member of the Institute of Electrical & Electronics Engineers and the Marketing Conference, a national association of utility marketing executives. He was a part-time lecturer in electrical engineering at Lehigh University from 1973 through 1976.

He is a past chairman of the executive board of the Mid-Atlantic Area Council, the regional electric utility reliability coordination group to which PP&L belongs, and has served on the board of trustees of the North American Electric Reliability Council.

PP&L supplies electricity to a 10,000-square-mile area of 29 counties in central eastern Pennsylvania. Among the communities it serves are Allentown, Bethlehem, Harrisburg, Hazleton, Lancaster, Scranton, Wilkes-Barre and Williamsport.

NEW YORK (SEPT. 27) PR NEWSWIRE - The American Stock Exchange today began trading put and call options on the Japan Index following Securities and Exchange Commission approval. The new options are denominated in dollars and offer investors the first SEC-regulated options on a broad-market of Japanese stocks.

The options trade under the ticker symbol "JPN." Spear, Leeds & Kellogg is the specialist unit, with Richard Reynolds as lead specialist.

Developed by the Amex, the Japan Index measures the aggregate performance of 210 leading stocks on the Tokyo Stock Exchange (TSE) that represent a broad cross section of Japanese industries. The Index is calculated once a day based on the closing prices of the component stocks on the TSE and is disseminated before the opening of Amex trading.

"With the addition of options on the Japan Index, individual investors are able to participate in the movement of the Japanese market with a number of investment strategies," said American Stock Exchange Chairman James R. Jones. "This new product fits in well with the Exchange's strong list of other international investment securities."

JPN options opened with strike prices at five-point intervals from 210 to 235 in near-term expiration months of October, November and December, 1990. Options on longer-term months opened with strike prices at 50-point intervals from 200 to 250 and initial expirations of June and December of 1991 and 1992 and June of 1993.

The Japan Index tracks the Japanese blue-chip market and provides a distinct advantage to U.S. investors because of its denomination in U.S. dollars. The value of the index is based on a method in which stock prices in Japanese yen are stated in dollar terms. The Index dollar value corresponds directly to changes in the yen prices of its component stocks without being affected be fluctuating yen/dollar exchange rates.

"The new options on the Japan Index also allow investors to effectively hedge risk on portfolios heavily weighted by Japanese equity holdings." Jones said.

#90270p8756 09/27/1990 ~PR Newswire

HUDSON, NH (SEPT. 27) PR NEWSWIRE - Howtek Inc. (AMEX: HTK) and Adobe Systems Inc. (NASDAQ: ADBE) have signed an agreement to combine the Howtek Personal Color Scanner (PCS) and Adobe Photoshop Limited Edition, a special version of Adobe Photoshop. The combination of these leading products offers users a powerful desktop color solution for such applications as business graphics, presentations and color desktop publishing. The products will be available for shipment by the end of October.

Howtek's PCS and Adobe Photoshop Limited Edition color solution will be distributed through Howtek's dealer channel. The color solution will include the Howtek's PCS, Adobe Photoshop Limited Edition software, as well as Howtek's proprietary Mac "Scan-It" software. An upgrade program for the full-featured Adobe Photoshop will be instituted worldwide to offer the most comprehensive solution for end users.

"By teaming up with Howtek, we can really offer users an excellent, affordable way to do color publishing at the desktop level," said John Kunze, director of product marketing for Adobe's Application Products Divison.

The Personal Color Scanner is a 300 Dpi, 24-bit, flatbed scanner. The scanning area is 8.5" x 14" and image types include continuous tone, halftone, line art

and reflective art. Adobe Photoshop, the leading image editing package, offers the user an intuitive interface and a robust set of tools for image compositing, color correction, photo retouching and image manipulation. Adobe Photoshop Limited Edition retains the powerful image processing core of the full-featured version (grey scale and RGB color editing), but omits the color separation features.

"Howtek's decision to join forces with Adobe is based on Photoshop's dominant place in the desktop market," said John Seguin, Howtek's vice president of North American sales.

Howtek designs, engineers, and develops computer peripherals and systems for the color graphic market.

TULSA, OK (SEPT. 27) PR NEWSWIRE - Matrix Service Company (NASDAQ: MTRX) has announced its initial public offering of 3,250,000 shares of common stock at a price of $8.00 per share.

Of the 3,250,000 shares offered, 2,845,000 shares are being sold by the company and 405,000 shares are being sold by certain selling stockholders. The underwriters have been granted an option by certain selling stockholders to purchase up to 250,000 additional shares to cover over-allotments.

The company will not receive any proceeds from the sale of shares by the selling shareholders. PaineWebber Incorporated (NYSE: PWJ), Robertson, Stephens & Company and First Analysis Securities Corporation are managers of the offering.

Matrix Service Company provides specialized on-site maintenance and construction services for petroleum refining and storage facilities. Through its wholly owned subsidiary, Matrix Service, Inc., the company is a leading provider of these services and related products for large aboveground storage tanks for petroleum and petrochemical products and piping systems located at petroleum refineries and bulk storage terminals.

Concurrently with the closing of this offering, the company will acquire Midwest Industrial Contractors, Inc., a leading provider of maintenance and construction services for refineries.

Midwest Industrial Contractors, Inc. specializes in performing "turnarounds," which involve complex, time-sensitive maintenance of the critical operating units of a refinery. Owners of petroleum refining and storage facilities use

the company's services to improve operating efficiencies and comply with environmental and safety regulations.

CONTACT: C. William Lee, vice president-finance of Matrix Service Company, (918) 838-8822.

TROY, MICH. (SEPT. 27) PR NEWSWIRE - Kmart Corporation (NYSE: KM) and Mattel Toys Inc. (NYSE: MAT) will make kids' Christmas merrier this year with their first joint Holiday Toy Guide.

The guides will be available in Kmart stores Sept. 30-Oct. 31, while supplies last.

The guide includes a sweepstakes entitled "Trip to Toyland" featuring five grand prize trips for four to California, a tour of the new Mattel Toy Headquarters, and tickets to Disneyland. The 2,400 first-prize winners will each receive $50 Kmart gift certificates good on Mattel toys at their local Kmart.

The 24-page, full-color Holiday Toy Guide will feature coupons redeemable for over $30 worth of valuable discounts ranging from $1 to $5 off the price of 16 popular Mattel toys and accessories. Additional discounts on special purchases of Mattel toys may be obtained by using a MasterCard credit card with the appropriate "MasterValues" coupon from the guide. Both Mattel and MasterValues coupons may be redeemed at any U.S. Kmart until Dec. 31, 1990.

"This exciting holiday gift guide will be distributed exclusively in Kmart stores for the prime time selling season," said William Parker, Kmart vice president of marketing and sales.

Couponed items which are featured include Baby Sparkles dolls, Barbie, Ken or friend dolls and accessories, Li'l Miss Magic Hair dolls, Cherry Merry Muffin dolls and accessories, Little Pretty Pets, See 'N Say talking toys, Hot Wheels track and play sets, Power Glove accessories for use with the Nintendo Entertainment System and items from the Mattel line of Disney Infant and Preschool toys.

Kmart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. Kmart, currently operating 2,332 Kmart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Warehouse Clubs and The Sports Authority.

WOODBURY, NY (SEPT. 27) PR NEWSWIRE - Millfeld Trading Co., Inc. (NASDAQ-NMS: SHOE; NASDAQ: SHOEW) today announced that the deadline by which the holders of the company's warrants must exercise their warrants and pay the $6.00 exercise price so as to receive any of the previously announced new warrants (each to purchase one share of the company's common stock), has been extended from Sept. 30, 1990 until Oct. 31, 1990.

In addition, the company has reduced the exercise price of the new warrants from $12.50 per share to $10.00 per share; warrantholders who exercise warrants and pay the $6.00 exercise price (including any warrantholders who have already done so), prior to the Oct. 31, 1990 deadline, will receive, in addition to one share of common stock per exercised warrant, the new warrants.

As previously announced, the new warrants expire on July 22, 1992 and are redeemable by the company at a price of $.10 per warrant on 30 days prior notice to warrantholders.

Millfeld and its wholly owned subsidiary Bright Star Footwear Products, market men's, women's, and children's footwear to more than 20,000 outlets of major retailers and mass merchandisers. The company also distributes the "No Excuses" shoe line and Team Sports Footwear featuring 128 logos of NFL, NHL and NCAA College teams.

WILMINGTON, DE (SEPT. 27) PR NEWSWIRE - Du Pont (NYSE: DD) today announced it will invest more than $100 million to build a plant for "Lycra" spandex fiber in Singapore.

Commercial production will begin in 1992. The plant is part of Du Pont's commitment to serve worldwide markets. It will be centrally located to serve the Asia Pacific region including Australia and New Zealand.

"The investment will support demand for 'Lycra' in the Asia Pacific region in keeping with strategies that have proved successful in other parts of the world," said Salim M. Ibrahim, worldwide business director, "Lycra". "The plant will have state-of-the-art technology and capability to double capacity to meet the needs of our customers."

"Lycra" is used in a broad range of applications, including women's hosiery, intimate apparel and swimwear.

The Singapore plant will be the ninth manufacturing site for "Lycra." The others are in the United States, Canada, Northern Ireland, the Netherlands, Mexico, Brazil, Argentina, and Japan.

"We are committed to being a reliable supplier of 'Lycra' to all our customers around the world," said Ibrahim.

HOPKINTON, MA (SEPT. 27) PR NEWSWIRE - Avatar Corporation announces that it is now shipping MacMainFrame Token Ring Workstation, MacMainFrame SDLC Workstation, MacMainFrame Token Ring Gateway and MacMainFrame SDLC Gateway products for the Apple Macintosh II family of personal computers.

Announced earlier in the year, these Macintosh-to-mainframe communications products are available through leading computer and networking dealers in the U.S. and abroad. MacMainFrame Coax Gateway and MacMainFrame Graphics, also

announced earlier, began shipping as scheduled in March and July respectively.

"Avatar is currently the only vendor to offer a coax gateway and a direct-connect SDLC host connection for the Macintosh," said Joyce Enos, MacMainframe product manager.

"Combined with our existing MacMainFrame Coax Workstation product offerings, the new MacMainFrame Token Ring and SDLC Workstation and Gateway products give users the ability to look to Avatar for all their Macintosh-to-IBM mainframe connectivity needs. The MacMainFrame Series offers the broadest range of solutions available today."

MacMainFrame Token Ring Workstation is currently available for the Macintosh II family and combines Avatar's Token Ring Workstation card and MacMainFrame Token Ring Workstation software to provide a Macintosh II with IBM 3278/3279 terminal and 3287 printer emulation and file transfer capabilities over a Token Ring network.

MacMainFrame Token Ring Workstation provides a user with up to eight simultaneous host sessions and transmits and receives data at four Mbps and is TokenTalk compatible. It is available for $1,295.

MacMainFrame SDLC Workstation allows a Macintosh user to directly access host information over a Synchronous Data Link Control (SDLC) connection. It provides IBM 3278/3279 terminal and 3287 printer emulation and file transfer capabilities.

Using synchronous modems, MacMainFrame SDLC Workstation can provide up to eight simultaneous host sessions either in a local or remote environment. It supports data rates of 1,200 bps to 56Kbps. MacMainFrame SDLC Workstation is currently available for the Macintosh II family for $1,295.

MacMainFrame Token Ring Gateway allows Macintosh users in an AppleTalk environment (LocalTalk, TokenTalk, EtherTalk) to run host applications on an IBM host that is resident on a Token Ring network. A combination of MacMainFrame Token Ring hardware and software provides up to eight simulaneous IBM 3270 sessions per Macintosh user and up to 64 host sessions per server.

The MacMainFrame server can be co-resident with an AppleShare server allowing for the sharing of computing resources. MacMainFrame Token Ring Gateway client software is available for all Macintosh computers while MacMainFrame Token Ring Gateway server hardware/software is currently shipping for the Macintosh II family.

PHILADELPHIA (SEPT. 27) PR NEWSWIRE - CoreStates Financial Corp (NASDAQ: CSFN) today announced the appointment of Charles L. Coltman III as chief credit policy officer.

Coltman, who also is an executive vice president of the Philadelphia-based bank holding company, has shared responsibility for corporate-wide credit policy functions since March of this year with Robert B. Murray. Coltman reports to the chairman, Terrence A. Larsen, and is on the CoreStates Management Committee.

Murray, also an executive vice president, will move on to a variety of assignments in other areas as a special assistant to Larsen.

CoreStates also announced that Dorothy T. Motz has been named to succeed Coltman as chief lending officer of Philadelphia National Bank, CoreStates' lead wholesale bank, reporting to Frank E. Reed, PNB president and chief executive officer. She will also be executive vice president of the bank. She had been deputy chief lending officer.

Coltman, who joined Philadelphia National Bank in 1970, has held a variety of executive responsibilities in the corporate and institutional side of the bank. He was named chief lending officer, assuming responsibilities previously held by Murray, in 1988.

Motz, who joined Philadelphia National Bank in 1981 as a manager in the foreign corporate area, has been a senior credit officer since 1985 and deputy chief lending officer since March.

Murray joined PNB in 1973 and held a variety of lending and management responsibilities. In 1982 he was named deputy chief credit policy officer of the bank and in 1985 became chief lending officer. He was named chief credit policy officer for the corporation in 1987.

ST. PAUL, MN (SEPT. 27) PR NEWSWIRE - Ecolab Inc. announced today the realignment of its Corporate Finance departments and a number of key promotions. These promotions are effective Oct. 1, and include the following organizational changes:

S. Lars Olson, currently senior vice president and controller of Ecolab, responsible for controller, tax, audit and treasury functions, will become chief financial officer of the Henkel-Ecolab joint venture in Dusseldorf, West Germany.

Olson joined Ecolab as vice president and treasurer in 1985, and became vice president and controller in 1986. Prior to joining Ecolab, Olson had extensive financial experience with International Harvester Corporation in both the treasury and controller functions.

Bruce J. Bentcover, vice president and treasurer, has been promoted to vice president and controller.

Bentcover joined Ecolab as assistant treasurer in 1985. He was elected treasurer one year later and was promoted to vice president and treasurer in 1987.

James M. Millsap, vice president, Corporate Development, will expand his current responsibilities to become vice president, Corporate Development, and treasurer.

Reporting to Millsap, Reid J. D. Dabney, assistant treasurer, has expanded his current responsibilities to include the company's investor relations function. Karen M. Kelsey, manager, Investor Relations, reports to Dabney.

Bentcover, Millsap and John G. Forsythe, vice president, Tax, will report to Michael E. Shannon, Ecolab executive vice president and chief financial officer, who will resume administrative responsibility for the controller, tax treasury and corporate development departments effective Oct. 1, 1990.

Ecolab Inc. is a leading worldwide developer and marketer of premium cleaning, sanitizing and maintenance services for the hospitality, institutional and residential markets. For the year ended Dec. 31, 1989, Ecolab reported sales of $1.3 billion and earnings of $34.2 million, after preferred dividends, or $1.25 per share, excluding a one-time charge of $31.5 million, or $(1.15) per share. Earnings in 1989 were $2.7 million, or $0.10 per share. Ecolab's shares are traded on the New York Stock Exchange and the Pacific Stock Exchange under the symbol: ECL.

PITTSBURGH (SEPT. 27) PR NEWSWIRE - Chambers Development Company Inc. (AMEX: CDVB) announced today the acquisition of four Georgia firms engaged in the collection and hauling of commercial and residential solid waste.

Three of the companies, Global Environmental Inc. and Southern Waste Systems Inc., both in Jonesboro, Ga., and Chadwick Enterprises in Mableton, Ga., will be consolidated with Chambers Atlanta operations.

Dependable Garbage Service in Cedartown, Ga., will be consolidated with Chambers' Cedartown operations, west of Atlanta.

The acquisition of the four companies is expected to generate annual revenue of approximately $1.7 million.

Alexander Rangos, Chambers executive vice president, said the acquisitions will enable Chambers to be more responsive to the needs of the local community while expanding and improving service.

"These four acquisitions are excellent for Chambers because they have established an outstanding record of quality service and personal attention to their customers," Rangos said.

Presently, the four companies serve commercial, municipal and residential customers in the Georgia counties of Clayton, Fayette, Henry, Coweta, Newton, Cobb, Haralson, Polk and Carroll.

Chambers Development Company, headquartered in Pittsburgh, with a major regional office in Atlanta, is a leading environmental firm offering services in recycling, collection, hauling, disposal and landfill development. The company also provides security through its wholly-owned subsidiary, Security Bureau Inc.

ATLANTA (SEPT. 27) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) has become the first charter corporate sponsor and the official U.S. airline of the World League of American Football.

The announcement was made jointly today by Whit Hawkins, Delta's executive

vice president of marketing and stations, and Tex Schramm, president of the World League.

League "sponsorship" is designed to develop a close marketing partnership and joint promotional effort between the World League and its charter corporate sponsors, according to Schramm.

"By joining us at the outset of the League, we are able to find innovative opportunities that serve the specific marketing needs of Delta," Schramm said.

"This is just the right time for us to take a major role with a key new international sports entity like the World League," Hawkins said. "Delta is entering into an expanding role as a major international carrier, and we see the World League as the ideal partner for our future."

Delta has current or projected schedules that will take its flights to all of the announced World League cities, including its international sites - London, Barcelona, Frankfurt, Milan and Montreal.

Charter corporate sponsors are given an array of promotional and sales benefits, including the official designation, internal and external promotion priorities, use of League merchandise, and broad advertising and promotional identification as a partner in this first intercontinental sports league.

"This announcement by Delta is another of the developments that will be happening rapidly now," Schramm added. "We will be naming more corporate sponsors, owners and our operational plans shortly."

The League, which features 12 charter franchises in seven different countries on two continents, will kick-off its first game on March 23, 1991. Delta and The Delta Connection carriers serve over 270 cities in 14 countries around the world.

#90270p8811 09/27/1990 ~PR Newswire

LANSING, MICH. (SEPT. 27) PR NEWSWIRE - Oldsmobile Division today announced it will offer consumer rebates on most 1991 vehicles and all 1990 models. Called "Oldsmobile Values Are Now," the program is effective immediately and will run through Dec. 12, 1990.

Buyers may take advantage of the following cash rebates:

	1990 Models	1991 Models
Cutlass Calais	$1,500	$ 750
Cutlass Ciera	1,500	750

Cutlass Supreme	2,500(a)	750
Eighty Eight	1,500	750
Custom Cruiser	1,500	---
Ninety Eight	1,500	---
Toronado	2,500	1,500
Silhouette	1,500	500
Bravada	---	---

(a) $2,500 on base coupe and sedan, all other models $2,000.

Oldsmobile dealers may offer consumers a special GMAC finance rate of 4.8 percent for up to 48-month terms in lieu of the 1990 model consumer rebates or 7.9 percent for up to 48 months in lieu of the 1991 model consumer rebates. A 10.9-percent rate for 49- through 60-month contracts is also available in lieu of the consumer rebate for either 1990 or 1991 models.

"This new program ensures that our dealers will be in the best competitive position possible as the 1991 model year gets under way," said Oldsmobile General Sales and Service Manager David E. Lahti. "For the consumer, that means today's smart, contemporary Oldsmobiles are an exceptional value."

#90270p8814 09/27/1990 ~PR Newswire

BOSTON (SEPT. 27) PR NEWSWIRE - Stephen J. Sweeney, who guided Boston Edison Company (NYSE: BSE) through some of its best and some of its most difficult years, has announced that he is retiring as the company's chief executive officer, effective Dec. 1, 1990. He will remain chairman of the board of directors.

Succeeding Sweeney as CEO will be Bernard W. Reznicek, who has served as president and chief operating officer since joining Edison in October 1987.

In making his announcement, Sweeney said, "The goals I have set for the corporation over the past several years to restore its financial health and prepare it for the 1990s have been accomplished. Boston Edison now has one of the strongest management teams in the utility industry and is prepared to face the competitive challenges of this decade." Specifically, Sweeney cited as major accomplishments:

- Assembling a new management team to guide the company into the future;
- Restoring Pilgrim Nuclear Power Station to operation and putting it on a path to operational excellence;
- Resolving major regulatory and financial uncertainties, which accompanied the 1986 shutdown of Pilgrim, and several critical regulatory decisions in the mid-1980s; and
- Building constructive working relationships with government officials,

public interest groups, labor unions representing Boston Edison employees and customers.

Sweeney especially credited the new management team, which he recruited beginning in 1987, for the company's turnaround.

Sweeney said that in addition to working with Reznicek through the transition, his immediate plans call for devoting time as chairman of the Greater Boston Chamber of Commerce "to building public and private partnerships between the business community and the new state administration, which takes office in January.

"It is vital to the economic and social health of this area that the business community work closely with the new administration. The Greater Boston Chamber of Commerce has a major role to play in this effort."

Sweeney's retirement caps a 37-year career encompassing many important milestones both for Boston Edison Co. and for the utility industry in general.

Bernard W. Reznicek came to Boston Edison from the Omaha Public Power District where he served as president and chief executive officer from 1981 to 1987. He has more than 30 years service in the utility industry in the areas of accounting, finance, employee relations and senior management.

NEW YORK (SEPT. 27) PR NEWSWIRE - American Express Travel Related Services Company, Inc. (TRS) today announced that Aldo Papone, TRS chairman, will retire on Jan. 1, 1991. Edwin M. Cooperman and G. Richard Thoman will be elected chairmen and co-chief executive officers, succeeding Papone, on that date.

Papone, who has been chairman of American Express TRS since April 1989, will become senior advisor to American Express Company (NYSE: AXP), reporting to Chairman James D. Robinson III. Papone also will continue as a member of the American Express Company board of directors.

Papone, 58, developed and led a team of outstanding executives, and managed the Travel Related Services Company through the most vigorous expansion in its history. Under his leadership, the company enjoyed a record of uninterrupted growth. For 1989, TRS reported profits of $830 million on revenues of $8.4 billion. Return on equity exceeded 29 percent.

Papone, who has been with American Express for more than 13 years, is credited

with the development of the company's marketing strategy as well as the identification of important synergies among various American Express units.

Cooperman, 46, has been president of TRS North America since 1989. An 18-year veteran of American Express, Cooperman is responsible for the company's core businesses in the United States and Canada, including the American Express Card, the Establishment Services Division Travel and Travel Management Services and the company's consumer lending business. Under his leadership, the number of American Express Cards in force has grown more than 50 percent to 24.3 million since 1985, when he assumed responsibility for the U.S. card business.

Thoman, 46, was named president of American Express International in 1989. He is responsible for American Express activities outside North America, including the Travel Related Services Company, American Express Bank and the Consumer Financial Services Group. He also oversees the company's worldwide Travelers Cheque business. Thoman joined American Express in 1979 as senior vice president-finance, planning and systems for the Travel Division. He was named president of TRS International in 1985, with responsibility for the company's international activities in more than 150 countries.

In his new capacity, Papone will advise Robinson on a number of matters, including marketing, communications and advertising strategies, and he will continue to work with key TRS executives on a variety of issues.

American Express Travel Related Services Company, Inc., a wholly owned subsidiary of American Express Company, is a family of travel, financial, insurance and communications businesses.

#90270p8816 09/27/1990 ~PR Newswire

NEW YORK (SEPT. 27) PR NEWSWIRE - Fiat Group (NYSE: FIA), Italy's largest private sector automotive and industrial concern, today reported results from operations for the first six months of 1990, which the group's Chairman, Giovanni Agnelli, termed "satisfactory". Net consolidated sales exceeded 30 trillion lire ($24.78 billion), an 11.8 percent increase over the corresponding period last year.

The group's income before taxes continues to be substantial ($2 billion) in the first half of 1990, although it fell short of the figure achieved in the same period a year ago ($2.29 billion).

Fiat group's sales and revenues should reach $49.05 billion at year- end ($41.16 billion in 1989) and investments in fixed assets and R & D expenditures will be higher than in 1989, topping $5.31 billion ($4.29 billion in 1989).

"The business outlook, which had already shown clear signs of slower growth in the closing months of the first half, became cloudier as a result of two new factors: the Gulf crisis and the uncertainties of the international and economic scene," Agnelli noted.

"At the present time, along with a less favorable market outlook than in the past, we are facing a demand that is shifting to ever higher levels of products and service quality, as well as heavy pressure from the ecological issues that are becoming increasingly urgent for all industry. In this context, our prime objective must be total quality, understood not only as a technical necessity, but as a general orientation of the entire organization to ongoing improvement and customer satisfaction," Agnelli added.

"At the same time, as a part of the effort to strengthen our international presence through external methods of growth, we have intensified our strategy of agreements and acquisitions. Especially important among the more recent initiatives in this field were the transaction between FiatGeotech and Ford New Holland in the field of farm and industrial equipment, which will put us in one of the top positions worldwide; Iveco's acquisition of a majority interest in Spanish Enasa; an agreement between Nippondenso of the Toyota Group and Magneti Marelli, which is opening up significant prospects in the area of automotive components; and one between Fisia and the Deutsche Babcock Anlagen, which will reinforce our presence in the market for environmental protection technology," Agnelli noted.

#90270p8819 09/27/1990 ~PR Newswire

LONDON (SEPT. 27) PR NEWSWIRE - United Newspapers plc (NASDAQ: UNEWY) today announced that pre-tax profit for the six months ended June 30, 1990, rose 3.7 percent to 56.6 million pounds sterling ($94.2 million) from the 54.6 million pounds reported for the comparable period of 1989.

Earnings were 17.9 pence per share ($0.60 per ADS), or 35.0 million pounds ($58.3 million), after taxes and minority interests for the first six months of 1990 compared with 18.9 pence per share, or 36.0 million pounds, before extraordinary items in 1989. Net income is based on an estimated tax rate of 33 percent. Revenues were 423.7 million pounds ($705.5 million), an increase of 5.5 percent over the 401.6 million pounds reported in 1989.

The board of directors of United Newspapers declared an interim dividend of 7.5 pence per ordinary share (15 pence per ADS), payable Nov. 16, 1990, to holders of shares registered on Oct. 18, 1990. ADS holders will receive the dividend translated at the exchange rate in effect on the date of payment.

Trading profit of 68.7 million pounds ($114.5 million), including a pension credit adjustment and acquisitions, was 15.6 percent higher than the 59.4 million pounds achieved in the similar period of 1989.

Excluding the pension credit adjustment, for which there was no similar credit in the prior year, trading profit was up 11.7 percent over last year. Operating margin improved to 15.7 percent of revenues from 14.8 percent in 1989.

The substantial increase in interest expense reflects the increased borrowings to finance the capital expenditure modernization program for the national and regional newspaper division together with the cost of buying-out the group's joint venture partner in the construction of Express Newspapers' building at Ludgate House as well as a number of small acquisitions.

Lord Stevens, chairman of United Newspapers, commented, "Apart from the purchase of some additional color units for the national newspapers, the major capital equipment program is complete. The group can now look forward to capital expenditures being broadly equal to depreciation charges for the year.

"The strength of sterling against the dollar has caused a marginal adverse impact in the first half as compared with the average exchange rate used for 1989. If current high dollar/sterling values continue, we can expect a further deterioration in the translation of U.S. profits for the second half."

Lord Stevens went on to state, "There is no doubt that reduced economic activity is having a dramatic effect upon U.K. advertising. Business magazines have been particularly affected in classified advertising and in the display market. Market shares and yields are, however, being maintained. In advertising periodicals, there also is a lack of confidence by advertisers in the shops and businesses, motoring and local government employment areas.

"The commitment to 'Auto Express' and the new launch of 'Select' have kept the profits of the Consumer Magazine division down as the remaining titles compete aggressively for advertising space in markets which are showing weakness," Lord Stevens continued.

"The Regional Newspaper division continues to perform satisfactorily with volumes of display and classified advertising up over last year, but there are signs that these gains are being reduced as the year progresses.

"In national newspapers, the circulation gains of the 'Daily Express' and 'Daily Star' are encouraging as are their increased shares in a declining total market for popular newspapers. There is clearly still a considerable amount of work to do to revive the circulation of the 'Sunday Express.' Advertising volumes in all three national titles were broadly the same as last year."

Regarding U.S. operations, Lord Stevens said, "Advertising pages are more difficult to secure in the business magazine market as advertising begins to slow but, again, the effort to sustain market share has been reasonably successful.

"Attendance at trade shows and exhibitions, and their resulting profitability, are sustaining overall U.S. performance. Advertising periodicals are performing well, with excellent results from the apartment rental sector generating an important new profit stream.

"A difficult time in the U.S. financial information markets has held back performance of the Information Services division in the period," he continued, "although the Extel Financial and PR Newswire businesses are performing satisfactorily. It is clear that the current high interest rate policy is affecting advertising outlays. This is true in the U.S., as well as in the U.K."

In looking ahead, Lord Stevens said, "I do not foresee any pick-up during the remainder of the year and would therefore expect a reduced performance in the second half. However, all of our businesses are well positioned in their respective markets and we shall strive to maintain market share and overall yields."

United Newspapers plc is an international publishing company with extensive holdings in the United Kingdom and in the United States (including PR Newswire Gralla Publications, and Miller Freeman Publications in the U.S.).

United Newspapers ADSs (equivalent to two U.K. ordinary shares of United Newspapers) are traded on the NASDAQ National Market System. Exchange rate is one pound equals to $1.665.

NEW YORK (SEPT. 27) PR NEWSWIRE - Apple Bancorp, Inc. (NYSE: APK) announced today that its counsel was in the process of finalizing the arrangements with counsel for Stanley Stahl which would enable Stahl to complete his $38 per share cash tender offer. Stahl's offer is currently scheduled to expire at midnight on Monday, Oct. 1, 1990, and the company stated that it presently expects Stahl to complete his offer at such time.

As the company has previously announced, simultaneously with Stahl's purchase of the tendered shares, the company will redeem the rights issued under the company's shareholder rights plan, terminate the two trusts previously established by the board of directors and appoint Stahl's designees to constitute a majority of the company's board.

The company stated that while its board remains neutral toward the offer and is making no recommendation as to whether shareholders should accept or reject the offer or tender their shares, the board continues to believe that those shareholders who determine that it is in their best economic interests to receive $38 per share in cash should tender their shares.

The company stated that in view of the fact that it believes that Stahl will consummate his offer at midnight on Oct. 1, 1990, shareholders who determine to tender their shares should do so promptly. The company's directors and executive officers have tendered their shares or stated their intention to do so.

#90270p8822 09/27/1990 ~PR Newswire

HOUSTON (SEPT. 27) PR NEWSWIRE - Team, Inc. (AMEX: TMI) today announced operating results for its first quarter ended Aug. 31, 1990. Revenues for the

quarter were $23,433,000, up 20 percent over the prior year's first quarter revenues of $19,507,000. Net earnings were $679,000 or $.15 per share fully diluted compared to $1,070,000 or $.35 per share reported for the first quarter of the prior year. The number of weighted average shares used in computing fully diluted earnings per share in the quarter increased 39 percent over the number of shares used in the first quarter of the prior fiscal year as a result of the completion of the stock offering in November 1989.

Revenues from Repair and Specialty Services, Team's largest division, rose 23 percent to $14,300,000 due mainly to strong increases in emissions monitoring and concrete restoration services.

The Transportation Division continues to perform well, with revenues increasing 25 percent over the first quarter last year, due to stronger demand for oilfield rental equipment and product related services.

In the Privatized Services Division revenues increased 13 percent over last year. The majority of the increase in revenues resulted from contracts in the Federal sector which carry a lower profit margin than highway maintenance contracts. Although revenues increased, operating profits were significantly lower than in the first quarter of fiscal 1990 primarily because the state of Texas sharply reduced spending during the latter part of its fiscal year ended August 1990 for highway maintenance and repair work for District 12. With the beginning of the state's new fiscal year on Sept. 1, 1990, concurrent with the company's second quarter, the state's spending for highway maintenance and repair work has resumed and work under these contracts will be back to normal in the second quarter.

One of Team's outstanding areas of performance for the quarter was in the environmental area with the company's plant emissions monitoring and control services. These services will be further expanded with the pending acquisition of Source Environmental Sciences Inc., a professional environmental consulting firm specializing in air quality monitoring and related services. With this acquisition, Team is continuing its emphasis on comprehensive environmental and air quality permitting services to its customers.

Team, Inc. is a national service company and a leader in the repair and maintenance of America's public and private infrastructure from roads and bridges to industrial plants.

#90270p8829 09/27/1990 ~PR Newswire

PHILADELPHIA (SEPT. 27) PR NEWSWIRE - AT&T (NYSE: T) will introduce USADirect(R) Service from Saudi Arabia on Wednesday, Oct. 3, according to a

filing with the FCC yesterday.

The service will allow Americans stationed in Saudi Arabia to reach an AT&T operator in the United States by dialing 1-800-100 from most telephones. The AT&T operator can complete calls anywhere in the United States. USADirect Service will be available from virtually all U.S. military bases in Saudi Arabia.

During an introductory period, AT&T will allow Americans stationed in Saudi Arabia to make free three-minute phone calls to the United States in order to demonstrate USADirect Service.

"AT&T is acting out of concern for military personnel stationed in Saudi Arabia who have had a difficult time communicating with friends and family," said Frank Ianna, vice president for marketing International Communications Services. "We want to give all those who are serving in Saudi a chance to call home."

With the addition of Saudi Arabia, USADirect Service is now available in 82 countries.

Travelers, expatriates, journalists and military personnel have found the five-year-old USADirect Service a good way to keep in touch with their friends and relatives in the United States. USADirect Service is economical, the company said, because calls are billed at AT&T rates and callers generally avoid hotel surcharges. It is convenient because the use of American operators avoids language difficulties.

Numbers to reach USADirect vary by country. In some countries, the service is only available from specially designated telephones. For further information about USADirect Service, call 1-800-874-4000.

ROCHESTER, NY (SEPT. 27) PR NEWSWIRE - Having redefined itself as "The Document Company," the Xerox Corporation (NYSE: XRX) today announced a new advertising campaign that highlights the product of its products - the document.

The campaign reflects a new marketing strategy for the company, intended to focus attention on document creation and distribution as a critical business process.

Called "Putting It Together," Xerox's first campaign developed by Young & Rubicam is themed to the music and lyrics of the Stephen Sondheim song, "Putting It Together," from "Sunday In the Park With George."

"We want to be known as The Document Company because documents are a critical part of the business process, both internally and externally," said Len Vickers, senior vice president for worldwide marketing at Xerox. "Internally, document assembly requires the collaboration of people, ideas and information. Externally, documents project a company's image throughout the marketplace."

"Thus, we want people to rethink the importance of documents in their professional and personal lives," he explained. "Documents focus information gathered from multiple sources in a way that allows people to make decisions and take action."

The advertising campaign will break four print ads and two radio spots beginning Oct. 1, to be followed by a broadcast effort debuting Oct. 16, during the World Series. The print campaign will run in The Wall Street Journal, New York Times, USA Today, The Rochester Democrat and Chronicle and The Rochester Times-Union.

"The lyrics of Sondheim's 'Putting It Together' perfectly reflect Xerox's message about the creation of a great document," said Eric Weber, vice chairman and creative director for Young & Rubicam. "Piece by piece, step by step, putting it together. The song is about inspiration, hard work, collaboration - and achievement."

DENVER (SEPT. 27) PR NEWSWIRE - AMDURA Corp. (NYSE: ADU) announced today that the Bankruptcy Court approved the sale of certain operating assets of its subsidiary, AMDURA National Distribution Co. (ANDCO), to United Hardware Distributing Co. The sale is subject to various closing conditions, but is expected to close within the next 30 days.

Under the terms of the purchase, United would acquire ANDCO's inventory and its distribution center in Milbank, S.D. Receivables and various other assets of ANDCO would not be purchased in the transaction.

The purchase price, to be received in cash in closing, was previously estimated to total approximately $21.5 million. The purchase price, and cash proceeds, depends on asset values as of the date of closing.

Of the cash proceeds expected to be received at closing, approximately $1 million will be placed in escrow to pay employee benefit claims, not previously covered, and rebates due ANDCO's customers. Proceeds from the sale, held for the benefit of the estate of ANDCO, will remain in escrow pending settlement of the company's bankruptcy case or appropriate orders of the Bankruptcy Court.

ANDCO is a hardlines distributor supplying independently-owned hardware retailers operating under the Trustworthy names in 11 upper-midwestern and western states. ANDCO has 270 employees, including 120 in Minnesota.

United Hardware Distributing is a Plymouth, Minnesota-based, dealer-owned hardware distributor, serving approximately 600 independently-owned, Hardware Hank stores.

#90270p8840 09/27/1990 ~PR Newswire

VIRGINIA BEACH, VA (SEPT. 27) PR NEWSWIRE - The Southland Corporation's 400 7-Eleven stores in Hampton Roads, Richmond, the Eastern Shore and northeast North Carolina will collect contributions to combat diabetes from Oct. 1 to Nov. 30. Canisters, educational brochures and posters will encourage 7-Eleven shoppers to drop-in their spare change to benefit the Diabetes Institutes Foundation and the Diabetes Institutes.

A formal kick-off was held today on the 22nd floor of Dominion Towers and featured Virginia' Attorney General Mary Sue Terry, as well as corporate and community leaders. Dr. Leon-Paul Georges, director of the Diabetes Institutes and Southland's Colonial Division manager John Carter also spoke.

Southland and the Diabetes Institutes Foundation will be assisted in their efforts by Hampton Roads radio station 2WD and Richmond radio station Q-94, which will publicize the campaign with public service announcements and educational programs. The on-air promotional time will amount to a donation of more than $56,000 from the stations.

Carlson Travel Network and Haynes Furniture have donated prizes to be awarded

to 7-Eleven store managers who raise the most money for the cause.

More than 12 million Americans suffer from diabetes, a chronic disorder that affects the body's ability to manufacture and utilize insulin. Less than half of them even know they have the disease. More than 300,00 people die from diabetes each year. In the Hampton Roads and Richmond region, there are an estimated 130,000 with the disease.

This is the second year for this canister campaign. Last year canister donations topped $37,000. This fund raising program with the Diabetes Institutes Foundation is a "perfect fit" with Southland's desire to affiliate with a regional effort, says Division Manager Carter. "The more we listened and learned about the disease, and what specifically the Diabetes Institutes was doing to fight it, the more we wanted to help them." "Motivating our employees has been easy," Carter said. "They enjoy supporting something they can touch and feel locally."

Internationally recognized as a leader in diabetes research, clinical care and education, the Diabetes Institutes are pushing forward the cutting edge of diabetes research and treatment. A highly specialized team of physicians and staff provides state-of-the-art outpatient and inpatient diabetes care by referral.

At the Diabetes Research Institute, world-renowned physicians and basic scientists strive to unlock the chain of events that cause the complications of diabetes.

The Diabetes Institutes was selected as one of 10 centers worldwide to conduct the clinical trials for the surgically implanted adjustable insulin pump. With its team of world-renowned physicians and basic scientists the Diabetes Institutes recently received the distinguished World Health Organization designation as a WHO Collaborating Diabetes Center. The Diabetes Institutes is a program of the Eastern Virginia Medical School.

BALTIMORE (SEPT. 27) PR NEWSWIRE - Serv-Tech Inc. (NASDAQ: STEC) has signed a letter of intent to acquire 60 percent of Chemisolv Ltd., a United Kingdom specialty and performance chemical company, for $1.1 million in cash and stock.

Chemisolv provides customized wastewater treatment and process improvement programs for the pulp and paper, steel, food and hydrocarbon processing industries.

Chemisolv will enter the U.S. market in the fourth quarter of this year and will provide services to Serv-Tech customers in the analysis of waste streams and recovery of products from those streams. It also will pursue its traditional markets in the United States.

The acquisition is subject to the review and approval of boards of directors at both companies.

Fred Sieber, president of Serv-Tech Environmental Services, a division of Serv-Tech Inc., made the announcement at Alex Brown & Sons' Fourth Annual Environmental Seminar in Baltimore.

Serv-Tech provides specialty maintenance services to the refining, gas processing and petrochemical industries in the United States and Europe.

#90270p8849 09/27/1990 ~PR Newswire
LONG BEACH, CA (SEPT. 27) PR NEWSWIRE - Aviation history has been written in

Long Beach with the delivery of six more McDonnell Douglas (NYSE: MD) MD-80 twin jets to American Airlines. The flurry of new deliveries to the airline this month brings to 201 the number of McDonnell Douglas MD-80s serving in American's fleet.

"This is the first time in commercial aviation history that one airline has operated 200 of a single type of aircraft," John Wolf, vice president and general manager of the MD-80/90 program for the Douglas Aircraft division of McDonnell Douglas, said today at a ceremony to mark the milestone.

Douglas officials presented keys for the latest MD-80 as well as a commemorative medallion to be installed in the 200th aircraft to Robert W. Baker, executive vice president of American Airlines. Baker said the MD-80 was a key part of an aggressive growth plan that in just six years has made American the free world's largest airline.

"We wanted an airplane that would fit in with the new route structure American was creating through its hub-and-spoke system," Baker said. "The MD-80 was a perfect fit. We have been very pleased with its performance and its maintenance record."

American Airlines has the largest fleet of aircraft in the western world with nearly 550 planes, including 59 McDonnell Douglas DC-10s, the largest number of that aircraft with any airline. McDonnell Douglas currently has firm orders from American for 58 more MD-80s and options for an additional 70.

American Airlines is also scheduled to take delivery of early production models of the McDonnell Douglas MD-11, the new long-range wide-cabin trijet, which is scheduled to receive FAA certification later this year. Deliveries to customers will begin immediately after certification.

American took delivery of its first MD-80 from McDonnell Douglas in May 1983. In July 1987 the airline became the first Douglas customer to operate 100 of a single type of aircraft when it took delivery of its 100th MD-80. Douglas and American set a record for the most aircraft of one type in a fleet in August 1989 when the airline received its 165th MD-80.

The latest McDonnell Douglas twin jets to join the American route structure are MD-82s, which feature seating for 142 in a two-class arrangement. There are five versions in the MD-80 family, offering different range capabilities. All versions feature comfortable five-across seating, the cabin configuration overwhelmingly preferred by passengers.

#90270p8850 09/27/1990 ~PR Newswire

GREENWICH, CT (SEPT. 27) PR NEWSWIRE - Jack Africk was elected vice chairman of UST at a meeting of the board of directors held today. In this position, Africk will be responsible for the company's legal, government relations and newly formed corporate development departments. He will continue to serve on UST's board of directors, a position he has held since 1980.

Africk, a veteran of more than 40 years in the tobacco business, most recently served as executive vice president of UST and president of UST's United States Tobacco Company subsidiary.

Africk joined United States Tobacco Company in 1979 as president of a new international division. Drawing on that experience, he spearheaded United States Tobacco Company's international efforts. In 1981 he was elected a senior vice president, and in 1984 executive vice president. He was named president of UST's United States Tobacco Company subsidiary in 1987.

Prior to joining United States Tobacco Company, Africk held executive positions with other tobacco companies, including president of R.J. Reynolds-Puerto Rico and senior vice president for RJR-MacDonald, Inc., and R.J. Reynolds subsidiary in Canada, and executive vice president at Liggett & Myers Tobacco Company.

In April 1988, he received the National Association of Tobacco Distributors' (NATD) annual Tobacco Industry Hall of Fame Award. The award is the highest honor that can be given to manufacturer associate.

He also serves as chairman of the L.A. Bantle Institute, an annual seminar series for executives in the tobacco and confectionery industries, and is on the board of trustees of Albertus Magnus College.

In addition to his professional commitments, Africk actively supports several civic and philanthropic organizations. He is a founder and former vice president of the East Nassau, N.Y., Young Men's and Young Women's Hebrew Association.

He also has been honored for his dedication to humanitarian causes, and in 1986 was awarded the Louis E. Seidman Human Relations Award by the tobacco and allied industries division of the American Jewish Committee, one of the nation's pioneer human relations organizations.

In October 1989, Africk was named Man of the Year by the National Tobacco, Confectionery and Allied Industries Division of the Anti- Defamation League.

Through its subsidiaries, UST is a leading producer and marketer of moist smokeless tobacco products including Copenhagen, Skoal, Skoal Long Cut, and Skoal Bandits. Other consumer products marketed by its subsidiaries include premium wines sold nationally under the Chateau Ste. Michelle, Columbia Crest, Conn Creek, and Villa Mt. Eden labels. UST subsidiaries also manufacture or

market quality pipes and imported pipe tobacco, imported cigars, and other tobacco-related products.

SOUTHFIELD, MI (SEPT. 27) PR NEWSWIRE - Leeco Diagnostics, Inc. (NASDAQ: LECO) has announced that its wholly owned Italian subsidiary, Technogenetics Srl, signed a distribution agreement with Amgen, Inc. Diagnostics Venture (NASDAQ-NMS: AMGN) for its Clinigen(TM) enzyme immunoassay kit for Erythropoletin (EPO).

Under the terms of this agreement, Technogenetics will receive exclusive distribution rights to the EPO assay in Italy. Technogenetics, which is headquartered in Milan, Italy, is a manufacturer of biotechnology reagents and a distributor of diagnostic and research products in Italy.

The Clinigen assay is used to determine the concentration of EPO in human serum as an aid in the diagnosis of various anemias and polycythemias. Recent clinical results suggest that Clinigen may also be helpful in the diagnosis and treatment of anemias caused by AZT and Cis-platinin.

Rod Raynovich, CEO of Leeco Diagnostics, stated that the agreement signed with Amgen reinforces Leeco's reputation as a company offering state-of-the-art technology. Raynovich further added that Leeco and Amgen were currently in discussions concerning future distribution contracts for additional Amgen assays, including one for G-CSF and IL-6.

Leeco will be actively seeking other licensing and distribution agreements for Technogenetics in the diagnostic and research laboratory marketplace.

Leeco is a diagnostic immunobiology company focused on rapid detection of diseases and medical conditions such as infection, pregnancy, and hormone imbalance.

Leeco products are sold through a worldwide distribution network to physicians' offices, clinical laboratories, hospitals, research institutes, and OTC markets. Leeco is 53-percent owned by a public company quoted on the Milan stock exchange and one of the major Italian independent pharmaceutical groups.

CONTACT: Rod Raynovich of Leeco Diagnostics, Inc., (313) 353-2620.

NEW YORK CITY, NY (SEPT. 27) PR NEWSWIRE - IMCERA Group Inc. (NYSE: IMA) senior management told security analysts here that they were comfortable with Wall Street estimates of 50-75 cents per share of the first quarter, compared with 27 cents reported a year ago.

"We're pleased with the strong sales and earnings gains we're seeing so far in fiscal 1991," said George D. Kennedy, IMCERA chairman and chief executive officer. "While the first quarter has typically been the weakest of the year, this quarter we're running ahead of budget and substantially ahead of last year's first quarter results.

"It's still unclear what effect this will have on full-year earnings, but we're delighted with the great start," Kennedy said.

Headquartered in Northbrook, Ill., IMCERA has three businesses -- Mallinckrodt Medical, Mallinckrodt Specialty Chemicals and Pitman-Moore. IMCERA also owns approximately 38 percent of the common stock of IMC Fertilizer Group, Inc.

MIDDLEBURY, CT (SEPT. 27) PR NEWSWIRE - Uniroyal Chemical Company, Inc. has announced the opening of a representative office in the Chiyoda-Ku section of Tokyo effective September 1990.

Robert J. Mazaika, president and chief executive officer of Uniroyal Chemical said: "This action, on the part of Uniroyal Chemical, further acknowledges and emphasizes its commitment to the Pacific Rim market in general and Japan in particular. It is consistent with the corporation's recent opening of a European business center located in Langeley, United Kingdom."

Dr. Koichi Okano, a graduate of Kyoto University and a highly regarded senior executive of the Japanese chemical industry, has been appointed managing director of Uniroyal Chemical in Japan. Dr. Okano, who was formerly with Mitsui Petrochemical Industries, Ltd., brings to his new position over 30 years of experience in the chemical industry. Most recently Dr. Okano has been the director of overseas operations and the licensing departments of Mitsui Petrochemical.

In his new capacity, Dr. Okano will be responsible for overseeing the existing activities of Uniroyal Chemical in Japan as well as identifying opportunities for technology licensing, joint venture and acquisition opportunities. In this role, he will serve all of the business interests of Uniroyal Chemical including its rubber chemicals and polymers, specialty chemicals and crop protection chemical activities.

Uniroyal Chemical Company is a leading worldwide producer of specialty chemicals and high performance polymers serving the rubber, plastics, petroleum, paint and coatings, adhesives and sealants, electronics and crop protection markets.

NEW YORK (SEPT. 27) PR NEWSWIRE - Sanwa Bank Ltd. has donated $1.25 million to The Center for Japan-U.S. Business and Economic Studies at the Leonard N. Stern School of Business at New York University.

The announcement was made last night by Kenji Kawakatsu, chairman of Sanwa Bank Ltd., and John Brademas, president of New York University, in an official ceremony at the Stern School.

The gift establishes "The Sanwa Research Endowment Fund on International Financial Markets," which will support research, publications and conferences on issues of concern to the world economic and financial community.

"Sanwa regards the exercise of creativity in solving the problems of international society as its natural obligation. With this in mind, we wish to cooperate with New York University and support its research into solutions to international financial and economic problems," said Kawakatsu.

"We are particularly committed to working with this key educational institution in New York City, because New York is the home of the largest Sanwa office outside of Japan," he added.

President Brademas lauded Sanwa for its continuing relationship with the Japan-U.S. Center, which started in 1987 with a three-year, $300,000 grant to study financial markets throughout the world.

"In establishing The Center for Japan-U.S. Business and Economic Studies in 1983, New York University became the first American institution of higher learning to recognize academically the profound importance, not only to our two countries but to the entire world, of the prodigious commerce between Japan and the United States," said President Brademas.

Richard R. West, Dean of the Stern School, thanked Sanwa for its generosity and praised Professor Ryuzo Sato, director of the Japan-U.S. Center at Stern, for his leadership.

"This gift from the Sanwa Bank underscores the excellent reputation for business management education the Stern School enjoys throughout the world, and emphasizes the role the U.S.-Japan Center plays in strengthening the ties between our two countries," said Dean West.

Sanwa Bank Ltd. is the world's fifth largest bank, with assets of more than $375 billion. Its international network includes more than 100 offices in 27 countries. The New York branch has assets exceeding $18 billion.

GREENWICH, CT. (SEPT. 27) PR NEWSWIRE - At a meeting of the board of directors of UST Inc. (NYSE: UST) today, John J. Bucchignano was elected a senior vice president and controller. In addition, the company designated Bucchignano principal financial officer.

Reporting to Bucchignano as senior vice president and controller are Jeffrey D. Harris, treasurer; Joan M. Schreiner, director of taxes; Robert M. Fox, director of finance - subsidiary operations; and Robert T. D'Alessandro, assistant controller. In addition, he supervises Michael V. Delaney, director of internal auditing, who reports to the audit committee.

Prior to being elected senior vice president, Bucchignano served as controller and principal accounting officer. He will continue to serve in these positions. Before that he was director of financial planning, a position he held upon joining the company in 1984.

Before joining UST, Bucchignano served as controller at Cognitronics Corporation in Stamford. He also worked at the accounting firm of Ernst & Ernst (now Ernst & Young).

Bucchignano was graduated from Le Moyne College in Syracuse, N.Y., and is a member of the American Institute of Certified Public Accountants (AICPA) and the New York State Society of CPA's. He resides in Bethel, Conn.

Through its subsidiaries, UST is a leading producer and marketer of moist smokeless tobacco products including Copenhagen, Skoal, Skoal Long Cut, and Skoal Bandits. Other consumer products marketed by its subsidiaries include premium wines sold nationally under the Chateau Ste. Michelle, Columbia Crest, Conn Creek, and Villa Mt. Eden labels. UST subsidiaries also manufacture or market quality pipes and imported pipe tobacco, imported cigars, and other tobacco-related products.

PARIS (SEPT. 27) PR NEWSWIRE - Insurance companies must expand internationally to insure and finance the new expensive technologies of the 1990s so that exposure will be spread globally instead of regionally, said Henry G. Parker III, a managing director of Chubb & Son Inc.

Parker made his remarks in Paris before a conference entitled, "Challenges and Opportunities of U.S. Insurance in the 90s," sponsored by L'Argus.

Parker pointed out that oversees investment by U.S. insurance companies totals some $11 billion or about three percent of all U.S. foreign investments and has a rate of return of 16.4 percent and is growing.

Parker attributes the reticence of companies to expand overseas to a number of factors, including lack of long range vision, failure to realize the U.S. premium market is shrinking as a percent of world market and immediate pressure to produce improved quarterly earnings.

But, Parker added that the current round of negotiations of the General Agreement on Tariffs and Trade (GATT) includes the trade of services. These negotiations, scheduled to end in December, will hopefully come to an agreement to reduce these trade barriers to the insurance industry, Parker noted.

Parker outlined a number of reasons on the importance for the U.S. insurance industry to look at the potential overseas market. These included difficult competitive conditions domestically, with too much risk capital chasing too little business, and a slowdown in new premium growth.

On the positive side, Parker highlighted the opportunities that exist for the insurance industry in once-Socialist countries in Eastern Europe that are now converting to market economies.

Parker also said that a strong U.S. insurance presence internationally will aid the U.S. trade deficit. "While we all read about the merchandise trade deficit, we don't read about the services industry surplus in trade. Manufacturing trade in the U.S., except for a couple of years, has always been in deficit. This was not a problem until 1981, when the services trade surplus could no longer offset the manufacturing deficit," Parker stated.

Henry Parker is a senior vice president and a managing director of Chubb & Son Inc., the managing arm of Chubb Group of Insurance Companies and a subsidiary of The Chubb Corporation (NYSE: CB) headquartered in Warren, N.J.

GREENWICH, CT (SEPT. 27) PR NEWSWIRE - At a meeting of the board of directors of UST held today, Joseph R. Taddeo was elected a member of the board and executive vice president. In addition, he was elected president of United States Tobacco Company.

Since June 1988, Taddeo has served as senior vice president of United States Tobacco Company with responsibility for the sales, marketing, and international operations of the company.

As vice president of industry relations from April 1987 through June 1988, Taddeo was in charge of developing grassroots cooperation in addressing legislative and regulatory issues affecting the company's tobacco business.

He joined the company in 1982 as regional director, international division. From 1984 to 1985, Taddeo was managing director of United States Tobacco Company's European operations. In 1985, he was elected a vice president in charge of United States Tobacco Company's international division where he developed the company's European business.

Prior to joining the company, Taddeo held various executive sales and marketing positions with R.J. Reynolds, including time in the international

area residing in Latin America.

Taddeo serves on the board of the Child Guidance Center of Southern Connecticut, the Tobacco Merchants Association and the Smokeless Tobacco Council.

Through its subsidiaries, UST is a leading producer and marketer of moist smokeless tobacco products including Copenhagen, Skoal, Skoal Long Cut, and Skoal Bandits.

Other consumer products marketed by its subsidiaries include premium wines sold nationally under the Chateau Ste. Michelle, Columbia Crest, Conn Creek, and Villa Mt. Eden labels. DENVER (SEPT. 27) PR NEWSWIRE - Scientific Software-Intercomp Inc. (SSI) (NASDAQ: SSFT) announced today that it has closed an additional $1 million financing with Halliburton Company (NYSE: HAL) through the sale to Halliburton of SSI's five-year Zero Coupon Convertible Exchangeable Subordinated Debenture.

At such time as SSI's shareholders approve the authorization of additional preferred stock, the Debenture will be exchanged for 200,000 shares of preferred stock at $5 per share. Both the debenture and the preferred stock will be convertible into SSI common stock at the same $5 per share price.

If the debenture is not exchanged or converted, it will mature in 1995 at which time $1,503,657 will be payable representing the purchase price of the debenture and the accrual of 8.5 percent per annum interest thereon.

Dr. E. A. Breitenbach, chairman and president of SSI, explained that the $1 million of funding will be used by SSI for additional working capital and will further strengthen its balance sheet.

In April of this year Halliburton purchased for $3 million a similar Zero Coupon Convertible Exchangeable Subordinated Debenture. At SSI's annual meeting of shareholders in June 600,000 shares of preferred stock were authorized and the $3 million debenture was exchanged for such preferred stock. That preferred stock is also convertible into SSI common stock at the same $5 per share price.

At the time of the $3 million investment by Halliburton, SSI and Halliburton entered into an Operating Agreement providing SSI with worldwide distribution channels through Halliburton for SSI products and particularly for the SSI Workbench which is a family of computer software programs for use on desktop computers that make high technology available to a wide range of personnel at operating oil companies. Under the Operating Agreement SSI is also working with

Halliburton on its development of its own workstation.

Halliburton is one of the world's largest diversified oil field services and engineering and construction companies with offices throughout the world and with revenues for 1989 in excess of $5.6 billion.

SSI for more than 20 years has provided high technology software and consulting services to the oil and gas industry. The company has offices in Denver, Bakersfield, Calif., Houston, Calgary, Canada, London and Cairo, Egypt.

NEW YORK (SEPT. 27) PR NEWSWIRE - Pan American World Airways, a wholly owned subsidiary of Pan Am Corporation (NYSE: PN), and Lufthansa German Airlines signed a definitive agreement in Frankfurt today under which Pan Am will provide certain services and facilities in connection with Lufthansa's proposed new Berlin operations.

Pan Am will receive $150 million upon closing of the transaction, which is expected on Friday, October 26.

On Sunday, October 28, Lufthansa plans to begin service between Berlin's Tegel Airport and Frankfurt, Munich, Hamburg, Dusseldorf, Nuremberg, Stuttgart and Cologne.

As part of the agreement, Pan Am will sell certain equipment to support Lufthansa's ground handling and check-in activities at Berlin's Tegel Airport and other points in West Germany currently being operated as part of Pan Am's Berlin Service. In addition, Pan Am will release certain slots, gates and various office facilities at designated airports in Germany.

Under a separate but related charter agreement, Pan Am will provide Boeing 727/200 charter capacity to support a portion of Lufthansa's intended schedule of operations from Berlin to Frankfurt, Munich, Dusseldorf, Nuremberg and Stuttgart. Pan Am will operate the charter services through June 30, 1991 on behalf of Lufthansa using Lufthansa flight numbers.

Pan Am will increase its New York to Berlin nonstop flights to five per week on October 28 and will begin London/Berlin service this Fall, offering convenient connections to Berlin from various U.S. cities. The U.S.-carrier will also continue to operate international services from the United States to Frankfurt, Munich, Hamburg, Stuttgart, and Nuremberg.

The operations of Berlin-based Pan Am Express/Europe are not affected by the

agreement. Pan Am Express currently offers service between 10 European cities and Berlin with 34 daily departures.

Pan Am first entered the Berlin market in 1950 when it acquired American Overseas Airways which was serving German markets from Berlin under a post World War II agreement signed by the United States, Great Britain, France and the Soviet Union. In its 40 years of uninterrupted service, Pan Am's IGS operations carried more that 67 million passengers.

NEW YORK (SEPT. 27) PR NEWSWIRE - Culbro Corporation (NYSE: CUC) today announced that Bruce A. Barnet had been reelected to its board of directors. Barnet left the board in 1988 after assignment to the Far East by his then employer, Time Warner Inc., with which he had worked since 1969. He returned to New York this year to assume the presidency of Riordan Publishing Company and of its consumer magazine group, Family Media. Publications include Discovery, Savvy Woman, 1001 Home Ideas, Golf Illustrated and World Tennis. Barnet, 45, is a graduate of Yale College and Columbia Business School and resides in New York City with his wife and two children. The Culbro board was expanded to 12 members with the addition of Barnet.

At its meeting today, the Culbro board also elected Ronald S. Milstein a vice president of the corporation. Milstein, 34, who has been with Culbro for seven years and received his law degree in 1981, will continue as assistant general counsel and assistant secretary. He resides in Massapequa, N.Y., with his wife and daughter.

Culbro Corporation is a diversified organization with interests in cigars, wholesale distribution of tobacco and sundry consumer products, industrial products including labeling systems and plastic components, real estate and landscape nursery stock.

LIVINGSTON, NJ (SEPT. 27) PR NEWSWIRE - Three appointments to senior management positions at the Howard Savings Bank (NASDAQ: HWRD) were announced today by Chairman and Chief Executive Officer William P. Tuggle III.

Joseph E. Fitzgibbon, a 37-year banking industry veteran will join the Howard as executive vice president, senior lending officer, responsible for all lending activities including administration of the bank's loan workout

department. He comes to the Howard from First Fidelity Bank, N.A. where he was executive vice president and senior loan officer in charge of the bank's commercial loan portfolio.

Henry F. Thorne has been named executive vice president, human resources, for the Howard. He was previously with Fidelity Bank, Philadelphia, from 1974 to 1989, managing a variety of key functions which included strengthening the personnel organization of the bank as senior vice president and director of personnel.

Thorne left First Fidelity in 1989 to join the financially troubled Montgomery National Bank of Princeton as president and chief executive officer in an attempt to rescue the institution, which was placed in receivership by the Comptroller of the Currency in June of this year.

Robert L. Slater has been appointed senior vice president and senior asset recovery officer at the Howard, with responsibility for the bank's loan workout unit. He was previously senior vice president and asset recovery group leader at City Savings Bank, F.S.B. (formerly City Federal Savings Bank), Somerset, where he was involved in all aspects of troubled debt restructuring and the management and sale of real estate owned properties.

"The banking experience and expertise of these three key executives will enhance our management team and benefit the organization," Tuggle said.

Fitzgibbon entered the banking industry in 1953 as a teller trainee with First National State Bank, a First Fidelity predecessor, and except for ten years with Franklin State Bank (1967-1977) where he held a variety of senior management positions, he served his entire career with First Fidelity and its predecessor institutions.

Fitzgibbon re-joined the First Fidelity organization in 1977 as vice president and loan officer. From 1982 to 1984 he served as executive vice president and senior lending officer for two of its affiliates, in South Jersey and in Bergen County.

He became senior vice president and group lending officer at First Fidelity, New Jersey, in 1984 and was responsible for five commercial lending regions and a centralized loan operations department. He also managed the reorganization of the bank's commercial lending department following its merger with Fidelity Union Trust.

From 1987 to 1988 he served as executive vice president and senior lending officer of First Fidelity's North Jersey bank, responsible for all lending departments. As senior vice president of the parent company, First Fidelity Bancorporation, in 1988 he was assigned the responsibility for the loan review function for the corporation's eight subsidiary banks. Fitzgibbon, 58, earned a B.S. in economics from St. Peter's College in 1953. He resides in Annandale.

Thorne started his career as a corporate planning associate with CIGNA, Philadelphia, in 1972. He joined Southeast National Bank, Malvern, Pa., in 1974 as a corporate planning officer, becoming director of marketing in 1975 and county executive in 1977, where he oversaw 13 community banking offices and a centralized commercial lending function.

At Fidelity Bank he was community banking group head from 1983 to 1985, managing 50 branch offices in two suburban Philadelphia counties. From 1985 to 1986, he was responsible for the correspondent banking, government banking, small business lending and training divisions. Thorne, 47, received his MBA in finance from The Wharton School in Philadelphia.

Slater began his banking career in 1970 as a loan assistant and trainee at Midlantic National Bank, Newark. He became secured loans manager in 1972, financial analyst in 1974 and assistant vice president and credit manager in 1976, where he conducted the financial analysis and underwriting of all head office and corporate banking credits. In 1980 he became a head office commercial loan/account officer concentrating on small and middle market New Jersey-based manufacturers, retailers and service companies.

He joined City Federal Savings in 1984 as vice president and regional director real estate finance. A resident of Bedminster, Slater, 42, has a B.S. in finance from Lehigh University.

BETHESDA, MD (SEPT. 27) PR NEWSWIRE - Directors of Martin Marietta Corporation (NYSE: ML) today raised the quarterly dividend on Martin Marietta common stock from 33-3/4 cents to 37-1/2 cents per share, an increase of 11.1 percent.

Payment at the new annualized rate of $1.50 per share will be made on Dec. 31, 1990, to holders of record at the close of business on Dec. 3, 1990. The last dividend increase was paid in September 1989.

"We have a solid and diversified backlog of orders in both our defense and non-defense businesses," said Norman R. Augustine, chairman and chief executive. "This dividend increase reflects our confidence in Martin Marietta's outlook and in our strategic positioning for the coming years," he added.

Separately, the board authorized purchase of 1 million of its common shares from Martin Marietta Corporation's Master Retirement Trust. The corporation

will have approximately 49 million shares of common stock outstanding after completion of this purchase.

In other action, the board updated its Shareholder Rights Plan, which was adopted in July 1986. Under the amendment, rights would become exercisable if any person's holding reaches 15 percent of the corporation's common stock. The amendment also adds both a percentage flip-in and an exchange feature. The corporation said these changes were not in response to any effort to acquire control of Martin Marietta, and it is not aware of any such effort.

HAYWARD, CA. (SEPT. 27) PR NEWSWIRE - Nellcor Inc. (NASDAQ: NELL) today announced that it has granted a license under its sensor-coding patents to SpaceLabs Inc. to use Nellcor's oximetry sensors with SpaceLabs' new model 90489 pulse oximetry module.

"We are very pleased to have completed this agreement with SpaceLabs," said Ray Larkin, Jr., Nellcor president and chief executive officer. "The agreement expands the list of major patient monitoring companies -- including Hewlett-Packard, Siemens and Puritan-Bennett -- with whom we now have patent licensing agreements. These agreements testify to the advantages of Nellcor's proprietary sensor technology in a range of diverse clinical settings."

The agreement allows SpaceLabs to offer Nellcor's multiple-use and single-use, patient-dedicated oximetry sensors with the new 90489 module. The wide variety of Nellcor sensors increases the module's possible applications for neonatal, pediatric and adult patients. The module is compatible with all SpaceLabs' Patient Care Management System (PCMS) monitors and is also able to use other sensors, including SpaceLabs' sensors.

SpaceLabs Inc. is a leading manufacturer of clinical information systems, patient monitoring equipment, diagnostic monitoring products and semi-automatic defibrillators for the pre-hospital market.

Nellcor Inc. designs, manufacturers and markets electronic monitoring instruments for patient safety and management in operating rooms, recovery rooms, intensive care units and throughout the hospital. Nellcor is the leading producer of pulse oximeters used in hospitals for the continuous measurement of patient oxygen status.

TULSA, OK. (SEPT. 27) PR NEWSWIRE - MAPCO Inc. (NYSE: MDA) today elected Don Hodel, former Secretary of the Department of Energy and former Secretary of the Department of the Interior, a director.

Hodel is currently the president of Summit Group International, Inc., an energy and natural resources consulting firm, and adviser to the president of Texon Corporation, a Houston-based company engaged in oil and gas marketing and related activities. He is a member of the board of directors and executive committee of American Electric Power Company and a member of the advisory board of the Electric Power Research Institute. Prior to his service as a member of the President's cabinet, Hodel served as the administrator of the Bonneville Power Administration and as an attorney.

A graduate of Harvard College, Hodel received his juris doctorate from the University of Oregon School of Law.

MAPCO is a diverse energy company whose business is conducted by four operating subsidiaries: MAPCO Coal produces and markets bituminous steam and metallurgical coal; MAPCO Gas Products produces and markets natural gas liquids and fertilizers; MAPCO Petroleum operates refineries and retail marketing networks through the Mid-South and Alaska systems; and MAPCO Transportation operates natural gas liquids and ammonia pipelines, and fractionation and storage facilities.

DEARBORN, MI (SEPT. 27) PR NEWSWIRE - Ford Motor Company (NYSE: F) has been awarded a $14.5 million research and development cost-shared contract by the U.S. Department of Energy (DOE) to advance electric vehicle powertrain technology toward commercialization.

Ford will provide research and development for the DOE's Modular Electric Vehicle Program (MEVP), which will focus on developing electric vehicle powertrain components, or "modules," suitable for use in a range of vehicle sizes -- from small two-passenger vehicles through full-sized vans. This program will allow manufacturers to build greater amounts of the electric vehicle components at lower costs, a major step in commercial product development.

The project is expected to result in more cost-effective production of electric vehicles on automotive assembly lines, said Dr. John P. McTague, Ford vice president - Technical Affairs. "This approach will enable electric vehicles to enter the marketplace sooner than through traditional design programs," he said.

The MEVP project calls for delivery of three electric vehicle powertrains, of varying sizes, using the modular components for the propulsion system. The powertrains will be integrated into three separate vehicles: a two-seater small passenger car, a subcompact wagon and the Aerostar minivan.

The MEVP development vehicles will be designed to permit acceleration from 0 to 50 mph in less than 18 seconds and a top speed of 70 mph.

GE Drive Systems of Salem, Va., will be a major subcontractor in the program. GE will have responsibility for the design of the electric subsystem.

As the prime contractor, Ford Motor Company will be responsible for management of the program, including systems design and the design and development of major subsystems such as the transaxle, system controller and battery subsystem. GE will have responsibility for design of the motor and of the inverter and its controls.

Ford's research and development program will expand the work performed under a previous two-part DOE cost-shared program that began in 1982. In the first phase of the program, the ETX-I powertrain was developed and incorporated into a small passenger car, the Mercury LN-7. This vehicle was delivered to the DOE in Washington, D.C., in 1986.

Current research involves the ETX-II powertrain, which was installed in a production Aerostar and showcased in Toronto and Washington, D.C., in 1989.

The ETX-II propulsion system features a compact transaxle which, for the first time, incorporates an alternating current motor, a two-speed automatic transmission and drive axle into a single-axle package. The ETX-II will be delivered to the DOE later this year.

BEAVER, PA. (SEPT. 27) PR NEWSWIRE - Michael Baker Corp. (AMEX: BKR) and Gehrmann Consult GmbH, a German architectural/engineering firm based in Wiesbaden, have signed a letter of intent to establish a new company to provide engineering services in Germany and countries in eastern Europe, it was announced today. The new company, which has not yet been named, will provide environmental management and facilities planning and design services for public and private sector European clients. It will be based in Wiesbaden, Germany.

"With the reunification of Germany, and recent economic and political developments in eastern Europe, we see many opportunities for providing specialized environmental engineering and science services," said William G. Thomas, Baker executive vice president. "There also is a growing need for facilities planning and design services."

Thomas said that in addition to Germany, countries targeted by the new company include Hungary, Czechoslovakia and the Soviet Union. Additional future opportunities exist in Poland, Yugoslavia, Rumania and Bulgaria, he said.

The new company will operate separately from Michael Baker GmbH, Baker's new subsidiary, whose formation was announced on Aug. 28, 1990. Based in Frankfurt am Main, Germany, Michael Baker GmbH is pursuing environmental management and facilities planning and design projects throughout western Europe and for U.S. clients in Germany.

Baker currently is the contractor for a major program of environmental management and asbestos abatement for the U.S. Department of Defense Dependents School system in 19 foreign countries, including Germany. In addition, Baker recently completed an environmental audit for a private firm seeking acquisition of an industrial facility in Germany, provided facility evaluations and design recommendations at sites located throughout western Europe for a U.S. government agency, and soon will begin a new asbestos management contract for facilities in Germany and Italy.

Michael Baker Corp., through its various subsidiaries, provides professional services worldwide in the fields of facilities planning and design, environmental management, facility operation and maintenance, transportation, civil and water resources engineering, and geo-digital services.

#90270p8910 09/27/1990 ~PR Newswire

ST. LOUIS (SEPT. 27) PR NEWSWIRE - Landmark Bancshares Corp. (NYSE: LBC) today announced that third-quarter earnings will be approximately $1 million, or $.12 to $.13 per common share (fully diluted), as the company increases its loan reserve by approximately $2.5 million to 1.40 percent of total loans, all in the third quarter. The company had previously announced plans to increase the loan reserve to 1.30 percent-1.35 percent of total loans over the third and succeeding quarters. For the third quarter, operating performance will be in line with earlier expectations and net charge-offs are expected to return to more normal levels.

"The increase in the loan reserve to approximately 1.40 percent of total loans all in the third quarter, results in year-to-date earnings that are lower than market expectations," stated S. Lee Kling, chairman and chief executive officer. "However, it is the company's fundamental earnings capacity that enables us to build our reserve by nearly $3.6 million in the first nine months of this year, while maintaining our solid capital base. Shareholders' equity is expected to be approximately $128 million, or $17.30 per share, at the end of the third quarter.

"Building the reserve in the third quarter is prudent in light of a higher-than-normal level of non-performing assets, the current economic environment and the regulators' expectations for higher reserves," Kling continued. "It does not relate to any specific loan situation."

The third-quarter provision of approximately $3.4 million should bring the total loan reserve to $20.6 million, compared with $18.1 million at the end of the second quarter and $16.9 million at the beginning of 1990. Net charge-offs are expected to be approximately .26 percent of average loans, compared with .70 percent in the second quarter. The non-performing assets ratio is expected to be in a range of 3.5-4.0 percent in the third quarter, compared with 3.1 percent the in second quarter.

Net income for the nine months ended Sept. 30, 1990, is expected to be approximately $3.8 million, or approximately $.51 per share, and will reflect a loan provision for the first nine months of 1990 of approximately $9.2 million. This compares with net income of $10.7 million, or $1.51 per share, for the same period last year which included a loan provision of $4.7 million. Third-quarter 1990 results will also reflect a charge to earnings of approximately $300,000 attributable to the alternative minimum tax. This amount can be recouped in future quarters as earnings return to normal levels.

Loan Review Process Kling pointed to actions the company is taking to further strengthen its loan review procedures. "While it appears that third-quarter charge-offs have returned to levels consistent with our historical performance our non-performing assets have risen. Addressing the issue of loan quality is our top priority. Along these lines, James A. Saitz has been assigned to oversee the entire loan review process, including monitoring the status and quality of existing credits, overseeing the work-out of problem loans and managing the reduction of our non- performing assets. Mr. Saitz will have the authority to directly coordinate specific individuals within the company as well as tape outside resources, as needed."

Saitz, who joined Landmark in August 1986, is executive vice president of Landmark Bancshares Corp. and chairman and chief executive officer of Landmark's Illinois region. His background includes working as assistant bank examiner and financial analyst in the bank supervision and regulations department of the Federal Reserve Bank of St. Louis, followed by executive positions with a St. Louis bank group and with a real estate brokerage firm concentrating in commercial, industrial and investment properties.

Expense Reduction Program Kling discussed the stepped-up implementation of the company's expense control strategies to maximize earnings. "In light of current earnings pressure, we have implemented additional cost-reduction programs including salary reductions for all senior officers and other expense cuts throughout the company, which should result in additional annualized savings of approximately $1.1 million. Because we have a very high-quality group of people working for Landmark, these cost- reduction measures should not compromise customer service.

"These measures complement Landmark's successful, long-term program to expand our assets while reducing operating expense," he noted. "Through consolidation merger and other cost-control efforts, we have reduced our ratio of overhead expense to assets to 3.06 percent in the second quarter of 1990 from 3.45 percent at year-end 1987."

Outlook For Full Year Kling commented, "Because of the uncertainty that pervades the industry and the economy, we are hesitant to discuss the fourth quarter outlook. However, we feel that the strong increase in our loan reserve, overhead reduction strategies and actions in addressing problem loans will benefit the periods ahead."

In conclusion, Kling said, "We are committed to the long-term future of Landmark. With more than one-quarter of the company's outstanding shares owned by Landmark directors, officers and employees, we have a significant stake in our future success. Our market franchise is among the strongest in the metropolitan areas we serve and we believe that we will continue to see the advantages of our strategic positioning as we move forward."

Landmark Bancshares Corp. is a St. Louis-based multibank holding company with 48 locations serving the Missouri and Illinois portion of the bi-state St. Louis metropolitan area, Kansas City and southwest Missouri.

EDINA, MN. (SEPT. 27) PR NEWSWIRE - Image Retailing Group, Inc. (NASDAQ: IMAG) today reported sales and earnings results for its fourth quarter and year ended June 30, 1990.

Sales for the quarter were $5,040,000; cost of goods sold was $3,000,000; gross profit was $2,040,000; and net loss was $(59,000). Sales for the year were $22,275,000; cost of goods sold was $13,346,000; gross profit was $8,929,000; and net income was $84,000.

Sales for the quarter were up 2.7 percent over the same period last year. Net loss was $(59,000) compared to a net loss of $(75,000) for the same period last year. The year-end results show sales up 14 percent and net income down 31 percent versus the same period last year. "We achieved record sales for the year, and though we reduced our losses in the fourth quarter compared to the same period last year, we were hurt by slower sales in the fourth quarter related to the slower local economic environment. We have implemented cost-cutting actions which should produce improvements in succeeding quarters " said Gary Thorne, president and chief executive officer.

Image Retailing Group is holding company formed in 1985 for the purpose of operating specialty consumer electronics stores. The company's only operating subsidiary is Audio King, Inc., which was acquired in September 1986. Audio King operates 11 stores in Minnesota and one in South Dakota.

PORTLAND, Ore. (SEPT. 27) PR NEWSWIRE - Bioject Inc. (NASDAQ: BJCTF)

announced today it has signed its first California distribution agreement with Santa Ana-based Deckert Medical Inc. The agreement signifies Bioject's entry into the second phase of its stepped national introduction for its Biojector, a needleless jet injection system.

The announcement was made by Tom Renne, national sales manager for Bioject, who indicated that the balance of distributor agreements for the west coast will be completed by year end.

Earlier this month Bioject announced the signing of a Canadian distributor, Vereburn Supply Ltd., that will market the Biojector in western Canada. The U.S. Pacific Northwest, including Alaska, Washington, Oregon, Idaho and Montana, is represented by Biddle & Crowther, that region's largest physician supplier.

Deckert Medical Inc., a privately-held company in business since 1926, has 21 sales representatives and four customer service agents covering a sales area south from Los Angeles to San Diego and eastward to the Palm Springs/Coachella Valley region.

"Deckert is a highly-respected company in the Southern California market with a proven commitment to customer service and an extremely high fill rate with its customers," commented Renne. "It's a quality firm with which we are proud to be associated."

Company officials at Deckert view the addition of the Biojector to its product line as a natural fit to its niche marketing strategy of supplying quality technology equipment to the healthcare industry.

"Bioject is in the forefront for the future of medication administration," commented Ron Cichocki, vice president of marketing and sales for Deckert. "We're excited to bring this technology to the market."

Tom Deckert, president, is a past chairman of both the Health Industry Distributors Association's Physician Market Group and Abco Dealers Inc. All sales representatives of Deckert are required to participate in HIDA's "Advanced Sales Training Program," a rigorous certification program for healthcare distribution representatives.

Bioject Inc. is a Portland, Ore.-based company specializing in drug delivery systems. The company develops, manufactures and markets needleless jet injection systems for widespread use in the healthcare industry.

OAKBROOK TERRACE, ILL. (SEPT. 27) PR NEWSWIRE - Telesphere Communications Inc. (AMEX: TSP), a full-service long distance telephone company and a leading provider of interactive 900 network services, today introduced a new enhanced information service for users of its TravelNet(R) long distance calling card.

The service, called TravelNet Connection(SM), offers TravelNet users immediate access to up-to-the-minute news, weather reports, sports scores and stock quotes. Charges for the service, which accrue on a per-minute basis, will be billed with other long distance charges on a single monthly Telesphere invoice.

To access TravelNet Connection, using a touch tone phone, callers dial the standard Telesphere 800 number, enter their personal travel code and then dial INFO (4636). Callers are then guided through the TravelNet Connection menu of services and may request as much or as little information as they desire.

According to Nick Jent, senior vice president of sales and marketing for Telesphere's Communication Services business unit, TravelNet Connection is only the latest in a series of enhanced calling features Telesphere has added to its portfolio of long distance services in recent months. "Our objective is to design and market long distance services that make our customers more productive," Jent said. "Business travelers need easy access to up-to-the-minute information so they can make informed decisions quickly. TravelNet Connection meets this need and as a result will make our TravelNet long distance calling card even more successful than it already is."

Earlier this year, Telesphere announced that it had signed an agreement with Voice Control Systems of Dallas to integrate voice recognition and speaker verification technology into its TravelNet card.

Telesphere Communications Inc. operates a nationwide, state-of-the- art, digital fiber optic network over which it provides long distance, operator, interactive 900 and other enhanced telecommunications services.

CHARLOTTE, NC (SEPT. 27) PR NEWSWIRE - Interstate/Johnson Lane, Inc.'s (NYSE: IS) board of directors today elected James. H. Morgan as president and chief operating officer. Morgan succeeds Elmon L. Vernier, Jr., who will continue as a consultant to the Company to pursue formation of an investment management joint venture in which Interstate/Johnson Lane may be a participant.

Morgan's appointment was hailed by Parks Dalton, who recently rejoined the Company as chairman and chief executive.

"Jim Morgan is not only admired and respected for his investment advice by individuals and corporations throughout the Southeast, but through the years he has forged strong and lasting relationships with many people at Interstate/Johnson Lane," Dalton said. "He is a leader and a motivator, and will challenge all of us to build on the base already established at Interstate/Johnson Lane to bring the company to its place as the premier securities firm in the Southeast."

Morgan originally joined Interstate/Johnson Lane in 1986 where he became senior vice president and director of investment policy. He resigned in July 1989 to become president of Morgan Investments Inc. in Greenville, S.C., a family firm.

While at Interstate/Johnson Lane, Morgan earned national recognition when he won a stock-picking contest held by the Wall Street Journal for five months in a row, outperforming other investment professionals and the Dow Jones Industrial Average.

With more than $80 million in capital, Interstate/Johnson Lane is one of the largest broker-dealer and investment banking firms headquartered in the Southeast. The firm has 1,150 employees, including more than 450 account executives serving individual and institutional investors through more than 70 sales offices in six southeastern states and New York City.

CHICAGO (SEPT. 27) PR NEWSWIRE - Oprah Winfrey's HARPO Productions, Inc., has named Kate Forte vice president of development for the company. Forte will head and open HARPO's west coast office in Los Angeles, it was announced today by HARPO president, Jeffrey Jacobs.

"We are very happy to have someone of Kate Forte's experience and judgment join us in this expansion and we look forward to continuing good relations in the creative community with the addition of our west coast office," said Jacobs.

Forte will be responsible for material acquisitions and development of theatrical and TV movies including HARPO's four-film commitment with ABC-TV.

Forte was formerly director of development at Marian Rees Associates, where she worked on more than a dozen television movies, including eight Hallmark Hall of Fame presentations.

HARPO Productions is based in Chicago at Winfrey's HARPO Studios. It also has offices in New York City.

#90270p8935 09/27/1990 ~PR Newswire
BLUE BELL, PA (SEPT. 27) PR NEWSWIRE - Unisys Corp. (NYSE: UIS) said today that the board of directors voted to suspend the quarterly dividend on its common shares.

The quarterly dividend had been 25 cents per share. Unisys emphasized that the common dividend action does not affect preferred stock dividends.

"The dividend action," said James A. Unruh, Unisys president and chief executive officer, "reflects the judgment of the board and management that the best way to maximize value to shareholders is to accelerate the improvement of our overall financial structure, particularly by reducing our debt as a percentage of total capital. Funds that would normally be used for the common dividend will be reinvested in the company to reduce debt. Though we have an

aggressive debt reduction program in place, faster progress in improving our capital structure would benefit shareholders.

"We have paid regular dividends for nearly 100 years, so this action was not taken lightly. We involved the Board and outside advisors during the six months since I was named CEO in a detailed review of the company's operations and plans. We also looked at such external factors as the significant structural change in the computer industry and the defense sector, the probability of cyclically weak economic conditions in many major markets and the impact of the Iraq crisis on the global financial picture. The conclusion was that this is simply not an appropriate point in the company's history to pay high dividends.

"The dividend decision's emphasis on restoring a conservative balance sheet is equally reflected in the overall strategic decisions made recently by the new management team as a result of the business review. In summary, those decisions aim to further specialize and focus our participation in the information systems industry. We will increasingly focus our investments on our internal strengths in overall network and system design, software and professional services. Our particular specialty will be providing mission critical solutions based on open network standards for customers with transaction intensive environments. This approach to our business represents a logical evolution from the basic marketing and product strategies and strengths developed over recent years.

"These actions are designed to improve both operational effectiveness and the financial profile of the business. We continue to target for 1990 a debt reduction of $600-800 million and a further reduction in 1991 of at least that magnitude. Over the near term, we expect a loss in the third quarter and a profit in the fourth quarter. Our 1991 business plan will include continued restraint on spending and working capital levels.

"Overall, we are convinced that our strategic and operational direction for the 1990s and beyond is sound. The dividend action is the appropriate one at this time as we strengthen our industry position for the long term," Unruh said.

NEW YORK (SEPT. 27) PR NEWSWIRE - Savings Banks in New York state hold $70.4 billion in real estate loans -- the second highest level on record, according to the Savings Banks Association of New York State (SBANYS).

The amount in outstanding loans at the end of 1990's second quarter was up $3.9 billion -- or nearly 5.9 percent from the first quarter of the year, and up $200 million from the second quarter of 1989. The record amount of outstanding real estate loans held by New York savings banks was $71 billion at the end of the first quarter of 1989.

"Savings banks in New York state are maintaining a good level of activity when it comes to home financing, despite the slump in the residential real estate market and declining home prices in many areas," said SBANYS President and CEO Robert O. Lehrman. "Their expertise in home mortgages, co-op and condo loans and their long history of helping New Yorkers realize the American dream of home ownership is recognized by an increasing number of homebuyers statewide."

SBANYS represents an industry of 82 savings banks with approximately $140 billion in assets, employing 35,000 people in 1,000 branches, offices and subsidiaries statewide. It is the largest organization representing savings banks in New York state.

#90270p8948 09/27/1990 ~PR Newswire

WASHINGTON (SEPT. 27) PR NEWSWIRE - U.S. Small Business Administration (SBA) Administrator Susan Engeleiter today proposed a package of regulatory changes for Small Business Investment Companies (SBICs) that will lessen the governments exposure to losses in the program.

The package, published for comment today in the Federal Register, includes 16 proposed regulatory changes.

SBICs are privately organized and managed venture capital investment firms that are licensed and regulated by the SBA. Using privately raised capital and funds obtained at favorable rates with SBA guarantees, SBICs provide long-term loans and equity financing to qualified small businesses. The first set of proposed regulations includes 15 steps. These major changes would:

-- Give the SBA nearly equal standing with other creditors when the debts of failed SBICs are settled. The proposed regulation would limit the subordination of SBIC debt to the agency. Under current rules, an SBIC's entire debt to the SBA is subordinate to the claims of other creditors. This provision will increase the amounts recovered by the SBA in liquidation proceedings of failed SBICs.

-- Set minimum requirements for the financial data SBICs must compile on the small businesses in which they invest. SBICs will be required to submit the data to the SBA before providing any financing to the small businesses and annually thereafter.

-- Require that any SBIC funds that are not currently being used to finance small businesses be safety invested in U.S. government securities or in federally insured bank accounts or certificates of deposit.

-- Limit the size of small companies in which SBICs can invest to those with gross assets under $20 million. This provision is designed to prevent use of SBIC funds to finance leveraged buyouts of large businesses.

An additional change proposed for comment would clarify existing rules that an SBIC's accountants must ensure that formal valuation procedures and underlying documentation are in place to fully support the values an SBIC establishes for its investment assets.

The regulatory changes are the latest in a series proposed over the past six weeks as part of a broad effort to strengthen the rules governing SBIC activities, SBIC financial relationships with the SBA, and financial reporting by SBICs.

Engeleiter said that work on other possible regulatory changes is continuing, and the agency is developing a new audit guide that deals specifically with new regulations.

#90270p8949 09/27/1990 ~PR Newswire

LA JOLLA, CA. (SEPT. 27) PR NEWSWIRE - Eric P. Neibart, M.D., a New York physician, medical educator and authority on infectious diseases, has been elected to the Board of Directors of LIDAK Pharmaceuticals (NASDAQ: LDAKU), based in La Jolla.

In making the announcement, David H. Katz, M.D., chairman and chief executive of LIDAK, said, "We are delighted to have Dr. Neibart join our Board. He brings with him expertise in clinical infectious diseases and a hands-on understanding of the complexities of managing the diseases of AIDS and its associated illnesses."

Neibart, 36, is a Diplomate of the American Board of Internal Medicine, Board Certified in Infectious Diseases and a member of the Executive Committee of the Intern Selection Committee at Mount Sinai Hospital, New York. He is also the author or co-author of a number of medical articles on such topics as antimicrobial agents and pneumonia, gastroenteritis and other secondary diseases in AIDS patients.

Neibart is a graduate of Franklin & Marshall College and received the Jesse McCall Award as outstanding student upon graduation from New Jersey Medical School. He fulfilled his internship and residency requirements at Mount Sinai Hospital where he served as chief medical resident.

LIDAK Pharmaceuticals is a biotechnology company organized to develop and commercialize innovative pharmaceutical products. The first such product is a patented, topical therapeutic compound which has produced positive results in volunteer patients suffering from oral and genital herpes infections and certain inflammatory skin diseases.

LIDAK has engaged in a strategic alliance with Medical Biology Institute which includes a 20-year license agreement giving LIDAK exclusive rights to all MBI technology.

The first of such technologies is one in which the adult human immune system

has been engineered to function in mice with a genetic defect known as Severe Combined ImmunoDeficiency (SCID), which is initially being commercialized for drug development against AIDS.

ST. PAUL, Minn. (SEPT. 27) PR NEWSWIRE - ZEOS International, Ltd. (NASDAQ: ZEOS) today announced the appointment of its new chief financial officer. At the same time, the company announced the creation and staffing of two additional management positions.

The company announced that John Bakewell has been appointed as chief financial officer effective Oct. 8, 1990. Prior to joining ZEOS, Bakewell served as manager in the Audit and Entrepreneurial Services Departments of the Minneapolis office of the accounting firm Ernst & Young. For the past three years, Bakewell served as Ernst & Young's Engagement Manager for the ZEOS International account.

According to Greg Herrick, president of ZEOS, "We consider John Bakewell an excellent fit for the position of chief financial officer. John has worked hand-in-hand with our management and accounting staff for several years. As an employee of Ernst & Young, John has already contributed a great deal to the success of our company. We are pleased to have him join us now as our new chief financial officer."

In addition, the company announced the appointment of William Edwards to the position of director of Manufacturing. Prior to joining ZEOS, Edwards was director of production for Lee Data Corporation and prior to that, manager of Testing and Assembly for Control Data. "Bill's 25 years manufacturing experience at Lee Data and Control Data will contribute significantly to our company's production abilities," Herrick noted. "He is a terrific addition to our management staff."

The company also announced the appointment of Terry Wander as director of Technical Services. In this capacity, Wander is responsible for ZEOS' telephone technical support as well as field and in-house repair services. Wander comes to ZEOS with significant management experience including five years with Great Northern Epson where he was director of Customer Support and received two national awards for the top Epson Customer Support center. Wander also served on Epson America's Customer Support Task Force. "Terry's experience in the management of technical and customer support services is perfect for ZEOS," Herrick noted.

ZEOS International, Ltd., manufactures and markets, direct to end users, ISA

and EISA (Industry and Extended Industry Standard Architecture) personal computer systems and workstations based on the Intel 80286, 80386 and 80486 microprocessor world wide under the ZEOS name. The company also provides contract manufacturing services under the name NPC Electronics and distributes passive electronic components through its Parts1 distribution division.

#90270p8954 09/27/1990 ~PR Newswire

CHICAGO (SEPT. 27) PR NEWSWIRE - Selfix, Inc. (NASDAQ: SLFX), today announced that in November 1990 it will move its Independent Products operations to Selfix main manufacturing operations in Chicago. Selfix acquired the assets of Independent Products Co. on June 22, 1990. IPC is a manufacturer of plastic Home Organization products that it markets in channels of distribution similar to Selfix. The Independent Products facility in West Point, Pa., will be closed and all administrative and manufacturing operations will be consolidated at the company's facility in Chicago.

Said Chairman Meyer J. Ragir, "The combination of Independent Products and Selfix offers synergies in marketing, operations and distribution. Because of our expertise in plastic manufacturing we can implement production efficiencies here in Chicago to better service IPC's customers."

Selfix intends to take a one-time charge associated with the relocation, the duplicate operation of both facilities and certain other nonrecurring costs. The company anticipates that despite this charge, which is not expected to exceed $1 million, it will earn a nominal profit in the June-September period.

Said Ragir, "Although the cost of relocation is significant, combining the manufacturing operations will enhance the long term profitability of our company. We prefer to be conservative in our financial management and not capitalize ll the costs, so a substantial portion will be expensed. Therefore we have decided to take a one-time charge in the period ending Sept. 30, 1990."

Selfix also announced it would change its reporting period to coincide with the calendar year, to eliminate lost production time due to physical inventories conducted in busy shipping periods. June 1 through Dec. 31, 1990 will be a shortened, seven-month annual period. June will be a stand alone month, and July-September and October- December will be reported as two quarterly periods.

Selfix, Inc., based in Chicago, designs, manufactures and markets a broad range of consumer home products, including over 300 housewares and Home Organization products.

Selfix is listed on the NASDAQ National Market System under the ticker symbol SLFX.

#90270p8956 09/27/1990 ~PR Newswire

NEW YORK (SEPT. 27) PR NEWSWIRE - Moody's Investors Service today assigned ratings to a $1.3 billion offering of Commonwealth of Massachusetts Fiscal Recovery Loan, Act of 1990 bonds to be sold today. The offering consists of four series of bonds, three of which are secured by letters of credit. The Series A bonds, totalling $1.025 billion and not secured by a letter of credit are rated Baa1. Series B, comprising $125 million of bonds with a letter of credit from National Westminster Bank PLC, and Series C, consisting of $100 million of bonds with a letter of credit from Union Bank of Switzerland, New York Branch, are each rated Aaa/VMIG 1; the $75 million of Series D bonds, with a letter of credit from Mitsui Taiyo Kobe Bank, Ltd., is rated Aa3/VMIG 1.

The provision of a dedicated revenue source from an issuer still facing serious credit difficulties affords a degree of enhanced security for these new bonds.

The Series A bonds are satisfactorily secured by dedicated income tax revenues to be deposited monthly to an irrevocable trust fund established with a trustee. Dedication of the share of state personal income taxes attributable to 15 percent of rates now in effect helps insulate the revenue stream from the Commonwealth's financial problems and from proposed tax rate reductions to be decided by voter this November.

The presence of letters of credit from National Westminster Bank PLC, acting through its New York branch, and from Union Bank of Switzerland, New York branch, result in best quality security for the Series B and Series C bonds, respectively. The presence of a letter of credit from Mitsui Taiyo Kobe Bank, Ltd., results in high quality security for the Series D bonds. All three letters of credit provide for regularly scheduled principal and interest, as well as demand payments. The ratings reflect Moody's evaluation of the creditworthiness of the banks issuing the letters of credit, and are based on a structure which ensures timely payments to bondholders and adequate legal protections.

Proceeds of these bonds will clear the Commonwealth's $1.3 billion accumulated deficit but it is too soon to assess the effect of efforts to restore financial control. Continuing threats to fiscal stability are posed by economic weakening which has already produced lowerings of this year's revenue estimates, a pending court challenge to part of the fiscal 1991 tax package, and the tax cut petition to be voted in November.

Amount of next tax-supported debt outstanding, including new: $10.73 billion.

#90270p8959 09/27/1990 ~PR Newswire

CAMDEN, NJ (SEPT. 27) PR NEWSWIRE - Campbell Soup Co. (NYSE: CPB) announced today that two of the most senior members of its board of directors will retire from active service and become Directors Emeriti.

Two prominent business leaders were named to succeed them. William S. Cashel Jr., 70, will retire and become Director Emeritus as of Nov. 15, 1990, after more than a decade of service which included four years as chairman of the board. Cashel is a retired vice chairman and chief financial officer of American Telephone & Telegraph Co.

Dorrance H. Hamilton, 62, will retire and become Director Emeritus as of Oct. 1, 1990, after nearly a decade of service. Mrs. Hamilton, who is a granddaughter of the inventor of condensed soup, and a major shareholder, is a trustee of various organizations and president of The Little House Shop Inc.

At its regular monthly meeting today Campbell's board unanimously nominated Edmund M. Carpenter, 48, chairman and chief executive officer of General Signal Corp. (NYSE: GSX), Stamford, Conn., to succeed Cashel. Carpenter will stand for election at the annual meeting of shareowners on Nov. 15.

Charles H. Mott, 58, was unanimously elected as a director, effective Oct. 1, succeeding Mrs. Hamilton. Mott also was unanimously nominated to the slate that will be voted on in November. Mott is president and chief executive officer of John W. Bristol & Co. Inc., a multibillion-dollar, New York-based, investment management firm specializing in university and foundation endowments.

He is expected to be named shortly as a trustee of the Campbell Major Shareholders' Voting Trust, which was established in June 1990.

In a prepared statement, Robert J. Vlasic, chairman of Campbell's board of directors, said:

"Bill Cashel has given generously of his time and considerable talent over the many years he has served on our board. Dorrance Hamilton has served with patience and grace through a difficult period that has produced major changes at the company. We will miss them both as directors.

"We are delighted to announce the election of Mr. Mott and the nomination of Mr. Carpenter. Each of them brings a wealth of experience and expertise to

the board."

#90270p8960 09/27/1990 ~PR Newswire

WALNUT CREEK, CALIF. (SEPT. 27) PR NEWSWIRE - The Nuclear Regulatory Commission staff is proposing to fine the Arizona Nuclear Power Project (ANPP) $75,000 for alleged violations of NRC requirements involving medical records of licensed reactor operators at the Palo Verde Nuclear Generating Station, located 10 miles west of Phoenix, Ariz. NRC Regional Administrator John B. Martin notified the ANPP of the alleged violations by letter on Sept. 26.

During inspections conducted July 16 through Aug. 7, 1990, inspectors found:

1) that ANPP failed to notify the NRC regarding four licensed operators who had developed medical conditions which would disqualify them from standing watch; and

2) that ANPP inaccurately certified that medical examinations for 15 candidates for operator licenses had been conducted in accordance with NRC requirements.

These alleged violations have been categorized as a Severity Level III problem with Level I being the most serious and Level V the least serious. The base civil penalty for Severity Level III is $50,000. The penalty was escalated 50 percent because NRC inspectors first identified weaknesses in the medical records management system and ANPP follow-up was initially inadequate.

ANPP now has 30 days to submit a written statement to the NRC admitting or denying the alleged violation, explaining the reasons for it if admitted, stating the corrective actions which have been or will be taken and the date when full compliance was or will be achieved.

The company also has 30 days to pay the proposed fine or to protest it, in whole or in part. If the fine is protested and later imposed, ANPP may request a public hearing.

SEATTLE (SEPT. 27) PR NEWSWIRE - The Boeing Co. (NYSE: BA) confirmed today that it is purchasing Broadacres Inc., which is the corporation that owns the 215-acre Longacres Race Course site in Renton.

Boeing intends to develop the property into a campus-style environment that will be aesthetically and environmentally sound.

No determination has been made on what activities will be located at the site according to the company, except that the site will not be used for manufacturing or production operations.

Boeing said the site's close proximity to other Boeing Puget Sound operations as well as Sea-Tac Airport and major highways makes it a desirable location.

#90270p8962 09/27/1990 ~PR Newswire

DETROIT (SEPT. 27) PR NEWSWIRE - General Motors (NYSE: GM) has established two special policy adjustment programs to cover repairs of potential paint flaking on certain 1987- to 1990-model-year vehicles.

GM dealers will perform the necessary inspections and paint repairs at no charge to owners. Subject vehicle owners who may have already paid for repairs of this condition are eligible for reimbursement upon submission of appropriate payment documentation.

Vehicles covered by the first special policy include approximately 230,000 model-year 1987-90 Chevrolet Beretta and Corsica cars painted Sapphire Blue, Medium Sapphire Blue, Silver or Gunmetal Gray.

The second special policy covers some 93,500 model-year 1988-89 Chevrolet S-10 Blazers, S-10 pickups, GMC S-15 Jimmys and S-15 pickups painted Bright Blue, Dark Blue or Gray metallic.

Both policies are good for three years from the date the vehicle was placed in service, regardless of mileage. For owners of 1987-88 vehicles already past the three-year service date, the special policies will be extended an additional 12 months to Sept. 30, 1991.

The paint flaking results in part from ultraviolet light penetrating the topcoat, degrading the base primer and causing a loss of adhesion between the two surfaces. The process originates from using and then "overbaking" a primer with high ultraviolet light sensitivity.

GM dealers will sand and refinish all affected vehicle surfaces exhibiting the flaking condition.

BOCA RATON, FL (SEPT. 27) PR NEWSWIRE - First Medical International, Inc. (NASDAQ: HUGE) has been awarded U.S. Patent No. 4,952,507 for the Production and Diagnostic Use of Antibodies Against Pancreatic Alpha-Amylase. The announcement was made by Roberto Riva, chief executive officer of First Medical International.

"The primary purpose for this antibody is to detect pancreatitis. Current tests measure pancreatic amylase indirectly. This antibody enables doctors to instantly diagnose whether or not acute abdominal pain experienced by an individual is the result of pancreatitis," said Roberto Riva.

"The potential clinical and commercial importance of these antibodies, particularly in the human and animal immuno-diagnostics areas is substantial," said Roberto Riva. "We will start discussions with potential licensees shortly " he said.

First Medical International (formerly called Humagen) has recently acquired MedTex, a proprietary medical waste disposal company based in Lansing, Mich., as well as the Boca Raton-based Cardio Scan, an established company specializing Holter Monitor EKG and EEG testing.

The company also has the exclusive right to franchise, own and operate Medical Depot Superstores in the U.S.S.R., Mexico, and Panama and a non-exclusive right to franchise, own and operate Medical Depot Superstores anywhere else outside the U.S.

SHREVEPORT, LA. (SEPT. 27) PR NEWSWIRE - TGX Corporation (NASDAQ: XTGXQ) announced that on Sept. 24, 1990, it filed a Plan of Reorganization in its Chapter 11 proceedings. The Plan as filed provides that common stock equity interests will be retained as they existed prior to the Chapter 11 filing. The Plan also provides for payment in full of the company's secured debt under restructured credit terms and provides for the delivery of a substitute debt instrument to holders of its Senior Subordinated Fixed Rate Notes ("Bonds") and to holders of unsecured claims pursuant to which all of such Bond indebtedness and other unsecured debt will be paid in full over time. Under the Bankruptcy Code, the reorganization plan must be approved by vote of the creditors and by the Bankruptcy Court before it is effective.

J.C. Templeton, the company's chairman said, "The Board of Directors and management of the company have approved the terms of this Plan and believe that it is in the best interests of all of the company's creditors and shareholders. We believe it will permit the maximum and earliest recovery by all creditors, and encourage its approval by all creditor groups."

NEW YORK (SEPT. 27) PR NEWSWIRE - ONE of the consumer world's most coveted professional honors was awarded today to Alamo Rent A Car, Inc., for developing the year's "outstanding corporate consumer service training program." The 14th annual nationwide competition, won previously by such blue-chip companies as Quaker Oats, Nissan and Reader's Digest, is sponsored by the Society of Consumer Affairs Professionals in Business. Alamo is the largest independently owned and operated car rental company in the U.S.

Alamo President Chuck Platt, on hand from company headquarters in Fort Lauderdale, accepted the Society's first place award "with a great deal of pride on behalf of every one of our 5,000 employees in 35 states and overseas, nearly all of whom deal with the public directly on a daily basis."

The membership of the Society of Consumer Affairs Professionals, the major national organization of corporate consumer affairs vice presidents, directors and managers, represents most of best-known U.S. companies that market consumer products or services.

Society V.P. Russell E. Schmuhl, manager of international consumer services for the Polaroid Corporation, made the presentation at a luncheon meeting of the organization's 1990 convention which winds up here tomorrow. He praised the auto rental company's winning program for its "success in enhancing Alamo employees' ability to provide quality consumer service."

The award singled out Alamo's current "Best Friends" customer service training program which rigorously re-trained every one of the company's employees from top management on down. The unique effort, supported by a multi-million-dollar budget, was designed to motivate employees to demonstrate the highest levels of courtesy, concern, and friendliness in their dealings with the five million consumers Alamo serves every year. Its implementation required a comprehensive on-going program of training, counseling, instruction and reward mechanisms as well as the introduction of new operating procedures.

The Alamo president added that the comprehensive, mandatory orientation and training program put in place to drive the "Best Friends" program capitalized on the methods and insights of modern psychology in the most "user-friendly" manner. Within months the program had produced significant results, dramatically raising our levels of customer satisfaction.

Multi-national Alamo also operates 27 overseas locations in the United Kingdom through its London-based affiliated company, Guy Salmon Services, Ltd., which specializes in up-scale car rentals.

HUNTINGTON BEACH, CA. (SEPT. 27) PR NEWSWIRE - Bay Cities National Bank's board of directors declared an initial dividend of 10 cents per share to stockholders of record as of Oct. 10, 1990, payable Oct. 25, 1990, according to George W. Schneider, chairman of the board of directors. The dividend was declared at the monthly meeting of the board on Sept. 25, 1990. It is anticipated that dividends will be increased in the future which will provide stockholders with a comfortable return on their investment.

Jim Davis, president, stated that the continued steady growth in profits, core deposits, solid loans and capital accounts have been recognized by Findley Reports which has rated the bank a Premier Performing Bank for the third consecutive year.

Approval has been received from the Comptroller of the Currency for the new San Pedro Regional Office of Bay Cities National Bank, and is expected to open in January 1991.

Bay Cities National Bank is an independent bank organized in 1982 by South Bay business and professional persons to serve the community. Total assets are in excess of $48,000,000.00.

#90270p8988 09/27/1990 ~PR Newswire
BOSTON (SEPT. 27) PR NEWSWIRE - The board of directors of Bank of Boston Corporation (NYSE: BKB) today voted to reduce the quarterly dividend on the corporation's common stock to 10 cents per share from its previous level of 31 cents per share. This newly declared dividend will be paid on Oct. 26, 1990, to stockholders of record Oct. 9.

Bank of Boston Chairman and CEO Ira Stepanian said, "This action, taken at the company's initiative, is a painful but necessary step to respond to the deepening uncertainty of today's economic environment. Reduction of the

dividend, in conjunction with other strong management actions, will enable us to conserve our strong capital base so that we may continue to confront head-on the significant challenges facing our industry and also take advantage of future market opportunities as they arise."

This lower dividend pay-out, when compared with previous quarters, conserves approximately $43 million in equity annually.

Expects Third Quarter Loss

Stepanian indicated that the corporation expects its results for the third quarter to show an after-tax loss of $200-$250 million. This would result in a loss of $150-$200 million for the first nine months, he said.

The major factors affecting expected third quarter results are: -- An estimated loan loss provision of $150-$200 million; -- Expected net loan charge-offs of approximately $175 million, primarily real-estate related;

-- An anticipated property-by-property valuation write-down in the book value of the company's Other Real Estate Owned (OREO) portfolio in the range of $35 million;

-- A special restructuring charge of $50 million related to an expense reduction program discussed below;

-- Special tax charges of approximately $40 million related to the current inability to utilize foreign tax credits. Problem Loans Decline

Stepanian said that nonperforming assets are expected to show a further quarterly decline of approximately $100 million and should total about $1.850 billion at Sept. 30. This would represent an approximate 7 percent reduction in nonperforming assets from the March 31, 1990, level of $1.981 billion and would be the second consecutive quarter in which nonperforming assets declined.

"The real estate markets and general economic conditions have worsened and are impairing the results of may institutions in our industry, both large and small," Stepanian said. "Aggressive, long-term solutions to address the industry's problems are needed, and we are therefore accelerating our corrective approach so that we can continue to tackle credit quality and drive down our level of nonperforming assets. We are bringing to bear here the same mindset that helped put our LDC debt problem behind us."

Strong Management Actions

Stepanian also announced that Bank of Boston has begun a targeted expense management program aimed at reducing annualized non-interest expense by at least $100 million from its second quarter 1990 level. This goal is to be achieved by the third quarter, 1991. Associated with this is a commitment to

reduce staff by a minimum of 1,500 positions, or 8 percent of worldwide staff, by early 1991, beginning with an immediate Voluntary Separation Program.

Sources of Strength

"We are taking decisive and admittedly painful actions," Stepanian said. "Yet in doing so, we are building upon an already strong foundation. With some $3 billion of total risk-based capital, we expect our Tier 1 and Tier 2 capital ratios, based on the 1992 guidelines, to exceed 5 percent and 9 percent, respectively, both of which are above required regulatory levels. Our nearly $7 billion of liquid assets further solidifies our soundness as a financial institution.

"This financial strength, further enhanced by a lower dividend pay-out, gives us the flexibility to weather the current storm and to pursue profitable opportunities in the future," Stepanian said. "We are maintaining an active presence in the marketplace, expanding our retail operations, and increasing our marketing efforts to indentify good new business relationships.

"The U.S. banking industry today faces a critical period as it continues to adjust to the challenges created by a weakening economy, regulatory pressures and increasing global competitiveness," Stepanian added. "Without question, these are extraordinary times that have required many in our industry to take decisive actions.

"The companies that will survive these times and excel in the future are those that have strong resources -- both people and capital -- and those with the willpower and courage to act decisively. We are confident that we have both," Stepanian concluded.

The Corporation

Bank of Boston Corporation, with assets at June 30 of $37 billion, is a New England-based superregional banking company with both national and international operations. Its major banking subsidiaries are The First National Bank of Boston, with headquarters in Massachusetts; Casco Northern Bank, N.A., in Maine; Bank of Boston Connecticut; Rhode Island Hospital Trust National Bank; and Bank of Vermont. The corporation and its subsidiaries provide a broad range of financial services to individual, corporate, institutional and governmental customers, as well as to other banks. The corporation's common and preferred stocks are listed on the New York and Boston stock exchanges.

#90270p8991 09/27/1990 ~PR Newswire

PEORIA, IL (SEPT. 27) PR NEWSWIRE - Caterpillar Inc. Chairman Donald V. Fites today in Washington urged "zero tariffs" on all Caterpillar products. "Zero tariffs will make Caterpillar a more competitive company and a more formidable exporter," he said.

"During the next ten weeks, the General Agreement on Tariffs and Trade (GATT) will set the world trading rules for the next ten years. If a zero tariff proposal is part of the final GATT package, negotiators will have taken a big step toward making trade freer and fairer." Fites spoke at a meeting in Washington, D.C., along with U.S. Trade Representative Carla A. Hills, Congressman Robert H. Michel, plus other business and congressional leaders.

Caterpillar has joined with a hundred other U.S. companies and associations to form the Zero Tariff Coalition. The new coalition supports elimination of all tariffs on the products its members manufacture.

With more than half of its $11 billion in 1989 sales outside the United States and with its exports supporting nearly 18,000 U.S. jobs, Caterpillar continues to be a vocal proponent of free trade. Calling tariffs "trade rules of another era," Fites said the trade barriers make it more difficult for Caterpillar to compete in many countries.

"I've found that when you ask a potential European customer who's thinking about buying a Decatur, Illinois-built motor grader to write out a $10,000 tariff check, that customer quickly rethinks his purchase. And that hurts."

Even though Caterpillar might temporarily benefit from tariffs on some products in the United States, Fites said the company enthusiastically endorses zero tariffs for all the products it produces.

"Elimination of tariffs will mean increased opportunities to export and improve profitability. And that will translate into more jobs and a better life for the people of this country," he said.

Caterpillar, headquartered in Peoria, Ill., is the world's largest manufacturer of earthmoving, construction, and materials handling equipment, and a major manufacturer of diesel and natural gas engines and gas turbines.

AMITYVILLE, NY (SEPT. 27) PR NEWSWIRE - Napco Security Systems, Inc. (NASDAQ: NSSC), vice president of finance and administration, Kevin Buchel, announced today the company's results for both sales and earnings for the three months and year ended June 30, 1990.

Sales for the three months ended June 30, 1990, increased 18 percent to $9,727,000 from $8,235,000 for the same period last year. Net income increased by $1,253,000 to $569,000 or $0.13 per share.

Sales for the year ended June 30, 1990 remained relatively flat, at $36,143,000 as compared to $36,669,000 in fiscal 1989. Net income amounted to $2,089,000 or $0.48 per share as compared to $2,257,000 or $0.52 per share for the same period a year ago.

Founded in 1969, Napco Security Systems, Inc. is one of the nation's leading manufacturers of electronic security equipment. The company's products are used in residential, commercial, institutional and industrial installations.

WASHINGTON (SEPT. 27) PR NEWSWIRE - Marriott Corporation (NYSE: MHS) today reported earnings per share from continuing operations of 27 cents for its 1990 third quarter ended Sept. 7, compared to 46 cents a year ago.

Marriott said earnings per share from continuing operations were up 9 percent in the 1990 third quarter excluding the impact of several non-comparable items -- a previously announced charge recorded by the food and services management division in the 1990 quarter, results of airline catering operations divested in December 1989, and a lodging transaction gain in the 1989 third quarter.

The company said net income for the 1990 third quarter was $27 million (27 cents per share), compared to $63 million (56 cents per share) in the year-earlier period which included results of airline catering and discontinued restaurant operations. Sales totaled $1,657,000,000, versus $1,695,000,000 in the 1989 third quarter.

Washington-based Marriott Corporation is a diversified hospitality company involved in lodging and contract services.

NASHVILLE, TENN. (SEPT. 27) PR NEWSWIRE - Allied Clinical Labs (NASDAQ: ACLB) today announced that William J. Gedale has been elected to the company's Board of Directors. Mr. Gedale is President of General American Investors Company, Inc., a closed-end investment fund listed on the New York Stock Exchange and headquartered in New York City.

"We are delighted to have Bill Gedale join our Board," commented Haywood Cochrane, President and Chief Executive Officer of Allied. "Through his more than twenty years of experience in finance and money management, Bill has become an expert on the U.S. healthcare industry and has been a long-time follower of the clinical laboratory industry. We look forward to his active participation as a member of Allied's Board of Directors."

Mr. Gedale, 48, who joined General American in 1969 and was appointed its President in March, 1989, has been a Research Analyst specializing most recently in the medical and industrial distribution industries. He assumed additional responsibilities relating to the investment operations of the company in July, 1988, when he was appointed Executive Vice President. Prior thereto, Mr. Gedale served as Senior Vice President (1983-1988), as Vice President (1978-1992), and as Corporate Secretary (1971-1977). He was named a Director in July, 1988. He is a member of the New York Society of Security Analysts and is active in the Health Industry Analysts Group; he is a past President of the Machinery Analysts of New York. A native of New Rochelle, Mr. Gedale resides with his wife and son in White Plains, New York.

Allied Clinical Laboratories owns and operates regionally-based clinical testing laboratories. The Company provides testing services to physicians, hospitals, clinics and other health care providers through a national network of seven regional laboratories (one of which serves as a reference laboratory) and fifty other service sites. Allied Clinical Laboratories completed its initial public offering of common stock on July 31, 1990 and began trading on NASDAQ at that time.

STERLING, VA. (SEPT. 27) PR NEWSWIRE - Radiation Systems, Inc. (NASDAQ-NMS: RADS) today announced that it has been awarded two contracts totalling more than $1.9 million.

The Technical Products Division was awarded a contract from the National Oceanic and Atmospheric Administration (NOAA), Department of Commerce, for the design, fabrication and turnkey installation of two 12-foot computer controlled satellite command antenna systems for the NOAA Control and Data Acquisition (CDA) facilities located at both Gilmore Creek, Alaska, and Wallops Island, Va. The systems will be used to satisfy 5-Band command functions to the geosynchronous and low polar orbiting weather satellites.

The second contract was awarded to the SatCom Technologies Division by Pittsburgh International Teleport. SatCom will supply two 9-meter earth stations to the teleport. One system will be installed in Germany and leased to the teleport, and the second system will be sold to and installed at the teleport. The antennas will form the communications link which Pittsburgh International Teleport is under contract to lease to the government for a dedicated intercontinental communications link.

Richard E. Thomas, chairman and chief executive officer of Radiation Systems, said: "The NOAA program incorporates standard products from two of our divisions. The Electromechanical Systems Division (EMS) provides servo-driven tracking pedestals, and the Technical Products Division supplies the satellite antennas. The acquisition of EMS has broadened the markets addressed by Radiation Systems, and programs like this NOAA contract provide continued new capabilities by combining our many strengths."

The SatCom contract provides continuing expansion into government communications markets. This market is expected to increase as funds are shifted away from weapons-related programs and diverted to other areas such as communications. SatCom's strong systems capabilities in both ground-based and transportable communications applications position it well for such programs.

Radiation Systems, Inc., designs, manufactures and installs a broad range of

antenna systems for radar, air traffic control, tactical military, satellite earth stations, terrestrial microwave and other specialized uses throughout the world.

#90270p9015 09/27/1990 ~PR Newswire

CHICAGO (SEPT. 27) PR NEWSWIRE - Ford Motor Company (NYSE: F) today introduced at the Chicago Boat Show a high-performance, 8-cylinder, marine-application engine called the "351 HO."

This engine is the first in a series of high-output, technologically advanced engines Ford plans to offer to the marine industry for sterndrive and inboard engine applications, with Job No. 1 production date scheduled for Dec. 1.

Ford's Power Products Operations, which markets Ford's other marine-application engines, will assume sales and marketing responsibilities for the "351 HO."

To develop the 285 horsepower that the small-block, 5.8L "351 HO" produces, Ford is using a modern adaptation of the "GT 40 cylinder heads" used by Ford

in its racing program during the 1960s and '70s. These cylinder heads were instrumental in helping Ford establish engine performance and durability history at the "24 hours of Le Mans" races.

Ford's testing of the "351 HO" included extensive dynamometer runs to ensure that the performance characteristics required in the marine environment were met and Ford quality standards were maintained.

Ford's in-water testing of the "351 HO" was completed in a 21-inch BAJA Eurosport with a OMC Cobra Sterndrive. Test results showed that the Ford-powered boat was quick to plane and generated lots of power at the top end, achieving a top speed of 55 miles per hour.

The product planning and development of the "351 HO" also included some of the same processes Ford uses to develop and introduce a new vehicle. For example, cross functional teams were used to identify and resolve issues, and Ford used the "Voice of the Customer" approach to receive feedback on its new products.

Some valuable feedback was obtained at this year's Miami Boat Show as the marine industry's senior management was given a "first exposure look" at Ford's new engines and an opportunity to participate in a "Ride and Drive" evaluation of the new products. This "Voice of the Customer" process helped Ford reconfirm its decision to introduce the "351 HO" to the marine industry.

Ford's Windsor (Canada) Engine Plant will be the manufacturing site for the "351 HO." Plans call for Ford to use the same production equipment that is presently used to produce some of Ford's other marine engines, and Ford's 5.8L light truck engine. A number of "351 HO" prototypes have been shipped to engine marinizers for evaluation.

HERSHEY, PA. (SEPT. 27) PR NEWSWIRE - J. Bruce McKinney, chairman of the board and chief executive officer of Hershey Entertainment & Resort Co., has announced the election of John B. Zerbe to the post of president and chief operating officer for HERCO.

Zerbe, formerly executive vice president and chief operating officer, was elected to the position by the HERCO board of directors at a meeting yesterday.

In his new capacity, Zerbe will continue to report to McKinney as chairman and chief executive officer.

A Lykens, Pa., native, Zerbe was elected to his former position in October 1988. Previously, he was assistant secretary and director of state marketing

for the state of Maryland's Department of Economic and Employment Development.

Zerbe has enjoyed a long successful relationship with HERCO and other Hershey interests. He held several management positions at Hersheypark & Arena for five years before leaving in 1981 as assistant vice president. Prior to that he served for 11 years as general manager of the Hershey Recreation Center and the Hershey Education & Cultural Center. He was recreation director for Hershey Estates from 1962 to 1965.

McKinney said, "The move to elect Mr. Zerbe as president is all part of HERCO's ongoing strengthening of our operations. John's election to the president's position is in recognition of his many achievements and contributions to our company."

"These are challenging times but our company is strong and we are positioned to manage the future successfully," said Zerbe.

Zerbe and his wife, Mary Jane, live in Hershey. They have three children.

Additional action by the HERCO board was the election of Franklin R. Shearer to vice president of sports and entertainment. Prior to this move, Shearer was assistant vice president, sports and entertainment.

He formerly served the company as assistant vice president-corporate operations. Prior to that he served HERCO as budget director and staff assistant to the president, general manager of Hershey Meats & Commissary and Commercial Group controller.

WINSTON-SALEM, N.C. (SEPT. 27) PR NEWSWIRE - Sara Lee Hosiery announced today the planned closing of its LaGrange, Ga. manufacturing plant. The shutdown, which will affect approximately 425 employees, will begin in early October and completed by the end of November.

"This decision was a difficult one for us to make because of the impact it will have on our employees and on the community," said Drew Mayse, vice president of manufacturing for Hanes Hosiery. "The LaGrange plant has an outstanding workforce and is located in a fine community.

"Yet, we are in an extremely competitive market and have to take the actions necessary to keep our operations efficient and cost-effective. These steps are necessary for the long-term future of Sara Lee Hosiery and of our employees."

Because the LaGrange plant does not have knitting capabilities and is 400

miles from material sources, Sara Lee Hosiery began moving production to other facilities, where additional capacity was already available, in May of this year in an effort to become more efficient. After further evaluation, the decision was made to phase out the LaGrange plant. As production is reduced, employees will receive a 60-day notice based on the shutdown of specific operations and shifts.

Since this is a permanent situation, employees will be offered a severance package based on the years of service as well as out-placement assistance.

Sara Lee Hosiery, headquartered in Winston-Salem, N.C., manufactures and markets ladies' hosiery under well-known brand names such as Hanes, Silk Reflections, L'eggs and Underalls.

#90270p9027 09/27/1990 ~PR Newswire

GRAND RAPIDS, MI (SEPT. 27) PR NEWSWIRE - X-Rite, Incorporated (NASDAQ-NMS: XRIT) today said it has received more than $1 million in orders for its X-Scan densitometer that it introduced in August.

Due to innovative product design, the X-Scan densitometer helps printing companies achieve a high degree of quality control at an affordable price. The X-Scan costs $15,000 each vs. about $40,000 each for comparable instruments offered by competitors.

Grandville, Mich.-based X-Rite said it has received X-Scan orders amounting to more than $1 million since the company held a preview of the instrument for more than 20 major graphic arts distributors in Traverse City, Mich., in August.

Ted Thompson, president and chief executive officer of X-Rite, said the

instrument has gotten an enthusiastic reception at the Graph Expo show being held this week in New York City where it was formally introduced for the first time, but it is too early to tell how many orders will result from the show.

"Customers like the X-Scan because it does everything that more expensive equipment does, but at about one-third the cost," Thompson said. "A company can afford to have an X-Scan at the end of every printing press that runs color."

The X-Scan system consists of an instrument that reads the color bars on a printed sheet and a personal computer that interprets and records the data.

X-Rite expects to fulfill its $1 million backlog of X-Scan orders between late November and early March. By the end of October, the company will complete a 30,000-square-foot expansion of its Grandville facility where the X-Scan will be manufactured along with X-Rite's new line of hand-held spectrophotometers.

Thompson said one customer, a major ink manufacturer that he could not name, recently placed a $1.2 million order for the hand-held spectrophotometers, which have a variety of uses in the field of color measurement. The instrument was introduced in the first quarter of 1990.

X-Rite manufactures products used in graphic arts, photographic, medical, packaging and microfilm industries throughout the world. It manufactures densitometers, sensitometers, colorimeters, shrink packaging equipment, silver recovery equipment and an X-ray marking system.

Shares of X-Rite common stock are traded on the NASDAQ National Market System under the symbol XRIT.

CHICAGO (SEPT. 27) PR NEWSWIRE - Sara Lee Corporation (NYSE: SLE) today announced an agreement in principle to acquire The Sans Group, the leading manufacturer and marketer of men's and women's underwear in Spain. Terms of the agreement were not disclosed.

Headquartered in Mataro (Barcelona), Spain, The Sans Group markets branded underwear products under the Abanderado, Princesa, Olimpic and Ocean brands. Sara Lee Corporation manufactures and markets underwear products in the United States and Europe including products marketed under the Hanes, Hanes Her Way and Dim brands.

"We believe S.A. Sans to be the premier underwear and knit products company in

Europe," said M. Weldon Schenck, chairman and chief executive officer of Sara Lee Personal Products, S.A. "It has exceptional management and a highly competitive manufacturing base. The partnership provides both corporations with superior means to accomplish common European objectives."

Sara Lee Corporation is an international food and consumer products company that markets a wide variety of brand-name products including Hanes, Hanes Her Way, L'eggs, Champion, Dim, Kiwi, Sanex, Douwe Egberts, Hillshire Farm, Jimmy Dean and, of course, Sara Lee.

#90270p9033 09/27/1990 ~PR Newswire

WASHINGTON (SEPT. 27) PR NEWSWIRE - The Air Line Pilots Association today petitioned the National Mediation Board to request that the USAir Group's (NYSE: U) four wholly owned regional airlines be declared a "single carrier" under the Railway Labor Act.

An NMB ruling to that effect would combine the 800 pilots at the Henson Airlines, Pennsylvania Commuter, Allegheny Commuter (formerly Suburban), and Jetstream International Airlines into a single labor bargaining unit for purposes of labor relations. (It would not combine them with the larger USAir airline.)

The four regional carriers and USAir are controlled by USAir Group, Inc. The regional airlines provide feeder service to USAir hubs.

"The holding company maintains these four as separate airlines to maximize its bargaining leverage. However, for purposes of labor relations, we think it makes a lot more sense to deal with the pilot work force as one unit under a single labor agreement. The petition isn't a one-sided proposal, either. The company would benefit by the simplified administration of labor issues, elimination of the duplication of effort and resources, and other economies of scale, while it still maintains the separate corporate and marketing identities of the four airlines," said Capt. Henry Duffy, president of ALPA.

"Our problem is that the holding company is using the current arrangement to whipsaw its pilots in each contract negotiation," said Capt. Brian Lynch, chairman of the Henson pilots Master Executive Council. Henson is the largest of the four affected airlines.

"It's difficult for a few hundred pilots to stand up to the combined might of a corporate giant like the USAir Group. That's why the Railway Labor Act allows workers at companies controlled by a single management entity to petition the NMB for recognition as a single bargaining unit. Our petition would go a long way toward restoring some fairness to the bargaining process

at the four carriers," Lynch said.

BOULDER, COLO. (SEPT. 27) PR NEWSWIRE - Synergen Inc. (NASDAQ: SYGN) announced today the appointment of Paul Hastings as product director and Dr. John Pribble as assistant director of clinical research. Both positions are new and reflect Synergen's commitment to increased clinical testing and future marketing of its human pharmaceutical products.

As product director, Hastings initially will be responsible for evaluating and targeting potential markets for Synergen's pharmaceutical products. He is working directly with the clinical staff in developing strategic business plans that address opportunities associated with commercialization of the company's products.

Hastings was previously senior product promotion manager at Hoffmann-La Roche in Nutley, N.J., where he was responsible for oncology and immunology product management. He held positions there in sales, training and development, and sales management. During his tenure at Roche, Hastings was also involved in the development of the product launch of Roferon-A (Interferon alfa 2a), one of the first recombinant proteins used as a therapeutic, and was later responsible for the marketing and promotional strategies for that agent. More recently, he was involved in the development of marketing strategies for ddC, an antiretroviral agent for the treatment of AIDS and AIDS-related complex. Hastings has a bachelor of science degree in pharmacy from the University of Rhode Island.

As assistant director of clinical research, Dr. Pribble will assist Dr. Michael Catalano, vice president and medical director, in directing human clinical trials of new pharmaceutical products developed by Synergen.

Dr. Pribble was previously a clinical research scientist at Marion Merrill Dow in Kansas City, Mo., where he conducted clinical research in the wound care and cardiovascular therapeutic areas. Dr. Pribble received his Bachelor of Science Degree in Pharmacy from Washington State University, Pullman, Wash., his Doctorate of Clinical Pharmacy from the University of Utah, Salt Lake City and completed a post-doctoral fellowship in emergency medicine/critical care therapeutics at Truman Medical Center, Kansas City.

Synergen currently has two products--IL-1ra for rheumatoid arthritis and TROFAKTM for wound healing--in clinical trials. The company plans to start clinical trials before the end of the year to test its elastase inhibitor (SLPI) in patients with cystic fibrosis and genetic emphysema. In addition, Synergen expects to file an IND prior to the end of 1990 to test IL-1ra as a treatment for septic shock.

Synergen is a biotechnology company developing products to treat inflammatory diseases, vascular disorders and neurological conditions using recombinant DNA technology and the latest advances in molecular and cellular biology.

PONTIAC, MI. (SEPT. 27) PR NEWSWIRE - The Board of Directors of First Federal Bancorp, Inc. (FFB) (AMEX: FFS) has elected Richard E. Cavill executive vice president and chief operating officer of its subsidiary, First Federal Savings Bank & Trust (FFSBT), effective immediately.

The announcement was made by Leo D. Ottoni, president and CEO of FFB and FFSBT. FFB is listed on the American Stock Exchange under the symbol "FFS." The action is subject to approval by the Office of Thrift Supervision.

"We are delighted that we have been able to persuade Dick Cavill to return," Ottoni said. "Dick Cavill brings more than 30 years of history and strength to our focus on more profitable operations of the bank."

Cavill will remain director, chairman and president of FFB's Florida subsidiary, Citizens Federal Savings Bank (CFSB), where he has been since December of 1989, when he took early retirement from FFB.

He had been with FFSBT and FFB for more than 30 years, beginning in the management training program in 1956.

FFSBT, headquartered in Pontiac, is the fifth-largest thrift institution in Michigan. FFSBT has 27 branches in six southeastern Michigan counties and employs approximately 400 people. CFSB has four branches in Jacksonville, Fla.

Both FFSBT and CFSB are members of the Federal Home Loan Bank System and their deposits are insured up to the applicable limits by the Federal Deposit Insurance Corp (FDIC). FFB had total assets of $1.27 billion as of June 30, 1990.

HARRISBURG, PA (SEPT. 27) PR NEWSWIRE - AMP Inc. (NYSE: AMP) Chairman and Chief Executive Officer Harold A. McInnes commented on current results and outlook in a presentation at 4 p.m. today at the Merrill Lynch Connector Industry Conference in New York City.

He indicated results are in line with analyst expectations. Third quarter sales should be in the $740-750 million range -- up about 9 percent from $681

million in the year earlier period -- but down from the record $764 million sales in the first quarter and slightly below the $752 million in the second quarter this year. The decline in sales from the second quarter was less than usual -- and is attributable to weakening in the value of the U.S. dollar and recovery in the Brazilian subsidiary -- which partially offset the normal seasonal summer softness. Third quarter earnings will be 65-70 cents per share -- up slightly from 64 cents per share in both the year earlier period and prior quarter -- but down from 75 cents in the first quarter this year.

The order backlog is expected to increase slightly during the third quarter from $509 million at June 30, 1990.

McInnes stated that for the fourth quarter, analyst estimates of about $775 million sales and about 75 cents earnings per share seemed reasonable. For the entire year, earnings should be about $2.80/share, up about 6 percent from $2.63/share in 1989, on sales growth of about 8-9 percent to over $3 billion from $2.8 billion in 1989. McInnes also indicated that analyst consensus estimates for 1991 of $3-$3.25 earnings per share on 5-10 percent sales growth also appear to be reasonable, assuming no recession in the U.S. and a stable U.S. dollar.

1990 capital expenditures are expected to be a record $350 million -- up from $220 million in 1988 and $252 million in 1989.

McInnes, along with AMP executives William J. Hudson, vice president, Asia/Pacific, and Benjamin Savidge, executive vice president and chief financial officer, commented that the immediate outlook is clouded, but were optimistic that AMP could resume its historic long- term growth and profitability performance during the 1990s.

Along with record capital spending and record spending on research, development and engineering ($270 million), they cited the continuation of the stock buyback program as another indication of confidence in AMP's future. In the last two years, the company has purchased 3.8 million shares of AMP stock under a 4 million authorization by the board of directors. Yesterday the board increased the authorization by 1 million shares.

Harrisburg-based AMP Inc. is the world's leading producer of electrical/electronic connection devices. It has 25,000 employees in nearly 160 facilities in the U.S. and 26 other countries. AMP stock is listed on the New York, Pacific and other regional stock exchanges.

#90270p9053 09/27/1990 ~PR Newswire

NEW YORK (SEPT. 27) PR NEWSWIRE - L. Dale Crandall has been named as the new

managing partner for Price Waterhouse's Southern California practice, it was announced today. The practice includes some 900 professionals who provide accounting and auditing, tax, management consulting, and a broad array of specialty services to the greater Los Angeles area out of six local offices.

In his new position, Crandall, 49, succeeds Abbott L. Brown, who is joining Columbia Pictures as executive vice president and chief financial officer.

"With his 27 years of experience at Price Waterhouse, Dale brings to his new position major, multinational client service, aggressive practice development, and management expertise," said Shaun F. O'Malley, chairman of Price Waterhouse.

Prior to his new appointment, Crandall served as managing partner of Price Waterhouse's San Francisco area offices and managing partner of merger, acquisition, and corporate finance services for the firm's west region. Crandall will assume his new position on Oct. 15.

"Dale has an approach to client service that focuses on helping clients gain competitive advantage and build shareholder value. He will bring proven leadership both to a number of our major clients and our Southern California practice," said Kenneth G. Docter, vice chairman of the firm's west region.

"While we will miss Abbott Brown, we are happy for him and pleased that Price Waterhouse partners are held in such high regard by the business community," Docter said. "We appreciate Abbott's contributions to our Southern California practice during his 25 years with Price Waterhouse, and we wish him continued success in his new endeavors."

Crandall has assisted a number of multinational clients with large acquisitions and divestitures, particularly in the oil and gas, cable television, and retailing industries. He also has directed audit engagements for banking, real estate, petroleum, computer, import/export, commodities trading, manufacturing, and savings and loan clients. Some of his clients have included Chevron, Hewlett-Packard, Raychem, and the Bank of California.

Active in San Francisco area community affairs, Crandall served on the Bay Area United Way's 1990 Campaign Cabinet and has been a longtime supporter of the Boy Scouts of America. He is a member of the board of directors of the Fromm Institute for Lifelong Learning. Crandall also is a member of the American Institute of CPAs and the California Society of Certified Public Accountants.

He is a graduate of Claremont McKenna College, Claremont, Calif., and earned a masters degree in business administration from the University of California at Berkeley.

Price Waterhouse is a leading worldwide professional organization of

accountants and auditors, tax advisers, and management consultants. Through a global network of firms practicing in 420 offices within 103 countries and territories, Price Waterhouse professionals provide advisory services to businesses, individuals, nonprofit organizations, and government entities.

NEW YORK (SEPT. 27) PR NEWSWIRE - NYMAGIC, Inc. (NASDAQ: NYMG) today announced that its board of directors had given final approval, after receiving a recommendation from its special committee of outside directors, to the acquisition of Mutual Marine Office, Inc. (MMO) and related affiliates of MMO.

It is anticipated that the transaction will be effective Jan. 1, 1991, if approved by the shareholders of NYMAGIC, Inc. MMO and its affiliates together own approximately 39 percent of outstanding NYMAGIC, Inc. common stock.

The aggregate purchase price would be paid through the issuance of 2,585,000 new shares of NYMAGIC, Inc. common stock, in addition to the approximately 3,300,000 shares of NYMAGIC, Inc. stock already owned by MMO and affiliates.

Although MMO and its affiliates have minimal book value, NYMAGIC, Inc. does not anticipate significant dilution to earnings per share as a result of this transaction.

The result of the acquisition would be to increase the Blackman family ownership interest in NYMAGIC, Inc. from approximately 39 percent to approximately 52 percent.

Alex Brown & Sons acted as the financial adviser to the special committee of outside directors of NYMAGIC, Inc.

RACINE, WI (SEPT. 27) PR NEWSWIRE - Johnson Worldwide Associates, Inc. (NASDAQ: JWAIA) today announced that it has agreed to acquire certain assets of SEACO/Elliot and continue the business as part of its Marine group. SEACO/Elliot is a manufacturer of commercial life rafts, based in Riviera Beach, Fla. The transaction is expected to close in October. The purchase price was not disclosed.

Terence S. Malone, president and chief executive officer, said, "This addition will give JWA's marine group an opportunity to participate in the growing demand for commercial life rafts as more countries adopt the SOLAS (Safety of Life at Sea) requirements."

Malone continued, "The company's 6 to 25 man commercial life rafts meet the SOLAS requirements and have been approved by the U.S., Canada, USSR and a number of European countries."

Johnson Worldwide Associates, Inc. principal business is in the manufacture and marketing of recreational products including marine, diving, fishing and camping products. The company also manufactures ink related products for office and industrial use.

#90270p9077 09/27/1990 ~PR Newswire

MOSCOW (SEPT. 27) PR NEWSWIRE - Global Natural Resources Inc. (AMEX: GNR), a Houston-based energy company, announced today that it has signed a joint enterprise agreement in the USSR with TATNEFT, an amalgamation (corporation) of the Soviet Union, which operates the oil and gas fields of Tataria, a republic located west of the Ural Mountains on the Volga River. The agreement, which is the culmination of a protocol concluded in the latter half of 1989, was signed in Moscow on Sept. 23 by executives of both companies and filed for registration with the Ministry of Finance on Sept. 27. The joint enterprise is to be named "TATEX."

James G. Niven, chairman of Global, said, "Much hard work has gone into the creation of this joint undertaking and we are proud to be one of the first American companies to sign and file an agreement with an oil and gas amalgamation in the USSR. We are excited about the potential of the enterprise we have established with our Soviet partners and believe that Global's interest in TATEX will have a positive effect on the value of our company."

TATEX will be owned 50 percent by TATNEFT and 50 percent by TEXNEFT, Inc., an 89 percent owned subsidiary of Global. The remaining interest in TEXNEFT, which is an after-payout interest, will be owned by Core Resources, a privately owned company in San Antonio, Texas, which initiated and assisted in the formation of the venture. Another unaffiliated company, which also assisted in the initiation of the venture may qualify, under certain circumstances, to receive an after- payout participation, in which case Global's after-payout interest in TEXNEFT will be 80 percent.

Initially, TATEX will install and operate vapor recovery facilities and compressors to recover evaporated crude oil from the bulk of TATNEFT'S production facilities, which currently handle approximately 800,000 barrels per day of crude oil and exchange the recovered vapor for export crude oil. This activity will substantially reduce hydrogen sulfide emission and other pollutants in Tataria. TEXNEFT will supply the hard currency requirements and technology to the venture and TATNEFT will supply the ruble component and necessary Soviet support. The financial support for the initial phase is currently expected to entail $3,225,000, and an equivalent amount in rubles, prior to the time that he joint venture becomes self sustaining. TATEX will sell its crude oil on the international market for hard currency. When all planned facilities have been installed, a process expected to take up to 30 months, TATEX expects to be exporting approximately 3,500 barrels per day earned in exchange for recovered vapors.

Global Natural Resources Inc. is a Houston-based energy company engaged in the exploration, development, production and transportation of oil and gas in North America and owns an interest in a long-term oil and gas production

sharing contract in Indonesia.

WORCESTER, MA (SEPT. 27) PR NEWSWIRE - BankWorcester Corporation (NASDAQ: BNKW) announced today that it expects to provide approximately $4 million for possible loan losses in the third quarter, which will affect earnings for the quarter.

It also announced that it expects to charge off approximately $5 million of loans. After the provision and charge-offs, the loan loss allowance is expected to be approximately $13 million, or 1.4 percent of loans outstanding, and non-performing assets are expected to be approximately $47 million.

BankWorcester President Harold Cabot said, "Although third quarter figures will not be in hand for a few more weeks, as of now it looks as if the quarter will be approximately break even.

The actions were taken in response to management's continuing review of the bank's loan portfolio, its recognition of further deterioration in the Massachusetts economy and real estate market and the preliminary results of a

recently completed field examination by the FDIC.

Until market conditions improve, there can be no assurance that non-performing assets will not increase further or that declines in collateral values will not necessitate additional increases in the allowance for possible loan losses or charge-offs in the future."

On Feb. 16, 1990, BankWorcester signed a definitive agreement to merge with Citizens Financial Group, subject to a number of significant conditions. One condition is that if the level of non-performing assets plus other certain items (the "specified amount") exceeds $50 million, after all regulatory approvals are received, Citizens may choose not to consummate the merger.

After reported charge-offs, the specified amount is expected to be approximately $66 million at the end of the quarter. It is anticipated that the specified amount will fluctuate from time to time. The point in time at which the specified amount is to be measured is after the receipt of all required regulatory approvals.

#90270p9100 09/27/1990 ~PR Newswire

ST. PAUL, MN (SEPT. 27) PR NEWSWIRE - H.B. Fuller Company (NASDAQ: FULL) today reported net sales of $203.1 million for its third quarter ended Aug. 31 1990, an increase of 7 percent over the $189.9 million for the same quarter a year ago. Net earnings were $6.4 million for the quarter, up 68 percent from $3.8 million for the period a year ago. Earnings per share were $.70, up 77 percent from $.40 in third quarter 1989.

The results include a third-quarter tax benefit of $0.1 million, or $.01 per share on the extraordinary charge booked in the first quarter resulting from income generated by the company in Panama during the quarter.

Net sales for the first nine months of 1990 were $589.2 million, up 5 percent from $563.8 million for the same period of 1989. Year-to-date earnings before the extraordinary item totalled $14.1 million, up 33 percent from $10.6 million in the first nine months of 1989. Earnings per share were $1.54, up 38 percent from $1.11 in 1989. Including the extraordinary item, earnings per share were $1.42 year-to-date.

Overall, International operations achieved a moderate increase in sales and operating income in the third quarter compared with the same three months in 1989.

European operations recorded a significant increase in sales, largely as a result of a weakening U.S. dollar. Operating income substantially increased for the quarter compared with the same period in 1989. Gross margins from European operations have improved over the quarter and year-to-date margins of the prior year.

Third quarter sales from Latin American operations were moderately above those of third quarter 1989 and operating income equalled the 1989 level. Negative impact from currency changes were less than the losses from the same period a year ago. Sales from Asia/Pacific and Canada operations were approximately even with those of the previous year's quarter and nine months.

U.S. sales for the quarter and year-to-date were up moderately from the sales of the same periods a year ago. Operating income was up substantially due to aggressive cost control measures and an improvement in gross margins.

ASC Division sales for the quarter were up moderately from the previous years with nine month sales approximating the previous year-to-date numbers. Operating income was up substantially for the quarter and significantly for the nine month period because of continued attention to cost and census control and an improvement in gross margins.

Gross margins as a percent of ASC sales were equal to the margins generated in the second quarter of 1990 and above those generated in the third quarter of 1989. Limited growth of the U.S. economy has hindered growth of the Division's core businesses. The automotive industry continues to operate at levels below earlier projections and so continues to adversely affect Fuller sales to that industry.

The U.S. Specialty Divisions and Subsidiaries as a whole recorded a moderate sales increase and substantial operating income growth for the quarter, primarily due to improved gross margins. Gross margins, as a percent of sales, were up for the third quarter and year-to-date compared to the same periods last year.

Sales and earnings were strong in the Industrial Coatings division. TEC

Incorporated, Linear Products, and Monarch produced operating earnings exceeding last year by tight cost controls and a moderate sales increase. Foster Products Corporation sales continued to lag due to a slowing construction market.

The effective tax rate for the third quarter is 40.3 percent and 42.5 percent year-to-date, down 11.1 percent and 5.0 percent to the comparable periods in 1989. The related positive earnings effect for the third quarter and year-to-date are $.13 and $.14 per share, respectively. The primary reasons for the decrease in the effective tax rate are a higher proportion of U.S. earnings projected for 1990 and various programs to reduce taxes.

H.B. Fuller Company is a worldwide manufacturer and marketer of specialty chemical products, including adhesives, sealants, coatings, paints, waxes and sanitation chemicals, with Fiscal 1989 sales of $753 million.

#90270p9101 09/27/1990 ~PR Newswire

PLEASANTVILLE, N.J. (SEPT. 27) PR NEWSWIRE - Atlantic Electric today filed a petition with the New Jersey Board of Public Utilities (BPU) for a base rate increase.

If approved, the company's request would increase net annual revenues by $112.989 million.

The petition also requests that the provisional base rate increase of $41.6 million, effective June 20, 1990, be placed permanently in rates. The June 20, 1990, base rate increase was offset by a $35.8 million decrease in Levelized Energy Adjustment Clause (LEAC) revenues. The provisional base rate increase partially covers the costs of a four- year capacity and energy purchase contract between Atlantic Electric and Philadelphia Electric (NYSE: PE). This power contract begins on June 1, 1990.

The company cited significant increases in capital investments and operating costs since its last request for base rate increases, filed in 1985, as the reason for the request. During this five-year period, the company has worked to maintain stable rates for its customers. The additional investments and operating costs are needed in part because customers are generally using more electricity. In 1990, on the hottest day of the year, customers used 22 percent more electricity than in 1985. The increase in demand was accompanied by growth in the company's customer base. Since 1985 the company

has added more than 58,000 customers to its system.

To maintain reliable electrical service over the last five years for all customers, Atlantic Electric invested more than $400 million in plant and equipment. Much of this new investment went toward expanding generating and transmission capabilities. The company has also experienced general increases in the costs of materials, equipment and labor. Based on current financial market conditions, the company also requested that the annual rate of return it may earn on its investments in facilities needed to serve its customers be reduced from 11.42 percent to 11.13 percent.

If approved by the BPU, the request will increase annual revenues by approximately 15 percent. Monthly residential bills will increase 13.3 percent-17.9 percent. The exact amount that a customer's residential bill will change depends on the amount of electricity consumed.

CONTACT: Susan Coan of Atlantic Electric, 609-645-4150, or at home, 609-645-1846

#90270p9104 09/27/1990 ~PR Newswire

NEW YORK, (SEPT. 27) PR NEWSWIRE - Amerada Hess Corporation (NYSE: AHC) today announced that its Canadian subsidiary, Amerada Minerals Corporation of Canada Ltd., has completed the acquisition of approximately 80 percent of the oil and gas producing properties and 250,000 net exploration acres owned by Placer Cego Petroleum Holdings Limited, a subsidiary of Placer Dome Inc. (NYSE: PDG). The properties are located principally in Alberta and British Columbia. The cost of the acquisition was approximately $215 million.

The properties being acquired by Amerada Minerals include proved and probable reserves of 201.4 billion cubic feet of natural gas and 6.9 million barrels of crude oil and natural gas liquids. The properties currently produce approximately 32,000 mcf of natural gas per day and 3,200 barrels of crude oil and natural gas liquids per day. Natural gas production from these properties is expected to reach 50,000 mcf per day in 1992, at which time total natural gas production capacity for Amerada minerals is expected to exceed 150,000 mcf per day. Crude oil and natural gas liquids production for Amerada minerals in 1992 is projected at 14,000 barrels per day.

WASHINGTON (SEPT. 27) PR NEWSWIRE - Marriott Hotels, Resorts and Suites today announced that it will manage the Halloran House Hotel in New York City. The 665-room hotel will be renamed the New York Marriott East Side Hotel. It is

owned by 525 Lexington Avenue Associates, a commercial real estate firm based in New York.

"Marriott is delighted to include this quality hotel in our portfolio of lodging products in the New York metropolitan area," said William R. Tiefel, president, Marriott Hotels, Resorts and Suites.

"The New York Marriott East Side Hotel complements and strengthens Marriott's presence in New York City and offers travelers a great lodging facility in an outstanding location. In addition, we will pursue other hotel conversion opportunities in markets which have long term growth potential," Tiefel said.

In Manhattan, Marriott also operates the New York Marriott Marquis and will open the New York Marriott Financial Center Hotel in January 1991. The New York Marriott East Side is the second major competitive hotel to be converted to a Marriott in the past three months. The company acquired the Westin Lennox Hotel in Atlanta in May.

"The attractiveness of the Marriott operating system, marketing programs and guest satisfaction levels will augment the appeal of one of New York's great hotels," said Morris Bailey, managing partner of 525 Lexington Avenue Associates. "We are pleased to have Marriott managing our hotel," Bailey said.

The New York Marriott East Side Hotel is located on Manhattan's East Side at the intersection of Lexington Avenue and 49th Street. It is just six blocks from Grand Central Station and close to Chemical Bank, IBM, Bristol-Myers, Citicorp, AT&T and other Fortune 500 companies.

Meeting and banquet facilities include a 3,775-square-foot ballroom, which is divisible into four sections. Six additional meeting rooms bring the total available meeting and banquet space to 12,815 square feet.

For dining and entertainment, the New York Marriott East Side Hotel features a 140-seat specialty restaurant, a 150-seat casual restaurant, and a lobby bar. The hotel also includes a concierge lounge, gift shop, and 24-hour room service.

Anton Najjar, formerly general manager of the Charleston Marriott in South Carolina and a 12-year Marriott veteran, has been named general manager of the hotel. Reservations are being accepted through Marriott's toll-free number, 800-228-9290, or by calling the hotel directly at 212-755-4000.

#90270p9107 09/27/1990 ~PR Newswire
LOUISVILLE, KY. (SEPT. 27) PR NEWSWIRE - Louisville Gas & Electric Company

(LG&G) (NYSE: LOU) and Illinois Municipal Electric Agency (IMEA) today announced an agreement for IMEA to purchase 50 megawatts of the Trimble County electric generating station's capacity. This sale is the result of LG&E's aggressive marketing efforts to sell capacity available from its new 495-megawatt plant, 125 megawatts of which were excluded from rates following an agreement with the Publc Service Commission of Kentucky last year.

IMEA is a non-profit, consumer-owned agency based in Springfield, Illinois. The agency is made up of 30 municipalities that own and operate their own electric systems. IMEA pools the members' electrical generating capacity and purchases additional power as necessary to meet the group's needs.

"IMEA and its members are pleased to be associated with LG&E," says Frank Madonia, IMEA's general manager. "The Company has been a leader in the environmental field for many years, and the Trimble County plant follows that tradition. In fact, the plant's state-of-the-art sulfur dioxide removal system will reduce emissions 30 percent below the standards in the proposed clean air legislation."

The Trimble County plant is expected to be in full commercial operation by the end of this year, and IMEA's member agencies will begin to take power from the plant on January 1, 1991. The terms and conditions of the sale will not be released at this time.

Negotiations are continuing with utilities from various regions for the sale of the remaining 75 megawatts of Trimble County's available capacity.

Plant Reaches Milestone Toward Commercial Operation A key milestone to the commercial operation of the Trimble County Plant was reached on September 25 when the plant was being tested and briefly produced electricity, which was transmitted to the LG&E system. The plant will undergo extensive additional testing before beginning full commercial operation.

CHICAGO (SEPT. 27) PR NEWSWIRE - American National Can (ANC), the world's largest can manufacturer, today announced that it will invest over $50 million to build a 250,000-square-foot two-piece beverage can making plant in Dunkerque, France. The new facility will help meet the growing demand for metal beverage containers in the European market, which is expanding at a double-digit annual growth rate.

The state-of-the-art facility, which will be operational during the first half of 1991, will manufacture 1.2 billion cans annually and is the company's first

beverage can plant in France. The Dunkerque facility, which will be built close to a major Coca-Cola filling plant, will serve a variety of customers in France, Holland and Belgium.

"This capacity expansion demonstrates our commitment to provide customers throughout the world with the service and high-quality packaging products they require," said Jean-Pierre Ergas, chief executive officer, at the company's executive office in Chicago. "Over the last five years, ANC has spent more than $1.3 billion for expansion, upgrade and technological advancement in our equipment and facilities."

ANC will spend $277 million for capital projects in 1990, $226 million in the United States and $51 million in Europe.

The plant, which will employ approximately 125 people, will be ANC's 11th in Europe and the second new operation in France.

American National Can Company is a $4.3 billion packaging manufacturer, producing a wide spectrum of metal, glass and plastic packaging products. It operates more than 100 facilities in 13 countries.

RICHMOND, VA (SEPT. 27) PR NEWSWIRE - RF&P Corporation's (NASDAQ: RFPC) board of directors today appointed two additional members to the board and established a Special Committee to evaluate a previously announced proposal by the Virginia Retirement System (VRS) and CSX Corporation (NYSE: CSX).

The new RF&P Corporation board members are John W. Rosenblum, dean of The Darden Graduate School of Business Adminstration at the University of Virginia and Edward Villanueva, a financial advisor, former acting president and chief financial officer of Richfood Holdings, Inc., and former chief financial officer of Circuit City Stores, Inc.

Rosenblum, Villanueva and RF&P Corporation board member C. Coleman McGehee, retired chairman of Sovran Bank, N.A., were also appointed as members of the Special Committee. McGehee will serve as chairman of the Special Committee.

On September 14, 1990, the VRS announced that it had proposed to CSX a transaction by which CSX would acquire RF&P's railroad operations in exchange for a portion of its RF&P shares, and the VRS would acquire CSX's remaining shares, in both cases for $35 per share. In addition, the VRS/CSX proposal includes a self-tender by RF&P for a portion of its shares not held by CSX or VRS at $35 per share in cash.

The Committee will study the overall fairness to shareholders of the proposed agreement. They also are authorized to meet with the appropriate representatives of CSX and VRS to negotiate the terms of a proposed sale agreement, placing special emphasis on protecting the interests of minority shareholders of RF&P Corporation and the welfare of employees of the Corporation and its subsidiaries.

Rosenblum has served as dean of The Darden Graduate School of Business Adminstration since 1983. He previously served there as acting dean and professor. He is a member of the board of directors of Chesapeake Corporation and Cadmus Communications Corporation.

Villanueva served as chief financial officer of Circuit City Stores, Inc. from 1967-1987 following eight years as a certified public accountant for S.D. Leidesdorf & Co., in New York City. In 1990 he served for eight months as acting president and chief financial officer of Richfood Holdings, Inc. He is a member of the board of directors of Circuit City Stores, Inc. and Richfood Holdings, Inc.

MONTVALE, N.J. (SEPT. 27) PR NEWSWIRE - For the 11th straight year, design engineers have chosen Mercedes-Benz as their "dream car."

In its annual survey of the car buying intentions and automotive engineering opinions of its 170,000 subscribers, Design News magazine found Mercedes was the clear winner in the dream car category, as it has been every year since 1980, when the first survey was taken. The survey results are included in the magazine's Oct. 1 issue.

Over those 11 years, Mercedes-Benz introduced a number of innovative design features and new models that demonstrated engineering leadership. Some examples, and the years they were introduced, include:

1980 -- The S-Class line of large sedans, which are still contemporary today, and a range of all-aluminum V8 engines;

1983 -- The SRS supplemental restraint system that includes driver- side air bag and knee bolster plus emergency tensioning retractors for the front seat belts, as well as debut of the 190 series of sports sedans that pioneered the Mercedes five-link rear suspension system;

1984 -- The introduction of ABS anti-lock braking, a Mercedes-Bosch development, to North America, the making of emergency tensioning seat belt

retractors standard in all but one model, and the first production offering of trap-oxidizer diesel emission control technology;

1985 -- SRS, with driver-side air bag, standard in all models, and the introduction of the Mercedes 300 series of mid-size cars;

1988 -- Full-front air bag systems offered as standard or optional equipment in all but one model, ABS standard in all U.S. models;

1989 -- The new 300SL and 500SL, with variable intake camshaft timing, automatic rollover bar, automatic soft top and integral seat/seat-belt design; the 4Matic computer-controlled four-wheel drive system for the 300E sedan and 300TE station wagon; and new clean, quiet and efficient turbocharged diesel engine technology offered in two models;

1990 -- ASD automatic locking differential and ASR automatic slip control traction systems available in all models, ADS adaptive damping suspension offered in the two SL models.

MINNEAPOLIS (SEPT. 27) PR NEWSWIRE - The U.S. Bankruptcy Court Judge overseeing Federated Department Store's bankruptcy proceedings today approved the lease agreement between Federated's Bloomingdale's subsidiary and Mall of America. Bloomingdale's will join Macy's, Nordstrom and Sears as major anchors of the 4.2 million square foot combination retail and entertainment complex under construction in Bloomington, Minn.

Arthur W. Spellmeyer, senior vice president of development for Melvin Simon & Associates, developer of Mall of America, said, "While we have expected all along that the judge would rule in favor of granting Bloomingdale's their lease, we are very pleased to have the decision finalized and are ready to proceed with further plans for the Bloomingdale's store."

Bloomingdale's will open a 210,000 square foot, three-level store in the southeast corner of the Mall of America project.

Joe Talentino, vice president, director of construction for Simon, said, "Mall of America will serve as construction manager for Bloomingdale's and will begin construction on the store in six weeks."

Construction on the mall portion of the project and on the Knott's Camp Snoopy theme park is on schedule and developers anticipate that work will begin on Macy's and Nordstrom in October.

Mall of America is scheduled to open in the fall of 1992.

#90270p9139 09/27/1990 ~PR Newswire

PLEASANTVILLE, N.J. (SEPT. 27) PR NEWSWIRE - Atlantic City Electric Co. (ACE) filed a petition with the New Jersey Board of Public Utilities (BPU) seeking an annual increase in base rate revenues of $112.989 million.

The increase in base revenues is designed to recover the costs of providing service for a test year ending May 31, 1991. ACE has requested that the increase become effective on Oct. 28, 1990, but no later than July 1, 1991, the end of the suspension period. If granted, ACE's annual revenues would increase by approximately 15 percent.

The requested increase reflects rate base additions and changes in operating expenses since ACE's last general base rate case, which was filed in April 1985. In its filing, ACE requested that a $41.6 million provisional base rate revenue increase granted by the BPU effective June 20, 1990, be confirmed and continued in permanent rates. That provisional increase covered a portion of the first-year revenue requirements associated with ACE's four-year purchase of 200 megawatts of capacity and associated energy from Philadelphia Electric Co. (NYSE: PE).

The first-year revenue requirements are estimated to total about $53 million. ACE has requested recovery of the first-year shortfall (the amount not covered by the provisional increase), plus full recovery of the costs for the remaining three years of the PE arrangement.

The major components of the requested increase reflect additions to rate base and changes in operating expenses, driven largely by growth in the demand for electricity experienced in southern New Jersey. Between 1985 and 1990, peak electrical demand has risen 22 percent and more than 58,000 new customers have been connected to ACE's system. In this filing ACE is seeking to increase its net rate base by an additional $400 million. This increase in rate base includes the costs of two combustion turbine generating units, and two 230 kv transmission lines built to strengthen service reliability to ACE's customers, and to provide connection to ACE's system for expected cogeneration projects. ACE has also incorporated in its request certain items affecting test year operating expense and operating income such as increased nuclear plant decommissioning expenses and adjustments for changes in federal and state taxes.

In testimony filed by its witnesses, ACE noted an increasing level of construction expenditures over the next several years, and the need for a large financing program. Internal generation of funds to meet those construction requirements will be affected by a lower rate of growth in energy sales, due to moderating economic conditions in the service area, and the loss of sales to several large customers who will be installing cogeneration facilities. The requested rate increase is intended to improve the expected level of cash generation and support the credit quality of the utility.

WASHINGTON (SEPT. 27) PR NEWSWIRE - The Student Loan Marketing Association (Sallie Mae) (NYSE: SLM) today announced an applicable dividend rate of 5.00 percent per annum on its Adjustable Rate Cumulative Preferred Stock, Series A, for the period Oct. 1, 1990 through Dec. 31, 1990.

At June 30, 1990, Sallie Mae had 4,277,650 shares of such stock outstanding. Dividends are computed quarterly, at 4.50 percentage points below the highest yield on certain long-term and short-term U.S. Treasury obligations, but they are never less than 5.00 percent nor more than 14.00 percent per annum.

Sallie Mae, a federally chartered, stockholder-owned corporation, is the major financial intermediary serving the education finance market. By buying insured student loans and providing other financial services to financial and educational institutions, Sallie Mae replenishes local supplies of student credit. The corporation owns nearly 30 percent of all guaranteed student loans outstanding today.

#90270p9162 09/27/1990 ~PR Newswire

MILAN, ITALY (SEPT. 27) PR NEWSWIRE - The board of directors of Montedison S.p.A. (NYSE: MNT) met today to review the company's first half results. These results did not decrease significantly from first half 1989 results, despite the slowdown in the chemical sector, partly due to the impact of transactions to restructure the business portfolio.

Raul Gardini, chairman of Montedison, reminded the board during the meeting that once the merger of Montedison with Ferruzzi Agricola Finanziaria is completed, a capital increase of up to 2,500 billion lire is foreseen as part of the company rationalization and development plan.

Ferruzzi Finanziaria and the Ferruzzi family have already given their consent to these transactions, which will permit the company to meet possible commitments related to the acquisition of Enimont and to the general development of the company.

Consolidated Results

The Montedison Group reported consolidated net income of 225 billion lire for the first half of 1990, versus 275 billion lire for the corresponding period in 1989 excluding the extraordinary impact of the Enimont transaction.

The operating results were affected by the less favorable market conditions in certain parts of the chemical sector and by increased competition in the pharmaceutical market, particularly in the areas of anti-cancer products and intermediates.

Those problems were reflected, for the most part, in the form of lower selling prices, whose impact on revenues was magnified in some instances by the weakness of the major currencies against the lire.

The group's first half-year sales revenues from directly managed businesses were 2,673 billion lire, down 7 percent on a comparable basis from the first half of 1989.

Operating income was affected as well, despite the positive performance of the energy sector. Operating income before depreciation and amortization was 436 billion lire for the period, a reduction of 22 percent from first half 1989 on a comparable basis.

Enimont had reduced sales revenues and operating margins as a result of the downturn in market conditions.

Overall, Enimont reported considerably lower net income for the first six months of 1990 than for the first half of 1989. This resulted in a

significant reduction in Montedison's share of earnings from Enimont which is carried as an investment under the net equity method.

On the other hand, in addition to lower tax charges, Montedison reported significant other income deriving from divestitures of activities or shareholdings in sectors considered non-strategic for the group.

These transactions were made under a policy of rationalization of the business portfolio designed to focus resources on areas of expected growth.

Parent Company Results
Montedison S.p.A., the parent company of the group, reported net income of 304 billion lire for the first half of 1990 versus 98 billion lire for the same period last year. This significant increase is attributable to higher gains on the sale of shareholdings and to the higher dividend income resulting from the financial restructuring of Erbamont which was part of the tender offer operation to attain full control of the company.

GREENFIELD, MA. (SEPT. 27) PR NEWSWIRE - The Bank of Western Massachusetts and West Mass Bankshares Inc. (NASDAQ: WMBS) have executed a non-binding letter of intent whereby The Bank of Western Massachusetts proposes to acquire West Mass Bankshares Inc., including its sole bank subsidiary, United Savings Bank.

United Savings Bank is a Massachusetts stock savings bank with six full service offices located in Franklin and Hampshire Counties and total assets of $191,000,000 as of June 30, 1990.

The Bank of Western Massachusetts is a Massachusetts chartered trust company with offices in Springfield and Holyoke, Mass. As of June 30, 1990, The Bank of Western Massachusetts had total assets of $143,000,000.

The proposed acquisition would be accomplished through a holding company to be formed by The Bank of Western Massachusetts which would acquire all of the issued and outstanding shares of West Mass Bankshares Inc. at a price equal to 100 percent of West Mass Bankshares Inc. adjusted book value.

Pursuant to the letter of intent, the acquisition agreement will set forth the agreed upon adjusted book value, which shall be no greater than $11.42/share or less than $10.34/share with the purchase price being paid in a combination of cash and stock of the new holding company to be formed. The transaction is subject to the execution of a definitive agreement and to shareholder approval

of both banks and regulatory approval of both the formation of the holding company and the transaction itself.

In making the joint announcement, Frank P. Fitzgerald, chairman of the board and Timothy P. Crimmins, Jr., president of the Bank of Western Massachusetts and Francis L. Lemay, president and chief executive officer of West Mass Bankshares Inc. cited "the complimentary nature of the products and services provided by the banks and the geographic bank network which would be created" as the most compelling reasons for the combination of the two banks.

They further pointed out that although the form of the proposed transaction is an acquisition, it is being viewed as a consolidation of two locally managed successful banks. The banks will continue to operate independently with no major changes in management or personnel.

MOSCOW (SEPTEMBER 27) TASS - PRESIDENT MIKHAIL GORBACHEV MET LATVIAN PRIME MINISTER IVARS GODMANIS IN THE KREMLIN ON WEDNESDAY. THEIR 90-MINUTE MEETING WAS ATTENDED BY LATVIAN FIRST DEPUTY PRIME MINISTER ILMARS BISERS AND PERMANENT REPRESENTATIVE OF THE LATVIAN GOVERNMENT IN MOSCOW JANIS PETERS.

GORBACHEV CALLED FOR "FURTHER POLITICAL AND ECONOMIC COOPERATION BETWEEN REPUBLICS IN A UNION OF SOVEREIGN STATES, WHICH WOULD PROVIDE FOR REPUBLICS' MAXIMUM INDEPENDENCE IN TACKLING INTERNAL ECONOMIC PROBLEMS AND CONDUCTING FOREIGN ECONOMIC RELATIONS", A REPORT ISSUED BY THE LATVIAN MISSION IN MOSCOW TODAY SAYS.

GODMANIS SAID THAT THE "COMPLETE RESTORATION OF THE POLITICAL SOVEREIGNTY OF THE LATVIAN REPUBLIC IS A MANDATRY PREREQUISITE FOR MOVEMENT TOWARDS ANY FORM$OF ECONOMIC OR POLITICAL ASSOCIATION".

THE LATVIAN REPUBLIC STANDS FOR THE PRESERVATION AND DEEPENING OF ECONOMIC AND CULTURAL TIES WITH OTHER REPUBLICS, HE SAID.

THE PRIME MINISTER POINTED TO THE NEED TO DEVELOP THESE TIES BY CONCLUDING INTERSTATE AGREEMENTS, WHICH, HOWEVER, "SHOULD NOT RESTRICT THE STATE SOVEREIGNTY OF THE LATVIAN REPUBLIC".

THE REPORT QUOTED PRESIDENT GORBACHEV AS SAYING THAT "THE PEOPLE OF LATVIA SHOULD THEMSELVES CHOOSE BETWEEN TWO WAYS OF DEVELOPING RELATIONS WITH THE SOVIET UNION -- THE LATVIAN REPUBLIC AS A MEMBER OF A UNION OF SOVEREIGN STATES, OR THE LATVIAN REPUBLIC AS AN INDEPENDENT STATE OUTSIDE THE SOVIET UNION.

"IF THE MAJORITY OF LATVIINS FULLY RECOGNISE THE IDEA OF A SOVEREIGN LATVIAN STATE DE FACTO, A REFERENDUM SHOULD BE ORGANISED TO FIND OUT THE ATTITUDE OF ALL LATVIAN RESIDENTS OF OTHER NATIONALITIES TO THIS IDEA. RELATIONS BETWEEN THE LATVIAN REPUBLIC AND THE USSR COULD THEN BE AMENDED."

THE LATVIAN SIDE EMTHASISED THAT THE STATE OF ETHNIC RELATIONS IN LATVIA AT THE CURRENT STAGE "IS NO OBSTACLE TO THE FORMATION OF THE LATVIAN REPUBLIC AS A POLITICAL SOVEREIGN STATE DE FACTO IN A DEMOCRATIC WAY".

IT CALLED FOR FINDING A COMMON FORMULA THAT WOULD PROMOTE THE RECOGNITION OF THE LATVIAN REPUBLIC BY MOSCOW AND OTHER CAPITALS OF THE WORLD.

AT THE SAME 1/4IME, THE LATVIAN SIDE NOTED, LATVIA'S ECONOMIC AND HUMANITARIAN TIES WITH THE SOVIET UNION AND ITS REPUBLICS SHOULD BE PRESERVED ANL DEVELOPED.

THE MEETING ALSO COVERED LATVIA'S DEMOGRAPHIC AND ENVIRONMENTAL PROBLEMS, THE SOCIAL CONDITIONS OF TROOPS, AND SUPPLIES OF FODDER GRAIN TO LATVIA.

THE LATTER PROBLEM WAS EMPHASISED IN A JOINT LETTER TO GORBACHEV FROM GODMANIS MOSCOW MAYOR GAVRIIL POPOV AND LENINGRAD MAYOR ANATOLY SOBCHAK.

CONCLUDING THE MEETING, GORBACHEV CALLED FOR CONTINUING JOINT EFFORTS "IN A DEMOCRATIC WAY" TO DRAW THE SIDES' POSITIONS CLOSER TOGETHER.

TALLINN (SEPT 28) TASS - THE FIRST READING OF THE BILL "ON ECONOMIC BORDER" WAS HELD AT THE ESTONIAN PARLIAMENT.

ACCORDING TO MINISTER RAIVO VARE WHO MADE A REPORT ON THE BILL, AN ECONOMIC

BORDER BETWEEN ESTONIA, ON THE ONE HAND, AND RUSSIA AND LATVIA, ON THE OTHER, PLANS TO BE&SET UP IN ORDER TO CREATE CONDITIONS FOR STABILISING THE DOMESTIC MARKET, TO CONTROL IMMIGRATION AND ERADICATE CRIME.

ACCORDING TO DEPUTY YEVGENY KOCHEGAROV, A FRONTIER GUARD OFFICER, IT HAS ACTUALLY BEEN PROPOSED TO CREATE A STATE BORDER, SEPARATING ESTONIA FROM THE REST OF THE SOVIET UNION, UNDER THE GUISE OF THE ECONOMIC BORDER. KOCHEGAROV BELIEVES THAT THE INTENTION TO PROTECT THE DOMESTIC MARKET IN SUCH A WAY IS NOTHING BUT ANOTHER ADMINISTRATIVE MEASURE BASED ON ISOLATION PRINCIPLES.

BANS ON SENDING BY HOST THE GOODS, THAT ARE IN SHORT SUPPLY, FROM ESTONIA TO OTHER REGIONS, THE SELLING OF THESE GOODS TO THE POPULATION ON THE PRESENTATION OF A PASSPORT AND THE DISTRIBUTION OF GOODS ACCORDING TO SPECIAL COUPONS DID NOT HELP STABILISE THE MARKET.

KOCHEGAROV CALLED IN QUESTION THE GOVERNMENT'S INTENTION TO SPEND NO MORE0THAN 1.5 MILLION ROUBLES ON THE CREATION OF THE "ECONOMIC BORDER". HE MAINTAINS THAT THE COST OF THIS OPERATION WILL BE MUCH HIGHER.

SOME OTHER MEMBERS OF PARLIAMENT SHARED THE OPINION OF KOCHEGAROV. THEY SUGGESTED THAT BY THE SECOND READING THE GOVERNMENT SUBMIT TO THE PARLIAMENT AN ESTIMATE OF POSSIBLE EXPENDITURES. MANY OF THEM FEAR RETALIATORY ACTIONS ON THE PART OF THE RUSSIAN FEDERATION AND LATVIA.

SINCE, ACCORDING TO THE RULES, A PARLIAMENTARY DISCUSSION CAN BE HELD ONLY AFTER THE SECOND READING, THE MAIN DEBATE ON THE BILL IS STILL AHEAD.

#90270u0112 09/27/1990 ~United Press International
CAPE CANAVERAL, Fla. (SEPT. 27) UPI - The leak-plagued shuttle Columbia likely will remain grounded until at least early December because of work to repair components in the ship's engine room that are leaking explosive hydrogen, officials say.

''I'm hopeful we will have gone through this entire (test) sequence and have Columbia back in the flying sequence in the December time frame and pull the (mission) off then,'' William Lenoir, NASA's associate administrator for space flight, said Wednesday at a Washington news conference.

The space agency is gearing up to launch the shuttle Discovery Oct. 6 from pad 39B to carry the Ulysses solar probe into space for a five-year voyage over the poles of the sun.

Once Discovery gets off the pad, Columbia will be moved to pad 39B to make room for the shuttle Atlantis, which is scheduled to blast off from pad 39A around Nov. 7 to kick off a secret military mission.

Once at pad 39B, Columbia will be subjected to an exhaustive series of tests to pinpoint the source of the leak that has grounded the ship four times and

delayed its launch from May 30 to early December at the earliest.

The leak hobbling Columbia only shows up in the presence of supercold liquid hydrogen rocket fuel at minus 423 degrees Fahrenheit.

Shuttle program director Robert Crippen said engineers plan to mount about 11 television cameras in Columbia's engine room for the first of at least two fueling tests to help pinpoint the leak.

Two of the cameras can be moved by remote control while eight small units will be aimed at specific targets. Another small camera may be mounted on a device called a ''Cobra'' that can be maneuvered about by remote control like a mechanical snake.

In addition, Crippen said if safety precautions can be worked out, a technician might be permitted to remain in the shuttle's engine room during the fueling procedure to look for leaks.

''I have asked the team to go out and tell me why we could not put somebody physically in there if the other means did not work,'' Crippen said during the news conference.

The problem is the engine compartment is flooded with inert nitrogen gas during fuel loading because the shuttle plumbing gets ''very cold and air would start liquifying and raining,'' Crippen said. ''People cannot live in pure nitrogen so they would have to be in some kind of (suit).''

In addition to the fueling tests, engineers are continuing to conduct room-temperature tests using helium. But so far, no leaks like the ones that forced NASA to ground the spaceplane have shown up under those conditions.

As of Tuesday, Lenoir said, NASA engineers were studying 83 potential leak sources, slowly working to narrow the list down.

Columbia originally was scheduled for blastoff May 30, but the ship was grounded the night before during fuel loading when sensors detected explosive hydrogen gas building up in the shuttle's engine room.

After Atlantis was grounded by a similar leak, NASA made two more attempts to launch Columbia on Sept. 6 and 18, but both tries were scuttled by hydrogen fuel leaks.

(SEPT. 27) UPI - Negotiators trying to come up with a deal to cut the budget deficit debated the fate of the capital gains tax behind closed doors on Capitol Hill in talks that recessed late Wednesday. They are expected to resume Thursday afternoon. A grim-faced Senate Republican leader Robert Dole says the UNexpectedly short session was laced with ''nice angry tones'' and there was ''NOT much'' progress.

President Bush flew to Minneapolis Wednesday night to continue campaigning for Republicans. The president met Independent-Republican Jon Grunseth, who is trying to upset Governor Rudy Perpich. Bush will attend three fundraisers Thursday morning and will meet a group of teachers. He will then fly on to Cleveland for another G-O-P money- raiser. At a stop in Chicago Wednesday night, Bush said he'll open the federal petroleum reserve for the first time.

Presidential son Neil Bush is expected to testify Thursday at a hearing into allegations that he acted improperly while a director of a Colorado thrift. The collapse of Silverado Banking, Savings and Loan in December 1988 is expected to cost taxpayers at least one-BILLION dollars. Bush... who was a director of the S-and-L from August 1985 to August 1988... is charged by the Office of Thrift Supervision with three violations of conflict of interest standards.

A spokesman for Guatemala's armed forces says four members of an elite army unit have been arrested and charged in the killing of an American. 49-year-old Michael Devine was working as an innkeeper and tour guide 130 miles north of

the capital when he was kidnapped June 8th. His body was found the next day on a jungle roadside. The United States reportedly threatened to cut off all military aid to Guatemala if the case was NOT resolved.

#90270u0231 09/27/1990 ~United Press International

(SEPT. 27) UPI - The case of a teen-ager accused of setting a boy on fire in New York went before a Brooklyn family court judge Wednesday. In a voice shaking with emotion, the prosecutor said the 13-year-old defendant twice set fire to David Opont... and laughed as the boy rolled in the snow, trying to put out the flames. But the defense lawyer said Opont couldN'T identify his attacker at first... and her client is NOT the one who committed the attack.

A bleak picture of student achievement was painted Wednesday by the Education Department in its annual Nation's Report Card. The report finds that most students CAN'T analyze what they read... CAN'T handle moderately challenging math problems... and have a limited understanding of American history. Education Secretary Lauro Cavazos calls the report a ''compendium of disappointment.''

#90270u0276 09/27/1990 ~United Press International

(SEPT. 27) UPI - Boston Red Sox second baseman Jody Reed refuses to believe the headlines.

Boston, which had lost 15 of its previous 21 games, scored five runs in the first inning en route to a 7-2 victory over the Cleveland Indians. The Red Soxmoved to within one-half game of the AL East-leading Toronto Blue Jays.

''We're in a good situation but it seems that everybody wants us to lose,'' said Reed, adding that news coverage of the team uses words like: '''folding, crashing and diving.' But we're not quitting, we're not dying.''

The Red Sox, which ended a three-game losing streak, had a 6 1-2-game division lead Sept. 4. Thursday, they can gain a tie for first place with a victory over the Tigers in a makeup game in Detroit. Toronto has the day off.

The Red Sox and Blue Jays meet in a three-game series in Boston starting Friday.

''If we go in there (Boston) even with them, and we'll find that out tomorrow, it's in our hands,'' Toronto Manager Cito Gaston said. ''It would have been nice to go in three or four up, but this is where we are.''

Luis Rivera capped Boston's burst in the first with a two-run single and starter Dana Kiecker, 8-9, allowed just two hits over six innings.

''I hope there were a lot of young kids watching tonight because they saw a good example of how not to pitch with a big lead,'' Kiecker said.

Boston ace Roger Clemens, plagued since Sept. 4 by tendinitis in his pitching shoulder, is scheduled to return to the mound in the Toronto series. The right-hander is 20-6 with a 1.98 ERA. Boston is 6-14 since Clemens last pitched, when they were 6 1-2 games ahead of Toronto.

In other AL games, New York defeated Baltimore 4-2, Seattle beat Detroit 8-4, Chicago over Minnesota 3-1, Milwaukee blanked Toronto 6-0, Oakland edged Kansas City 3-2 and Texas halted California 6-2.

In the National League, it was: San Francisco 7, San Diego 6; New York 4, Montreal 0; Pittsburgh 4, Chicago 3; St. Louis 8, Philadelphia 1; Cincinnati 5 Atlanta 2 and Houston 10, Los Angeles 1.

-- AROUND THE AL --

Yankees 4, Orioles 2

At New York, Chuck Cary scattered five hits over 6 2-3 innings and Steve Balboni's solo homer ignited a two-run fourth inning. Cary, 6-11, walked two and fanned seven. Dave Righetti pitched the ninth to earn his 35th save and 223rd of his career, establishing a major-league record for saves by a left-hander. Former Yankee Sparkey Lyle held the old mark of 222.

Mariners 8, Tigers 4

At Detroit, Jay Buhner collected a career-best four hits, including a two-run homer and RBI single, leading Seattle over Detroit. Eric Hanson, 17-9, allowed three earned runs and six hits in 7 1-3 innings. Bill Swift earned his sixth save. Detroit starter Frank Tanana, 8-8, suffered the loss.

White Sox 3, Twins 1

At Chicago, Greg Hibbard and Bobby Thigpen combined on a four-hitter. Consecutive two-out singles by Carlton Fisk, Frank Thomas, Dan Pasqua and Robin Ventura produced two first-inning runs off Minnesota starter and loser Kevin Tapani, 11-8, who remained winless since July 30. Hibbard improved to 14-9 and Thigpen hurled a scoreless ninth for his major league record 54th save.

Brewers 6, Toronto 0

At Milwaukee, Ron Robinson tossed a seven-hitter to pace Milwaukee to a win

over Toronto, shaving the Blue Jays' lead in the American League East to a half game over Boston. Robinson, 12-4, worked his sixth complete game of the season and second career shutout. Loser David Wells, 11-5, allowed three runs on eight hits in seven innings.

Athletics 3, Royals 2

At Kansas City, Mo., Bob Welch became the first 26-game winner in the AL in 22 years. Welch, 26-6, became the first AL pitcher to win 26 games in a season since Denny McLain won 31 for the Detroit Tigers in 1968. Dennis Eckersley notched his 45th save in 47 save opportunities. Bret Saberhagen, 5-9, was the loser.

Rangers 6, Angels 2

At Arlington, Texas, Rafael Palmiero's two-run triple and the longest pitching stint of Kenny Rogers' major-league career brought Texas the victory. Rogers, 10-5, won his seventh straight decision while making only his second start of the year. Kirk McCaskill fell to 12-11.

-30- 4442

#90270u0299 09/27/1990 ~United Press International

(SEPT. 27) UPI - The New York Mets have to keep winning because the Pittsburgh Pirates aren't losing.

For the second consecutive night, the Mets beat the Montreal Expos but failed to reduce their three-game deficit to the National League East-leading Pirates because Pittsburgh defeated the Chicago Cubs twice.

The Pirates reduced their magic number to five. Pittsburgh and New York each have seven games left; three of those games are against each other in a season-ending series in Pittsburgh.

''We are holding in there. We have no control of what is happening in Pittsburgh,'' Mets Manager Bud Harrelson said. ''We have to keep winning and hope that they do lose.''

David Cone, 12-10, helped eliminate Montreal from the NL-East race by allowing only two hits over eight innings. Montreal moved to within 4 1/2 games of first place last Friday but then suffered six straight defeats.

''We are doing what we have to do. We are putting our blown opportunities and frustration behind us,'' Cone said. ''There is no better medicine than winning in another team's park.''

The Mets play Montreal Thursday and then host the Cubs in a three- game weekend series. Then it's on to Pittsburgh.

''New York has to take care of the New York Mets until we get to Pittsburgh,'' Mets center fielder Daryl Boston said. ''We can't concern ourselves with them too much until we see them.''

New York jumped on Expos starter Dennis Martinez, 10-11, for two runs in the first inning. Howard Johnson walked and stole second. Dave Magadan doubled Johnson home for a 1-0 lead.

In other NL games, Pittsburgh shaded Chicago 4-3, San Francisco edged San Diego 7-6, St. Louis routed Philadelphia 8-1, Cincinnati downed Atlanta 5-2 and Houston pummeled Los Angeles 10-1.

In the American League, it was: New York 4, Baltimore 2; Boston 7, Cleveland 2; Seattle 8, Detroit 4; Chicago 3, Minnesota 1; Milwaukee 6, Toronto 0, Oakland 3, Kansas City 2 and Texas 6, California 2.

-- AROUND THE NL --

Pirates 4, Cubs 3

At Pittsburgh, Andy Van Slyke keyed a four-run fifth inning with a two-run triple and Zane Smith scattered seven hits. Smith, 12-8 overall and 6-1 since Pittsburgh obtained him from Montreal last month, pitched his fourth complete game and third in nine starts for Pittsburgh. Kevin Coffman, 0-1, was the loserin his first major league start.

Giants 7, Padres 6

At San Francisco, Matt Williams hit two homers and drove in five runs, taking over the NL RBI lead with 119. Randy O'Neal, 1-0, won with 1 2-3 innings of relief. Steve Bedrosian pitched a scoreless ninth for his 16th save. Dennis Rasmussen, 11-15, gave up both Williams' homers and took the loss.

Cardinals 8, Phillies 1

At Philadelphia, Todd Zeile, Felix Jose and Rod Brewer knocked in two runs apiece to guide St. Louis. Bryn Smith, 9-8, gave up five hits in seven innings. Jose DeJesus, 6-8, suffered the loss.

Reds 5, Braves 2

At Cincinnati, Jose Rijo struck out 11 while scattering eight hits and Eric Davis smashed a two-run homer. The victory, Cincinnati's fifth in six games, reduced the Reds' magic number for clinching the NL West to three. Rijo, 14-7, walked none and retired 11 in a row at one point in notching his seventh complete game.

Astros 10, Dodgers 1

At Houston, Franklin Stubbs drove in a career-high six runs and Jim Deshaies scattered four hits. The loss dropped the Dodgers 4 1-2 games behind Cincinnati in the division. Stubbs had a bases-loaded double and a three-run homer against his former teammates. Deshaies, 7-12, won for the first time since Aug. 25 and improved to 7-0 against Los Angeles in the Astrodome.

#90270u0301 09/27/1990 ~United Press International

TOKYO (SEPT. 27) UPI - Troops in Bhutan fired at pro-democracy demonstrators in six districts of the Asian country within the last week and killed hundreds of people, Japan's Kyodo News Agency reported Thursday.

Kyodo quoted written statements from several pro-democracy groups in Bhutan and C. J. Himali, a member of the Bhutan Support Group of Nepal, as saying at least 327 demonstrators were killed between last Thursday and Tuesday.

Himali also said nearly 500 people were shot and wounded during the army crackdown on demonstrators and about 2,000 were arrested, Kyodo said in the dispatch from the Nepalese capital Katmandu.

Many demonstrators were missing and believed killed in six districts, according to the written reports signed by officials of the Bhutan People's Party, the Students' Union of Bhutan, and the People's Forum for Human Rights in Bhutan, Kyodo said.

A poor kingdom in the eastern Himalayas between India and China, Bhutan became a British protectorate in 1910 and independent in 1949, but India guides its foreign policy. Bhutan became a kingdom in 1907 and did not open its doors to the outside world until the 1960s.

The Kyodo report said demonstrators were organized in the districts of Phuntsoling, Chamarchi, Samchi, Sibsu, Galefu, and Samrang.

The report said about half of the 327 killed died in Samrang last Friday.

In Samchi, one of the victems was allegedly shot inside an army vehicle after he was arrested, Kyodo said. At Chamarchi, near the Bhutan-Indian border, demonstrators were able to retrieve eight dead bodies after the army action, Kyodo said.

#90270u0317 09/27/1990 ~United Press International

BANGKOK, Thailand (SEPT. 27) UPI - Eighteen governments are protesting intensified political repression by Burma's military junta, which has detained and interrogated Burmese citizens working at foreign embassies, a senior diplomat said Thursday.

Inside Burma, meanwhile, Buddhist monks upset over the deaths of two monks shot by security police have effectively excommunicated military families in a move that is having a ''major impact,'' the diplomat said.

Earlier, official Rangoon radio announced the arrests of three people for writing and distributing poetry ridiculing the military junta, which has so far refused to turn over power to a legislature elected in May.

''A large number of governments, an increasing number of governments, view with horror what is continuing to happen in Burma,'' said a Rangoon-based diplomat who asked not to be identified.

The diplomat said the 12 European Community nations, joined by the United States, Japan, Sweden, Australia, Canada and New Zealand, recently issued a tough verbal protest against Burmese military repression in Rangoon.

The protest cited the recent arrests of the leaders of the National League for Democracy which swept 80 percent of the seats in the elections, continued repression of free speech, and moves away from a promised return to democracy.

It also protested the detention and interrogation of Burmese staff working for foreign embassies and raids carried out by armed troops on embassy compounds in violation of the Vienna agreements on diplomatic rights.

In the past 10 days, Burmese staff from the U.S., British and Australian embassies have been taken away for as much as four days of interrogation in a prison north of Rangoon, the diplomat said.

The questioning, he said, focused on the activities and opinions of embassy officials and their contacts with civilian political leaders.

The detentions were part of a campaign to intimidate the Burmese people to allow the military to maintain its 30-year domination of Burma despite the opposition party' s overwhelming election victory, he said.

Rangoon radio, in a broadcast Wednesday night, said Sein Hlaing, 35, Myo Myint Nyein, 38, and Nyan Paw, 36, were arrested earlier this month for commissioning distributing or writing ''poems that criticize, slander, and ridicule the leaders of the Defense Services.''

The diplomat said the arrests were part of the repressive campaign that has included torture, beatings, intimidation and firing into crowds of protesters.

''Their repression of their own people is continuing at exactly the same level if not intensified, as compared to before the election,'' the diplomat said.

The military, however, has been shaken, he said, by the action of the Buddhist leadership to effectively excommunicate all military families by refusing to perform marriages or alms ceremonies for them. The Buddhists are protesting the deaths of at least two monks shot by security police in Mandalay last month.

''This is having a very major impact on the rank and file of the military,'' he said.

Tuesday Maj. Gen. Tin U, a junta member, warned Buddhist monks against becoming involved in politics.

''Venerable abbots and monks should only practice their religion and work for religious affairs,'' he said in a radio broadcast. ''Arrangements are being made to enable the venerable monks to do this.''

The diplomat said Buddhist protests against the regime have spread from Mandalay to nearby cities.

''We do not believe that the Burmese people will continue to put up with this totally undemocratic, brutal military regime forever,'' he said.

He said there were signs some officers in the military were disquited by the junta's tough policies and would support negotiations with the civilian political parties on power-sharing arrangements.

But the key leaders in the junta have made it clear ''they have no intention of handing over power.''

(SEPT. 27) UPI - Wet ground from earlier rains combined with cool overnight temperatures Thursday to create a blanket of fog from Kentucky to Vermont, while storms rocked Kansas and streams flooded in Idaho.

Temperatures warmed across the South as high pressure remained in the region, bringing low temperatures in the 60s and highs in the 80s.

Rain during the day Wednesday left the ground wet in the Northeast and Middle Atlantic states and when cool night air met the warmer moisture, a blanket of fog was formed in several states.

Driving was perilous during Thursday's morning rush hour in Pennsylvania, New York, Vermont, Kentucky, Maryland and Virginia, and forecasters warned motorists to be especially careful in valleys and other low lying areas where fog was thickest.

Visibility was near zero in parts of south central New York state, the National Weather Service said.

Showers and thunderstorms stretched across northeast Kansas and heavy rain was reported about 20 miles north of the town of Manhattan.

To the west, thunderstorms with heavy rain and hail hit the southwestern Idaho valleys including Boise, flooding small streams and streets. Knee-deep water was reported in downtown Boise and 3 feet of water covered streets in surrounding areas.

Cool temperatures and cloudy skies covered New England and the Midwest had mostly clear skies.

Clear skies covered the West with some local fog, especially along the coast, and temperatures dipped into the 50s in Washington state and were in the 60s in Southern California.

#90270u0338 09/27/1990 ~United Press International

(SEPT. 27) UPI - Here is a roundup of the latest major events in the Persian Gulf crisis stemming from the Aug. 2 Iraqi invasion of the oil-rich emirate of Kuwait:

NEW YORK - The United States says Iraq's demand for a list of personnel at the U.S. Embassy in Baghdad is ''repugnant'' and the Bush administration will ignore the warning that hiding foreigners from authorities is punishable by death. Secretary of State James Baker, speaking in New York, said the Bush administration will not comply with the demand. ''That's absolutely right,'' Baker said when asked if he would refuse to give the names of the Americans as requested in Iraq's diplomatic note. ''We have read it, it's repugnant and we've rejected it.''

PARIS - Ten diplomats from the French embassy in Baghdad expelled from Iraq arrived in Paris Thursday as the first French troops began taking up position in Northern Saudi Arabia, officials said. France ordered the 4,000 troops deployed after Iraqi soldiers raided its embassy in occupied Kuwait earlier this month and seized three French citizens who had sought refuge there.

AMMAN, Jordan - Jordan announced it was suspending all flights between Amman and the Iraqi capital Baghdad to comply with the U.N. air embargo on Iraq, hours after it allowed Iraqi Airways planes carrying some Westerners to land. ''The government of Jordan decided to impose the ban after news reports accused our country of breaking sanctions against Iraq,'' said one Jordanian Foreign Ministry official.

CHICAGO - President Bush moved to quell energy jitters by saying Wednesday night he would authorize a test sale of 5 million barrels of oil from the nation's strategic reserve of 590 million barrels. The president also said he was taking the action in response to oil price gouging in the wake of the invasion.

DHAHRAN, Saudi Arabia - A U.S. Navy helicopter crashed into the Red Sea during

a routine training mission Wednesday but officials said all 17 occupants escaped before it sank. The Navy said an investigation was ordered into what caused the helicopter to crash about 5,000 yards from the aircraft carrier USS John F. Kennedy, where the chopper was based.

LANDING ZONE FOSS, Saudi Arabia - Marine Commandant Alfred Gray ordered his hot and dusty men Wednesday to banish boredom and morale problems and keep focused on their mission in the Saudi desert, where he said will probably last six months. ''Is it going to be easy? Hell no,'' the ruddy-faced four-star general said. ''Are we going to do it? Hell yes.''

TOKYO - Prime Minister Toshiki Kaifu is expected to announce Thursday his proposal for amending Japanese law to allow the deployment of non- combat troops to the gulf, news reports said. Kaifu will propose a ''U.N. Peace Cooperation Corps'' of unarmed military personnel and civilians, the Kyodo News Service said.

PARIS - Terrorist leader Mohammed Abul Abbas warned Wednesday of a ''war without limits'' if Iraq is attacked and threatened to strike the United States and Western Europe. He said Palestinians support Iraq because it was the first country to link the Palestinian cause to the Persian Gulf and the petroleum crisis.

BUCHAREST, Romania - The Romanian government offered American, Canadian and British soldiers and their wives and children hotel accommodations at Black Sea resorts for rest and recreation during the gulf crisis. The government will also send mineral water to troops involved in Operation Desert Shield, the official news agency Rompres said.

#90270u0358 09/27/1990 ~United Press International
(SEPT. 27) UPI - Around the World... Around the Clock... the latest news from U-P-I: .

President Bush is taking steps to quell energy jitters stemming from the Persian Gulf crisis. He said outside Chicago last night he will authorize a test sale of five-Million barrels of oil from the nation's strategic petroleum reserve. He says the oil market ''is very tight,'' but says there is enough to meet current needs. .

Crude oil prices rose on world markets yesterday... because of rumors about the Persian Gulf crisis. One rumor said a U-S warplane was shot down in the Middle East, but the Pentagon denied it. In Europe, oil rose to more than 40-dollars a barrel, and in New York it closed at more than 38-dollars.

Budget negotiators came up short again last night in their bid to reach agreement on a 500-BILLION-dollar deficit reduction plan. Little progress was

reported in talks that recessed late last night. The negotiations resume this afternoon. If NO agreement is reached by Monday, automatic budget cuts go into effect.

David Souter is virtually assured of approval today when the Senate Judiciary Committee votes on his nomination to the Supreme Court. Two liberal Democrats yesterday said they would support Souter, which gives him a total of four Democrats and all six Republicans. The full Senate could vote as early as next week.

The movie industry scrapped its X-rating and replaced it with ''N-C- 17''- NO Children under 17. The Motion Picture Association changed the system in response to criticism of its X-category. Critics say the X- rating, usually associated with pornography, UNfairly taints legitimate adult-oriented movies.

#90270u0474 09/27/1990 ~United Press International

(SEPT. 27) UPI - Stock prices on the Tokyo Stock Exchange continued to fall Thursday, as investor interest failed to recover from the impact of Wednesday's 4.7 percent plunge.

The blue-chip Nikkei Average of 225 selected issues, which plunged 1, 108.70 points Wednesday, fell another 478.71 points - or 2.2 percent - to 21,771.91 - its lowest close since Jan. 5, 1988.

The broader-based Tokyo Stock Exchange Price Index, which dropped 67.92 points Wednesday, slid another 31.18 points to 1,620.26 - its lowest level in nearly four years.

Declines hammered advances 856 to 102, while 64 issues remanined unchanged.

Trading was heavier than had been seen in recent days but remained light for the market's historical average as an estimated 430 million shares changed hands, up from 365 million shares Wednesday.

Elsewhere in Asia, stocks closed slightly lower in moderate trading on the Hong Kong Stock Exchange as stocks continued to slump as a result of the Gulf crisis.

The Hang Seng Index, which fell 28.76 points Wednesday, lost another 10.79 points to 2,767.95.

Among the narrower indexes, properties rose 15.64 points, industrials shed 1.33, financials dropped 1.87 and utilities tumbled 60.74 points.

An estimated 560 million shares changed hands, compared with 690 million shares on Wednesday.

In Bangkok, stocks closed slightly higher in moderate trading on the Thailand Stock Exchange as foreign investors returned to the market.

The Stock Exchange of Thailand Index, which gained 11.11 points Wednesday, added another 5.09 points to 630.15.

An estimated 1.4 billion shares chnaged hands, up from the 1.2 billion shares Wednesday.

In Singapore, stocks closed mixed in light trading on the Singapore Stock Exchange.

In Australia, stock prices closed mixed in light trading on the Sydney Sharemarket.

The All Ordinaries Index, which eased 7.8 points Wednesday, rebounded the same 7.8 points to 1,393.6. The All Industrials index lost a modest 2.0 points to 2,027.67 and the All Resources index eased 1.4 points to 878.3.

An estimated 86.6 milliion shares changed hands, compared with 95 million shares Wednesday.

#90270u0535 09/27/1990 ~United Press International

CICERO, IND. (SEPT. 27) UPI - Authorities offered a reward for information about the vandalism to the grave of Ryan White, who became known worldwide during his five-year struggle against AIDS.

Hamilton County Sheriff's Deputy Gene Stilts said damage to the area at the Cicero Cemetery was minor.

Stilts said the vandalism was believed to have occurred Sept. 14. He said flowers were pulled from pots and tossed around and a maroon metal- and-glass candle holder was thrown aside as were statues of angels.

The monument was not damaged and Stilts said he replaced the candle holder.

White was 18 when he died April 8 after battling acquired immune deficiency syndrome through a blood transfusion. He became internationally known after he and his mother, Jeanne, battled with officials to allow him to attend public school. He became a symbol of AIDS education and a source of inspiration for those suffering from the disease.

#90270u0610 09/27/1990 ~United Press International

TUNIS, Tunisia (SEPT. 27) UPI - The meeting of the Arab League had hardly opened Thursday when the Kuwaiti and Iraqi ambassadors squared off.

Iraqi Ambassador Alouane Jabouri began by complaining about Kuwait's presence at the session of the Arab League's governing council on grounds the Persian Gulf emirate no longer exists as an independent state.

Kuwaiti Ambassador Nasser al Jihane replied: ''Here is new proof that Iraq wants to divide the Arabs. It is Iraq that is destroying Arab security.''

''Who has been excluded from the Asian games? Iraq,'' the Kuwaiti ambassador said in answering his own question. ''Who is absent today from the United Nations and is hiding in Baghdad if not Tariq Aziz,'' he asked referring to the Iraqi foreign minister.

''By contrast, Kuwait is present everywhere,'' he said.

Tapping his hand on the table to stop his Kuwaiti counterpart, Jabouri replied: ''It is not Tariq Aziz that is hiding but those that have invited the imperialist forces to their countries so they can hide under their boots.''

The brief session broke up after the Palestine Liberation Organization passed the group's rotating presidency to Qatar.

#90270u0615 09/27/1990 ~United Press International

(SEPT. 27) UPI - Authorities say a well armed man has barricaded himself in a hotel bar near the University of California campus at Berkeley. Police say the gunman shot a police officer and possibly more people in the Durant Hotel. The wounded have been taken to hospitals. Police have surrounded the hotel, but there is NO word on whether they have made contact with the gunman.

Secretary of State Baker says the Bush administration will NOT comply with Iraq's demand for a list of U-S Embassy workers in Baghdad. Baker told New York reporters the demand was- in his words- ''repugnant and we've rejected it.'' Iraq called for the list of Americans on the grounds that hiding foreigners amounts to ''a crime of espionage'' which carries a death sentence.

Government leaders at the U-N General Assembly want to give peace a chance in the Persian Gulf crisis. British Foreign Secretary Douglas Hurd told reporters yesterday have ''to give the precious time for peace to build up'' Hurd says he expects the U-S-led multi-national force to stay in the gulf ''longer than three months. The multi-national force was deployed after Iraq invaded Kuwait August 2nd.

Soviet lawmakers have adopted in principle a bill to end seven decades of official atheism. The Soviet news agency Tass says the bill upholds separation of church and state- quoting- ''as has been accepted in all civilized countries.'' Deputies in the Supreme Soviet halted discussion on the matter until Monday, after they accepted the bill in principle, but failed to put it into effect.

Another New York City youth was shot and killed early today... hit by a stray bullet. 13-year-old Levy Mitchell died in a Bronx hospital after he was struck by gunfire while visiting friends in the Bronx. He's the sixth New York City youth to be hit by random gunfire since Friday. Police arrested a 15-year-old boy for shooting a 13-year-old girl yesterday. She is in stable condition after being hit by a stray bullet.

-30- 2148

#90270u0621 09/27/1990 ~United Press International

(SEPT. 27) UPI - Japan's Kyodo news agency reports troops in Bhutan fired at pro- democracy protesters in six districts of the Asian nation during the past week. The report says hundreds of people were killed. The news agency quotes statements from several pro-democracy groups in Bhutan indicating 327 demonstrators were killed between last Thursday and Tuesday. Bhutan is a poverty-stricken kingdom in the eastern Himalayans between India and China.

Police in Saugus, Massachusetts, are searching for a tall, muscular man who allegedly tried to abduct a five-year-old boy. Police say the boy bit his attacker in the face and escaped. Police say the boy was walking across a street to his home last night when a white car pulled up and the driver tried to pull him inside. The child bit the man and he let him go.

A Georgia textbook panel ignored charges of a ''witch hunt'' and rejected a controversial ''Impressions'' reading series for the state's elementary schools. Opponents of the series complain that it dwells on witches, ghouls and New Age ideas. A panel's 13-8 vote last night, virtually assures the series will be used in few, if any, Georgia public schools. Publisher Harcourt

Brace says only 22 of 822 stories in ''Impressions'' mentions ghosts or goblins.

#90270u0642 09/27/1990 ~United Press International

ATHENS, GREECE (SEPT. 27) UPI - Iran's ruling clerics have asked people to turn out in large numbers for demonstrations against the presence of U.S. forces in the Persian Gulf, Tehran radio said Thursday.

In broadcasts monitored in Athens, the radio called on people to assemble at five points in Tehran on Friday and march toward the Tehran University prayer grounds to protest the presence of U.S. troops in the region.

The call was made by the Committee to Coordinate Islamic Propaganda, which asked for similar demonstrations to be held simultaneously in other Iranian cities.

Since the Persian Gulf crisis began with the Iraqi invasion of Kuwait Aug. 2, Iranian clerics have expressed more concern about the growing presence of U.S. troops in the area than Iraq's occupation of its neighbor.

On Sept. 12, Iranian religious leader Ayatollah Ali Khamenei said a struggle against the U.S. presence in the region would be counted as a Jihad, or holy war, and that anyone killed in the struggle would be considered a martyr.

Iran has expressed little sympathy for its Arab neighbors in the gulf threatened by Iraqi expansionism.

-30- 1326

#90270u0643 09/27/1990 ~United Press International

ATLANTA (SEPT. 27) UPI - Georgia-Pacific Corp. said Thursday it completed definitive agreements to sell containerboard and packaging assets and related timberland to Packaging Corp. of America and GE Capital in a $740 million deal.

The transaction, previously announced, was approved by Georgia- Pacific's board of directors Wednesday.

Included in the sale are a linerboard mill at Valdosta, Ga., a corrugatingmill at Tomahawk, Wis., 19 box plants, approximately 540,000 acres of timberland which Georgia-Pacific owns, and cutting rights to a substantial amount of additional timberland.

PCA, a subsidiary of Houston-based Tenneco Inc., and GE Capital are committed to enter into agreements leasing to PCA the assets that GE Capital acquires from Georgia-Pacific.

The transaction, which is expected to be completed by the end of the year, is subject to termination of the waiting periods under the federal antitrust premerger notification rules, completion of the lease arrangements between GE Capital and PCA, and completion of the financing for the assets GE Capital is acquiring.

#90270u0648 09/27/1990 ~United Press International

BEIJING (SEPT. 27) UPI - The Olympic Council of Asia Thursday selected Bangkok to host the 1998 Asian Games, but decided to postpone for six months the appointment of a new president to replace the Kuwaiti sheik slain in the Iraqi invasion in August.

Bangkok was chosen ahead of Djakarta and Taipei. The 1994 Games had already been awarded to Hiroshima, Japan.

The AOC delayed taking any action over the presidential vacancy because of a split in ranks.

Former president Sheikh Fahad Al Ahmad Al-Sabah, half-brother of the now exiled-emir, was killed Aug. 2 defending the Royal Palace against the invading Iraqis.

His son, Sheik Ahmed Fahad Al-Sabah, was among the candidates for the presidency, along with Chinese International Olympic Committee Vice President He Zhenliang, Indonesian tycoon Bob Hassam and Sri Lanka's Roy de Silva.

''I didn't want to have the election now because I wanted to preserve the solidarity of Asia,'' announced the 30-year-old sheik, saying he had a majority of 24 votes.

Some delegates believed Sheikh Ahmed was too inexperienced for the position, but others felt it necessary to preserve annexed Kuwaiti's high profile in Asian sports.

Hong Kong delegate A. De O. Sales, who chaired the meeting, said the decision was deferred ''to let the dust settle and to give people proper perspective.''

He said under the OCA constitution there was an age minimum for president of 35 years old, but ''the general assembly is empowered to suspend or waive those qualifications and if the rules were suspended, Fahad could be the president.

''The atmosphere was a happy one but not docile,'' he said.

The decision to postpone was ''an overwhelming majority,'' Sales said.

The meeting will be held in Saudi Arabia which was chosen ahead of Japan. The Kuwait national olympic committee has been based in Riyadh since the Iraqi invasion.

-30- 2060

#90270u0663 09/27/1990 ~United Press International

CHICAGO (SEPT. 27) UPI - The fate of an employee buyout of United Airlines dominated the agenda of the regular monthly meeting of UAL Corp. directors Thursday as the Oct. 9 deadline for financing the deal drew closer.

The UAL board already has extended the deadline once; it was originally Aug. 9. But Iraq's invasion of Kuwait - and resulting higher fuel costs and lower earnings for airlines - have stymied employee efforts to line up bank backing for the $4.4 billion, $201 a share bid.

Analysts are unanimous that a buyout cannot be financed at that price. That investors agree is evident in the price of UAL stock - more than $100 below the buyout price.

Directors faced new pressure to bolster stock value as they convened Thursday to get a progress report on the buyout and review possible options - including an expected scaled-down offer by employees and a restructuring backed by UAL Chairman Stephen Wolf.

United Employee Acquisition Corp. - which groups the pilots, flight attendants and machinists unions and non-union UAL employees - were trying to sell directors on a revised offer worth about $3.7 billion.

Under that plan, the employee group would acquire 80 percent of UAL for about $175 per share - $150 of it in cash, and the remainder in preferred stock and a ''stub.''

United Employee Acquisition has pitched the proposal to 26 banks and set next Thursday as a tentative deadline for banks to join the $2 billion financing package. As an incentive, it is offering bank and loan syndication fees totaling around $210 million.

But a source close to Wolf said the UAL chairman was adamantly opposed to any scaling down of the $4.4 billion bid and believed there were better alternatives available to boost stock value.

Wolf and UAL Executive Vice President John Pope - the company's chief financial officer and a member of the board - were buttonholing outside directors to back an extensive restructuring and expansion plan, board sources said.

Going into Thursday's meeting, the 11 outside directors were reported almost

evenly divided between working with the employee group on a revised buyout plan and letting the clock run out on the employee bid to pursue Wolf's course of restructuring and expansion.

But the collapse of an employee buyout could spell labor trouble for UAL.

All three of the airline's unions - the Airline Pilots' Association, the Association of Flight Attendants and the International Association of Machinists - are working under open contracts.

The unions agreed to a moratorium on labor negotiations while pursuing the employee buyout. As a result, United's labor costs have been lower than those of other carriers. They also have agreed to massive concessions as part of the buyout.

But if the buyout disintegrates, UAL will have to deal with the unions at the bargaining table.

Leaders of United's pilots union already have served notice they will be making tough demands for retroactive pay and benefits improvements - if the employee buyout fails and they return to negotiations.

#90270u0681 09/27/1990 ~United Press International

TOKYO (SEPT. 27) UPI - Monica Seles and Jennifer Capriati lost quarterfinal matches Thursday in the $350,000 Nichirei International Ladies Tennis Championships.

Top seed Martina Navratilova enjoyed an easier day, routing Stephanie Rehe 6-1 6-3 in the second round.

No. 8 seed Stephanie Frazier upset Seles, the 16-year-old French Open champion 5-7, 7-5, 6-2. Seles, the No. 2 seed from Yugoslavia, sprained her ankle during the second set.

No. 3 Katerina Maleeva of Bulgaria dropped No. 6 seed Capriati 7-6 (7-4), 3-6, 7-6 (7-3).

In the other second-round matches, No. 4 Mary Joe Fernandez of Miami beat Cristina Tessi of Argentina 6-3, 6-1; No. 5 seed Helena Sukova of Czechoslovakia downed American Marianne Werdel 6-7 (4-7), 6-3, 6-2; and No. 7 Manuela Maleeva-Fragniere of Bulgaria topped Peanut Louie Harper of San Francisco 6-2, 6-2.

Friday, Navratilova meets Maleeva-Fragniere while Fernandez faces Sukova in the quarterfinals. Frazier plays Katerina Maleeva Saturday in the semifinals.

All of Seles' previous three matches with Frazier went three sets, with Seles winning each. However, after coming from a 4-0 deficit in the second set to take a 5-4 lead, Seles slipped and sprained her ankle while leading 30-15. Frazier rallied to break Seles' serve then won the next two games to force a third set, which she won easily.

Capriati, the 14-year-old rookie pro from Wesley Chapel, Fla., led 30-0 while serving for the match, but failed to put Katerina Maleeva away. Capriati also led 4-3 in the tie-breaker, but Maleeva rallied to win the final four points to take the match.

Fernandez fell behind 3-2 to Tessi in the opening set and double- faulted to trail 40-0 before serving an ace and ripping a pair of forehand winners to force the game to deuce. Tessi's two unforced errors gave the game to Fernandez, and she dominated the rest of the match.

#90270u0697 09/27/1990 ~United Press International

NEW DELHI, INDIA (SEPT. 27) UPI - A high school student set himself ablaze and police shot dead one demonstrator Thursday as sporadic protests against a federal job quota program flared despite a police order barring public assembly.

Police fired at angry mobs in at least two different sections of the city, killing one person and wounding at least six others, the Press Trust of India news agency reported. In one case, the rampaging youths burned vehicles and looted shops, the agency said.

In the western part of the capital, high school student Anil Kumar poured fuel on his body and set himself ablaze in protest over the job quota system. At least eight other people have set themselves ablaze since Sept. 19, including one who later died.

In a gruesome twist to the wave of self-immolations, a man who worked as a clothes washer in northern Himachal Pradesh state reportedly set himself ablaze Wednesday night to protest the continued anti-job quota strikes in the region.

A government administrator told the Press Trust of India that the man said he was ''fed up'' with the continued strikes because he was poor and his children were starving.

Clashes, demonstrations and protest suicide attempts also were reported in several states across the northern part of the country, but the level of violence Thursday was considerably lower than the previous two days.

At least 11 people have been shot dead by police since Tuesday, when violent

protests erupted in reaction to the death of a student who set himself ablaze to protest a government decision to reserve 27 percent of all federal jobs for the so-called backward classes.

Prime Minister V.P. Singh, who announced the program Aug. 7, issued a televised appeal for calm Wednesday night, but he rejected calls for his resignation and said he would not overturn his decision to implement the job quota scheme.

Police issued an order Wednesday night barring the public assembly of more the five people in many areas of the capital. The order also outlawed demonstrations and slogan-shouting.

Curfews have been imposed on several cities across north India because of the violence.

High-caste youths oppose the job reservation scheme because it will restrict ability to enter India's government service. They also charge that the move will enshrine the caste system in law and increase government inefficiency by eliminating merit.

Proponents of job reservation say it will give lower-caste citizens, who represent about 54 percent of India's 830 million people, a better opportunity to obtain government employment, which traditionally has been the domain of the upper castes.

The latest quota decision will not affect the harijans, or untouchables, who are at the bottom of the caste system. Since the 1950s, 22.5 percent of all federal jobs have been reserved for them.

Under the ancient caste system, Hindus are born into four basic levels of society, with the priestly Brahmins at the top and the untouchables, who are restricted to menial tasks, at the bottom. Traders, farmers and others belong to the two intermediate castes.

#90270u0704 09/27/1990 ~United Press International

KINGSTON, MASS. (SEPT. 27) UPI - A church deacon faced arraignment Thursday for allegedly murdering his young neighbor after police investigating the teenager's disappearance found her body buried in his basement.

Henry Meinholz, 52, a bookkeeper for a lumber company, was arrested Wednesday after the body was discovered in his cellar.

The body was exhumed after authorities obtained a court order, and investigators were waiting the results of an autopsy Thursday to confirm their suspicions that it was the remains of Melissa Benoit.

Benoit, 13, vanished Sept. 15 after spending the afternoon watching television at another neighbor's house. She is believed to have left that house, located 50 feet from her own, to visit the grave of her father, who died one year ago last week.

Her disappearance sparked a massive search and nationally televised pleas for her safe return. Henry Meinholz and his wife reportedly were among the hundreds of neighbors and friends who combed the South Shore town looking for the missing girl.

About 90 minutes after the body was found, Plymouth County District Attorney William O'Malley announced that Meinholtz had been charged in the eighth-grader's murder.

Benoit lived with her mother one door away from the Meinholtz house in Kingston, a quiet community of 4,300 about 25 miles southeast of Boston.

His attorney said Meinholtz would plead innocent to the charge at his arraignment in Plymouth District Court, but offered no further comment.

Melissa's disappearance was brought to a national audience Sept. 21 when Benoit's mother, Diane Richard, appealed for her daughter's return on the television program ''America's Most Wanted.''

Kingston Police Chief Alan Ballinger said ''investigative techniques'' and questioning of several people led them to Meinholz, but he declined to elaborate. He said the psychics played no role in the discovery of the body.

#90270u0715 09/27/1990 ~United Press International

JACKSON, MS (SEPT. 27) UPI - Security Savings and Loan Association of Jackson has accused federal regulators of reneging on contracts signed in the mid-1980s when it took over two struggling thrifts with government assistance.

The allegation was made in a U.S. District Court suit filed Wednesday against the Office of Thrift Supervision, the agency that oversees savings and loans. The suit does not affect the day-to-day operations of Security, which has 17 branches.

In the suit, Security alleges the government refuses to honor contract terms because of changes in accounting policy brought about by the 1989 federal savings and loan bailout bill.

Security is seeking restitution of about $24 million if the court rules the contract terms invalid.

H.C. Bailey, Security's chairman and chief executive officer, told a news conference the government's decision not to honor the contracts could force the thrift to sell subsidiaries to raise money to meet government capital standards for savings and loans.

''We do not believe that the government or the regulators have the authority to abrogate the contractural rights,'' Bailey said. ''In any business transaction you have to rely on contracts and agreements, and that is the whole basis of our lawsuit. I clearly think we are being penalized for helping the government.''

Security, which has about $306 million in assets, was an aggressive acquirer of ailing savings and loans in the 1980s because of its sound financial position.

The dispute revolves around Security's acquiring North Mississippi Savings and Loan in Oxford in 1984 and Security Trust Savings and Loan in Knoxville, Tenn. in 1985.

Security alleges in the suit that the dispute centers on the way government assistance was listed on the balance sheet. It said the government agreed to let $9 million of income capital certificates issued and $3.5 million in cash contributions from the FSLIC be listed as assets. Additionally, about $11 million in good will - the price paid more than an institution's actual value - could be treated as an asset.

''Without these benefits, Security would not have been willing to make these acquisitions,'' Bailey said. ''We would never have acquired the first S&L.''

Security officials said the government reneged on the contract terms following passage of the bailout plan in August 1989 and that talks with regulators have proven fruitless.

''We have never gotten a definitive answer explaining why they will not honor the contrats,'' said John Shows, a Security executive vice president and legal counsel.

(SEPT. 27) UPI - Police in the Philippines say suspected rebel soldiers exploded bombs at a toothpaste firm and two drug labs, causing minor damage but NO injuries. The bombings are part of a new offensive apparently aimed at multi-national and American companies.

The president's son, Neil Bush, is expected to testify today at a Denver hearing on his role in the 1988 collapse of Silverado Banking, Savings and Loan. Neil Bush served for three years as an outside director of Silverado.

The unification of the two Germanys takes place next Wednesday, and Berlin authorities are concerned that radical protests might mar the ceremonies. Officials say a rampage by radical youths last Sunday might indicate more to come.

In New York City this morning, a 13-year-old boy who was visiting friends in the Bronx died after being shot in the chest. Levy Mitchell is the sixth child struck by random gunfire in the city since Friday. He's the 21st shot since July 22nd.

In Kingston, Massachusetts, the next-door neighbor of a missing teen- ager was charged with the girl's murder after police found a body buried in his basement. 52-year-old Henry Meinholz reportedly had helped in the search for the girl.

The National Football League commissioner has ordered New England Patriots receiver Zeke Mowatt to appear at league offices by tomorrow to discuss an alleged sexual harassment incident. Mowatt was fined by team management for verbally abusing a woman reporter last week in the team's locker room.

WASHINGTON (SEPT. 27) UPI - World Bank President Barber Conable said Thursday he believes the global lending institution has adequate resources and programs to handle any short-term economic distruptions caused by rising oil prices.

Conable, in a briefing for reporters before the start of the final session of the joint annual meeting of the International Monetary Fund and World Bank, said some new programs may be needed if oil prices remain inflated for a prolonged period.

''We are not pushing for a facility now because we don't want a facility until it is needed,'' he said. ''''If this crisis extends into '' extends into

Conable also reiterated support for a plan launched by IMF Managing Director Michel Camdessus calling for countries profiting from higher oil prices to contribute the windfall to a special fund to help less fortunate nations.

''Clearly we'd expect those who have a windfall to reflect that in their relationship with the global community,'' he said.

The World Bank's president also said it is important any emergency lending programs be designed to meet short-term needs rather than alter long-range economic planning.

Conable's remarks came a day after the first meeting of the U.S.-led Gulf Crisis Financial Coordination Group, a multilateral effort to boost the economies of countries most severely affected by rising oil prices.

Since Iraq's Aug. 2 invasion of neighboring Kuwait, oil prices have more than doubled and several countries have begun feeling the pinch. The World Bank has projected the global economy will slow this year because of higher oil prices, marking the first slowdown in seven years.

''It's obvious the gulf crisis accentuates the problems of development,'' he said.

Richard Prebble, New Zealand's minister of state owned enterprises, said in an address to international bankers and finance officials from 152 nations that economic mistakes made during previous oil shocks are still haunting the global economy.

''Many countries, including New Zealand, which borrowed heavily in an effort to cocoon themselves from higher prices, are still laboring unde the resulting debt burden,'' Prebble said.

''Those countries which recovered quickly from the shocks were those which implemented policies such as allowing higher prices to flow through to oil users and keeping monetary policy firm.''

Prebble said more expensive oil is not deadly to economic progress, but failing to respond to the increases appropriately can be very costly.

''The world economy cannot afford to ignore the lessons of the past,'' he said. ''The lesson from the oil shock of the 1970s is that higher oil prices need not lead to either inflation or recession.''

#90270u0780 09/27/1990 ~United Press International

FAIRVIEW HEIGHTS, IL (SEPT. 27) UPI - Two Zeigler Coal Co. mines remained closed Thursday in the wake of a pay dispute that has affected about 528 miners.

A spokesman for Zeigler also said Thursday the firm planned to lay off 53 miners effective Monday at the two idled mines.

''One has nothing to do with the other,'' said Jim Telle, a spokesman for Zeigler. ''The layoffs were planned before this came up.''

Telle said about 238 miners walked off the job Tuesday at Old Ben No. 24 and about 290 miners did the same Wednesday at Old Ben 26. Both mines are near Sesser, Ill.

The walkout was to protest an announcement that employees would be paid on Friday rather than Tuesday.

Zeigler bought four Illinois-based Old Ben mines in July from British Petroleum. Telle said the change was to get the Old Ben pay periods in line with other Zeigler operations in Illinois.

Zeigler President Mike Reilly said the layoffs are necessary to maintain competitiveness in a slow market.

Telle said the layoffs effective Monday would involve about 21 miners at Old Ben No. 24 and 32 miners at Old Ben No. 26.

Telle said he knew of no negotitations between company and union officials and assumed both mines would also be closed on Friday.

#90270u0798 09/27/1990 ~United Press International

INDIANAPOLIS (SEPT. 27) UPI - The U.S. Food and Drug Administration has approved a device made by the Indianapolis-based Eli Lilly and Co. to treat patients with clogged arteries.

Lilly officers said Wednesday the tool, called the Simpson Coronary AtherCath, is an atherectomy catheter that removes the material clogging the blood vessel rather than just flattening it.

The device is the first of its kind to gain FDA approval, Lilly said. The tool cuts, captures and removes plaque, which causes clogging.

The device is made and sold by Devices for Vascular Intervention Inc., a California company that Lilly bought for $50 million in 1989.

Physicians currently use a procedure in which a balloon catheter is inserted into the artery and inflated to flatten the plaque.

The Indiana Heart Institute helped test the new Lilly tool.

''It's an important device,'' said Bruce F. Waller, a cardiac pathologist with the institute. ''It has specific uses and it will add to the tools we have available, but it's not going to sweep everything else off the table.''

#90270u0803 09/27/1990 ~United Press International

(SEPT. 27) UPI - A stand-off continues in Berkeley, California, where a ''well-armed'' gunman has killed one student and wounded at least eight other

people in a hotel bar near the University of California campus. Police say the gunman is believed to be holding more than a dozen people at gunpoint. Several people managed to escape or were freed as the four- hour hostage drama dragged on. One of the wounded was a police officer.

President Bush is moving to ease worries about energy in the wake of the Persian Gulf crisis. He told a G-O-P fund-raiser near Chicago last night that he will O-K a test sale of five-Million barrels of oil from the nation's strategic reserve of 590-Million barrels. Bush says he's acting in response to oil price gouging on world markets after Iraq invaded Kuwait last month.

Secretary of State Baker meets again today with his Soviet counterpart to discuss co-operation, including military co-ordination. Baker and Soviet Foreign Minister Shevardnadze met for four hours yesterday, but discovered they had too many topics and NOT enough time. Hence, a meeting this afternoon in New York City, where both men are visiting the United Nations.

David Souter managed to keep quiet about his views on abortion during his Senate Judiciary Committee hearings. Today, the panel votes on his Supreme court nomination. Souter has won the support of two liberals on the panel- Senators Patrick Leahy of Vermont and Herb Kohl of Wisconsin- making approval a certainty. Both men praised Souther as being open-minded.

A teen-ager visiting friends in the Bronx has become the sixth child in New York City to be hit by a stray bullet since Friday. Police say 13-year-old Levy Mitchell was shot in the chest and taken to Bronx- Lebanon Hospital where he died this morning. Since Friday, six children have been hit by gunfire in New York, including a 12-year-old girl who died Sunday.

#90270u0809 09/27/1990 ~United Press International

(SEPT. 27) UPI - In South Africa, an earthquake shook the city of Welcom, 170 miles southwest of Johannesburg, killing two gold miners. Researchers say the quake measured four-point seven on the Richter scale and lasted several seconds. Officials say falling rocks in a gold mine killed two miners and injured five other people.

The movie industry did away with its X-rating yesterday in favor of ''N-C-17 '' meaning, ''NO Children under 17.'' It's the Motion Picture Association's response to sharp criticism of the X-category, which some filmmakers believed UNfairly tainted legitimate adult-oriented movies with a label synonymous with hard-core pornography.

So far, NO jurors have been seated in the trial of a Cincinnati, Ohio, art museum and its director accused of obscentity for displaying the work of photographer Robert Mapplethorpe. Jury selection resumes today.

Authorities in Tucson, Arizona, say a four-week-old girl was mauled to death in her bassinet yesterday by a family dog. Police say the dog was a full-grown malamute the family had owned since last June. Police say the baby girl's mother and her husband went to sleep at about midnight and awoke to find the child ''had been mauled over her entire body.''

#90270u0844 09/27/1990 ~United Press International

(SEPT. 27) UPI - Police in Berkeley, California, say they have NOT been able to contact an armed man who's holding about one dozen people hostage in a hotel bar near the University of California. Authorities say the man is irrational. Police say he invaded the bar in the Durant Hotel shortly after midnight and started shooting. At least nine people were wounded, including a U-C student who later died.

The French consul to Baghdad arrived in Paris today along with nine other French diplomats who were expelled from Iraq. He says morale is good among French citizens being held by Iraq as human shields against possible Western attack. The French diplomats were expelled in retaliation for the expulsion of 11 Iraqi diplomats by Paris.

Two miners were killed and five hurt when a moderate earthquake shook the South African city of Welkom and its goldfields today. The quake measured four-point-seven on the Richter scale, and caused some surface damage. In southeast Missouri, an aftershock to yesterday's mild earthquake struck last night but caused NO serious damage or injuries. The earlier quake also caused NO damage or serious injuries.

E-P-A Administrator William Reilly says the nation must do a better job of focusing environmental cleanup efforts. He told the National Press Club yesterday that the country must determine which pollution problems are the biggest health and ecological risks... and then focus on those targets. He released a study identifying top concerns- indoor and outdoor air pollution... worker exposure to chemicals... and drinking water contamination.

#90270u0854 09/27/1990 ~United Press International

CHICAGO (SEPT. 27) UPI - The prospect of near- term export business resulted in scattered buying on the Chicago Board of Trade.

Midmorning prices were mostly higher in relatively light trading. Some traders were on the sidelines awaiting release of the grain stocks report later in the day.

The Agriculture Department has targeted the Soviet Union for 500,000 tons of wheat flour, Morocco 1.2 million tons of wheat and 17 African countries for

500,000 tons of wheat.

Representatives of the United States and the USSR have completed their talks in Washington. Agriculture Undersecretary Richard Crowder says the Soviets assured him they will meet their commitments under the old and new long-term grain supply agreements.

Soybeans were higher and corn was mostly higher at midmorning, although gains were limited by increased harvest activity. Liquidation ahead of the stocks report also kept a lid on corn prices.

Wheat was fractionally higher on short- covering.

The midmorning prices:

Corn Dec 2.28 1/2 up 1/4; Mar 2.37 1/2 off 1/4; May 2.43 1/2 off 1/4.

Soybeans Nov 6.18 1/4 up 2 3/4; Jan 6.33 up 3; Mar 6.46 up 3 3/4; May 6.55 1/4 up 4.

Wheat Dec 2.77 1/4 up 3/4; Mar 2.91 up 1/2; May 2.98 3/4 up 1.

Oats Dec 1.16 1/2 up 2 1/4; Mar 1.26 1/2 up 1 3/4; May 1.33 up 1/2.

#90270u0861 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - More than 100 students at the University of the District of Columbia, protesting the way the school is run, occupied two campus buildings for a second day Thursday and forced the cancellation of classes.

Campus police said university officials closed all three campuses when the students refused to leave the buildings until their demands were met, particularly the sacking of 11 members of the board of trustees appointed by Mayor Marion Barry.

Barry arrived at the campus of the city-run university shortly before noon and met with students who had requested his intervention.

''Our goal is to make life easier for the students,'' Barry said to the cheers of the protesters. He said he was ''here to listen'' and then entered the occupied building, which was off limits to reporters.

The students said they were upset with decision-making by the trustees and cited a decision by the 15-member board in June to accept a controversial work of art by feminist painter Judy Chicago and to spend more than $1 million in badly needed funds to renovate part of the campus Carnegie Library to house it.

The artwork, called ''The Dinner Party,'' is of dinner party table settings and depicts female genitalia. The board later formed a committee to review that decision, which threatens $1.6 million in badly needed federal funding for the university because some members of Congress declared the work obscene.

The students demand the board withdraw the invitation to house the artwork and the ''immediate dispatch of a (Capitol) Hill lobby'' to pressure Congress to restore the $1.6 million it threatened to remove from the UDC budget.

''We support the students,'' said Dave Chatman, president of the Faculty Senate, a body of 60 faculty members. ''The board has not communicated with the university for the past five years and they've made appointments we're against.

''The faculty is against 'The Dinner Party.' The students don't want it and (the board) is still doing it,'' Chatman said.

The controversy is only the latest example of unrest at UDC, which was formed in 1977 as an open-admissions university run by the District of Columbia. It has had five presidents or acting presidents in the past eight years and the search is on for a successor to Raphael Cortada, who was fired as president earlier this year.

Trustees, faculty and administrators have frequently wrangled over personnel and academic issues but it is the first time the students, most of them city residents and many of them needing remedial help to remain enrolled, have registered their protests in such physical fashion.

Other items among a list of 20 demands were longer library hours, capital improvements, a more Afro-centric curriculum, another seat on the board for a student representative, a revitalized athletic program and the dismissal of acting Athletic Director Thomas Waters.

Chatman said the faculty was meeting Thursday to discuss the situation at the university, which has a student population of about 12,000.

The students Wednesday stormed two buildings, overcoming a security detail in one of them, after the board refused to meet with them. The students barricaded themselves in the buildings and officials cancelled night classes Wednesday.

#90270u0864 09/27/1990 ~United Press International

CHICAGO (SEPT. 27) UPI - Three Chicago-area orange juice makers are under investigation by a federal grand jury looking into allegations the companies sold adulterated juice that was billed as ''pure,'' a published report said Thursday.

In addition, records from a defunct Paw Paw, Mich., juice maker that formerly made juice for Very Fine Products Inc., of Westford, Mass., also have been subpoenaed.

The Chicago Sun-Times, citing sources, said a special grand jury has been meeting since August 1989 to investigate Everfresh Inc. of Franklin Park, Ill. which sells juice under the Everfresh label; American Citrus Products Corp. of Melrose Park, Ill., doing business as Home Juice and distributing the Mr. Pure orange juice brand; and Olympic Gold Orange Juice Inc. of Elgin, Ill. selling juice under the Olumpic Gold label.

The grand jury also hopes to look at the records from Warner Vinyards of Paw Paw, Mich.

Lawyers for each firm told the paper their records had been subpoenaed by a grand jury in Chicago, but each denied any wrongdoing on the part of the companies.

A spokesman for the U.S. Attorney's office in Chicago refused comment.

The newspaper said the Chicago area has a reputation for adulterated juice around the offices and laboratories of government regulators, with at least one Food and Drug Administration chemist characterizing orange juice manufactured in the area as coming ''from the Cook County orange groves.''

''In investigating instances of adulteration, it's not unusual for the Chicago area to come up,'' said Kristen Chadwell, a lawyer for the Florida Citrus Department.

Just last year, three officials of Bodine's Inc., of Chicago, pleaded guilty to fraud charges that prosecutors then described as the largest consumer fraud prosecution in history for juice that had sweeteners and other products added without informing customers.

FDA regulations require notifying customers on the label if sweeteners, preservatives or other juice by-products are added to orange juice concentrate.

#90270u0873 09/27/1990 ~United Press International

(SEPT. 27) UPI - Good news on the home heating front. The American Gas Association says adequate supplies of natural gas should be available to meet consumer demand this winter. But the association says there could be isolated problems in some areas for short periods. A study indicates about half the distribution companies surveyed believe they will have to pay more for gas this winter than last.

Political repression in Burma is drawing criticism from other countries. A diplomat based in Rangoon says 18 governments are protesting stepped-up repression by Burma's military junta, which has detained and questioned Burmese citizens working in foreign embassies. The junta also has refused to turn over power to a legislature that was elected in May.

Amnesty International says security forces in Zaire continue to torture, illegally detain and kill government opponents and peaceful demonstrators... despite political reforms initiated earlier this year. The London-based human rights organization says the government of the equatorial African country has failed to stop or investigate killings and abuses carried out by security forces in the past two and one-half years.

Authorities in Loganville, Georgia, say they're working to get Willie Williams released from prison as quickly as possible. Williams, a poorly educated landscaper, has served 39 months of a life prison sentence for a 1986 rape-burglary that another man now says he committed. Police say Anthony Ecols confessed to the crime earlier this week. Authorities say Williams earlier confessed to the crime, but apparently to ''avoid trouble.''

WASHINGTON (SEPT. 27) UPI - House Minority Leader Rep. Robert Michel, R-Ill.,

and Caterpillar Inc. executives joined U.S. Trade Representative Carla Hills Thursday in supporting the ''zero-for-zero'' tariff proposal.

The proposal, advanced by the United States in March, would eliminate tariffs on a wide range of products - provided other countries agree to do the same.

Michel, who is from Caterpillar's home base of Peoria, Ill., said the Zero Tariff Coalition is breathing new life into the General Agreement on Tariffs and Trade, or GATT, talks taking place in Geneva. The group was formed three weeks ago and includes more than 100 U.S. companies.

''This group's hard work will mean more U.S. exports and jobs,'' he said. ''I'm impressed with the broad cross-section of members and what they've accomplishedin such a short time.''

Caterpillar Chief Executive Officer Donald Fites said GATT negotiators over the next 10 weeks will set world trading rules for the next 10 years.

''If our zero-tariff proposal is part of the final GATT package, negotiators will have taken a big step toward making trade freer and fairer,'' Fites said.

The Uruguay Round of GATT negotiations is expected to be finished in December.

#90270u0941 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - Holly Planells's ex-husband thought their son should never again reside in the land of the Great Satan, so he abducted Yousef, then 3, to Jordan in 1986. Father and son have never returned to the United States.

Betty Mahmoody haltingly agreed in 1984 to her husband's demand to go on a two-week vacation to Iran with their 4-year-old daughter to visit his family. Mother and daughter were held against their will for 18 months, until they escaped with the help of professional smugglers.

Planells, of New York, and Mahmoody, of Detroit, told their harrowing stories to a House Judiciary subcommittee Thursday to urge passage of legislation that would make it a federal crime to abduct children to foreign countries.

The four different House and Senate bills would accomplish the same general end - attempt to deter the crime by punishing the kidnapper with stiffer prison terms and fines.

While the aggrieved relatives say the bills are a start in the right direction a Justice Department official said the move would be a ''well-intentioned but largely empty gesture.''

One of the bill sponsors, Rep. James Saxton, R-N.J., said children are snatched from playgrounds, backyards or during unsupervised visits at a rate of about eight a week. He said there are about 4,000 cases currently on record.

''These children are usually taken and kept abroad by foreign-born ex-spouses who took the children out of the United States in violation of a U.S. custody order. Most of the time, the foreign-born parent is in his or her homeland with the child and untouchable by U.S. authorities,'' Saxton said.

If a child is taken to a country that has no extradition treaty with the United States, the kidnapper and child may never return. Only the 15 countries that signed the Hague Convention are required to return wrongfully removed children.

''It is our view that passage of this legislation will not increase the likelihood of the extradition of parental kidnappers from abroad,'' said David Margolis, acting deputy assistant attorney general. ''If enacted, (it) would inevitably give rise to false hopes and unrealistic expectations on the part of left-behind parents.''

But Planells, Mahmoody and other people caught in international child kidnapping episodes urged passage.

''We ask you to imagine one of your children or grandchildren taken from your household and never being able to share your love,'' said Rosemary Janvier of Seaside Heights, N.J., whose grandchild was abducted to Eastern Europe in 1987.

''We ask you to help prevent further parental kidnappings by considering this legislation ... on behalf of the children still at risk and least able to protect themselves,'' Janvier said.

ATLANTA (SEPT. 27) UPI - Quitting smoking appears to come easiest to people in Montana and Minnesota, while the habit dies hardest in Kentucky and the nation's capital, federal health officials said Thursday.

Montana and Minnesota, followed by Massachusetts, North Dakota, New Hampshire, California, Oregon, Idaho and New Mexico topped the list of 39 states and District of Columbia with the highest smoking cessation rates.

Kentucky and the District of Columbia have the lowest quitting rates, followed by Tennessee, Oklahoma, South Carolina, Alabama, Indiana, West Virginia, Ohio and North Carolina, according to the U.S. Centers for Disease Control report.

In Montana, 59 percent of people age 18 and older who had ever smoked at least 100 cigarettes polled in the 1989 survey said they were ex- smokers, compared to 43 percent in Kentucky. Minnesota had a 57.4 percent quitting rate, the District of Columbia 43.8 percent.

''In general, states with lowest quit ratios have the highest prevalence of current cigarette smoking,'' the CDC said.

The survey by the federal health agency was unveiled as a supplement to a U.S. Surgeon General's report released Tuesday, which documented the far-reaching health benefits that can result from ceasing the nicotine habit.

''Factors affecting smoking cessation that may explain the variations in smoking cessation by state include the percentage of heavy smokers, societal norms and attitudes about smoking cessation, and the existence, strength and scope of smoking cessation services,'' the CDC report said.

The states with the highest quitting rates tend to have the best anti-smoking campaigns and strongest policies restricting smoking at work and in public places, said Dr. Luis Escobedo, the CDC epidemiologist who wrote the report.

''Some of it is also cultural,'' Escobedo said, noting the high quitting rate in Utah, where the Mormon religion's edict against smoking helps keep the rate down. ''If you look at the map you see Utah has one of the highest rates of smoking cessation.''

Utah is ranked No. 6 on a separate list of the states included in the CDC report that eliminated the effects of age, race, sex and education on smoking cessation to illuminate other factors that influence quitting.

Whites, people over 35, men and those with more education have higher quitting rates than blacks, women, people under 35 and those with less education in all the states.

The second ranking better gauges the effect of influences such as anti-smoking campaigns on getting people to stop smoking, officials said.

Hawaii, Montana, North Dakota, Massachusetts and Idaho topped that list. Oklahoma, Kentucky, West Virginia, Tennessee and Michigan were at the bottom.

Other factors affecting smoking behavior contained in the package of CDC reports report included:

-Knowledge of the benefits of smoking cessation nationwide was lowest in

smokers aged 55 to 64 who had no college education.

-11.4 percent of Mormon Idaho women of reproductive age smoke, compared to 28.2 percent of Protestant women in Idaho reproductive age and 31.9 percent of Roman Catholic females in Idaho of baby-bearing age.

-In New York, women who reported an annual income of higher than $25, 000 were more likely to smoke than those with an income of greater than $35,000.

-In 1986, 52 percent of smokers nationwide used the top five brands, Marlboro, Winston, Salem, Kool and Newport.

-The higher a person's education level nationwide, the greater the likelihood of smoking brands with low-tar levels.

-76 percent of blacks and 23 percent of whites smoke mentholated brands.

#90270u0993 09/27/1990 ~United Press International

NEW YORK (SEPT. 27) UPI - The value of construction industry contracts declined a minimal 3 percent nationally in August, a leading industry indicator released Thursday said.

The Dodge Index of construction contracting, which declined to 146 last month, should be interpreted as ''no change'' because it has been fluctuating around 150 for the past several months following a steep decline registered last winter, according to F.W. Dodge, a division of McGraw-Hill. The index is measured against a 1982 base of 100.

The index showed that the value of residential and nonresidential building eased 4 percent in August, while public works and utility contracts, which Dodge calls nonbuilding construction, edged up by 1 percent in value.

For the year to date, 1990 construction contracting trailed the value of the year-ago period by 8 percent.

''August contacting didn't reveal much about how the construction sector will be reacting to the Middle Eastern confrontation, since most the month's work was already committed,'' said George Christie, vice president and chief economist for F.W. Dodge.

''The risk, of course, is whether higher-cost oil will tip the already weakened economy into recession by next winter.''

Christie predicted this would be enough to touch off a recession. ''That implies a secondary decline for construction, particularly for commercial building and housing,'' he said.

Dodge said the steep decline in office building continued in August, while sewer and water projects rebounded sharply. Housing remained weak, as a decline of one-family home building more than offset a modest gain in multi-family construction.

For the first eight months of 1990, most regions showed declines from the same period of 1989. The Northeast had the biggest fall, with 24 percent, while the Southeast fell 14 percent, South-Central states declined 6 percent and the West was off 2 percent.

The only region to show a gain was the North-Central region, which advanced 3 percent.

The construction values, at seasonally adjusted annual rates, were:nonresidential building, $80.3 billion; residential building, $108.4 billion; and nonbuilding construction, $47.6 billion. Overall, the value of construction contracts came to $236.3 billion.

The year-to-date figure was $180.8 million for all categories, Dodge said.

#90270u0995 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - The insurance fund protecting U.S. bank deposits is expected to shrink by $3 billion in 1990, about $1 billion more than expected, the chairman of the Federal Deposit Insurance Corp. said Thursday.

In another development, the agency voted to increase the premium it charges banks for protecting deposits to 19 1/2 cents per $100 of deposits.

FDIC chief William Seidman said his agency determined that in the first six months of the year, the government's Bank Insurance Fund fell to about $11.4 billion from $13.2 billion - a 14 percent loss.

The FDIC had been expecting a $2 billion loss for all of 1990, but Seidman said: ''Now we think it'll be $3 billion for the year.''

''The losses are larger and there were more failures,'' Seidman told United Press International.

As for insurance fund losses next year, Seidman said, ''It's hard to predict ... but it appears 1991 will be better than 1990.''

At a House subcommittee meeting, Seidman was asked by Rep. Frank Annunzio, D-Ill., whether Congress could prevent the sagging insurance fund ''from going broke'' in the next few years.

''Clearly no one can give that assurance at this point,'' Seidman said. ''No one can see the future.''

News of the losses was announced at a Thursday meeting of the agency, which insures deposits at the nation's banks to $100,000. Also during the session, FDIC officials voted to increase the insurance premium.

Effective Jan. 1, the premium will increase to 19 1/2 cents per $100 of deposits. The FDIC had been planning to increase the premium to 15 cents per $100 from the current 12 cents per $100.

Seidman said the 19 1/2-cent premium ''will increase our income and reduce our losses.''

He also said that the FDIC would consider raising the premium further if the Congress passes legislation granting the agency wider latitude on raising insurance premiums.

The sweeping plan is supported by the White House, but Seidman said another increase could cause problems for many ailing institutions.

''The weaker banks are in danger of failing if you make the costs too high,'' Seidman said, echoing the concerns of other government officials, including Federal Reserve Board Chairman Alan Greenspan.

The higher insurance premiums would cut into bank profits, possibly leading to cuts in services and lower interest payments to depositors.

On Wednesday, the Bush administration proposed increasing deposit insurance fees for banks that make reckless loans, and limiting the number of insured accounts per depositor.

#90270u0997 09/27/1990 ~United Press International

(SEPT. 27) UPI - A gunman described by witnesses as ''irrational'' continues holding as many as 20 people hostage in Berkeley, California. He entered a bar in the Durant Hotel one block south of the U-C Berkeley campus early this morning and opened fire. One student was killed and at least seven other people were wounded, including a police officer. The gunman is described as a 31-year-old Iranian.

The bi-partisan budget negotiations are to resume this afternoon in Washington amid new partisan attacks from President Bush and Democratic congressional leaders. The bargaining is aimed at working out a plan to cut 500-BILLION dollars from the federal deficit over the next five years. Word from negotiators this week indicated that progress was being made in the talks, which face a Monday deadline before automatic budget cuts take effect.

The Japanese government unveiled a plan today for a non-combat peace- keeping corps that would involve sending members of Japan's military overseas for the first time since World War Two. The plan drew immediate fire from the nation's two main opposition parties, casting doubt on whether it can clear the Japanese parliament. The plan attempts to balance demands that Japan send people to the multi-national force in Saudi Arabia against fears in Asia of a resurgence of Japanese militarism.

Leaders of the West German Social Democratic Party are meeting with the heads of its East German sister organization today. They want to merge the two parties into one before German unification becomes a reality on October 3rd. The new Social Democrats are expected to be the main challenger to Chancellor Helmut Kohl's Christian Democratic Union in the December 2nd elections covering all of Germany.

#90270u1001 09/27/1990 ~United Press International

HOUSTON (SEPT. 27) UPI - A convicted drug buyer is back behind bars after what might be the longest lunch break in county history.

Eduardo Onofre, 24, disappeared two weeks ago after a state district judge allowed him to go to lunch after his conviction. Onofre was back in custody Wednesday thanks to what one prosecutor said was the ''tenacious'' work of an undercover police officer.

Onofre was convicted Sept. 10 of trying to buy two kilograms of cocaine. The conviction was returned just before lunch and Judge Carl Walker decided to let Onofre go to lunch on two conditions - that he remain in the courthouse and return to the courtroom by 1:30 p.m. for sentencing.

Onofre did neither and he was sentenced in absentia to 45 years in prison and fined $1 million.

Assistant District Attorney Ruben Perez said he thought he had seen the last of Onofre, but the persistence of the arresting officer paid off when the convict was re-arrested Tuesday night.

The officer spent two weeks checking addresses and talking to sources before tracking Onofre down at an apartment. Onofre, who had dyed his hair blond, did not resist arrest.

#90270u1003 09/27/1990 ~United Press International

BRIDGEPORT, CT (SEPT. 27) UPI - A pawn shop owner who said he paid about $1,000 to help police recover most of a $60,000 collection of stolen teddy bears plans to think twice before helping strangers in the future.

Joe Davis, who owns three pawn shops in Bridgeport, said he helped recover about 200 of the 300 stolen bears from street vendors this week but has yet to hear from the owners.

''I hope these people are happy,'' he said Wednesday. ''It sure has left a poor taste in my mouth.''

The bears were stolen from a trailer owned by Larry and Ellen Idema of Grand Haven, Mich., as they slept in a nearby motel.

Police said the bears started turning up after the theft was reported. Davis, who had heard about it, said he tracked down dozens of them from street vendors at a total cost of $1,000.

On Tuesday, the Idemas returned to Connecticut to retrieve their collection and then left town.

Milford Police Sgt. Ned Doran said Ellen Idema was particularly pleased to recover one 1907 bear valued at $5,000.

''A reporter told me they say they're going to mail me a check for $500 but I'm done helping people,'' Davis said. ''It makes you feel bad when people can't even pick up the phone and say 'thank you.'''

-30- 1440

#90270u1007 09/27/1990 ~United Press International

WEST BERLIN (SEPT. 27) UPI - Less than one week before German unification, the East and West German Social Democratic parties merged into a single organization and pledged to help the new Germany ''find its place in a

peaceful Europe.''

When the two countries unite Oct. 3, the Social Democratic Party, or SPD, will be the largest opposition group to the conservative-led government of Chancellor Helmut Kohl.

Only two of more than 550 delegates at the SPD's reunification congress voted against the new party's rules.

''Together we start work, so that for the first time in history Germany can find its place in a peaceful Europe,'' the party said in its new manifesto.

''Neither national self-contentment nor even nationalistic exuberance are needed now, but rather solidarity of Germans among themselves,'' the statement said. ''What is also needed is solidarity with the peoples of central and eastern Europe who are treading a new path, and with the majority of mankind, which is faced with bitter poverty,''

Before the vote, former West German Chancellor Willy Brandt spoke to the 550 delegates, whose combined party will be the main challenger to Chancellor Helmut Kohl's Christian Democratic Union in the Dec. 2 all- German elections.

''Germany in particular needs social democracy,'' said Brandt, an architect of ''Ostpolitik,'' or East-West detente during the 1970s. Brandt is the party's deputy chairman.

On Oct. 14, East Germans are due to elect regional governments in the five states, which will join West Germany's 11 states in the Federal Republic.

Recent surveys show the SPD is only likely to win in one of the states at the Oct. 14 polls.

Because East Germany is effectively joining the West German republic, Kohl will automatically retain his position at the head of the government on unification day.

The CDU, which will hold its unification congress Oct. 1-2, will be the main political party and the SPD will remain the largest opposition party in a united Germany.

Although that could change after the election, even SPD officials doubt it will.

The majority of Germans interviewed by research institutes recently, said if national elections were held today, rather than Dec. 2 they would vote for the CDU and would want Kohl to remain chancellor.

Kohl's SPD challenger Oskar Lafontaine saw his popularity drop in recent

months. He has faced growing criticism from within his party - largely from East German members - for his attempts to block Kohl's plans for swift German unification.

The SPD hopes to eventually derive political benefits by placing social issues at the heart of its campaing program, at a time when East Germans are likely to feel the full blast of unification.

East Germany, which has been plunged virtually overnight in a free market system after 40 years of hardline Communism, has been hit by a crippling economic crisis, marked by a dramatic increase in unemployment levels.

The East German SPD was re-established last October, 43 years after Social Democrats - in what was then the Soviet-occupied zone of Germany - were forced to merge with the Communist party to form the Socialist Unity Party, which ruled East Germany with an iron fist until it was ousted last fall.

#90270u1025 09/27/1990 ~United Press International

LONDON (SEPT. 27) UPI - Police found and defused a bomb Thursday believed planted by the Irish Republican Army at an antiterrorism conference that would have caused ''death and serious injury'' had it exploded, Scotland Yard said.

The explosive device, wrapped in a plastic sandwich container, was placed under a speaker's platform and would have gone off at 10:30 a.m., during the conference titled ''Terrorism and Democracy,'' said Commander George Churchill-Coleman, head of the Scotland Yard anti-terrorist squad.

''If the device had exploded, it would have caused death and serious injury,'' said Churchill-Coleman.

Scheduled speakers at the conference included London Metropolitan Police Commisioner Sir Peter Imbert, and Foreign Office Minister William Waldegrave.

The bomb had been placed on the site despite high security surrounding the conference, located in central London.

''Early inquiries lead us to believe the bomb was placed in position this morning, after an extensive search,'' said Churchill-Coleman.

The conference site was 200 yards (meters) from the site of an IRA bomb attack last summer at the prestigious Carlton Club, popular among Conservative Party politicians. The club was extensively damaged but no injuries were reported.

Althhough no group has yet claimed responbility for placing the bomb, police believed it was planted by the IRA as part of its campaign to drive British troops out of Northern Ireland.

''This is yet another example of a divisive attack mounted by this organization. It failed due to the extensive vigilance mounted by the police '' said Churchill-Coleman.

After the bomb was spotted, police cordoned off the immediate area and evacuated adjacent buildings.

''There are army helicopters flying overhead. They've evacuated all the nearby buildings, and they're searching for more devices,'' said Nancy Bromhead, an office worker in the area.

The IRA recently picked up the pace of its campaign of violence on the British mainland, with a series of gun and car-bomb attacks on high- ranking officials. The former governor of the island of Gibraltar, Sir Peter Terry, was seriously wounded in a shooting earlier this month.

#90270u1032 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - The Pentagon announced Thursday an urgent $7 billion arms sale to Saudi Arabia that includes top-line U.S. tanks, attack helicopters, anti-tank weapons, Patriot anti-aircraft missiles and rocket launchers.

It is the first stage of a two-phased arms sale to Saudi Arabia that will total about $21 billion and include sophisticated F-15 fighters. Pentagon spokesman Pete Williams said the second sale probably will occur ''early next year.''

The Bush administration decided to split in two the largest ever U.S. arms sale after supporters of Israel in Congress expressed concern that the total Saudi weapons package was too large for the sheikdom's immediate defense needs and that the weapons may one day be targeted on Israel.

Williams said the American weapons provided in the smaller $7 billion package are what the Saudis ''urgently need for their defense'' against Iraq, which has a 1 million-man army and 5,500 tanks.

The largest part of the sale, actually totaling $6.744 billion, amounts to $3.13 billion and includes hundreds of armored tracked vehicles, including 150 M-1A2 main battle tanks.

The M-1A2 is the newest U.S. tank. Although it has not rolled off the General Dynamics Corp. production line yet, it is an improved model of the M-1A1 tank, specifically designed to defeat the Soviet-built T-72 tanks used by the Iraqis.

Saudi Arabia - which currently has about 550 mostly French-built tanks -

already has a $3 billion order for 315 of the M-1A2, a sale that was announced last October.

Included with the 150 tanks will be 200 Bradley Fighting Vehicles with 1,750 TOW anti-tank missiles, 207 armored personnel carriers, 50 cargo carriers and 60 tank-recovery vehicles.

The second largest part of the sale, for $1.8 billion, will provide the Saudis with 10,000 tactical wheeled vehicles, including 1,200 of the High Mobility Multi-Purpose Wheeled Vehicle, or HMV.

One of the key parts of the package is a $984 million sale of 384 long-range Patriot guided ground-to-air defense missiles, designed to track and intercept attacking aircraft.

Also, the package would provide the Saudis with 12 Apache attack helicopters with Hellfire anti-tank missiles, another 150 TOW anti-tank missiles, eight UH-60 utility helicopters, and nine artillery Multiple Launch Rocket Systems, called MLRS, with 2,000 rockets.

Congress has up to 30 days to disapprove the sale. If no action is taken, the sale will go ahead.

#90270u1040 09/27/1990 ~United Press International

LONDON (SEPT. 27) UPI - The fashion house Laura Ashley announced plans Thursday to close seven factories in Britain and Ireland and cut 1,500 employees from its staff - 1,000 in Britain and 500 worldwide.

Seven factories in Ireland and Britain are scheduled to be closed next March resulting in the loss of 1,000 factory jobs, according to a company spokeswoman. The factories currently employ 2,400.

''We have not taken these decisions lightly and deeply regret the redundancies that they will involve,'' said Sir Bernard Ashley, chairman of Laura Ashley Holdings PLC.

The company manufactures women's and children's clothing, home furnishings and perfumery products.

''If Laura Ashley is to survive in today's highly competitive environment, it is no longer viable to source the current level of garments worldwide from our UK factories when products of similiar quality can be obtained at significantly lower cost from other suppliers in other countries,'' Ashley said in explaining the move.

The decision to close the factories and cut 1,500 employees was the result of

a detailed review of Laura Ashley's operations undertaken last year.

A review of the overall staffing levels will mean another 500 employees will lose their jobs worldwide, said a spokesman. No details of the overseas job losses were available.

High inflation and interest rates in the United Kingdom were blamed for the measures.

''In particular, the high inflation rate, together with the current exchange rate, have made U.K. sourcing commercially unattractive,'' said the spokeswoman.

Products currently obtained from the factories to be closed will now be purchased from outside suppliers.

Laura Ashley will continue to print its own fabrics and wall- coverings in Great Britain and will keep open a made-to-measure curtain factory, the company said.

-30- 2077

#90270u1044 09/27/1990 ~United Press International

BERKELEY, CA (SEPT. 27) UPI - A squad of police Thursday stormed a bar near the University of California campus and gunned down a heavily armed man who had killed one student and held others hostage for seven hours of terror and sexual perversion.

Lt. Jim Polk, commander of the police SWAT team, said the gunman had been undergoing violent mood swings and there was fear he would harm his hostages, so the decision was made shortly after 7 a.m. to rush the bar rather than wait him out.

Members of the six-man SWAT team found the gunman at one side of the room and the hostages at the other and they opened fire, Polk said.

Paramedics rushed the wounded gunman away as hostages streamed out into the street and police tried to round them up to collect their statements. Twenty three hostages were taken to police headquarters.

''We just shot him,'' police Capt. Philip Doran said in announcing the end of the siege.

The wounded gunman, identified as Mehrdad Dashti, was taken to Highland General Hosptial in Oakland, where he was pronounced dead on arrival.

Doran said Dashti was angry over his failure to obtain a government loan to attend the University of California.

''(The) motive as far as I understand - he was very angry. He had been turned down for a student loan. He was angry at the federal government for other reasons besides that. So, whatever his motive may have been, at least those two were part of it,'' Doran said.

The gunman held as many as 20 people hostage as he kept police at bay in a standoff that lasted for nearly seven hours, authorities said.

At least seven people were wounded during the rampage.

Polk said Dashti had several weapons, including a machine pistol similar to an Uzi.

The gunman began shooting sporadically at patrons inside Henry's bar in the Durant Hotel, a block south of the UC Berkeley campus, shortly after midnight, Doran said.

He spent the next seven hours firing his guns and killing time by sexually harassing his white female hostages, witnesses said.

Phil Kim, an architecture student who escaped early in the siege, said Dashti forced female hostages to ''drop their pants'' and forced the male hostages to sexually molest them ''with carrots he brought with him.''

Initially, more than 20 people were held hostage at gunpoint, but several escaped or were allowed to leave as the standoff continued, leaving about 20 patrons inside with the gunman.

Two women released from the bar said Dashti appeared irrational and ordered non-white appearing women to ''run out and tell the police ... that they had done this to me. This isn't my fault I wrote several letters to your FBI.''

They said he ordered male hostages to ''sit up by the windows.''

Several blonde women, they said, were ordered to ''take off their pants.''

''After the girls took off their pants, at least the blondes, he had them do something sexually perverse,'' one of the former hostages said.

Local hospitals reported receiving at least eight gunshot victims. One of them John G. Sheehey, 22, a UC Berkeley student, died of his wounds.

Chris Hobbs, 20, a UC graduate student, was in fair condition with a gunshot wound to his thigh, Eden Medical Center spokeswoman Cassandra Phelps said, and student Rebecca Davis, 21, of Berkeley, was in fair condition with a leg wound at Kaiser Permanente Medical Center in Oakland.

A wounded police officer was treated at Highland General Hospital and released. Two victims were admitted into the hospital, a man who was shot in the left shoulder and a woman with numerous gunshot wounds, including at least one in the chest, spokeswoman Deborah Yamamoto said.

A woman and a man were treated for gunshot wounds and released from Alta Bates Hospital in Berkeley, a hospital spokeswoman said.

One hostage, Ken Young, 21, a Berkeley senior from Ventura, Calif., said there were about 75 people in the bar, some of them attending a birthday party, when the incident began.

''At the first shots, everybody hit the floor, just like in a movie,'' Young said.

Of the other hostages, Young said, ''They're in pretty good spirits, but they're smoking a lot of cigarettes.''

ALGIERS, ALGERIA (SEPT. 27) UPI - Former President Ahmed Ben Bella sailed home from exile Thursday and immediately called on President Chadli Bendjedid to dissolve the government and appoint an interim administration to hold early general elections.

Police said some 50,000 people lined the port of Algiers to welcome home Ben Bella, 74. He arrived on a ferry-boat, the ''Hoggar,'' from Barcelona together with his wife and three children, 500 Algerian and foreign guests and 100 journalists.

The Hoggar blasted its siren as Ben Bella, looking fit in a dark suit and necktie, waved to the throng and beamed broadly. On arrival the veteran politician made his way to the Martyrs' Square and delivered a fiery speech attacking the government.

''I have no confidence in the current government to prepare the elections,'' he said. ''So I demand the dissolution of this government.'' Chadli has agreed tentatively to hold multi-party legislative elections for the first time in Algeria in January.

But the government also has hinted it could postpone the polls if the country undergoes disorders similar to anti-government riots in October 1988 in which hundreds of people were killed.

Ben Bella was the first president of the north African nation after independence from France in 1962. A military coup led by his defense minister, Col. Houari Boumedienne overthrew him June 19, 1965. Ben Bella was jailed

until 1980 and went into exile the following year, wandering between France, England, Spain and Switzerland.

Ben Bella called for an interim government to preside over elections.

''In Algeria now there is a great democracy but it is thanks to the people and not to the regime.''

Ben Bella, who recently visited Iraqi President Saddam Hussein, urged Algerians to go to the Iraqi Embassy and volunteer to fight alongside the Iraqis against the United States.

Security was extra tight in the capital with hundreds of police deployed for the homecoming.

In June the Moslem fundamentalist Islamic Salvation Front won multi- party nationwide local and provincial elections, trouncing the ruling National Liberation Front.

Political experts say Ben Bella's Movement for Democracy in Algeria could attract support from some ruling National Liberation Front supporters concerned to stop Islamic Salvation Front leader Abassi Madani from seizing power. Other Algerians who voted for the fundamentalists in the local elections as a protest against the FLN may also find solace in voting for Ben Bella.

Aides said Ben Bella decided to return from exile by ferry because he feared he might be shot and killed if he used an airplane.

#90270u1055 09/27/1990 ~United Press International
(SEPT. 27) UPI - The Iraqi leadership ordered foreign nationals be denied food ration cards beginning next week and gave all Kuwaitis until Monday to obtain Iraqi I.D. cards in another move to strengthen its hold on the conquered emirate, Cairo Radio said Thursday.

Iraqi President Saddam Hussein has often stated that foreigners in Iraq and occupied Kuwait will suffer from the U.N. trade embargo along with Iraqis, and that if the situtation becomes desperate, food and medicine will be reserved for Iraqi citizens only.

Diplomatic sources said Jordan, meanwhile, was reconsidering its suspension of all flights between Amman and the Iraqi capital of Baghdad, taken Wednesday following reports an Iraqi jetliner had loaded up with illegal cargo for its return trip after delivering a group of Western hostages to Amman.

The sources said Jordan's King Hussein was considering banning all flights

except passenger flights.

The exact terms of the U.N.-imposed air embargo were still being debated. The British Foreign Office said the resolution did not bar passenger flights providing their cargo was inspected or apply to medical supplies and equipment for U.N. forces.

The developments came amid an escalation in a war of nerves in the Persian Gulf following the decision by the U.N. Security Council to impose the air embargo against Iraq for its Aug. 2 invasion of Kuwait.

Western diplomats said the decision was a severe blow to Iraq, which had been receiving supplies by plane to counter the enforcement of the economic embargo by warships in the Persian Gulf.

''You are going to see Saddam Hussein lash out because he is getting squeezed more and more in his corner,'' said one Western diplomat in the region.

Japan, meanwhile, considered plans to send a non-combat peacekeeping force to the region.

Prime Minister Toshiki Kaifu of Japan, whose constitution forbids the use of force in international disputes, unveiled a plan to create a non- combat corpsthat would involve sending members of Japan's military overseas for the first time since World War II.

Japan, which has pledged $4 billion for the gulf effort, has been under intense pressure from the West to deploy troops as well. But Tokyo faces fears at home and in Asia of a Japanese military revival.

The first of 4,000 French troops ordered to the gulf following a raid by Iraqi soldiers on the French ambassador's residence in Kuwait this month arrived in Saudi Arabia Thursday.

In the raid, Iraqi soldiers rounded up three French citizens who had sought refuge at their envoy's residence and took them to an undisclosed location, presumably to act as human shields with other Westerners at key Iraqi installations.

Western officials said Thursday Iraqi authorities had sent notes to all foreign embassies in Baghdad over the past few days warning diplomats that it was a crime punishable by death to harbor foreign citizens. Some of the notes, including one to the U.S. Embassy, asked for a list of non-embassy personnel staying in the diplomatic compounds.

BRUSSELS, BELGIUM (SEPT. 27) UPI - Two men forcibly entered the home of a U.S. Air Force general assigned to NATO and overpowered a guard in a possible kidnap attempt, but the general was vacationing overseas, officials said Thursday.

The U.S. military bodyguard was struck on the head, bound and gagged, then lost consciousness when the intruders applied ''ether or chloroform'' during the Tuesday night incident, the officials said.

The guard remained hospitalized Thursday with severe head injuries, and investigators were unable to question him further.

There was ''no evidence of theft'' at the suburban home of Brig. Gen. John W. Douglass, said the U.S. embassy in Brussels, and Belgian authorities said kidnapping was a ''possible'' motive.

Douglass, the deputy U.S. representative to the NATO Military Committee, has been assigned to NATO since summer 1989. The embassy said he was out of the country during the incident.

U.S. officials declined to speculate publicly on the motive for the incident, but said unspecified additional security measures for U.S. personnel in Europe had been implemented in response.

There has been concern about the safety of U.S. officials in Europe since Iraq invaded Kuwait on Aug. 2. NATO anti-terrorism experts met in Brussels on Wednesday on new security steps to combat an expected wave of Iraq-sponsored terrorism against Western targets.

The incident occurred at about 7 p.m. on Tuesday when a man wearing ''what appeared to be a police uniform'' forced his way into the Douglass home in suburban Kraainem, the embassy said.

He overpowered the bodyguard and was joined by a second intruder, and they searched the house.

The guard, who was reportedly bound and gagged with adhesive tape, was found unconscious by a family friend living at the house at 11:45 p.m. when she returned home, the embassy said.

U.S. military officials have joined Belgian authorities in the investigation.

''We have not ruled out a kidnap attempt, but we cannot say now that is what it was,'' said a spokesman for the security service in the Belgian Interior Ministry.

''We will know more when we are able to question the guard who was injured, but he isn't able to be questioned right now,'' the spokesman said. ''He was

severely injured in the head. We don't know what was used to hit him.''

The guard, whose name was withheld, was still hospitalized on Thursday, authorities said.

#90270u1088 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - An American warship in the Red Sea fired warning shots and boarded an Iraqi oil tanker that had refused to stop Thursday, but allowed it to proceed when no cargo was found, the Pentagon said.

Pentagon spokesman Pete Williams said the frigate USS Elmer G. Montgomery in the northern Red Sea radioed an Iraqi oil tanker, the Tadmur, at about 6 a.m. EDT and asked it to stop for inspection and ''it did not.''

The tanker was proceeding south, out of the Jordanian port of Aqaba, Williams said.

The Montgomery fired warning shots across the tanker's bow with .50 caliber machine guns and sent a boarding party of Navy and Coast Guard members aboard the vessel, Williams said.

The boarding party, however, found no oil or other cargo and allowed the ship to proceed, he added.

It was the fourth time a U.S. warship has fired warning shots near tankers and cargo ships in Middle East waters since the United States began its interdiction program Aug. 17 to enforce U.N. sanctions against Iraqi goods.

No injuries have been reported.

Williams said that, as of Thursday, there had been 1,400 interceptions, most of them by simple radio contact with captains of commercial ships to ask about their cargo and destination. In addition, there have been 125 boardings, 110 by U.S. warships and the others by warships of other nations.

Six ships have been diverted from their intended destinations, five after boardings took place and one without a boarding, Williams said.

#90270u1090 09/27/1990 ~United Press International

LONDON (SEPT. 27) UPI - British entry to the European Monetary System and a drop in interest rates to 10 or 11 percent could stimulate further inflation, a former economic adviser to Prime Minister Margaret Thatcher said Thursday.

Sir Alan Walters, who resigned as economic adviser to Thatcher last year, said

he believed political pressure would lead to Britain's early entry into the European Regulatory Mechanism, a first step toward European Community monetary union.

Walters, a long-term opponent of monetary union, forecast continued hard times for the British economy, even after entry to the ERM is achieved.

''It will be turbulent indeed if we go in anything like short term, and if we do go down with interest rates, to say 10 or 11 percent, I am afraid we may see inflation ignite again,'' he said in a television interview.

The British inflation rate, one of the worst in Europe, hit 10.2 percent in August and was fueled Thursday when when Texaco and Esso increased gasoline prices to about $4.50 a gallon.

Walters' comments came as speculation increased that Britain would be forced to drop interest rates in view of increasing evidence of an economic recession and in spite of official denials of such a downturn.

''We are in a mild recession. Not steep, but it is likely to get worse,'' said Walters.

Chancellor of the Exchequer John Major warned the cabinet Thursday that inflation would not come down very soon.

In Washington this week, Major said entry into the ERM, previously based on British inflation dropping to the European average, could be conditioned instead on future falls in prices.

''The government is looking more realistically at the ERM as a way of getting interest rates down without drastically dropping them suddenly,'' said Adrian Cunningham, an economist at Bank of America.

The Prime Minister, addressing the Confederation of British Industry in Wales Wednesday night, downplayed the critics of her economic management, which calls for high interest rates, at about 15 percent, to combat inflation.

''The voices of gloom and the newspapers talk of the end of the British economic miracle. Why, after all these years of sustained growth, the right philosophy and the right policy?'' she asked.

The CBI is among groups calling for a drop in interest rates, citing sharp falls in British industrial output blamed on the loss of export markets and falling internal consumer demand.

The Thatcher government may have to drop the interest rates soon if Conservative Party fortunes in the next general election, scheduled at the latest in the fall of 1992, are to prosper.

#90270u1098 09/27/1990 ~United Press International
LUSAKA, ZAMBIA (SEPT. 27) UPI - Zambia's ruling party Thursday nominated President Kenneth Kaunda to run in the nation's first free elections since 1972, following a concession by Kaunda to phase out the single- party system.

The United National Independence Party's 600-strong council ended a four-day special session unanimously making Kaunda the party's candidate for the October 1991 elections.

Kaunda accepted the nomination and told the party session he wanted a peaceful transition to a multi-party democracy.

''We have seen elsewhere that if this transition is not carried out with firm national discipline, it deteriorates into a condition of anarchy.''

Attacking the pro-democracy advocates who mobilized tens of thousands of Zambians in protests against his rule, Kaunda branded them ''anarchists and political thieves.''

He warned, ''If they continue insulting us and police gather adequate evidence of this, they will not go unpunished.''

The president Tuesday suspended three UNIP parliamentarians from the 135-member caucus for propagating multi-party democracy, saying the trio went ''too far in their criticism of the party policies.''

But pro-democracy activists had welcomed his concession to end one- party rule and abandon a national referendum scheduled for August 1991 to test support for a multi-party system. Kuanda called the referendum at the end of June, after a week of bloody anti-government rioting.

The 66-year-old leader, who has ruled since independence from Britain in 1964, said Monday he was proposing a restoration of democracy without holding a referendum to prevent further bloodshed in the debt-strapped southern African state and because ''I do not want to split the country into two camps.''

In terms of Kaunda's proposals, a president would be directly elected for a five-year term by a majority vote. But he gave no details of requirements for candidates or prospective parties.

Kaunda's announcement followed massive public protests, two of them drawing up to 100,000 people, by citizens demanding an early implementation of multi-party democracy.

#90270u1104 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - Paper companies Thursday strongly disputed government findings that their mills are contaminating fish with hazardous dioxin at levels posing a serious health risk to people who eat the fish.

Industry officials charged the Environmental Protection Agency relied on outdated information in assessing health risks from dioxin residues released into streams from mill bleaching processes used to make white paper products.

They said the agency relied on fish tissue samples taken in 1988 that did not reflect recent improvements in the bleaching process that the companies claim have greatly reduced dioxin discharges.

''The EPA ignored more recent data that calls into serious question the basis of their risk assessments,'' said Richard Phillips, vice president and director of process technology for the International Paper Co., whose Georgetown, S.C., plant was cited as posing the highest dioxin risks of any U.S. paper mill.

''EPA hardly mentioned the substantial progress International Paper, and the paper industry generally, have made during the last two years in reducing the level of dioxin formation during the pulp bleaching process,'' Phillips said.

The EPA said people eating two quarter-pound meals per month of fish caught downstream of the Georgetown plant faced a lifetime cancer risk of one in 100. Altogether, the EPA said there were 20 paper mills nationwide exposing local fishermen to a lifetime cancer risk greater than one in 10,000. The EPA considers a cancer risk of one in a million a permissible level of dioxin risk.

The industry already has pledged cooperation with EPA efforts to reduce dioxin discharges by improving its bleaching process.

Phillips said the problems with the EPA's risk figures were illustrated by its

assessment of his company's South Carolina plant.

He said International Paper offered EPA data on fish contamination levels compiled by South Carolina officials in April 1990, but the EPA refused to accept the new information. Phillips said the state data reflected much lower fish contamination than indicated by the 1988 data relied on by the EPA.

Betsy Southerland, director of EPA's contaminated fish and sediment task force acknowledged the EPA's risk assessment reflected conditions as they existed in 1988.

However, she said dioxin residues tend to settle on river bottoms, where they can linger for extended periods of time, depending on river currents.

Consequently, she said even if paper mills had reduced dioxin discharges since 1988, substantial dioxin risks probably were still presented by contaminated sediments, which affect bottom-feeding fish.

''When you clean out your pipe, that doesn't mean you clean out the food chain '' Southerland said. ''We would still have the concern that you have residual contamination in the sediments.''

Southerland said she was unaware of any offer by paper companies to provide updated fish-testing data. She said the EPA risk assessment was based on a joint EPA-industry analysis of paper mill wastewater discharges in 1988.

Southerland said some of the nation's 104 paper mills had offered the EPA more recent data on dioxin discharges, but the agency did not accept them because EPA officials did not know if the testing methods used gave a ''representative'' picture of wastewater releases.

''You could go out and take one sample when you know dioxin levels are going to be low,'' she noted.

#90270u1106 09/27/1990 ~United Press International

HOUSTON (SEPT. 27) UPI - The biomedical technology industry in the Houston area will more than double in size this year and grow to over $1 billion in total revenues by 1995, a study released Thursday indicated.

The survey involved 70 area companies and was conducted by Sommers & Associates, a marketing communications, public relations and market research company.

Survey questionnaires were sent to more than 400 Houston-area companies that are either members of biomedical organizations or are listed in the State Comptroller's Office records as being in one of 18 areas related to biological

and medical technology.

''The Houston biomed companies responding to our survey expect their revenues to increase to approximately $420 million in 1990, up 55 percent from last year's $270 million,'' said Thomas G. Sommers, president of the firm. ''The 70 survey companies expect their sales to grow an additional 240 percent by 1995, reaching a total of $1.03 billion.''

The forecast indicates Houston ''is in the major leagues'' in biomedical technology, Sommers said, and that the companies see significant future growth from technologies and products now moving toward commercial application.

''It appears the synergy of being able to work on biological and medical technologies in proximity to institutions like those in the Texas Medical Center is about to pay off,'' he said.

By comparison, the San Francisco Bay area - the accepted biotechnology capital of the United States - had 1989 biotechnology revenues estimated at $1.04 billion, Sommers said.

The survey companies' billion-dollar sales estimate excludes new companies that could start up before 1995 and currently existing companies that failed to respond, Sommers said.

Companies included in the survey range from molecular biology- oriented biotech firms to developers of medical devices, surgical instruments and therapeutic equipment.

Two-thirds of the companies reported having active research and development programs underway, and 22 in collaboration with a local university or medical institution.

Houston's biomed industry has grown at a 15 percent annual rate during the 1980s, the survey showed. Based on company predictions, the growth rate will accelerate to almost 20 percent a year between 1990 and 1995.

Total employment by survey companies more than doubled in the past 10 years, rising from about 1,800 a decade ago to 3,800 this year. Survey respondents expect an additional 30 percent increase in workforce size by 1995.

Of the 70 surveys participating in the survey, only 14, or 20 percent, were founded prior to 1980. Only eight of the participating companies are publicly owned.

-30- 2928

#90270u1114 09/27/1990 ~United Press International

DENVER (SEPT. 27) UPI - Neil Bush, the president's son, repeatedly denied

Thursday that he had any conflict of interest while serving as a director of the failed Silverado Banking, Savings and Loan.

In the first public hearing into the failure of a savings and loan, an administrative law judge is considering government allegations that Bush, 35, acted improperly during his three-year term as an outside director of Silverado.

The 1988 failure of Silverado, expected to cost taxpayers $1 billion, was one of the largest thrift failures in the nation and has received increased attention because of the involvement of the president's son, who served on the board of directors from August 1985 to August 1988.

The Office of Thrift Supervision has charged Bush with three violations of conflict-of-interest standards.

Bush is accused of failing to fully disclose his business dealings with developer Bill Walters while voting on $111 million in loans and transactions, and failing to fully disclose his financial dependence on Ken Good, a developer and Silverado borrower. Walters and Good defaulted on about $130 million in Silverado loans.

Bush said he believed other members of the board of directors were generally aware of his business relationships with Walters and Good. But he said he didn't recall any specific discussions with board members about those ties.

''My loyalty to Silverado was never impaired by my relationship to Bill Walters,'' Bush said. ''I had absolutely no doubt that I didn't have a conflict.''

Bush, dressed in a dark blue suit, white shirt and red-and-blue striped tie, said, ''Even the highest standard of conduct could not have prevented Silverado's failure.''

Bush and his wife, Sharon, entered the federal courthouse through a delivery entrance to avoid the crowd of photographers outside.

Administrative law judge Daniel Davidson twice admonished Bush not to go beyond the question with his answers. At one point, the prosecuting attorney had asked about the reputation of an institution, and Bush called the question ''outrageous and hypothetical.''

On Wednesday, prosecution and defense experts on legal and business ethics gave conflicting opinions about Bush's behavior as a Silverado director.

Geoffrey Hazard, a professor at Yale Law School and director of the American Law Institute, testified for the defense. Edward Conry, an associate professor of business law and ethics at the University of Colorado at Denver and former

research fellow at Yale Divinity School, testified for the government.

Hazard said Bush was not a party to any transactions on loans between Silverado and Walters, and therefore did not breach Colorado conflict-of-interest rules.

''There is nothing inconsistent between Bush's actions and generally accepted ethical principles,'' Hazard testified.

Conry said that Bush, by becoming a Silverado director, had assumed the obligation of placing the thrift's interest above his own. The professor said Bush did not sufficiently disclose his relationships with Walters and Good.

Because Bush has a master's degree in business administration, Conry said he thinks Bush ''would have been aware of the legal and moral obligations which were the foundations of his position as a director of Silverado.''

''I conclude Mr. Bush was imprudent, unethical and fully culpable,'' Conry said.

Conry, paid $12,400 by the government as an expert witness, also testified he thought Bush had ''deceived himself when he said he saw no conflict. ... His picture of reality is not accurate.''

A final decision in the case is not expected until next spring.

In addition to the OTS complaint, Bush is a co-defendant in a $200 million suit by the Federal Deposit Insurance Corp., against Silverado's former directors.

-30- 4063

#90270u1123 09/27/1990 ~United Press International

(SEPT. 27) UPI - A seven-hour stand-off in Berkeley, California, ended this morning when police shot and wounded a gunman who they say killed one person and wounded seven others during the night. Police shot the suspect when he walked out of Henry's Bar in the Durant Hotel, one block from the University of California campus. .

The suspect held as many as 20 hostages during the ordeal, but some escaped or were allowed to leave. Witnesess said the gunman apparently had a grudge against white women and sexually harassed his white female hostages during the night.

The United States has rejected out of hand an Iraqi demand that it produce a list of all non-Embassy personnel at the U-S mission in Baghdad. Iraq says it will execute any diplomat who hides foreigners. Demands for similar lists have been handed to all embassies in Iraq. .

The scope of the international action against Iraq may expand to include non-combat peace-keepers from Japan. The Japanese constitution bans sending military forces to other countries, but the government is mulling the idea of sending a force that would be involved in non- military activities.

The agency that insures bank deposits is losing money faster than expected. F-D-I-C assets dropped 14 percent in the first half of the year, to 11-point-four-BILLION dollars. And that could leave a three- BILLION-dollar loss for the entire year, up from the original two- BILLION-dollar estimate.

#90270u1125 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - Soviet Gen. Mikhail Moiseyev, deputy defense minister and chief of the general staff, will arrive in Washington Sunday for a six-day U.S. visit that will include a news conference at the Pentagon.

It will be Moiseyev's first visit to the United States, Pentagon spokesman Pete Williams said. The Soviet military leader will be the guest of Gen. Colin Powell, chairman of the Joint Chiefs of Staff.

Williams said Moiseyev will arrive at Andrews Air Force Base, Md., at 5 p.m. Sunday, where he will make a statement and speak briefly with U.S. reporters.

An honor ceremony will be held Monday upon his arrival at the Pentagon. The Soviet general and Powell will later place a wreath at the Tomb of the Unknowns in Arlington National Cemetery.

During the week, Moiseyev will tour U.S. troops from all four military services in New York, Michigan, South Dakota, California and Colorado, Williams said.

On Wednesday night, Moiseyev will speak at a dinner hosted by the San Francisco Chamber of Commerce, the World Affairs Council of Northern California and the Commonwealth Club.

Moiseyev and Powell plan to hold a joint news conference late Friday at the Pentagon, Williams said, and Moiseyev will leave Friday night for Moscow.

#90270u1147 09/27/1990 ~United Press International

(SEPT. 27) UPI - A 52-year-old church deacon from the Boston suburb of Kingston, Massachusetts, faces arraignment today after police found the body of a young neighbor girl buried in his basement. The 13-year-old victim disappeared on September 15th after leaving her home to visit her father's grave.

Experts on legal and business ethics gave conflicting testimony in Denver yesterday about the behavior of President Bush's son while he was a director of the Silverado Banking, Savings and Loan prior to its collapse. The Office of Thrift Supervision has charged Neil Bush with three violations of conflict-of-interest standards. Bush is expected to testify today.

The Senate Judiciary Committee is to vote today on whether to recommend that the full Senate confirm the nomination of David Souter to the U-S Supreme Court. It appears as if Souter has the support of a majority of the members of the panel. The full Senate likely will vote on the nomination next week.

-30- 1129

#90270u1148 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - The Senate Judiciary Committee approved David Souter's nomination to the Supreme Court Thursday as respect for the New Hampshire jurist's intellect outweighed liberal concerns about his views on abortion.

The full Senate is expected to confirm Souter, probably next week - shortly after the Supreme Court begins its new term. He would become the court's 105th jurist and replace Justice William Brennan, who retired in July after 34 years as a leading liberal on the court.

The Judiciary Committee voted 13-1 as seven of the panel's eight Democrats, including Chairman Joseph Biden of Delaware, joined with all six Republicans to back the nomination.

Also voting for Souter were Sens. Howard Metzenbaum, D-Ohio, Paul Simon, D-Ill., Patrick Leahy, D-Vt., Dennis DeConcini, D-Ariz., Howell Heflin, D-Ala. Herbert Kohl, D-Wis., Strom Thurmond, R-S.C., Orrin Hatch, R-Utah, Alan Simpson, R-Wyo., Charles Grassley, R-Iowa, Arlen Specter, R-Pa., and Gordon Humphrey, R-N.H.

Only Sen. Edward Kennedy, D-Mass., voted against the nomination.

At a political campaign stop in Cleveland, President Bush told the crowd, ''I just got some good news from Washington. The Senate Judiciary Committee strongly endorsed my nominee, my outstanding nominee for the Supreme Court in a 13-1 vote.''

Bush went on to ''urge the full Senate to confirm him as quickly as possible. He is an outstanding jurist, and I think that is good news for all who are committed to the Constitution of the United States. He will be a superb jurist.''

Souter could become the Supreme Court's swing vote on abortion rights and his

refusal to give an opinion on the subject during his confirmation hearing was criticized by several Democratic senators.

Groups supporting abortion rights interpreted his silence as a sign he would roll back previous court rulings on abortions. But most of the Democratic senators on the committee praised Souter as a fair-minded jurist.

Although Biden acknowledged that Souter's nomination was a ''mixed picture,'' he said Souter demonstrated that he was not ''a doctrinaire legal conservative'' and ''his mind is an open one.''

Given Bush's opposition to abortion, Biden said Souter is ''the best we can hope for.''

But Kennedy said the Senate is ''still in the dark about this nomination and the lesson of the last 10 years is ''that we must vote on ''s is ''that we must vote on

''I am troubled that if Judge Souter joins the current closely divided Supreme Court, he will solidify a 5-4 anti-civil rights, anti-privacy majority inclined to turn back the clock on the historic progress of recent decades,'' Kennedy said. ''I hope I am wrong. But I fear I am right.''

Republicans criticized Democrats who have opposed the nomination for using a ''litmus test'' to judge the nomination - with Simpson suggesting that if they want to advance their positions they should ''go get a different president.''

In announcing their support for Souter Wednesday, liberals Leahy and Kohl said they would have liked to have known his views on abortion, but were confident he would approach the issue without prejudging it.

''The majority of Americans expect David Souter will share their view that decisions about reproduction are best left to the individual,'' said Leahy. ''I cannot predict how he will vote in every instance but I do not think this country should have a completely predictable Supreme Court.''

Kohl praised Souter's views on the separation of church and state and predicted he would ''be a justice whose decisions will benefit consumers.''

''I believe the right to choose is a fundamental one and I would like to have heard Judge Souter say so. But at least we didn't hear him say that a woman does not have that right,'' Kohl said.

''Maybe that is the best we can hope for at this time.''

Souter, 51, a member of the 1st U.S. Circuit Court of Appeals since April and a New Hampshire Supreme Court justice for seven years, repeatedly sidestepped questions about abortion during his three days of testimony this month.

He said he believes the Constitution includes a fundamental right to privacy, which, for example, would cover a married couple's right to use contraception. But he refused to say whether that right extends to abortion.

Souter told the committee it would be inappropriate for him to answer such questions because of the likelihood the Supreme Court will review the 1973 Roe vs. Wade decision that guarantees a woman's right to abortion.

JOHANNESBURG, South Africa (SEPT. 27) UPI - An earthquake measuring 4.7 on the Richter scale jolted the central South African city of Welkom and its goldfields early Thursday, killing two miners and causing some surface damage.

The quake, preceded by a smaller tremor, began at 1:09 a.m., lasted several seconds and shook buildings across the city and in outlying areas, mines seismic researcher Alexander Mendecki said.

Fallen rocks at the city's President Brand gold mine killed two miners and injured five, mine owner Anglo American Corp. said in a statement. ''The damage ... is still being assessed,'' AAC said.

A civil defense official of Welkom, 170 miles southwest of Johannesburg, noted the tremor caused some damage to property but no casualties among residents.

''We have cracked walls and lots of broken windows,'' he said. ''I think the worst part for residents was that lots of them were shaken awake so early.''

Said resident Margaret van Rensburg, ''Our house seemed to be trembling like crazy. It was really quite scary.''

Mendecki noted quakes measuring around 4.7 maginitude hit the area about once a year, adding the tremor of January 1989 had been the most serious in recent years and left ''some fairly major'' surface damage, particularly in the mining areas.

He said any link between quakes and mining activity around Welkom ''is almost impossible to make... we can't say for certain what effect, if any, the activity has on natural tectonic processes.''

#90270u1163 09/27/1990 ~United Press International

LAKELAND, FL (SEPT. 27) UPI - A proposed free-trade agreement with Mexico - the third-largest citrus producer in the world - could devastate Florida's lucrative citrus industry, an agricultural trade group said Thursday.

The trade proposal would eliminate tariffs and duties on imports and exports, freeing up cheaper citrus products from Mexico, said Bobby F. McKown, executive vice president of Florida Citrus Mutual.

''To give a mature industry the size of Brazil's duty-free treatment would have a disastrous effect on the Florida citrus industry,'' McKown said from his Lakeland office.

Mexican exporters of fruits and vegetables would have an unfair advantage because growers there do not have to match the overhead growers here do, he said.

''We have unemployment to pay for, workmen's compensation, health care, social security,'' McKown said. ''All of these are costs that Mexico does not have to deal with.''

Those factors, coupled with a lower wage scale and more liberal, less-costly agricultural chemical restrictions would allow Mexican producers to sell their crops for less.

President Bush informed Congress Wednesday the United States plans to start negotiations with Mexico on a free-trade agreement between the two countries that would gradually take effect.

Canada, which already has a free-trade pact with the United States, is also involved in the negotiations. The talks could lead to the formation of a North American Free Trade Zone.

The lost revenue would have a severe impact on the multibillion- dollar industry and the estimated 144,000 state citrus workers, McKown said.

While Mexico currently provides 12 percent of the U.S. imports of orange juice and about 14 percent of the frozen juice, exports to Mexico are miniscule, McKown said.

''It's been one-way trade as far as citurs is concerned,'' he said. ''With a free flow agreement, you would have a deterioration of the U.S. citrus industry. There would be a considerable loss of jobs and closing of packing houses.''

The new threat has forced an unlikely alliance of California, Arizona, Texas and Florida, citrus states at risk under the trade proposal.

''We are working very closely together,'' McKown said. ''Those four states would be the hardest-hit. We have been considering this for quite some time now.''

Florida Citrus Mutual, along with co-petitioners from Florida and California, has filed comments with the House Ways and Means Committee and the International Trade Commission, McKown said.

The group opposes the lifting of tariffs, and recommends that economic and agricultural standards in Mexico be raised to match those in the United States he said.

Also at stake are commodities such as tomatoes, melons and strawberries. The state could lose between $5 billion and $7 billion annually to Mexico if free flow is allowed, according to the Florida Fruit & Vegetable Association.

Such an influx of strawberries could ''upset our delicate balance,'' said Chip Hinton, executive director of the Florida Strawberry Growers Association in Plant City, Fla.

Hillsborough County, Fla.'s strawberry industry, which was valued at $89 million last year, supplies 21 percent of the nation's winter strawberries.

#90270u1166 09/27/1990 ~United Press International

OKEFENOKEE SWAMP, Ga. (SEPT. 27) UPI - A nearly 4-week-old fire in the Okefenokee Swamp mushroomed to 11,000 acres Thursday, forcing firefighters to revamp their strategy to protect stands of nearby commercial pine forests.

Jim Burkhart, spokesman for the Okefenokee Wildlife Refuge, said firefighters abandoned the swamp to let it burn, and were building fire lines to keep flames away from the commercial timber.

''The last day or so we've been really hampered by a lot of smoke hanging over the fire,'' Burkhart said, adding the fire was spreading rapidly to the southwest.

''It's doing its own thing out in the swamp area,'' Burkhart said.

Refuge officials are concerned that commercial pine timber growing along the swamp's perimeter will not be able to resist the effects of the flames if the swamp fire manages to escape the refuge.

Burkhart said the pines, normally fire resistant, also have suffered from the drought conditions that have drained the swamp.

''You have the potential for either killing the tree or exposing it to big damage,'' Burkhart said. ''There are going to be some trees lost ... but it's not a wholesale loss.''

Officials said rain offers the only opportunity of relief from the blaze, but

forecasters are not predicting any showers in the near future.

The fire, started by lightning Sept. 1, smoldered across 2,600 acres without spreading significantly in recent weeks until a dry cold front moved through south Georgia over the weekend, bringing a drop in humidity and 10-15 mph winds. On Tuesday, the fire spread to 5,000 acres.

TUNIS, Tunisia (SEPT. 27) UPI - Was Mohamed Ali Mahjoubi, the former Tunisian Secretary of State for Security who was fired mysteriously last month, manipulated by a spy working for the Israeli secret services?

A Tunisian weekly magazine, ''Realites,'' contends this was the case Thursday and suggests that Mahjoubi, who was fired Aug. 20, may have been linked to the April 16, 1988, assassination of PLO military leader Abu Jihad.

No official reason has been given for the sacking of Mahjoubi, who only was appointed to his post March 3.

The government did not disclose that Mahjoubi had been fired until Tuesday when the semi-governmental newspaper ''La Presse'' announced that Mahjoubi had been ''arrested and put at the disposal of justice'' for ''abuse of power for personal ends in his previous position as commissaire of police.''

The newspaper report seemed designed to scotch rumors circulating that Mahjoubi may have died in prison.

The magazine article published Thursday charges that Mahjoubi was linked to a certain ''Raoudha, alias Lilia,'' the manager of a hairdresser's salon in a luxury hotel in Tunis. Lilia used the job as a ''cover to devote herself to collecting information and selling it to a foreign power.''

''Certain information'' suggest she was in contact with the Israeli secret service Mossad, the magazine said.

Abu Jihad and Mahjoubi were neighbors at the Tunis suburb of Sidi Bous Said, and according to the magazine report, Mahjoubi had the police guard removed from Abu Jihad's villa on the eve of the Israeli attack.

The report says Mahjoubi also may have ''collaborated with another power,'' which not identified. But speculation is rife in Tunis the former police chief may have also have had links with Libya.

For the moment, however, the murky affair seems set to remain a mystery until Mahjoubi's trial, if it ever takes place.

#90270u1196 09/27/1990 ~United Press International

GALVESTON, TX (SEPT. 27) UPI - An 8-year-old Russian boy suffering deep burns over slightly more than 30 percent of his body must undergo surgery to remove the dead skin, a doctor at a renowned Texas burn hospital said Thursday.

Anton Avdeenko and his mother, Anna, 32, arrived about 9:30 a.m. Thursday at Shriners Hospitals for Crippled Children-Burn Institute, ending a historic medical ambulance flight.

''We have examined Anton and found that he has a little over 30 percent burn, all of which is very deep and will require surgery,'' said Dr. Paul Waymack, adding the boy, who speaks no English, was in good spirits.

The boy has second- and third-degree burns suffered during an outdoor accident involving a chemical fire at his home Sept. 17, Waymack said. The burns are scattered over the boy's body, but the worst injuries are on Anton's legs, he said.

Shortly after his arrival at the hospital, Anton was taken off a ventilator he had been using since developing breathing problems during the first leg of the flight from the Soviet east coast city of Magadan to Anchorage, Alaska.

Anton was hospitalized briefly in Anchorage Wednesday because of the breathing problem.

''This was just due to the fact that when in an airplane the oxygen content is low because of the altitude ... He is doing very well right now,'' Waymack said, adding the youth was eager to get off the ventilator so he could eat.

Waymack said skin grafts will be performed after the damaged skin is removed Friday. Tests were being conducted to determine whether the grafts will be made from unburned areas of the patient's body or from cadavers.

The medical evacuation was the first from the Soviet Far East to the United States, said Dr. Ted Mala of Anchorage, who pioneered medical exchanges between Alaska and Siberia.

The Soviets called for help Sunday when Anton's condition began deteriorating. They renewed their requests Tuesday. That night, with visas waived and approvals granted, Rocky Mountain Helicopters of Provo, Utah, which operates Providence Hospital's LifeGuard Alaska program, sent its air ambulance for Magadan.

The closest Soviet burn treatment center to Magadan reportedly is in western Russia, farther than the closest American help.

The Shriners hospital in Galveston is well-known for successfully treating severely burned patients and routinely admits children from other countries.

This is not the first time the Shriners have helped Soviet children. Gene Bracewell, board chairman for the Shriners Hospitals for Crippled Children hospital system, said the organization provided free medical care to Soviet children injured in the 1988 Armenia earthquake and a 1989 train explosion in the Ural Mountains.

#90270u1204 09/27/1990 ~United Press International

VALDOSTA, Ga. (SEPT. 27) UPI - The sound of autumn on south Georgia highways is the annoying splatter of ''love bugs'' meeting their death on the windshields of motorists speeding through the creatures' mating grounds.

From the first of September to the end of October, hordes of male and female love bugs take to the air to court along the highways, bedeviling motorists as they splatter on windshields and stick to paint jobs.

''They can get so bad that they'll clog up radiators and cause overheating. They're particularly a nuisance in paint shops. All somebody has to do is open a door, and two will fly in, not one,'' said J. J. Whitesell, an entomologist at Valdosta State College.

There's no disputing that love bugs are a highway nuisance, but the insects are just doing what comes naturally, Whitesell said Thursday.

''They're flying around these areas, mating and flying to various wildflowers where they can get some nectar. They get hit by cars, that's all. They don't sting. They don't bite. They're just there,'' he said.

The insects are actually black flies, plecia neartcia, that were dubbed love bugs because of their prodigious lovemaking. Love bugs spend their adult life mating, and when the eggs are laid, they die, Whitesell said.

''It seems to be constant, but we're not sure. I've seen females flying around with dead males attached to them. In the lab, we had a mating pair mate for seven days,'' he said.

Love bugs thrive in heat and moisture, and the steamy asphalt of southern Georgia's highways is a magnet for them, Whitesell said.

''They're attracted to heat, and the highways get hotter than most surrounding areas. The larvae grow along roadsides, particulary roadsides that have been cut in the summer and produce leaf litter. Larvae eat leaf litter,'' he said. ''The larvae only eat dead grass. If anything, they are beneficial insects.''

Love bugs have a bivoltine system, in which two generations are born each year one in the spring which begets one in the fall. Whitesell said it appears this year's spring generation produced an unusually large number of fall offspring. But, he cautioned that his figures are based on an unscientific study.

''My sampling comes from driving down the road,'' he said.

#90270u1214 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - The human rights group Asia Watch on Thursday named 867 people missing in China since the 1989 pro-democracy protests, and said China appears unwilling to account for them without Western pressure.

Asia Watch said the actual number of people apparently held by authorities for political or religious activities is at least twice as large, probably much higher, and compared the situation to the mass disappearances of citizens in Latin America.

The 130-page report, based on official and non-official sources, consists mostly of a person-by-person listing of all those the group has been able to verify as being held by Chinese authorities since the Tiananmen Square protests were violently crushed by the government June 4, 1989.

Several hundred to several thousand people were believed killed in the military action to end two months of student-led protests. The government has said only 300 people, mostly soldiers, were killed.

''The unavoidable conclusion is that China now has a major 'disappearances' problem, one similar in scale to any previously seen in, for example, Central and South America,'' the report said.

Tens of thousands of people who opposed governments in Argentina and Guatemala have disappeared over the past four decades and are widely believed to have been killed by government forces.

An author of the report, Robin Munro, said it was intended to help resurrect the issue of China in Western nations, particularly the United States, where President Bush has backed far away from his initial harsh statements against Beijing to even approve most-favored-nation trading status this year.

Munro said such actions as granting preferred trading status embolden China in its crackdown on political dissent, while U.S. criticism has produced such changes as this summer's release of dissident astrophysicist Fang Lizhi.

''China is very sensitive to its international image,'' he said.

Congress is expected to begin debate within two weeks on removing China's most-favored-nation trade status, and Munro said his group backs an effort by Rep. Donald Pease, D-Ohio, to tie the issue to China's political prisoners.

Asia Watch, in what it called the ''most comprehensive compilation by any human rights organization to date,'' said at least 1,722 people were missing or still being held in China, including the 867 people it was able to name.

The numbers were compiled partly from Asia Watch sources inside and outside China, but most were based on media reports from throughout China that have listed arrests since the Tiananmen Square protests, but rarely have told of where they are being held, results of trials or prisoner releases, it said.

Such Chinese media reports spoke of thousands of people being detained in single roundups at various times, although Munro said his group's figures are based only on specific numbers given in individual media reports.

China's only official statement on prisoner releases was made earlier this year when Beijing said 881 people were released between January and May.

But the official statement gave few names, and Asia Watch has only been able to confirm about 44 releases since the crackdown at Tiananmen Square, Munro said in an interview from the group's New York headquarters.

''If more than those 881 have been released, it's in the interest of the Chinese authorites to say so,'' Munro said.

''In the last few months the Chinese government has had a lot of success in kind of conveying the impression that most of these people were released,'' he said. ''We're in contact with a lot of these people, and we know they're not released.''

#90270u1241 09/27/1990 ~United Press International

VATICAN CITY (SEPT. 27) UPI - The Vatican Thursday welcomed the preliminary approval of a Soviet law allowing religious freedom Thursday but said it was anxious to see its final promulgation.

''Obviously we have learned with great satisfaction of the approval of this law, which renders justice to millions of believers in the Soviet Union,'' said Vatican spokesman Joaquin Navarro Valls. ''We await with anxiety the promulgation of this new norm, which has been announced many times.''

Navarro spoke after the approval ''in principle'' of the law ending more than 70 years of official atheism in the Soviet Union by the Supreme Soviet Wednesday.

Vatican sources said Navarro was referring to Soviet legislative procedure which requires the general approval of a law to be followed by a discussion of eventual amendments before its final passage.

Soviet leader Mikhail Gorbachev promised Pope John Paul II during their historic meeting in the Vatican Dec. 1 that the law granting ''freedom of conscience'' would be introduced shortly in the Soviet Parliament.

The pope made its adoption a main condition of his eventual visit to Moscow in response to an invitation extended by Gorbachev.

Archbishop Francesco Colasuonno, the papal representative appointed to Moscow under an agreement to restore ''permanent diplomatic contacts'' early this year, told reporters the Soviet law has some shortcomings, notably the refusal to permit religious instruction in Soviet schools and to permit the Catholic Church to open and run its own religious schools.

(SEPT. 27) UPI - The Senate Judiciary Committee endorsed David Souter's nomination to the Supreme Court today... and full Senate confirmation is expected, probably next week. The judiciary panel voted 13-1 for approval, with seven of the panel's eight Democrats- including Chairman Joseph Biden of

Delaware- joining all six Republicans to back the nomination. Only Senator Edward Kennedy of Massachusetts voted against confirmation. Souter would become the court's 105th jurist, replacing Justice William Brennan, who retired in July after 34 years as a leading liberal on the court.

A seven-hour hostage drama is over in Berkeley, California. Police shot and killed a gunman as he walked out of Henry's bar at the Durant Hotel, one block from the University of California campus. The man, identified as Mehrdad Dashti, reportedly was angry over his failure to obtain a government loan to attend the university. He shot eight people during the siege. One, a 22-year-old student, later died of his wounds. Witnesses who fled the bar said he made irrational demands and statements while holding them capitive. They also say he sexually harassed his female hostages.

The man considered the George Washington of modern Algeria is home after 10 years in foreign exile. Ahmed Ben Bella, now 74, was the first president of the North African nation when it gained independence from France in 1962. He was overthrown three years later in a military coup and remained jailed until 1980, going into foreign exile one year later. Now he's back whipping up support for a new political party ahead of elections set for early next year.

Religious leaders in Iran are asking that citizens turn out in large numbers for anti-American rallies planned today to protest the presence of U-S troops in the Persian Gulf area. The call for demonstrations was made over Tehran Radio in a broadcast monitored in Athens, Greece.

#90270u1277 09/27/1990 ~United Press International

BANGKOK, Thailand (SEPT. 27) UPI - Eighteen governments are protesting intensified political repression by Burma's military junta, which has detained and interrogated Burmese citizens working at foreign embassies, a senior diplomat said Thursday.

Inside Burma, meanwhile, Buddhist monks upset over the deaths of two monks shot by security police have effectively excommunicated military families in a move that is having a ''major impact,'' the diplomat said.

Earlier, official Rangoon radio announced the arrests of three people for writing and distributing poetry ridiculing the military junta, which has so far refused to turn over power to a legislature elected in May.

''A large number of governments, an increasing number of governments, view with horror what is continuing to happen in Burma,'' said a Rangoon-based diplomat who asked not to be identified.

The diplomat said the 12 European Community nations, joined by the United States, Japan, Sweden, Australia, Canada and New Zealand, recently issued a tough verbal protest against Burmese military repression in Rangoon.

The protest cited the recent arrests of the leaders of the National League for Democracy which swept 80 percent of the seats in the elections, continued repression of free speech, and moves away from a promised return to democracy.

It also protested the detention and interrogation of Burmese staff working for foreign embassies and raids carried out by armed troops on embassy compounds in violation of the Vienna agreements on diplomatic rights.

In the past 10 days, Burmese staff from the U.S., British and Australian embassies have been taken away for as much as four days of interrogation in a prison north of Rangoon, the diplomat said.

The questioning, he said, focused on the activities and opinions of embassy officials and their contacts with civilian political leaders.

The detentions were part of a campaign to intimidate the Burmese people to allow the military to maintain its 30-year domination of Burma despite the opposition party' s overwhelming election victory, he said.

In Washington, State Department spokesman Richard Boucher said the four U.S. Embassy employees, all Burmese, were ''detained and interrogated about embassy operations and personnel.''

''We regard such harassment as a serious contravention of accepted international behavior and as totally inconsistent with international law,'' Boucher said.

Rangoon radio, in a broadcast Wednesday night, said Sein Hlaing, 35, Myo Myint Nyein, 38, and Nyan Paw, 36, were arrested earlier this month for commissioning distributing or writing ''poems that criticize, slander, and ridicule the leaders of the Defense Services.''

The diplomat said the arrests were part of the repressive campaign that has included torture, beatings, intimidation and firing into crowds of protesters.

''Their repression of their own people is continuing at exactly the same level if not intensified, as compared to before the election,'' the diplomat said.

The military, however, has been shaken, he said, by the action of the Buddhist leadership to effectively excommunicate all military families by refusing to perform marriages or alms ceremonies for them. The Buddhists are protesting the deaths of at least two monks shot by security police in Mandalay last month.

''This is having a very major impact on the rank and file of the military,'' he said.

Tuesday Maj. Gen. Tin U, a junta member, warned Buddhist monks against becoming involved in politics.

#90270u1280 09/27/1990 ~United Press International

UNITED NATIONS (SEPT. 27) UPI - The Emir of Kuwait appealed to the United Nations Thursday to help liberate his country occupied by Iraq which, he said, has carried out massive destruction and tortured his people.

Sheikh Jaber Al-Ahmad Al-Sabah said he came to the U.N. General Assembly to present the ''horrors and suffering'' of his people.

''Now the fate of a people, of a nation, is in your hands,'' he said.

Al-Sabah, whose family ruled over the small desert kingdom rich in oil for more than 200 years, received standing ovation by the more than 2,000 delegates from 160 countries attending the annual session.

The six-member Iraqi delegation, headed by that country's deputy permanent representative to the United Nations, Sabah Talat Kadrat, walked out of the assembly hall before Al-Sabah began his address.

''Today, I plead before you the cause of a people whose land, until so recently, was a beacon for peaceful co-existence and genuine brotherhood among the family of nations,'' the emir said.

''We are confident that the only measure that will win your endorsement is support for our legitimate right to liberate our land,'' Al-Sabah said.

Iraqi President Saddam Hussein ordered his troops into Kuwait Aug. 2, less than a day after talks between the two countries to resolve dispute over oil production and their common border collapsed.

Saddam consequently declared Kuwait one of Iraqi provinces. The Security Council reacted by condemning the military occupation and imposed on Aug. 6 a set of stringent sanctions to force Iraq to pull out. It allowed Western navies sent to protect the rest of Persian Gulf countries to use force to impose the sanctions.

On Tuesday, the 15-nation council ordered an air traffic embargo on Iraq to further isolate it.

Al-Sabah said, ''rape, destruction, terror and torture are now the rule of the day in the once peaceful and tranquil land of Kuwait.''

He said ''hundreds of thousands'' of Kuwaiti citizens as well as nationals of various countries have been made homeless and have lost their savings.

''Indeed, at this very moment, an intense campaign of terror, torture and humiliation continues unabated in that dear land,'' the emir said.

Dressed in a long white and gold robe, the emir said the Iraqi occupation has caused repercussions on the world's security as well as economy.

To remedy economic losses suffered by developing countries, Al-Sabah said he has decided to write off interest payments on loans to those countries. Kuwait's contributions to development aid to the Third World had amounted to 8.3 percent of its GNP, the emir said.

Among migrant workers in Kuwait were some 100,000 Bangladeshis before the Aug. 2 invasion. President Hussein Muhammad Ershad Bangladesh, who addressed the General Assembly before Al-Sabah Thursday, said these workers's salaries

represented an important source of foreign currency for his government.

Ershad told reporters Wednesday that he expected a budget deficit of $600 million this year because of the Iraqi invasion and billions of dollars in the long run.

A Bangladeshi diplomat said 50,000 of his countrymen were repatriated and the rest will be returned home by the end of the month.

#90270u1294 09/27/1990 ~United Press International
(SEPT. 27) UPI - F-D-I-C chief William Seidman says his agency has determined that over the first six months of the year the government's Bank Insurance Fund shrank by 14 percent... from 13-point-two-BILLION dollars to about 11-point-four-BILLION. The F-D-I-C had expected a two-BILLION-dollar loss for all of 1990, but Seidman now says it appears as if it will be three-BILLION by the end of the year... because of more financial institution failures. He won't predict next year's losses but says it appears 1991 will be a better year than 1990.

More bloody protests in India against a federal job quota program. One high school student in New Delhi set himself ablaze today... and police shot and killed one demonstrator. The Press Trust of India says police fired at angry mobs in at least two different sections of the the capital, killing one person and wounding at least six others. In one case, rampaging youths burned vehicles and looted shops.

#90270u1305 09/27/1990 ~United Press International
WARSAW (SEPT. 27) UPI - The Persian Gulf crisis could cost Poland up to $11 billion in direct and indirect losses over the next few years, reignite inflation and jeopardize economic recovery, the government said Thursday.

The report said Poland will feel the fullest impact of higher oil prices next year, when the Soviet Union, from which Poland imports 80 percent of its oil, will require hard-currency settlement of trade balances.

Poland's plight is the same as that of former communist nations throughout Eastern and Central Europe, hit by dramatically higher oil costs just as their traditionally cheap source, the Soviet Union, is drying up.

World Bank officials have warned that East European economies breaking out of the Comecon East Bloc trading system and facing real market prices will shrink dramatically as they are hit with rising oil costs.

In Bulgaria, even more dependent than Poland on once-cheap Soviet oil, gross domestic product could fall by as much as 15 percent.

''Poland has incurred direct losses as a result of the imposition of economic sanctions on Iraq and Kuwait,'' a Central Planning Office report said, pointing to direct losses through 1994 of $2.9 billion, including $541 million

this year.

The estimate came as Prime Minister Tadeusz Mazowiecki traveled to Spain and the United States, and with Finance Minister Leszek Balcerowicz in Washington for the International Monetary Fund's annual meeting.

A spokesman for the planning office said Mazowiecki and Balcerowicz took the report with them to bolster their arguments for aid.

By observing U.N. sanctions against Iraq, Poland stands to lose $1.68 billion in now-broken contracts for goods and services, $170 million in pre-paid Iraqi oil and payments on $500 million Iraqi debt to Poland.

It said indirect losses stemming from higher oil and oil product prices would range between $1.7 billion and $2.2 billion a year through 1994. It said the indirect losses would total $432 million for 1990.

The agency added that ''higher costs of production and transport ... may bring up the inflation rate.'' As this could require a tighter monetary policy, this ''creates a danger for the (current) recession to deepen.''

Poland suffered crippling triple-digit inflation in 1989 before Mazowiecki's government launched its ''Big Bang'' program of economic reform.

The plan brought inflation down to a monthly rate in the single digits - but also depressed the economy and living standards. The impact will be felt even more next year when coal and electricity price ceilings are eliminated.

The International Monetary Fund, which provides and coordinates foreign aid to Poland, has warned that further credits of $300 million could be withheld if inflation in the fourth quarter exceeds 14 percent.

Poland's decision this week to send a hospital ship and another medical unit to the Gulf was welcomed by the U.S. administration. Polish involvement in the Gulf is expected to weigh on its side in aid distribution.

But the Polish Parliament's lower house Thursday demanded a full explanation of the government decision. Of particular concern to legislators is the fact that about 1,200 Polish citizens remain in Iraq.

-30- 3472

#90270u1333 09/27/1990 ~United Press International

WARSAW, POLAND (SEPT. 27) UPI - Polish President Wojciech Jaruzelski said Thursday he would not accept President Bush's invitation to visit the United States because his office term has been shortened by Parliament.

''A new situation has emerged which made me cancel the visit,'' Jaruzelski

said in a letter to Bush.

Jaruzelski was invited to visit Washington in October following Bush's visit to Poland in May.

But last Friday, the Sejm, or lower house of Parliament, approved Jaruzelski's offer to resign this fall despite the fact that his office term expires in 1994.

Pressure was mounting on Jaruzelski, author of martial law imposed in Poland in 1981, to step down as the last remnant of the communist regime. It is believed Solidarity founder Lech Walesa's decision two weeks ago to run for the presidency also pursuaded Jaruzelski to step down.

New elections are expected to take place Nov. 25 and Solidarity Prime Minister Tadeusz Mazowiecki may become Walesa's rival during the campaign.

Mazowiecki is currently on a visit to Spain and is scheduled to travel to the United States Saturday to meet Bush.

The text of Jaruzelski's letter was handed to U.S. Ambassador Thomas Simons Thursday and carried by the official news agency PAP.

In another development, the Polish Parliament approved amendments to the constitution Thursday that may allow a presidential election to take place in November.

The lower house, or Sejm, approved the amendments on a 325-4 vote with 10 abstentions. The Senate meets Saturday to consider similar legislation.

The Sejm approved a number of amendments to the current constitution which will allow for early presidential and parlimentary elections.

If the Senate, or the upper house, agrees to the amendments, the presidential elections could take place as early as Nov. 25 and the new president could be sworn in before Christmas.

-30- 2092

#90270u1362 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - Charles Darwin, the famous British naturalist who developed the theory of evolution, may have suffered from the ''yuppie flu,'' a researcher said Thursday.

Darwin, who in 1859 put forward the idea all living things evolved from earlier forms through natural selection, developed a debilitating illness in his 20s that has been the subject of much speculation. Darwin died in 1882 at age 73.

One biographer proposed that Darwin suffered from hyperventilation aggravated by psychological factors. But E.J. Field of the University of Warwick in Coventry, England, has now proposed Darwin was stricken by myalgic encephalomyelitis or ME - the British scientific term for what Americans call the ''yuppie flu'' or ''chronic fatigue syndrome.''

''All in all Darwin's illness seems to have been ME with the usual string of different diagnoses and negative physical findings,'' Field wrote in a letter published in The Lancet, a British medical journal.

Chronic fatigue has been called the yuppie flu because it frequently affects young professionals. Symptoms vary but a hallmark is long-term lethargy that leaves victims unable to function. Although some have speculated the illness may be triggered by viruses, the exact cause is unknown.

''Darwin's catalogue of symptoms included almost every feature of myalgic encephalomyelitis (ME), including its characteristic remissions and (daily) variability,'' Field wrote.

''When ill he became pale, suffered 'panic attacks,' and could do no more than three hours work a day,'' he said.

'''I am very weak and can write little. My nervous system has failed...''' Field quoted Darwin as writing.

In his autobiography, Darwin also said he was ''troubled by palpitations, pain around the heart, and some gastric symptoms'' before he left on the five-year voyage aboard the HMS Beagle in 1831 that spawned Darwin's ideas.

''Even ringing in the ears, and dislike for noises are recorded. Only in his last decade, with the rest that naturally accompanied it, did his condition improve,'' Field said.

#90270u1393 09/27/1990 ~United Press International

MIAMI (SEPT. 27) UPI - Two former executives of General Development Corp. have agreed to plead guilty to defrauding thousands of home buyers and may be ordered to reimburse those victims as part of their sentence, officials said Thursday.

''We expect restitution to be ordered,'' U.S. Attorney Dexter Lehtinen said.

David F. Brown, the former chairman of General Development, and Robert F. Ehrling, the former president, agreed to plead guilty to fraud and conspiracy to commit fraud under the terms of a plea agreement reached Wednesday.

Each faces a possible prison sentence of five years on the conspiracy charge, but the government has agreed to recommend a sentence of no more than 42 months. The agreement also provides for a consecutive sentence of up to five years probation on the fraud charge.

Lehtinen said the executives will not be fined.

''Any money that exists we want to go to the victims,'' Lehtinen said.

General Development agreed earlier this month to plead guilty to conspiracy and make restitution of up to $160 million.

The company and its two top executives were indicted in March on charges they inflated the value of homes sold in nine Florida communities and prevented buyers, many from northern states, from checking prices on competing homes.

General Development estimates that more than 10,000 home buyers will be eligible to file claims against it as part of any restitution plan.

Lehtinen said the government is not prepared to a make a specific recommendation on the amount of restitution Brown and Erhling should make.

''Restitution will be taken up seriously, but we are not prepared to make a recommendation,'' he said.

In July, U.S. District Judge Lenore Nesbitt tossed out earlier plea agreements with General Development, Brown and Erhling, saying the restitution plan was unacceptable.

The company's earlier plea agreement called for restitution of between $80 million and $100 million.

General Development filed for Chapter 11 bankruptcy protection in April.

#90270u1402 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - The House passed and sent to President Bush Thursday a bill to compensate hundreds of American civilians who became unwitting victims of the nation's nuclear weapons buildup during the Cold War.

The measure authorizes a $100 million trust fund to pay damage claims to cancer victims who trace their disease either to radiocative fallout from atomic weapons tests in Nevada or to their work mining uranium for nuclear bombs.

The fallout victims, also known as the ''downwinders,'' would be eligible for individual payments of up to $50,000, and the miners would receive as much as

$100,000 each. Their families or estates also could qualify for compensation.

By a voice vote, the House accepted changes to its original bill adopted by the Senate, which set eligibility standards to account for a claimant's smoking habits, alcohol consumption and age.

The legislation now goes to President Bush, who is expected to sign the measure into law. However, no claims can actually be paid before Congress passes a companion appropriations bill to establish the trust fund.

The downwinders and uranium miners turned to Congress for compensation after the courts ruled they were unable to recover damages in lawsuits against the federal government.

''It seems so appropriate, as we have watched and wondered over the demise of the Cold War, that we compensate the victims of the Cold War,'' said Rep. Wayne Owens, D-Utah, a chief sponsor of the bill and a lawyer who represented a group of downwinders who filed suit against the government 12 years ago.

''We are saying that as a nation, that in the difficult and dangerous post-war period ... we acted hastily, we acted with insufficient knowledge, and that as a result, many of our fellow citizens fell ill,'' said Rep. Barney Frank, D-Mass., another sponsor.

Congress previously has enacted measures to compensate victims of fallout from nuclear weapons tests in the Marshall Islands and to veterans exposed to radiation while working at the Nevada Test Site in the 1950s or in Japan at the end of World War II.

This legislation is aimed at 600 to 800 people who developed cancer from exposure to radioactive clouds that drifted over their communities in Nevada, Utah and northwestern Arizona from 223 above-ground nuclear explosions conducted at the Nevada Test Site during the 1950s and early 1960s.

Also covered are an estimated 250 to 450 miners who contracted lung cancer or other respiratory diseases from radiation exposure while working in the uranium mines of Utah, Arizona, Colorado, New Mexico and Wyoming to extract ore for nuclear weapons from 1947 until 1971.

Many of the uranium miners of that era were Navajo Indians, and some of the earliest and dirtiest of the mines were located on Indian reservations.

Some 1,200 downwinders, including children of the fallout victims themselves, filed suit several years ago claiming they were exposed to cancer-causing radiation as a result of negligence on the part of the government.

A U.S. district judge in Utah ruled in favor of the plaintiffs in 10 of the 24 test cases. But a federal appeals court later reversed the decision, holding

the government was negligent but immune to such damage suits and that compensation was a matter for Congress to decide.

The courts reached similar conclusions in other cases brought by uranium miners.

Under the bill, uranium miners who smoked would have to show a higher level of radiation exposure than non-smokers to receive compensation. Those who smoked and developed cancer after age 45 would have to show higher exposure levels still.

Records of miners' radiation exposure were kept by the government.

In the case of the downwinders, the bill establishes different eligibility factors for smoking, alcohol consumption and age for each of 13 different types of cancers covered by the legislation.

In addition, for most of the downwinders' cases, the onset of their disease would have to be within five years of exposure, and they must have lived in the affected area for two years.

#90270u1407 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - The annual meeting of the International Monetary Fund and World Bank closed Thursday with praise for the ''shared responsibility'' of member countries determined to work their way through the Persian Gulf crisis.

''I feel encouraged by the sense of shared responsiblity of the membership and a high degree of consensus on the key options at this juncture,'' IMF Managing Director Michel Camdessus said after the meeting.

Much of the three-day meeting focused on formulating an financial response to steer the global economy safely past this period of rising oil prices without altering long-range economic strategies and programs.

Camdessus said he was especially pleased that the gathering of international bankers and finance officials, representing 152 nations, expressed their determination not to repeat the economic mistakes of the 1970s.

In other words, most of the finance officials have indicated it is better to pass along higher oil costs to consumers rather than offsetting the economic pinch with changes in monetary policy.

''Those countries which recovered quickly from the shocks (of the 1970s) were those which implemented policies such as allowing higher prices to flow through to oil users and keeping monetary policy firm,'' said Richard Prebble,

New Zealand's minister for state owned enterprises.

The meetings also agreed that countries most severely affected by increasing oil prices, which have more than doubled since Iraq's Aug. 2 invasion of Kuwait, need ''swift assistance,'' said Barber Conable, president of the World Bank.

''We are urgently examining the needs of our most affected members countries and are launching programs of assistance,'' Conable said in his concluding remarks at the meeting.

In a briefing for reporters, Conable said he believes the World Bank has adequate resources and programs to handle any short-term economic distruptions caused by rising oil prices. He added that some new programs may be needed if oil prices remain inflated for a prolonged period.

Conable reiterated support for a plan launched by Camdessus calling for countries profiting from higher oil prices to contribute the windfall to a special fund to help less fortunate nations.

''Clearly we'd expect those who have a windfall to reflect that in their relationship with the global community,'' he said.

Shortly before the meeting ended, participants heard from a defensive Abdul Moneim Othman, Iraq's alternative executive director to the IMF, who originally had not planned to address membership.

Othman said he felt compelled to speak after listening to other members present what he termed ''downright distortions'' about Iraq's Aug. 2 invasion of Kuwait.

Since the invasion, and the subsequent U.S.-led military response and U.N. economic sanctions, oil prices have more than doubled and several countries have begun feeling the pinch. The World Bank has projected the global economy will slow this year because of higher oil prices, marking the first slowdown in seven years.

''It should be quite obvious that what is going on in our region goes well beyond being a dispute over ordinary economic and border matters,'' Othman said.

#90270u1408 09/27/1990 ~United Press International

SANTA ANA, CA (SEPT. 27) UPI - A judge Thursday extended the temporary custody of an 8-day-old baby boy to his genetic parents and reduced the visitation rights of the infant's surrogate mother to reduce the child's ''stress.''

The unprecedented case centers on the rights of surrogate mothers and biological parents. It is the first time in the nation that a judge has been asked to decide whether a surrogate mother has the right to call a child her own even when it has no genetic link to her.

No final decision was made during Thursday's hearing. The judge scheduled an Oct. 9 hearing for further arguments.

The judge did, however, extend temporary custody of the child to his biological parents until the Oct. 9 hearing and reduced the visitation rights of the surrogate mother to twice a week.

Anna J. Johnson, 29, a licensed vocational nurse and a single mother, agreed in January to bear the child for Mark and Cris Calvert, an Orange County couple, for $10,000.

Before the boy was born, Johnson filed a lawsuit claiming the couple breached their contract with her by making late payments, failing to buy life insurance for her and not caring adequately for her and the fetus.

Johnson delivered the 6-pound, 10-ounce boy last week.

WASHINGTON (SEPT. 27) UPI - NATO Secretary-General Manfred Woerner received a briefing from the Joint Chiefs of Staff on the military situation in the Persian Gulf Thursday and discussed alliance support with Defense Secretary Dick Cheney.

Pentagon spokesman Pete Williiams said Woerner was not asked to provide more

NATO support for Operation Desert Shield and that he did not offer to seek additional assistance from the other 15 member nations.

After receiving the Joint Chiefs of Staff briefing on the situation in the gulf, Woerner spent about 90 minutes with Cheney discussing a wide range of issues, including a review of NATO support for Desert Shield.

Most nations in the alliance have offered either to send ships, troops or planes to Saudi Arabia or provide financial or logistical assistance to the United States for the military operation to deter Iraqi aggression.

Williams said Woerner and Cheney also discussed the future political role of NATO, prospects for a conventional forces reduction agreement with the Soviets and other arms control issues, and NATO's continuing strategy review.

(SEPT. 27) UPI - Police in Berkeley, California, shot and killed a gunman who had held as many as 20 people inside a hotel bar for seven hours early today... killing one of them and wounding seven others. The gunman was identified as Mehrdad Dashti. Police say Dashti was angry over his failure to get a government loan to attend the University of California. The hotel bar was one block from the U-C campus. .

Phil Kim, an architecture student who escaped early in the siege, said Dashti forced female hostages to ''drop their pants''... then forced the male hostages to sexually molest them with carrots that Dashti had brought with him. Another hostage confirmed that story, saying Dashti picked on blondes for the sexual perversion.

The full Senate may vote by next week on the nomination of New Hampshire jurist David Souter as the 105th member of the U-S Supreme Court. The Judiciary Committee voted 13 the nomination to the Senate floor. Massachusetts Democratic Senator Edward Kennedy cast the lone negative vote. Groups on both sides of the abortion issue had gone after the Souter nomination because of his refusal to say how he stands on the question.

The first of an estimated four-thousand troops from France have begun taking up positions alongside other allied nations in Saudi Arabia. The troops were sent to the region after Iraqi forces invaded the residence of the French ambassador in Kuwait and took three French citizens away. .

At the same time, 10 French diplomats expelled from Iraq have arrived safely in Paris. They were thrown out of the country in retaliation for the expulsion of Iraqi diplomats from France.

#90270u1436 09/27/1990 ~United Press International
KARACHI, PAKISTAN (SEPT. 27) UPI - A special court Thursday ordered former Prime Minister Benazir Bhutto to appear before it to reply to the charges of official misconduct.

The special court in the Sindh capital city of Karachi issued two notices to the deposed prime minister to appear on Sept. 30 to answer charges of alleged official misconduct in the hiring of a consultant to administer a government bank loan and awarding of a contract for cotton export.

A similar type of notices were issued against Bhutto on Sunday by another special court in the Punjab state capital of Lahore, ordering her to appear before it on Oct. 2 and 9 in two different cases of alleged misuse of power.

Bhutto was dismissed on Aug. 6 by President Ghulam Ishaq Khan, who charged her administration was tainted by corruption and nepotism.

He also dismissed the national assembly and allowed the regional governors to dissolve the provincial assemblies.

In addition, he set up the special courts to investigate charges of corruption against Bhutto and members of her administration.

Experts say the special courts were set up in an attempt to bar Bhutto from participating in the Oct. 24 elections to the National Assembly. If found guilty by the special court she could be disqualified from running for elected jobs for up to seven years.

Government officials have also implicated Hakim Ali Zardari, Bhutto's father-in-law of ''financial irregularities.'' Zardari was the former chairman of the National Assembly's Public Accounts Committee.

Her husband, Asif Ali Zardari is facing criminal charges in a bank fraud case and is out on bail.

The Western-educated leader has repeatedly denied any wrongdoing and has charged that the president's decision to dismiss her government was illegal.

Sources close to her say that she would challenge the constitutionality and legality of the special courts, which she described as ''kangaroo courts'', but would not refuse to appear before them.

Bhutto, 37, became the first female prime minister of a Moslem country when her Pakistan People's Party came to power following the November 1988 elections - the first democratic ballot in 11 years.

Before she was dismissed, Bhutto had been criticized for failing to control

the growing ethnic violence in southern Sind Province, sparking tensions between her government and the army. She also had been criticized for corruption by her administration and family.

#90270u1441 09/27/1990 ~United Press International

ATLANTA (SEPT. 27) UPI - Health and Human Services Secretary Louis Sullivan Thursday defended spending billions on AIDS research and education even though the disease kills far fewer people each year than heart disease or cancer.

Sullivan cited the epidemic potential of the disease and the possibility that AIDS research will lead to cures for other diseases as reasons for big-budget research. He also noted the devastating effects of the deadly disease on the nation's youth.

''We are losing the next generation of leaders - losing them, by and large, to high-risk sexual behavior and intravenous drug abuse,'' Sullivan said.

AIDS has killed fewer than 90,000 in more than nine years in the United States

while heart disease kills 1 million people a year and cancer kills another half million, Sullivan said.

''There is little wonder that the Office of Technology Assessment, an agency of the Congress, has reported that half the scientists responding to a poll complained that we are spending too large a proportion of our research and education dollars on this one disease,'' Sullivan said.

However, the secretary, speaking to an international gathering of doctors concerned with AIDS and its effect on minorities, warned the disease could spread quickly because it is so highly communicable.

He pointed out statistics showing that worldwide, Africa has the highest rate of HIV infection, referring to the virus that triggers acquired immune deficiency syndrome.

A study by the Agency for International Development in Kampala, Uganda, showed that a quarter of the women there were HIV positive, Sullivan said.

''What is happening in Africa could be the precursor to what might happen elsewhere,'' the health secretary said.

Sullivan also addressed the issue of AIDS and minorities, saying a disproportionate number of blacks and Hispanics contract the disease. The situation is only worsening for minorities, as three-quarters of the pediatric AIDS cases are minority children.

''They are our children, our brothers and our sisters. They might have been our heroes,'' said Sullivan, the nation's first black Health and Human Services secretary.

The terrible effect on minorities is enough to justify the $3.5 billion requested for AIDS programs by President Bush for the 1991 budget, the secretary said.

''We must never allow funding for research, prevention and treatment of this disease to become the hostage of old prejudices that we have wrestled with in our nation for so many decades,'' he said.

Sullivan also promised that AIDS research will lead to cures for other diseases, and a basic understanding of viruses in general.

''This is not a special interest disease,'' Sullivan said. ''Research on HIV and AIDS will not benefit just the hundreds of thousands, but millions whose lives will be improved by what science discovers.''

#90270u1442 09/27/1990 ~United Press International
BOSTON (SEPT. 27) UPI - The Bank of Boston Corp. Thursday predicted it will lose up to $250 million in the current quarter, slashed its dividend by more than two-thirds and said it will cut its work force by at least 1, 500 employees, or 8 percent, on a worldwide basis.

Citing ''the deepening uncertainty of today's economic environment,'' Ira Stepanian, chairman and chief executive officer, said the bank would immediately begin a ''voluntary separation program.'' The program, he said, is a start on the banking company's ''commitment to reduce staff by a minimum of 1,500 positions ... by early 1991.''

The statement did not rule out the possibility of later layoffs.

Bank of Boston, the region's biggest banking company, has been hard hit by the collapse in New England real estate but had returned to profitability after a big loss in the third quarter last year.

The dividend cut will save about $43 million a year, the bank said.

Stepanian said the decision and other actions will allow the company to ''conserve our strong capital base.''

The company, with subsidiary banks in five of the six New England states, had $37 billion in assets at the end of the last quarter.

#90270u1446 09/27/1990 ~United Press International
ATLANTA (SEPT. 27) UPI - A Greek organization founded by the late Aristotle Onassis honored former President Jimmy Carter Thursday for his practical approach to international peacekeeping.

The Alexander Onassis Public Benefit Foundation, named for the Greek shipping tycoon's 23-year-old son who died in a plane crash, awarded Carter the Onassis Prize for Man and Society, Aristotelis 1991.

''I will be proud to accept this award on behalf of The Carter Center in hopes that suffering people will continue to benefit from our programs,'' Carter said. ''When the Carter Center was founded in 1982, we envisioned an organization that would reach out to people in need and address unresolved problems that afflict our modern society. Today, the realilty has exceeded our dreams.''

The foundation, making the announcement in Athens, Greece, praised Carter for his ''personal involvement and valuable contribution in bringing international disputes into the realm of international peacekeeping efforts.''

Carter's legacy of peacekeeping efforts include bringing warring Eritrean rebels and the Ethiopian government to the negotiating table last fall and monitoring elections in civil war-torn countries such as Nicaragua.

He traveled to Haiti last week to oversee preparation for December elections in the Caribbean country.

Other Onassis Prizes went to West German Foreign Affairs Minister Hans-Dietrich Genscher, Cypriot archaeologist Vassos Karageorghis and the organization, Greenpeace International.

#90270u1456 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - An experimental drug may prevent the distressing hair loss that strikes many cancer patients undergoing chemotherapy, an animal study showed Thursday.

A team from the University of Miami School of Medicine in Florida and Cell Technology Inc., of Boulder, Colo. found an experimental cancer drug called ImuVert protected young rats against hair loss caused by two standard cancer chemotherapies.

It is not known if the drug will work the same way in humans. But the results hold promise for solving the long-standing problem of hair loss, which demoralizes many cancer patients and even prompts some to refuse potentially life-saving chemotherapy.

"Although this complication has been known for many decades, little progress has been made in its prevention and treatment," the researchers wrote in a study published in the journal Science. In contrast, medications have been developed in recent years to reduce the other major side effects of chemotherapy - nausea and pain.

Joann Schellenbach, a spokeswoman for the American Cancer Society in New York, said cancer patients often cite the first glimpse of their bald heads as one of the most horrifying experiences of their illness.

"Hair loss is a constant, physical reminder that your life is currently on the line. It's more than just vanity. It's such a symbol," Schellenbach said. "If this new approach works, it would be of tremendous value to the cancer patient."

It is not known excactly how many of the one million Americans diagnosed with cancer each year undergo chemotherapy. But chemotherapy is frequently used in people with leukemia and those whose cancers have spread beyond the original tumor site.

Exactly how ImuVert acts to ward off hair loss is not known. But Dr. Adel Yunis of the University of Miami speculated the drug, an immune booster derived from a bacteria, may increase immune cells' output of chemicals that protect the hair follicles.

One stumbling block in preventing hair loss has been the lack of animals that shed their hair when given chemotherapeutic agents. In the latest work, researchers found 8-day-old rats with a type of leukemia resembling a form of the disease found in humans suffered hair loss when they were given cytosine arabinoside, a standard anti-leukemia drug.

However, when ImuVert was added to the chemotherapy regimen, the young rats were completely protected from hair loss. The addition of ImuVert also improved survival among the rats, with two of 20 animals that received the combination treatment dying from leukemia compared with 21 of 23 in the group that only received cytosine arabinoside.

ImuVert also guarded against hair loss in rats given doxorubicin, a chemotherapy drug widely used against leukemia and breast cancer. However, the experimental drug did not prevent hair loss in rats when given with a different type of chemotherapeutic agent, call cyclophosphamide.

If all goes well, tests of ImuVert to prevent chemotherapy-induced hair loss in humans should begin within two years, Yunis said. The drug, made by Cell Technology Inc., is already being tested alone in brain cancer patients. Known side effects include fever, chills, and nausea.

Many chemotherapy drugs cause temporary hair loss ranging from slight thinning to total baldness. Hair generally grows back in several months after the end of treatment.

In the past, some doctors have tried to prevent hair loss by using tourniquets or ice-filled caps to block chemotherapy drugs from reaching the scalp. However, results have been mixed and the practice has not become widespread.

(SEPT. 27) UPI - The nation's film-making industry has come up with a new rating system that separates hard-core movies from those with a very adult theme that also were classified as X-rated. The new addition is N-C-17, short for NO children under 17. It should help producers of serious adult-theme movies who had to battle the harsher X-rating that often kept their films from being shown.

Classes at all three campuses of the University of the District of Columbia have been canceled for a second day as more than 100 students occupy two buildings. They are protesting the way the school is run and demand the firing

of 11 board members. The students also want longer library hours and revitalization of the athletic program.

Polish President Jaruzelski has turned down an invitation to visit the United States next month. The move comes as pressure builds to get him to step down. Jaruzelski's term officially runs to 1994 but the lower house of Poland's Parliament last week approved his offer to resign this fall. Solidarity leader Lech Walesa already has said he plans to run for the presidency if elections are held.

#90270u1476 09/27/1990 ~United Press International

SAN FRANCISCO (SEPT. 27) UPI - A federal appeals court Thursday declared unconstitutional Nevada's auto insurance rate rollback law passed in 1989 to mirror California's sweeping rate reform measure, Proposition 103.

The 9th U.S. Circuit Court of Appeals tossed out the Nevada rollback law, stating it denied insurers the constitutionally required ''fair and reasonable return'' on their money.

Unlike the landmark California insurance rate reform measure, which was upheld by the California Supreme Court in 1989, the Nevada insurance measure could not be salvaged.

The law, passed by the Nevada Legislature in 1989, mandated a rollback of motor vehicle liability insurance to 1988 levels, imposed a minimum rate reduction of 15 percent below the 1988 levels and froze rates for one year.

The new restrictions were never put in place, however, because of court-ordered stays imposed while the legal challenges pending against the law.

Scott Doyle, Nevada's chief deputy attorney general, said, ''Any time you have a significant argument before the court, it is always a disappointment to get an adverse ruling from the court.

''Obviously we have not received a copy of the decision. We will take the opportunity to study it and decide what, if anything, should be done next,'' Doyle said.

Seven insurance companies filed suit challenging the law, which was to take effect Oct. 1, 1989.

Insurers maintained the law violated their due process rights because it prohibited increasing rates if firms faced losses.

The insurers said the law would deprive them of property in the form of profits.

Language in the Nevada law was identical to California's when it provided that ''rates must not be excessive, inadequate or unfairly discriminatory ...''

But California state law did not define the meaning of the term ''inadequate. That was a critical divergence from Nevada insurance law, which states: ''Rates are inadequate if they are clearly insufficient, together with the income from investments attributable to them, to sustain projected losses and expenses in the class of business to which ''he class of

Judge Edward Leavy wrote that the Nevada definition left insurers in the position of declaring rates ''adequate'' if losses and expenses were identical.

''Thus the law guarantees only that an insurer will break even; it does not guarantee the constitutionally required 'fair and reasonable return,''' Leavy wrote.

A fair rate involves balancing the interests of investors and consumers, according to the court.

The appeal court also rejected the notion that the Nevada law was a temporary emergency measure intended to correct a short term rate problem.

Leavy was joined in the decision by Judges J. Clifford Wallace and Arthur Alarcon.

#90270u1481 09/27/1990 ~United Press International

WEST ALLIS, WI. (SEPT. 27) UPI - The Excalibur Automobile Corp., which produces expensive neo-classic cars, has filed for Chapter 11 bankruptcy in federal bankruptcy court in Milwaukee.

Excalibur President Scott Dennison said Thursday the company filed for Chapter 11 status Wednesday to protect the firm and its investors from creditors while talks on selling Excalibur continue.

''Negotiations are still thrashing away. But as of (Wednesday), we put this thing into Chapter 11,'' he said.

The firm laid off the last of its workers in June, when it closed down.

The bankruptcy statement said the firm, as of Aug. 14, had assets of about $4.7 million and substantially more than $3.9 million in debts, including about $2.4 million in debts secured by mortgages.

The firm's largest creditor is First Wisconsin National Bank of Sheboygan, Wis., which has more than $2.1 million in loans outstanding, and the second

largest is the city of West Allis, near Milwaukee, which is owed more than $200,000 in economic development loans and back taxes.

John Stibal, director of economic development for West Allis, said the filing may turn out to be good news for Excalibur and the city.

''I believe this is what it is going to take to get Excalibur's current situation to a resolution and refinanced. We view this as a step in the right direction,'' he said.

#90270u1489 09/27/1990 ~United Press International

UNITED NATIONS (SEPT. 27) UPI - Nicaraguan President Violeta Chamorro, in a speech that briefly distracted the U.N. General Assembly's attention from the Persian Gulf crisis, Thursday praised her country's return to democracy and peace after a decade of civil war.

She also called for a unified Central America and asked for a greater effort to ease the debt burdens of less developed nations.

Chamorro thanked the United Nations for overseeing last February's election, which elected her. She said it was the first free election in her country's 169-year existence.

She told the General Assembly that since she took office April 25, 21,000 Contra rebels had been successfully demobilized, and that the Nicaraguan armed forces had been reduced from 90,000 members to 33,000.

At a later press conference she said her goal was to approach the level of Costa Rica, one of the few countries in the world to have abolished its army.

When asked if Nicaragua planned to send troops to join the U.S.-led multinational force in the gulf, she laughed and explained that she was reducing the size of her army and couldn't spare any soldiers.

As a symbol of Nicaragua's disarmament, Chamorro presented the president of the General Assembly with two destroyed rifles, one Soviet and one U.S.

Chamorro's husband, a newspaper publisher, was murdered in 1978 for his opposition to dictator General Anastasio Somoza who was overthrown the following year by Sandinista guerillas. Chamorro was a member of the first Sandinista junta, but she resigned after accusing the movement of being anti-democratic.

#90270u1497 09/27/1990 ~United Press International

ANCHORAGE, AK (SEPT. 27) UPI - A judge has ruled that the Exxon Corp. and its shipping subsidiary are liable for all actual damages caused by the wreck of the Exxon Valdez, which created America's worst spill in Alaska last year.

''Exxon Shipping Corp. and Exxon Corp. are strictly liable without regard to fault for all damages which are compensable under (the law), ruled state Superior Court Judge Brian Shortell in an order signed Wednesday.

Compensable damages include property damage, loss of income and other economic harm. The ruling represented a victory for the state of Alaska, fishermen, native villagers, seafood processors, environmentalists and others suing Exxon in state court.

The ruling did not address the amount of damages or the issue of punitive damages, but only whether Exxon could be held liable for actual damages caused by the spill.

Nor did the court address the issue of blame, saying it doesn't matter under Alaska's strict liability law.

''Causation is a factual issue which has not yet been established by any of these plaintiffs,'' the ruling said. ''However, Exxon Shipping Corp. and Exxon Corp. will be strictly liable for all damages allowed (by statute) proved to have been proximately caused by the spill.''

Proximate cause means an event closely linked to an effect, and the ruling is certain to provoke new court arguments over whether the spill was the direct cause of the damages claimed by the various plaintiffs.

Shortell based his order on a state law that ''persons owning or having control over hazardous substances which are spilled into Alaskan waters or on Alaskan lands are strictly liable for damages caused by those spills. Corporations are persons who may be liable under the statute.''

Shortell ruled that evidence in the case establishes beyond dispute that Exxon had control of the crude oil spilled from its tanker last year and that oil is a hazardous substance.

Actual damages caused by the spill must be proved at trial, Shortell said. But the ruling means Exxon cannot avoid legal responsibility for the damages.

Shortell also denied a motion from the Alyeska Pipeline Service Co. to dismiss complaints against it from plaintiffs who are suing for ''purely economic damages where there has been no physical injury to a plaintiff's person or property.''

The judge said there was no basis for limiting plaintiffs' damages.

On March 24, 1989, the Exxon Valdez crashed into a well-known reef in Prince William Sound, breaking open and spilling nearly 11 million gallons of crude into pristine fishing and wildlife waters.

In the months that followed, hundreds of suits were filed in state and federal court against Exxon and Alyeska. Earlier this year the Justice Department charged Exxon with five crimes stemming from the spill. The various cases are said amount to billions of dollars in claims.

#90270u1500 09/27/1990 ~United Press International

UNITED NATIONS (SEPT. 27) UPI - Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze said Thursday they had made progress toward an arms control agreement and adjourned their talks to consult their allies.

Baker and his Soviet counterpart met for two hours during which they discussed reducing conventional forces in Europe.

The secretary of state said the two sides had made ''good progress'' and will consult their allies in NATO and the Warsaw Pact.

Baker said progress had been made on limiting aircraft in the conventional forces agreement but ''we need to discuss it with them (the allies) before we discuss it with you (the press).''

The two also met nearly four hours Wednesday and discussed issues ranging from strategic arms reduction to Afghanistan.

The series of Baker-Shevardnadze meeting this week is their 20th, an average of one per month during the Bush administration.

The show of solidarity is not accidental, according to U.S. officials, with both Baker and Shevardnadze determined to send a signal to Baghdad that Iraqi strongman Saddam Hussein's ambitions will not be allowed to destroy superpower cooperation.

In their talks Wednesday, a senior U.S. official said Baker and Shevardnadze moved forward on both conventional forces reduction in Europe and strategic arms cuts.

The official said the negotiations are now down to refining extremely technical issues - important but requiring a lot of homework and expert advice from specialists.

Included in those are such questions as:

-What is a combat aircraft? Does it include two-seater trainers that can be turned into a warplane by adding some electronics and some wing- pylons which could carry missiles? And if so, how many of those planes would equal one plane specifically designed to kill enemy aircraft or tanks?

-In strategic arms, how could you determine how many warheads there are on a big missile transported around aboard a train? How can the two sides exclude naval forces, as the United States wants, if those ships can carry weapons that can never be inspected and yet have the ability to incur enormous damage on an enemy nation?

Those questions, according to U.S. officials, are being negotiated in a spirit of cooperation.

In another example of the post Cold-War period, Baker and Vietnam's deputy prime minister, Nguyen Co Thach, have scheduled a 30-minute meeting Saturday morning in New York, the highest such meeting since the end of the Vietnam War.

-30- 2718

#90270u1503 09/27/1990 ~United Press International

ANCHORAGE, AK (SEPT. 27) UPI - The Alaska tourist industry launched Thursday its biggest nationwide television advertising campaign ever in a joint effort with Exxon to convince would-be visitors to come to Alaska.

Exxon paid $7 million for the project aimed at wooing tourists still scared away by the March 1989 oil spill, the nation's worst, which coated more than 1,000 miles of pristine Alaska coastline with crude oil spilled from the grounded Exxon Valdez.

The Alaska Visitor Association ads - which Exxon had a hand in writing and producing - say Prince William Sound, where the Exxon Valdez tanker spilled 11 million gallons of oil, was ''mostly recovered'' and ''nearly restored.''

Three 30-second commercials will air 60 times each week in 35 major markets around the country, reaching half the television viewers in America, according to the visitors association. The ad blitz will last four weeks.

''Our goal is to encourage visitation to the state,'' said AVA director Karen Cowart.

She said the tourist industry was still feeling the effects of the spill and research showed that potential tourists still avoided Alaska because of it.

In 1989, the state lost at least 10,145 tourists and about $15 million in tourism revenue, according to ''very conservative'' estimates based on no

growth in tourism from the previous year, according to AVA research.

Exxon paid for a $4 million tourism ad campaign last year, but Cowart said the tourism trade group went back to Exxon for more money for an even bigger project this year because ''we still had problems and we took the research to Exxon.''

Showing scenes of Prince William Sound, one ad says, ''1991 is the time to come. See its pristine shoreline, nearly recovered now after last year's spill.''

Another ad says, ''Alaska - where winter storms and cleanup efforts have nearly restored the part of Prince William Sound hit by the 1989 spill.''

All three ads mention the spill because they are attacking a perception problem that the Alaska shores are in worse shape than they really are, Cowart said. Prince William Sound scenes and wildlife were shot recently, she said.

The ads also show scenes unconnected to the spill that are major attractions, such as Mount McKinley, glaciers, totem poles and other wildlife.

Exxon had a say in writing and producing the spots, Cowart said, but she said there were no strings attached to the $7 million Exxon payment. ''It was an outright grant.''

She said the mutual goal of the project was to bridge ''the gap between the actual reality and the perception'' of the condition of shores hit by oil and to tell people that ''the state of Alaska is a great destination.''

Exxon has spent more than $2 billion and two summers trying to clean the shores of oil. The state of Alaska wants Exxon to return next summer to clean up the remaining oil.

NEW YORK (SEPT. 27) UPI - Assets of the nation's 524 money-market mutual funds rose by $361.6 million to $409.12 billion in the week ended Wednesday, the Investment Company Institute reported Thursday.

In the latest week, the Washington-based institute said, broker- dealer fund assets decreased $505.5 million to $165.1 billion, but assets of general-purpose funds increased $681.3 million to $145.53 billion and institutional fund assets rose $185.8 million to $98.48 billion.

The Investment Company Institute, a national association of the American investment company industry, reports the assets of money market funds to the Federal Reserve Board each week.

The Donoghue Organization, of Holliston, Mass., said that average seven-day simple yields were 7.47 percent, up from 7.46 the previous week, and that 30-day simple yields were unchanged at 7.47 percent.

The average maturity of fund portfolios was 46 days, the same as the previous week.

The Bank Rate Monitor, North Palm Beach, Fla., gave average rates as follows: money-market deposit accounts, 5.88 percent, down from 5.89; Super-Now accounts, 4.97 percent, unchanged; six-month certificates of deposit, 7.49 percent, unchanged; 1-year CDs, 7.59 percent, up from 7.58; 2 1/2-year CDs, 7.69 percent, up from 7.67; and five-year CDs, 7.80 percent, unchanged.

The average rate for a one-year, adjustable-rate mortgage was unchanged at 8.25 percent.

The average rate on a 15-year, fixed-rate mortgage rose in the latest week to 9.76 percent from 9.70, while the average rate for a 30-year, fixed-rate mortgage reached 10.06 percent from 10.01.

The average rate for a four-year automobile loan was 12.23 percent, up from 12.22.

#90270u1557 09/27/1990 ~United Press International

JACKSONVILLE, FL (SEPT. 27) UPI - A Navy wife arrested on charges of buying a newborn baby for $3,000 may have bought and sold as many as 10 children from her home, investigators said Thursday.

Nellie Cutright, 45, of Mayport was arrested Wednesday and held in the Duval County Jail on $50,000 bond on charges of child buying, which carries a maximum penalty of five years in prison and $5,000 fine, and insurance fraud.

Investigators claim Cutright used her military insurance to cover the mother's hospital delivery costs.

''There could have been as many as 10 (babies) that went through that house,'' said Duval County Assistant State Attorney McRae Mathis. ''We don't know where they came from or where they've gone.''

Investigators, however, said Cutright is suspected of finding couples in at least four states - Florida, Missouri, Virginia and Texas. Some may have paid as much as $25,000 for a child.

Authorities said evidence taken from Cutright's home and witnesses' statements that infants were seen being carried in and out of the home, suggest Cutright may have been involved in selling children during the last nine years.

''About every other year, we come across a child-selling case,'' said Chief Assistant State Attorney John Delaney. ''This is the first time that we felt it wasn't an isolated incident or isolated circumstance.''

Charged with child selling was Virginia Underwood, the baby's 25- year-old mother. However, Underwood, who also faces a maximum penalty of five years in prison and a $5,000 fine, has been cooperating with authorities and was released from jail on her own recognizance, investigators said.

The month-old girl was found at Cutright's home and turned over to state social workers.

Cutright's husband's name was withheld until he could be formally contacted by the Navy. Investigators would not say whether he was involved, but they did say that the alleged ring did not appear to relate directly to the Navy.

The investigation began two weeks ago, when Underwood, who moved to Pensacola since the alleged baby sale, contacted state officials because she was worried about her child, Mathis said.

Investigators searching the Cutright home found photographs, blank and altered birth certificates, altered military identification cards for children and infant hospital armbands. Florida law says adoptions must be handled through the state Department of Health and Rehabilitative Services, a licensed adoption agency or a qualified intermediary such as a doctor or lawyer.

No money is permitted to change hands, except to cover medical bills and prenatal care.

According to investigators, Underwood checked into Memorial Medical Center in Jacksonville about one month ago, posing as Nellie Cutright. Cutright posed as ''Billie Jo,'' the mother's sister.

The women left after the baby, Kayla Cutright, was born Aug. 26. Cutright then allegedly paid Underwood $3,000 and took the child home, billing her military insurance for the delivery. It is believed she intended to keep the child herself.

#90270u1580 09/27/1990 ~United Press International
WARSAW, POLAND (SEPT. 27) UPI - Some Polish municipal authorities, trying to do away with a symbol of the Communist past, want to move the graves of Soviet soldiers killed in Poland while fighting Nazi Germany.

The idea, however, is being opposed by none other than one of Poland's most anti-communist politicians, Solidarity founder Lech Walesa, a presidential candidate.

At a news conference held in Gdynia, Walesa's spokesman Andrzej Drzycimski read out a stement that said the fallen Soviet soldiers should be left ''where death caught them by surprise.''

Municipal authorities in a number of towns, including Krakow in southern Poland, want to move the graves from prominent locations to less conspicuous spots.

Walesa said Polish national tradition and Christian values call for respect for the dead soldiers, regardless of their uniform.

''Remebering the past, we should shape a new future, including the one in the East,'' Walesa said.

A Solidarity group of scientists in Krakow, citing similar reasons, issued an appeal to the municipal authorities, demanding the Soviet graves remain where they are.

#90270u1615 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - Indexing capital gains to ensure that taxes are not paid on profits eaten by inflation appears to pose the same philosophical and fiscal dilemma for Democrats that they had with President Bush's call to cut the tax rate.

Accordingly, the latest administration proposal at the bipartisan budget summit - a ''bottom line'' plan that sources said calls for indexing capital gains instead of cutting rates - may not end the impasse that has kept bargainers from reaching a $500 billion, five-year deficit reduction deal.

Indexing, Democratic analysts say, still predominantly benefits the wealthy, but not by quite as much as would a rate cut or excluding a portion of the gain from taxation, as Bush had proposed earlier.

And, they say, indexing remains a money-loser for the Treasury, not a revenue-producer, so money would have to be found from other sources to make up the loss.

Democrats are also likely to insist that any indexing proposal be offset by additional taxes on the rich - the same demand that helped create the original impasse over capital gains since GOP budget negotiators have rejected any hike in income tax rates on the rich in exchange for a capital gains cut.

''Most Democrats are, in fact, looking at indexing as just another version of capital gains,'' one Democratic source said. ''Rank and file Democrats will view this as just another version of capital gains and it will require for most Democrats the same price - that is, some adjustment to the (income tax) rates'' for the rich.

''I think it's going to be very, very difficult for them (Democratic leaders) to get half the Democrats in the House to vote for indexing without some sort of a rate increase,'' the source said. ''I do think it's unlikely that they'll agree to it without an offset.''

The source said ''politically, I don't think that it's any less'' difficult to

get Democratic approval for indexing than for a capital gains rate cut.

Although it can be structured in several ways, indexing of capital gains is fairly simple to understand. Here's how it works.

If someone buys a stock or other asset for $1,000, holds it for 10 years and then sells it for $2,000, there is a capital gain, or profit, of $1,000.

Under current tax law, that $1,000 profit is taxed at the same rate as ordinary income, such as wages. So someone in the 28 percent tax bracket would pay a 28 percent tax, or $280, on the $1,000 capital gain.

With indexing, the tax on the $1,000 gain would be figured as follows:

If inflation over the 10 years the asset was held before being sold averaged 5 percent per year, the inflation factor would be 50 percent during the decade. Under indexing, the asset seller would take the original purchase price of $1,000 and add 50 percent, the inflation factor, before figuring the gain.

In this example, the capital gains tax would be paid on only a $500 gain. That is the difference between $1,500 - the original purchase price plus the 50 percent inflation factor - and the sale price of $2, 000.

At the same 28 percent tax rate, the tax would be $140 after indexing. That is half the $280 in taxes that would be collected under current tax law.

What Bush had earlier proposed was that 30 percent, or $300, of the $1,000 gain in this example be excluded from taxation. Someone in the 28 percent tax bracket would then pay a capital gains tax on the $700 in profit after the exclusion, for a tax of $196.

Again, the tax using indexing would be less than under Bush's earlier proposal.

There are alternatives, such as allowing for 50 percent of inflation instead of 100 percent, but indexing by itself does not appear to be the key that will unlock the golden door of a deficit reduction agreement.

#90270u1622 09/27/1990 ~United Press International

SEATTLE (SEPT. 27) UPI - Asiana Airlines of South Korea Thursday received its first Boeing 767-300, spokesmen for the Seattle-based aircraft manufacturer said.

The plane is the first of 12 767-300s ordered by Asiana, Boeing Commercial Airplane Group spokesmen said. They said the plane, which holds 259 passengers will serve the carrier's intra-Asian routes.

The airline Sept. 3 ordered 27 Boeing aircraft and took options on 24 more. Boeing Co. said the 27 orders are valued at about $3 billion.

The two-year-old airline ordered two 767s in 1988.

(SEPT. 27) UPI - The chairman of the Federal Deposit Insurance Corporation says the fund protecting U-S bank deposits is expected to decrease by three-BILLION dollars in 1990. That's a shrinkage of one-BILLION dollars more than

previously anticipated. William Seidman told U-P-I ''the losses were larger and there were more failures.''

A former Algerian president returned from exile to Algiers, where about 50-thousand people greeted him today. Ahmed Ben Bella called for general elections, 15 years after his government was overthrown in a military coup. Aides say Ben Bella took a ferry home, believing he might be killed on an airplane.

The East and West German Social Democratic parties merged today in what promises to be Germany's largest opposition party when the two nations unite next Wednesday. The S-D-P released its new manifesto in West Berlin, saying the party will work- quote- so ''Germany can find its place in a peaceful Europe.''

An anti-terrorism conference in central London proved to be the scene of anti-terrorism work. Police say they ound and de-fused a bomb today that could have caused ''death and serious injury'' had it exploded. Police say they suspect the outlawed Irish Republican Army planted the explosive.

Belgian police say kidnapping may have been on the minds of two men who last night broke into the home of a U-S Air Force general assigned to NATO. The men overpowered a guard, leaving him hospitalized with severe head injuries. But the general who resides in the Brussels home was out of the country.

The Chicago Sun-Times today quotes sources as saying a federal grand jury is looking into allegations involving three Chicago-area orange juice makers. The sources say the Chicago area has a reputation among government regulators for selling juice billed as ''pure''... but adulterated with unlisted ingredients.

#90270u1637 09/27/1990 ~United Press International
WASHINGTON (SEPT. 27) UPI - Key congressmen told Energy Secretary James Watkins Thursday they would move quickly to allow him to triple, to 15 million barrels, a test oil sale from America's strategic petroleum reserve.

Watkins, meanwhile, said the price of oil will continue to rise if Iraqi President Saddam Hussein keeps talking about war - despite President Bush's decision to sell 5 million barrels of oil from the stockpile.

''I do think this test shows resolve,'' Watkins said. ''I think the psychological impact is significant.''

But the purpose is to test the U.S. emergency oil system, not to bring the price of oil down, he said.

''We are ready to physically move the oil,'' Watkins said. ''I can't say that it's going to work perfectly,'' but the purpose is to ''stress the system.''

''We're concerned that every time Mr. Hussein opens his mouth on something more serious, it jolts that market,'' Watkins said. ''We're not the only ones affecting the market by a long shot.''

''If Saddam Hussein makes another threat,'' the price of oil will rise despite administration action to sell reserves, Watkins said.

Bush announced the 5 million-gallon test sale in suburban Chicago Wednesday, moving to quell the nation's energy jitters. The oil is stored in underground salt caverns in Texas and Louisiana.

During a long hearing Thursday, key members of Congress indicated they were prepared to swiftly push legislation giving Watkins the authority to sell 15 million barrels of oil from the 590 million-barrel stockpile.

The energy secretary testified at a joint meeting of two House Energy and Commerce subcommittees. The subcommittees are headed by Reps. John Dingell, D-Mich., and Philip Sharp, D-Ind.

Sharp kept pressing Watkins, encouraging him to seek authority from Congress to draw down more than 5 million barrels. Watkins said initially, ''We'll get back to you later,'' but Sharp predicted the House and Senate would move with unusual speed to increase the amount.

Watkins, pushed to specify a bigger amount that could be put up for sale, indicated 15 million barrels would be desirable.

''Three times the number is the number,'' he said, engaging in unusual public negotiation with congressmen who have been hit with a deluge of complaints from voters about skyrocketing gasoline prices at the pump.

''Make no mistake: we will move rapidly to give you all the authority you need '' Sharp said.

Watkins also said the government recognizes ''potential threats'' to the petroleum reserves from saboteurs. A Watkins aide testified that security has been upgraded, facilities ''hardened,'' surveillance increased and the National Guard placed on ''standby alert.''

''We expect oil prices to remain volatile,'' Watkins testified. ''But barring complications, such as armed conflict, major accidents or unusual weather patterns, we believe that the market will keep supplies adequate to meet demand during the winter months.''

Many congressmen asked Watkins to persuade America's allies to begin drawdowns of their oil reserves in conjunction with the United States.

Watkins said ''we are prepared to implement a coordinated drawdown'' of the more than 1 billion barrels in strategic reserves held by the United States and other nations belonging to the International Energy Agency ''should the situation warrant.''

The international agency meets in Paris Friday. Watkins noted, however, that worldwide oil stocks are currently ''above the norm.''

Watkins promised that his long-awaited national energy strategy will be on Bush's desk in December and that conservation will be ''at the core'' of the plan.

The administration also plans to increase its request for conservation money in the next budget, Watkins said, indicating he agreed with some of the criticism that conservation efforts were forgotten after the last oil shock in 1979.

NEW YORK (SEPT. 27) UPI - Worries about U.S. banks drove the dollar down against most European currencies in New York trading Thursday, but rising Mideast tensions and oil prices helped to brace it against the Japanese yen.

Troubled Bank of Boston's announcement of a two-thirds dividend reduction and plans to lay off 1,500 employees deepened market anxiety about the solidity of U.S. banks, a dollar-bearish leitmotif these days.

Fears that the Mideast standoff could turn into a shooting war gave a limited amount of support to the dollar, analysts said.

''We've been prone to all kinds of rumors'' said analyst Terry Reid, a Harris Bank assistant vice president in Chicago. ''The attitude in the market is that this Middle East situation might be coming to a head.''

As players believe war news would boost the dollar, however temporarily, no one wants short positions in the unit, Reid said.

Late in the New York session, the dollar was quoted at 1.5610 marks, off from 1.5650 marks Wednesday, and at 138.10 Japanese yen, up from 136.85.

Bank of New York trader Jim Dempsey said the dollar's advance on the yen was mostly a byproduct of the yen's weakness against the deutsche mark. The dollar is a stepping-stone in yen-to-mark trading and gains in the process.

Currency traders said indications from the Swiss National Bank that it would keep its official short-term interest rates firm also proved negative for the dollar, which had moved up on softening Swiss rates.

The British pound finished at $1.8785 up from $1.8720.

Other New York dollar rates: 1.2930 Swiss francs, down from 1.3010; 5.2525 French francs, up from 5.2380; and 1,167.30 Italian lire, off from 1,170.60.

In Europe, the dollar closed mixed in choppy trading as dealers stood by for new Mideast developments. European players also fretted about trouble in the U.S. banking industry as real estate loans go bad.

''Upward and downward pressures (on the dollar) are fairly balanced,'' remarked David Simmons, a Midland Bank currency analyst.

''But we're expecting the Fed to change monetary policy (to an easier stance) because of worries about the U.S. banking system,'' he said.

In London, the pound strengthened against the dollar to close at $1.8710 vs. $1.8650 at the close Wednesday.

The dollar ended lower in Frankfurt, at 1.5680 German marks vs. 1.5685. But it rose in Zurich, to 1.3085 Swiss francs compared with 1.3070.

The dollar declined in Paris, Brussels, and Milan, to 5.2485 French francs vs. 5.2635, 32.28 Belgian francs vs. 32.34, and 1,172.60 Italian lire vs. 1,175.50 Wednesday.

In Tokyo, the dollar inched up against the yen in reaction to another fall on the Tokyo Stock Exchange, ending at 137.50 yen vs. 137.40.

''Inflation pressure and the oil price surge is behind the stock plunge and this also works against the yen,'' said Hiroshi Adachi, a vice-president with Lloyds Bank (Japan).

Gold closed higher in Zurich at $404.50 an ounce against $402.50, but closed lower in London at $405.25 an ounce vs. $405.375.

Republic National Bank in New York closed cash gold at $405.75 an ounce, off from $407.25 Wednesday. The New York Commodity Exchange settled contract gold at $405 an ounce, also down from $406.60.

Silver closed unchanged in Zurich at $4.80 an ounce. It was also unchanged in London, ending at $4.82.

Republic closed cash silver at $4.80 an ounce, off from $4.815. Comex silver finished trading at $4.771, down from $4.798.

#90270u1686 09/27/1990 ~United Press International
NEW YORK (SEPT. 27) UPI - Stock prices fell to their lowest level in more than 17 months Thursday in erratic trading on the New York Stock Exchange as investors unloaded blue-chips as the price of oil surged amid worries of escalated hostilities in the Persian Gulf.

The Dow Jones industrial average, which fell 25.99 points Wednesday, tumbled 32.17 points, or slightly more than 1.3 percent, to close at 2427.48 - its lowest level since May 11, 1989.

Since the Aug. 2 Iraqi invasion of Kuwait, the Dow Jones Average of 30 selective blue-chip issues has tumbled 437.12 points, or about 6.6 percent of its value.

Among broader market gauges, the New York Stock Exchange composite index lost

2.16 to 165.36, a new low, and Standard & Poor's 500-stock index tumbled 4.09 to 300.97 - its lowest level of the year. The price of an NYSE common share dropped 38 cents.

Declines crushed advances 1,187 to 397, while 403 issues escaped the sell-off among the 1,987 issues crossing the Big Board tape. Volume totaled 182,690,000 shares, well above the 155,570,000 shares changing hands on Wednesday.

Market watchers said stocks plummeted as the price of crude oil surged on global markets and tensions grew in the oil-rich Middle East.

In New York, West Texas Intermediate closed 87 cents a barrel higher at $39.54 on the Mercantile Exchange in what analysts described as a wild trading session.

Oil prices surged on Defense Department reports confirming that the U.S. warship Elmer Montgomery fired a shot across the bow of an Iraqi tanker in the Northern Red Sea.

The prompt-delivery November contract traded as high as $40.10 a barrel - an all-time high for the commodity before dropping back on profit-taking.

''Oil prices also moved up on rumors of troop movements in Saudi Arabia,'' said James Fiedler, energy analyst with E.D.& F. Man International Futures Inc. ''People now truly anticipate a conflict. About the situation in the Middle East, it is no longer a question of what (is going to happen) but when.''

Cash-strapped investors around the globe have been selling stocks in the face of surging oil prices, which have risen more than 75 percent since Iraq's invasion of Kuwait amid rumors and speculation of a shooting war in the Middle East.

President Bush, in a move to quell the nation's energy jitters, late Wednesday authorized the sale of 5 million barrels of oil from the nation's Strategic Petroleum Reserve of 590 million barrels.

The President also said he was taking the action in response to oil price gouging in the wake of Iraq's Aug. 2 invasion of Kuwait, which has sent shock waves through the world's oil markets.

''Anything that has to do with the Mideast has a negative effect, but it's always more the price of oil and the reaction in that market that either hurts or helps us,'' said Ron Doran, director of institutional trading at C.L. King & Associates in Albany, N.Y.

Doran said that other factors continue to trouble the market as well - the failure thus far of budget conferees to agree on a deficit-cutting plan and

the failure of the Federal Reserve so far to respond to the faltering economy with an interest rate cut.

On the economic front, analysts said, investors will be watching the Commerce Department report on Friday, its composite index of leading indicators for August, which is expected to reflect a decline in most of the reports components.

After rising 0.1 percent in June and holding steady in July, private economists are expecting the report to show a 1.0 percent decline in the index which is designed to predict future economic activity.

On the trading floor, Citicorp, which fell 1 Wednesday, paced the actives slipping another 3/4 to 13 3/4. The company's Citibank announced plans to lay off 100 workers and transfer hundreds of others in cost- saving measures.

General Electric was the second most active, tumbling 3 3/8 to 51 5/8. Boeing Co. followed, falling 1 1/4 to 39 5/8.

In a weak but active banking sector, Bankamerica eased 3/4 to 19 1/4, Chase Manhattan slipped 1/8 to 11, Manufacturers Hanover fell 1 to 20 1/4 and Chemical Bank lost 7/8 to 14 1/8.

Oil issues on average could not buck the downward trend, even with higher oil prices. Texaco fell 7/8 to 61 3/4, Exxon lost 1/4 to 49 5/8, Mobil lost 1 5/8 to 63 1/2, Atlantic Richfield fell 2 to 135, Sun Co. slipped 5/8 to 30 7/8 and Phillips Petroleum fell 1 1/4 to 26.

Union Carbide added 5/8 to 14 7/8 after its board unanimously authorized a series of initiatives designed to enhance value for stockholders and strengthen its businesses.

Among blue-chips, AT&T, trading ex-dividend, was unchanged at 31 1/8 and IBM eased 1 to 104 3/4.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 222,553,450 shares, compared with 187,437,100 shares traded in the previous session.

Prices closed sharply lower in active trading on the American Stock Exchange.

The Amex Market Value index fell 4.63 to close at 305.43. Declines led advances 439-140 among the 808 issues traded. The price of an average share lost 15 cents.

Composite volume totaled 19,005,500 shares, vs. 16,103,300 traded Wednesday.

Hillhaven Corp. led the Amex issues, unchanged at 1 1/2.

The National Association of Securities Dealers composite index closed down 8.84 to 341.19.

#90270u1707 09/27/1990 ~United Press International
WASHINGTON (SEPT. 27) UPI - The Securities and Exchange Commission announced Thursday Texas oilman T. Boone Pickens and his Mesa L.P. agreed to pay a $2.3 million settlement in the sale of stock of a gold mining company.

Separately, the limited partnership, based in Dallas, announced it will pay $4.9 million to settle a pending class-action lawsuit arising from Pickens' 1984 attempt to acquire control of Phillips Petroleum Co., of Bartlesville, Okla. In the same settlement, Phillips Petroleum agreed to contribute $1.1 million and other defendants $619,750, Mesa said.

In the SEC case, Mesa said it agreed to a consent decree to ''avoid the time, distraction and expense of protracted litigation.''

The SEC said that Pickens and Mesa agreed to the settlement ''without admitting or denying the allegation in the complaint'' about dealings in the common stock of San Francisco-based Homestake Mining Co.

The agreement, filed in U.S. District Court for the Northern District of Texas requires ''Mesa to disgorge $2.3 million in profits obtained as a result of conduct as alleged in the complaint'' to pay claims by Homestake shareholders.

The agency's complaint stems from an announcement made by Pickens and Mesa on Feb. 29, 1988, offering to purchase the gold mining company ''in a negotiated transaction,'' the SEC said.

The announcement caused Homestake's stock price to surge by nearly $4 a share, the agency said.

But over the following two weeks, Pickens and Mesa sold more than 3 million shares of Homestake stock without issuing a press release ''correcting or updating'' its offer to buy the company, the SEC charged.

The SEC said Mesa's press release announcing the takeover offer ''was at the time of issuance or thereafter became materially false and misleading due to its omission to disclose Mesa's intention to sell a substantial part of Mesa's holdings of Homestake common stock.''

''The complaint alleges that Mesa and Pickens should have known that the press release was at the time of its issuance or thereafter became materially false and misleading,'' the agency said.

The SEC said that the $2.3 million settlement will be disbursed to Homestake investors under a ''plan of distribution'' drafted by the agency and approved

by the federal court.

In the Phillips Petroleum case, Mesa owned about 5.7 percent of the company when it offered to acquire 23 million Phillips shares at $60 a share in 1984, said Sydney Tassin, a Mesa consultant.

''Phillips began numerous defenses to prevent the offer, and ultimately Mesa settled with Phillips on the basis that Phillips would effect a recapitalization providing its shareholders with at least $53 a share,'' Tassin said.

The settlement netted Mesa about $75 million on a pre-tax basis, Tassin said.

''The lawsuit arose out of that and has been going on since that time,'' Tassin said. ''We won a summary judgment two years ago, but the other side appealed. In that appeal, our summary judgment was upheld as to half of the counts and was denied on the other half.''

As with the Homestake case, Tassin said Mesa did not violate any law but decided to settle to avoid the expense of drawn-out legal proceedings.

PITTSBURGH (SEPT. 27) UPI - Pittsburgh Penguins star center Mario Lemieux has developed a disc space inflammation in his back, and he may miss the first three months of the season, team officials said Thursday.

Lemieux, a two-time scoring champion, underwent back surgery July 11 to have portions of bone shaved from a vertebra in his spine.

''Mario Lemieux's back pain has worsened over the last several weeks, '' said team orthopedist Dr. Charles Burke. ''It has worsened in a pattern that we had not expected. It is a different pattern than he's had previously.''

Lemieux was hospitalized earlier this week, and doctors repeated all the tests Lemieux had prior to surgery to compare them, Burke said. The tests and X-rays revealed a new problem that was not directly related to the surgery, he said.

''The X-rays and tests that we have done show that the disc taken out has been completely removed and there's no evidence of any recurrence or other problem from the disc itself,'' Burke said. ''There is an area of inflammation that exists in the same disc space in a different area from where the disc herniations occurred.''

The source of that inflammation is not known, but it could have spread from a small, flu-like infection Lemieux had in August that was unrelated to his back Burke said. Lemieux is being given antibiotics to treat the inflammation, he

said.

''The good news is that the problem is very treatable,'' Burke said. ''The bad news is it will take approximately six to eight weeks of medication to treat the problem, and he will not play for a minimum of eight weeks and most likely 10 and 12 weeks.''

The original back injury caused Lemieux to miss 21 games last season while he underwent therapy with spine specialist Dr. Robert Watkins of Los Angeles, but he still scored 45 goals and 78 assists, fourth best in the league. Lemieux continued to experience pain in his back, buttocks and legs after the season, and surgery was deemed necessary.

Lemieux had not played a game during the exhibition season but said as recently as Thursday he hoped to play in the season opener in Landover, Md., against the Washington Capitals on Oct. 5, his 25th birthday.

Lemieux probably would be in the hospital for about 10 days and then receive medication at home for the rest of his treatment, Burke said.

''This is a very uncommon thing, especially in a healthy individual,'' said Burke.

HOUSTON (SEPT. 27) UPI - The Houston Rockets Thursday acquired guards Kenny Smith and Roy Marble from Atlanta in exchange for center Tim McCormick and guard John Lucas, plus future considerations for both teams, general manager Steve Patterson announced.

Smith, with career scoring of 14.4 points per game and 6.8 assists in 221 games, was the sixth selection overall in the 1987 NBA draft by Sacramento. He went on to earn first team All-NBA rookie honors in 1987- 88, averaging 13.8 points and 7.1 assists. Smith, who led the Kings in assists and steals his first two seasons, averaged 17.3 points and 7.7 assists in 1988-89 as he started and played in every game.

The North Carolina graduate was averaging 15.0 points and 6.6 assists in 46 games (all starts) for Sacramento last season when he was traded with forward Mike Williams to Atlanta for Antoine Carr, Sedric Toney and a 1991 second round draft pick. He made only five starts for Atlanta, averaging 7.7 points and 4.3 assists in 20 minutes per game.

Marble, a 1989 first-round selection (23rd overall) by the Hawks, averaged 2.1 points in 24 games last season. He was placed on the NBA's suspended list Feb. 22. The 6-foot-6, Flint, Mich., native is Iowa's all-time leading scorer and is the 10th all-time leading scorer in Big Ten history.

Marble started several 1989 exhibition games for the Hawks. His best performance came in a 122-120 win over Houston when he had 31 points, 10 of 14 field goals, 11 of 13 free throws and nine rebounds in 35 minutes.

McCormick played two seasons for the Rockets, averaging 4.6 points and 2.9 rebounds in 99 games as a reserve. He missed most of last season because of two knee operations.

Lucas, ninth on the NBA's all-time assists list (6,454), played five seasons for the Rockets three different times. He was the No. 1 pick in the NBA draft by Houston in 1976 and has played 14 seasons in the league with six teams (Houston, Golden State, Washington, San Antonio, Milwaukee, Seattle).

Lucas holds the NBA record for most assists in one quarter (14, San Antonio vs Denver; April 15, 1984). He also shares the second highest total for one quarter (12, once with Houston and once with Golden State).

#90270u1768 09/27/1990 ~United Press International

ALBANY, NY (SEPT. 27) UPI - Promising New Yorkers cleaner air, state officials Thursday adopted the tough California motor vehicle emissions standard for cars sold in New York after 1993.

In doing so, New York became the second state in the nation to adopt standards higher than those imposed by the federal government. New Jersey and Massachusetts are expected to follow suit.

The action comes as California considers even tougher regulations requiring less-polluting fuels.

The New York emission standards are identical to the California standards that have been in place for several years. On Friday, California officials are expected to adopt stricter ''tier two'' standards that will require at least 10 percent of cars sold in California in the year 2003 to emit no pollutants.

The auto industry opposed the stricter New York standards as too expensive and not relevant to the Northeast, where they say a colder climate does not produce the same levels of ozone as in California.

But state Environmental Conservation Commmissioner Thomas Jorling said the cost of the new emissions standards should be no more than $100.

''By adopting the California standards for motor vehicle emissions, New York state is adopting the single most cost-effective program of emissions reduction that can be applied,'' he said.

''With it, we can make dramatic strides to achieve healthful air for all our citizens. New York is also sending a clear message that the time has come for the automobile industry to produce vehicles that are clean, fuel-efficient, durable and do not damage the environment nor threaten public health,'' he said.

#90270u1790 09/27/1990 ~United Press International

NEW YORK (SEPT. 27) UPI - A tank barge sank Thursday in the busy Kill Van Kull, spilling at least 20,000 gallons of fuel oil into the waterway that separates Staten Island and New Jersey.

The barge Sarah Frank, owned by New England Marine of Bayonne, N.J., sank at 9:15 a.m. at the First Marine Shipyard on Staten Island, in the Kill Van Kull, the waterway separating Staten Island and New Jersey, Coast Guard officials said.

Coast Guard Chief Warrant Officer John Hollis said no more than 20, 000 gallons leaked and that the spill was contained by Thursday afternoon. He said environmental damage from the spill was expected to be minimal, thanks to the placement of booms around the sunken ship.

''The oil is well-boomed off in a contained area in a shipyard.'' Hollis said. ''The oil is not going anywhere.''

He said vacuum trucks and skimming boats were being brought in to suck the oil out of the water through hoses. The retrieved fuel oil would then be loaded into trucks, Hollis said.

The Coast Guard also placed booms around Shooters Island bird sanctuary to prevent the oil seepage from harming wildlife, Hollis said.

The waterway was not closed to ships, but some boats were forced to re-route, with northbound ships being sent south, Hollis said.

Coast Guard spokesman Lionel Bryant said investigators were uncertain what caused the barge to sink.

The leak was the second large spill this month in the waterways separating Staten Island and New Jersey. On Sept. 5, about 5,000 gallons of oil spilled into the adjacent Arthur Kill from a 6 million-gallon Hess oil tank in Perth Amboy, N.J.

The two waterways have been the site of numerous spills during the past year, including three ''major'' spills of more than 100,000 gallons of oil.

HOLLYWOOD (SEPT. 27) UPI - The late soul singer-songwriter Marvin Gaye, whose hits included ''Heard It Through the Grapevine'' and ''Sexual Healing,'' was honored Thursday with a star on the Hollywood Walk of Fame.

Stevie Wonder, Lou Rawls and former Supreme's singer Mary Wilson were among those who attended the unveiling of the star.

Gaye, who was shot and killed by his father in 1984 one day before his 45th birthday, was remembered as a ''visionary'' during the ceremony, which was also attended by Motown founder Berry Gordy and television rock music show host Dick Clark.

Hundreds of fans spilled into the street as Gaye's star was dedicated. Many shouted ''It's about time'' as Gaye's three children, Marvin III, Frankie and Nona accepted the honor on his behalf.

The singer, pianist, drummer and composer was born into a religious family in Washington, where he sang his first solos in the choir at the church where his father was a minister.

As a young man, Gaye toured the rhythm and blues circuit, but his big break came when he met up with Motown's Gordy at a Detroit party. His first R&B chart hit, ''Stubborn Kind of Fellow'' in 1962, followed shortly after tha meeting.

His hit ''Heard it Through the Grapevine,'' became the No. 1 seller in the nation in December 1968. Gaye's other hits included ''Ain't That Peculiar,'' ''What's Going On'' and his famed duets with Dianna Ross, Mary Wells, Kim Weston such as ''Ain't No Mountain High Enough'' and ''Ain't Nothing Like the Real Thing.''

In 1982, Gaye won his first Grammy award for his ''Midnight Love'' album, which featured the sultry hit ''Sexual Healing.''

#90270u1868 09/27/1990 ~United Press International

SALEM, OR (SEPT. 27) UPI - Northwest utilities would pay an additional $650 million to $1.4 billion during the next 21 years if Oregon voters close the state's only nuclear power plant, a study released Thursday showed.

The joint study by the Oregon Public Utility Commission and the state Energy Department estimated that most of the cost - $440 million to $930 million - would be incurred by Portland General Electric, which owns 67.5 percent of the Trojan nuclear plant northwest of Portland.

The rest of the cost would be spread among other utilities, most of it through increased wholesale prices charged by the Bonneville Power Administration, which gets 30 percent of Trojan's electricity. Pacific Power & Light gets 2.5 percent of Trojan's output.

The report deals with the impact of a statewide ballot measure that would close Trojan until the federal government opens a dump for radioactive waste and until the plant is proven earthquake-safe and cost-effective.

Ironically, the report was released less than a week after a circuit court judge invalidated the anti-Trojan initiative and four other ballot measures, saying they lacked required statements about their impact on state government.

Elections officials immediately appealed the ruling, and the issue was scheduled to go before the Oregon Supreme Court Friday afternoon. If the Supreme Court overturns the lower ruling, voters will decide Trojan's fate in November.

The report says the measure would amount to a permanent closure of Trojan, which is now licensed to operate until 2011. The opening of a waste dump is not scheduled until 2010 and the report says it would cost too much to

maintain the plant in a ready-to-restart condition.

If PGE recovered its extra costs from ratepayers, residential customers would see their bills jump by an average of $25 to $52 a year during the 21-year period, according to the report. The increase would probably be higher in the early years.

PGE might also be able to recover the extra costs from taxpayers through condemnation proceedings, according to the report.

If ratepayers or taxpayers did not foot the bill, stockholders would have to absorb some of the cost, which would make it harder for PGE to sell stocks and bonds, state officials estimated.

The report estimates that BPA's wholesale rates for electricity would increase 0.7 percent to 1.5 percent, and perhaps more in the near future. However, the report offers no prediction as to how much of the wholesale price increase would be passed through to ratepayers at utilities which buy power from the BPA.

PGE and the BPA would both have increased costs because they would have to pay more for power to replace electricity lost through a Trojan shutdown, according to the report.

The total region-wide cost estimate is lower than an earlier prediction by the Northwest Power Planning Council, which said a Trojan shutdown would cost $800 million to $2.2 billion. The new report uses different assumptions about the efficiency of Trojan and the cost of replacement power.

If Trojan is closed, coal, oil and gas plants in the western United States and Canada would have to increase output to make up for the lost power, the report said. Officials estimate the Northwest would have to buy more power at some times of the year and reduce energy sales to other regions at other times. In the long run, increased conservation might alleviate some of the problem, the report says.

The commission and the Energy Department began work on the report after the Trojan ballot measure became a major issue in the gubernatorial campaign, with Democrat Barbara Roberts saying the plant should be closed and Republican Dave Frohnmayer saying it should be kept open.

#90270u1872 09/27/1990 ~United Press International

HONOLULU (SEPT. 27) UPI - A Navy submarine prowling the ocean floor has located and recovered the bottom half of a cargo door that tore off a United Airlines jet last year, sending nine people to their deaths, Navy officials said Thursday.

The deep-sea sub crew found the door section Wednesday night while on their sixth dive to 14,000 feet below the ocean surface about 100 miles south-southwest of Oahu, Lt. Cmdr. Sandy Stairs said.

The recovered section, which measures six-by-10 feet, was raised to the surface with the hydraulic jaws of the submarine and brought onto the deck of the sub's support ship, the National Transportation Safety Board said.

United Flight 811, with 355 people aboard, was bound for New Zealand from Honolulu Feb. 24, 1989 when part of the fuselage ripped away at 22, 000 feet, sweeping nine passengers out of the Boeing 747 and to their deaths.

The NTSB earlier this year blamed the accident on improper latching and flawed design of the cargo door locking mechanism, as well as maintenance and inspection problems.

But the board, the Federal Aviation Administration, United, and Boeing are anxious to examine the door to make a final determination of the cause of the accident.

''Preliminary examination of the (recovered section of the) door by a safety board investigator (who was aboard the sub) has revealed that it had fractured longitudinally near the midspan latch position,'' the NTSB said Thursday.

''The (door's) eight latch cams are in the nearly 'open' position. The eight latch lock sectors are in the 'locked' position; all of them are deformed. The latch cam actuator is in place. The master latch lock handle is locked,'' the safety board said in a statement.

NTSB spokeswoman Druscilla Anderson said investigators do not yet know what all of that means.

''Our investigators ... will have to do some analysis as to whether what was supposed to have been done (to lock the door) was done, and what failed and what didn't,'' she said.

The sub crew also believe they may have found the top half of the door about 200 yards away during the 18-hour dive. The sub will make another dive Thursday night to inspect the debris and recover it if it is the door.

The recovery of the door section by the Navy sub, the 31.5-foot, 58, 000-pound Sea Cliff, involved the second-deepest manned recovery ever attempted.

An unmanned submersible towed across the ocean floor July 20 found a three-mile-long field of debris in the area and found a 9-foot-long piece that officials thought could be the door.

#90270u1880 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - Millions of Americans are signing up for ''gold'' credit cards that offer services most consumers don't need and at higher fees they could often avoid, the nation's largest bank card consumer group said Thursday.

''For many, the cards will mean little more than higher rates and fees and more plastic profits for the banks that issue them,'' said a statement issued by the Virginia-based Bankcard Holders of America.

The 75,000-member non-profit group issued a 16-page consumer guide to the premium or gold credit cards whose primary message is ''consumers will pay much higher annual fees for most gold cards than for standard cards.''

''Consumers are being inundated with gold card offers from virtually every major issuer of gold credit cards,'' explained BHA executive director Elgie Holstein, noting that Americans are currently holding 22.8 million gold Visas and MasterCards alone.

''What we advise people is to consider carefully whether they really need a gold card, considering annual fees for the privelege of carrying one.''

Holstein said one of the most common reasons people apply for gold cards is to obtain a higher line of credit, ''but they can often get it from their regular credit card just by asking.''

The difference is that annual fees for gold cards are often higher. The annual fees for standard cards, Holstein said, range from free to $55 and average $17 while gold card annual fees range from free to $100 and average $36.

The BHA guide notes that many benefits, called ''enhancements'' in the industry, are poor buys because they are either offered by lower- cost standards cards (such as emergency cash), little used by most consumers or duplicate coverage cardholders may already have. Many homeowners' insurance policies, for instance, include the kind of purchase coverage offered by gold cards.

''Fewer than 5 percent of cardholders actually make use of the enhancements that come with gold cards,'' Holstein said. ''This means that unless you really think you may someday need one of the benefits, save your money and stick with a standard card.''

The consumer group's director added the ''prestige factor'' that prompts many people to buy gold cards is fading.

''There's so many different colors and designs of (all) cards now that

impressing the waiter is harder than it used to be,'' Holstein said.

#90270u1944 09/27/1990 ~United Press International
WASHINGTON (SEPT. 27) UPI - Democrats proposed a new tax plan at the bipartisan budget summit that would, for the first time, impose limits on the

amount of federal tax deductions wealthy Americans could claim, sources said Thursday.

''The more you make, the more it's limited,'' one Democratic source said of the new proposal that would hit the richest taxpayers the hardest.

Details of the plan - and Republican reaction to it - were not immediately available.

The bipartisan negotiating group was expected to meet late into the night again Thursday in hopes of reaching a $500 billion deficit- reduction plan before steep automatic spending cuts required under the Gramm-Rudman balanced budget law kick in on Monday, the first day of fiscal year 1991.

The source said the Democratic proposal would bring in enough money over five years to offset the cost of a new Republican plan to index the capital gains tax to ease the bite inflation takes out of profits from the sale of assets.

Under the new Democratic proposal, virtually all deductions for wealthier Americans would be limited, including those for home mortgage interest, charitable contributions and the amount paid in state and local taxes.

Currently, there are no limits on those deductions, regardless of income level.

Democrats have argued that during the 1980s the federal tax code has become increasingly more regressive - that is, the rich have shouldered proportionately less of the tax burden while middle income taxpayers have shouldered more of the burden.

And they have resisted Republican calls for a cut in the capital gains tax - a move they say benefits mainly the rich - unless there is an offsetting tax increase on the wealthy.

To date, Democrats have demanded that income tax rates on the rich go up as the price for Democratic agreement to a capital gains cut. But the new proposal may represent a signifcant movement by Democrats away from the tax increase the GOP will not accept to a more acceptable, yet progressive, alternative.

Earlier Thursday, assistant House Democratic leader William Gray of Pennsylvania said on the CBS program ''This Morning'' that he was hopeful a budget agreement ''of historic proportions'' by this weekend.

And in Minneapolis, where President Bush was on the second day of a two-day political swing, he continued blaming congressional Democrats for the current budget impasse.

Bush said ''the clock is ticking and I'm hopeful Congress will get the message

and make the compromises to keep this country from screeching to a halt'' on Monday, when the automatic spending cuts kick in and thousands of government workers will be furloughed for lack of funds to pay them.

Bush charged that Democrats have not offered a serious budget plan and warned that the automatic cuts in four days would be a ''tragic fact of life.''

''We can't afford business as usual,'' he said. ''The American people deserve better.''

He said that ''America faces serious across-the-board cuts of services of every kind because Congress and the Democratic leadership couldn't get serious about reducing the deficit and budget reform.''

''The Gramm-Rudman meat ax is about to do it for them,'' Bush said.

Bush said Democrats ''seeking political gains demanded I put everything on the table, including taxes.''

''To put our fiscal house in order, I demanded they act,'' he said. ''They acted, all right, as if they had all the time in the world.''

#90270u1959 09/27/1990 ~United Press International

WASHINGTON (SEPT. 27) UPI - Farmers who borrow money from the government will have no deadline to "graduate" to private lenders, under a package approved by farm bill negotiators Thursday, but they would have fewer chances to erase debts.

The provisions approved by House and Senate negotiators generally tighten the rules for the debt restructuring programs created in response to the farm crisis of the 1980s. The 1987 farm credit rescue law requires the government to restructure loans if it would be cheaper than foreclosure.

Under the language given tentative approval, borrowers would be limited to a lifetime total of $300,000 in debt forgiveness, most farmers would get only one writedown or loan ''buy out'' and buy outs would be available only to borrowers who negotiate fairly with the Farmers Home Administration.

Some 5,000 borrowers have bought out their loans - paid the government it was likely to raise if it liquidated the loan - for $1 billion and an additional 4,600 have had $796 million in debts written off.

The Bush administration early this year suggested a 17-year limit for the amount of time a farmer could receive assistance through the FmHA loans or loan guarantees.

The Senate modified the proposal to a 25-year limit during work on the new farm policy law but its negotiators agreed with the House to eliminate the idea.

During their meeting, negotiators resolved the contentious issue of whether to set a cutoff date for access to the loan writedown and buy out programs. The administration wanted bar writedowns and buy outs on any loans made after Jan. 6, 1988. The House endorsed the ''sunset'' date in a bill passed earlier this year.

Sen. Kent Conrad, D-N.D., said it was unwise to eliminate a program that could prove useful if hard times return. Rep. Glenn English, D- Okla., said leaving the programs open would mean ''people can ... borrow money on the assumption they won't have to paid it back.''

Conferees compromised by saying only one writedown would be allowed for loans made after the start of 1988.

#90270u1974 09/27/1990 ~United Press International

NEW YORK (SEPT. 27) UPI - A Cuban exile who was the first and last member of the anti-Castro ''Omega 7'' terrorist group to face prosecution pleaded guilty Thursday to federal bombing and bail-jumping charges, officials said.

Jose Ignacio Gonzalez, 48, had pleaded guilty in February 1984 to a series of bombings in Miami in the early 1980s, and as part of the plea bargain, agreed to testify against other members of Omega 7.

The group, dedicated to the overthrow of Cuban leader Fidel Castro, assumed responsibility for more than 30 bombings and two murders between 1978 and 1984.

Gonzalez was never sentenced after jumping bail in April 1984.

He remained in hiding until Guatemala expelled him June 4, and was arrested upon arriving in Miami, said U.S. Attorney Otto Obermaier.

He then was transferred to New York to face the outstanding charges against him and to be sentenced on the 1984 charges, Obermaier said.

Assistant U.S. Attorney Michael Tabak said Gonzalez agreed to be sentenced in New York instead of Miami when he entered his latest plea. He also pleaded guilty to one count from a federal indictment out of Miami that charged him with damaging foreign government property located in the United States.

That charge relates to Gonzalez's admission that he placed a time bomb under a sofa at the Mexican Consulate in Miami in 1981. He made that admission in 1984 when he also pleaded guilty to transporting a bomb to the Offices of the

Consulate General of Nicaragua in Miami in 1982, Tabak said.

Gonzalez also pleaded guilty Thursday to the bail-jumping charges.

He entered his guilty pleas in 1984 and on Thursday to the same judge, U.S. District Court Judge Robert Carter. Carter set sentencing for Nov. 29, and ordered Gonzalez that continue being held without bail.

Gonzalez, formerly of Miami, faces a maximum sentence of 25 years in prison and $35,000 in fines.

In 1984, he and two other Cuban exiles were the first defendants implicated in Omega 7 to plead guilty and to enter cooperation agreements with federal prosecutors investigating the right-wing group.

One of those defendants was charged with helping Gonzalez plant the time bomb in the Mexican Consulate by distracting a receptionist. The explosion damaged the building, but no one was injured.

#90270u1975 09/27/1990 ~United Press International

UNITED NATIONS (SEPT. 27) UPI - After years of bargaining and setbacks, the United States and the Soviet Union stood on the brink of a final breakthrough on an agreement limiting conventional military forces in Europe, officials said Thursday.

Although some minor details remain to be worked out by technical teams, Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze laid out the final pattern for agreement in a two-hour session Thursday.

Both men, after their meeting described ''good progress'' and said they were taking the results to their allies for approval. Since the Warsaw Pact, as a military alliance has virtually ceased to exist, that means the results will be approved if NATO buys the bargain that Baker and his negotiators struck in their talks in New York.

A NATO diplomat said, ''I can't imagine that any details over minor issues would stand in the way of approving such a major agreement.''

The treaty would limit men, aircraft, helicopters and armored vehicles based in Europe. The cuts would be at least 50 percent in each category.

In their second meeting in two days, Baker and Shevardnadze focused only on the remaining issues in the conventional forces in Europe agreement, known as CFE.

There were three remaining issues:

-Sufficiency, or the percentage of forces that the United States and the Soviet Union would be permitted to make up in the remaining East- West forces. The United States wanted that percentage to be around 30, while the Soviets pushed for a slightly higher number, between 35 and 40 percent. According to a U.S. official there will be different percentages for different categories of weapons.

-Zones. Officials said there was essential agreement on how many units each side can station outside its own national territory.

-Aircraft. The exact counting rules will have to be worked out by teams of technical experts, but Western officials said they believe the minor remaining differences will be bridged.

The two are expected to meet at least one more time in New York after their session Thursday, to discuss strategic arms reductions, in addition to a Shevardnadze session with President Bush Monday in New York.

The Baker-Shevardnadze series of meetings this week is their 20th, an average of one per month in the Bush administration, in addition to dozens of telephone calls between the two foreign ministers.

The show of superpower solidarity is not accidental, according to U.S. officials, with both Baker and Shevardnadze determined to send a signal to Baghdad that Saddam Hussein's personal ambitions will not be allowed to destroy what should be the dawn of the post-Cold War era of peace.

The conventional force talks have been going in their present form since January 1989, but this CFE series follows a frustrasting series of failures going back to 1975.

The major breakthrough came with the breakup of the Warsaw Pact, but that left the question of how to put that new military situation into a treaty that would weather the next uncertain changes in Europe, and how to regulate military forces.

Included in those questions are such arcane issues as:

-What is a combat aircraft? Does it include two-seater trainers which can be turned into a warplane by adding some electronics and some wing- pylons which could carry missiles? And if so, how many of those planes would equal one plane specifically designed to kill enemy aircraft or tanks?

-How can each side be sure that a demobilized military man remains a civilian. Do you count border and custom guards or reserve units, and if so, how does each side verify those counts?

-How do you destroy a tank, a vehcile specifically designed to resist destruction? Environmentalist groups quickly opposed the dumping of tanks into the ocean, but other methods are expensive, slow and possibly dangerous, such as the trend, which has already begun, of selling off surplus tanks to the Third World.

In another example of cooperation in the post-Cold War period, Baker and Vietnam's deputy prime minister, Nguyen Co Thach, have scheduled a 30-minute meeting Saturday morning in New York, the highest-level session in a series of four lower-level-meetings that began last month.

#90270u1991 09/27/1990 ~United Press International

NEWARK, N.J. (SEPT. 27) UPI - The ousted president of a failed New Jersey savings and loan admitted Thursday that he used bank funds to buy flowers for his wife and insurance for his mother and took cash payoffs from borrowers, including one who has defaulted on $17 million in loans.

Donald Moskowitz, 51, who headed tiny United Savings Bank in Paterson for a decade, pleaded guilty to two counts of bank fraud and one of tax evasion. He agreed to cooperate with an ongoing federal investigation.

''He treated United Savings Bank as his own personal piggy bank,'' said Jeremiah Doyle, assistant head of the Newark FBI office.

Moskowitz also admitted taking thousands of dollars from borrowers along with free furniture for his house. One borrower gave his sister a $500-a-week no-show job, he said.

Wayne Cross, who has since defaulted on millions in loans to his companies, gave Moskowitz an initial payoff of more than $10,000 followed by other payments of up to $7,500, Moskowitz said.

The Office of Thrift Supervision fired Moskowitz in April after finding evidence of ''mismanagement, insider abuse, dishonesty and outright fraud.'' Regulators estimated that he cost the thrift millions of dollars.

U.S. Attorney Michael Chertoff said that Moskowitz's crimes did not cause the collapse of United Savings, saying the S&L was forced to shut down because it could not meet capital requirements. United Savings lost $7.6 million last year and $1.2 million in the first quarter of 1990.

But Chertoff called Moskowitz ''a living symbol'' of the S&L crisis because of his carelessness and greed.

During the hearing, Moskowitz reluctantly admitted that a $2.7 million life insurance policy with his mother as beneficiary cost United Savings more than

$200,000 in annual premiums. The bank also paid his mother's health insurance.

But he continually tried to justify his conduct, saying that he did not remember authorizing payment of the premiums and telling U.S. District Judge Alfred Wolin that he would not have continued the policy if he had known how much it cost.

United Savings, with four branches and assets of $245 million, was almost a family business. Moskowitz succeeded his uncle as president in 1979.

Moskowitz explained the flowers to his wife by saying he thought of them as a business expense.

''At that time, I was working 14 hours a day,'' he said. ''I wasn't coming home for dinner.''

#90270u2007 09/27/1990 ~United Press International

KINGSTON, MA (SEPT. 27) UPI - A church deacon charged with killing his young neighbor and burying her partially clad body in his basement was ordered Thursday to undergo psychiatric testing, while police prepared to excavate his yard and search for more bodies.

A crowd of as many as 300 jeering Kingston residents gathered outside the courthouse as Henry Meinholz, 52, was brought in for his arraignment. Some shouted, ''Hang him! Hang him!'' as several police officers led the suspect inside, where he pleaded innocent.

Meinholz, a bookkeeper for a lumber company, was arrested Wednesday after authorities investigating the disappearance of 13-year-old Melissa Benoit discovered a body in the cellar of his Main Street home.

The body, which had been wrapped in a plastic sheet, was exhumed after authorities obtained a court order. Investigators were awaiting the results of an autopsy Thursday to confirm their suspicions that it was Benoit's remains and to determine the cause of death.

Meanwhile, Kingston Police Chief Alan Ballinger said he had applied for a warrant to dig up part of Meinholz's yard in a search for more possible bodies.

''We're applying for a warant now to dig up some particular areas in their backyard,'' he said. ''We want to be very careful and meticulous.''

Benoit, a soft-spoken eighth-grader at the Sacred Heart School, vanished Sept. 15 after spending the afternoon watching television at another neighbor's house. She is believed to have left that house, located 50 feet from her own, to visit the grave of her father, who died one year ago last week.

Her disappearance sparked a massive search by several hundred volunteers and a nationally televised plea for her safe return by her mother, who appeared on the program, ''America's Most Wanted.''

Meinholz, a deacon at the First Baptist Church in Plymouth, and his wife were among the scores of neighbors and friends who combed the South Shore town of 4,300 residents, 25 miles southeast of Boston, looking for the missing girl.

Meinholz underwent a lengthy session with a court psychiatrist at the Kingston police station before he was brought to Plymouth District Court for arraignment, Plymouth County District Attorney William O'Malley said.

After pleading innocent, Judge Dennis Collari ordered him held without bail and sent him to Bridgewater State Hospital for a 20-day psychiatric evaluation. The case was continued to Oct. 16.

Meinholz's attorney, Jack Atwood, said his client was ''bewildered'' by the entire chain of events and was unable to remember anything about the incident. He said the court psychiatrist had confirmed the memory loss was genuine.

#90270u2031 09/27/1990 ~United Press International

MOSCOW (SEPT. 27) UPI - Soviet President Mikhail Gorbachev ordered local authorities and enterprises to fulfill contracts for delivery of materials Thursday in his first decree under new powers delegated by the parliament

earlier in the week.

Some enterprises and cities have been falling behind on fulfilling state orders or threatening to withhold supplies in an effort to earn more money or obtain scarce consumer goods in the tattered Soviet economy.

''Authorities and managerial bodies' actions leading to disorganization of economic ties between enterprises shall be regarded as inadmissible,'' said the president's decree, carried by the official news agency Tass Thursday night.

The decree is the first under new powers to guide the economy that were given Gorbachev by the Supreme Soviet Monday.

It was unclear what effect the decree would have on the 15 republics and other local bodies that have asserted their rights to control economic decisions. The Russian republic's parliament has already come out against the increased presidential powers.

No mention was made in the Tass report of possible measures to be taken if the decree was ignored.

The decree issued Thursday orders enterprises to ''ensure the maintenance of the established economic ties and the fulfillment of contractual obligations concerning the delivery of raw and other materials and components in the fourth quarter of 1990 and in 1991.''

Gorbachev also ordered that ''in the event of necessity'' the Council of Ministers ''should introduce a special regime for the operation of railways and other all-state life-sustaining systems of the country.''

#90270u2034 09/27/1990 ~United Press International

LOS ANGELES (SEPT. 27) UPI - An arrest warrant was issued Thursday for actor Corey Feldman, who failed to appear in court for one of his two heroin cases because he has enrolled in a live-in drug rehabilitation program.

Superior Court Judge Gordon Ringer held the bench warrant until Oct. 31, when Feldman, 19, is scheduled to once again appear in court. Feldman, the star of such movies as ''Stand by Me,'' ''The Goonies'' and ''The Lost Boys,'' will not be arrested unless he fails to show up in court on that date.

His lawyer, Richard Hirsch, said Feldman did not appear for Thursday's pre-trial hearing because he has enrolled in the 30-day live- in program. Hirsch did not say where the program is located.

Feldman enrolled in the program following his arrest last week during which

police in North Hollywood found packets of heroin in his socks while the actor was sitting in a car whose rear window was smashed. Police were investigating whether the car was stolen.

Feldman is scheduled to be arraigned on a heroin charge stemming from that arrest on Monday. It was not known if he would seek postponement of the arraignment since he will still be in the drug rehab program.

Thursday's scheduled hearing stemmed from the actor's arrest in March for allegedly possessing 25 balloons of heroin and cocaine.

Following that arrest, Feldman also entered into and completed a drug rehabilitation program.

#90270u2036 09/27/1990 ~United Press International

NEW YORK (SEPT. 27) UPI - Commercial bank stocks plunged across the board Thursday in heavy trading on the New York Stock Exchange, reflecting wide expectations of dismal earnings, reduced dividends and more trouble ahead.

Wall Street hammered nearly all the largest U.S. banks in a binge of selling, revealing deep doubts about the industry. Pessimism even affected stocks of banks once regarded as solid, high-performance institutions.

''Even the top tier was down,'' commented M.A. Schapiro bank analyst Stephen J. Paluszek. ''They were sold off across the board, no doubt about it.''

Troubled Bank of Boston's afternoon announcement that it will lose as much as $250 million this quarter, slash its dividend by more than two- thirds and lay off at least 1,500 employees deepened the malaise.

The heaviest loss of the day was sustained by NCNB Corp., whose stock fell by $3.25 a share to end at $20.125. The Charlotte, N.C.-based bank one day before revealed that growing problem loans would heavily cut into profits.

Among New York money center banks, Chase Manhattan Corp.'s stock fell another 1/8 point on a continuing slide since its announcement last week it was trimming its dividend by about half and cutting its work force by 5,000.

Citicorp, also expected to be hurt this quarter by a deteriorating commercial real estate loan portfolio, dropped $0.75 to $13.75. Chemical Banking Corp., also burdened with troubled loans, fell $0.875 to $14.125.

Analysts, currency traders and others said the financial marketplace was rife with rumors saying other major banks were in trouble.

''There seems to be a constant flow of rumor-sharing,'' Paluszek said. ''It's

compounding the problem. Unfortunately the public, or the investing public if you will, is a little beaten down by this.''

West Coast giant First Interstate Bancorp lost $2.25 to finish at $19.75 and rival Security Pacific Corp. dropped $1.50 to end at $19.50. BankAmerica Corp. declined $0.75 to close trading at $19.25.

Even First Wachovia Corp., the North Carolina super-regional regarded by bank analysts as an industry gem, took a hit on fears that NCNB's problems might be spreading in the region. Its stock fell $1.375 to $33.

But Edward J. Powers Jr., a bank analyst with William D. Witter, said falling stocks reflect the financial reality that ''a lot of these banks are simply undercapitalized and they have to cut their dividend.''

The annnouncement by No. 2 U.S. bank Chase that it will cut its dividend - an unthinkable move in better times past - cleared the way for others to do the same. ''If Chase can do it, everybody can do it,'' Powers said.

A rising national tide of bank failures, amid ever-stronger indications that the economy is in the grip of a recession, has produced a feeling of crisis in the banking industry that some experts say is justified.

Declared analyst Powers: ''This is a very serious situation similar to 1933,'' when President Franklin D. Roosevelt called a banking holiday and closed the nation's banks to enable them to reorganize.

#90270u2047 09/27/1990 ~United Press International

LAS VEGAS, NV (SEPT. 27) UPI - Comedian Rodney Dangerfield got some respect and $725,000 in damages Thursday from a federal court jury for eye injuries he suffered in a steam bath accident at Caesars Palace.

The panel deliberated less than one day before ordering the resort to pay the damages to the 68-year-old comedian, who has built a career around the complaint, ''I don't get no respect.''

Dangerfield had sought $5 million for injuries he testified occurred when he was hit in the eyes by a burst of steam as he entered a steam room at the resort.

The panel heard 2 1/2 weeks of testimony, then deliberated several hours Wednesday and Thursday, before announcing their decision to award Dangerfield $225,000 for performances he missed because of the eye injuries and another $500,000 for pain and suffering.

Dangerfield's attorney, Barry Landberg, maintained the comic should be paid

millions of dollars for pain he continues to suffer from a March 1988 steam bath accident at the Strip resort that burned Dangerfield's eyes and forced him to cancel several performances at the hotel.

Attorneys for Caesars Palace said the entertainer showed no signs of permanent injury and said there was no rational basis for awarding damages for personal injury.

The resort countersued, saying Dangerfield's refusal to perform violated his contract. The resort said it lost more than $100,000 in revenues because Dangerfield cancelled the shows, but the 10-member jury rejected the argument and found entirely for the comedian.

The panel ruled Caesars Palace was obligated under its contract to pay Dangerfield for the missed shows because the injury should have excused him from performing.

Dangerfield, who arrived at the federal courthouse after the verdict was read, said he was pleased with the decision and was not concerned about the amount of the award.

''I was concerned about the truth,'' he said. ''I was right, I wouldn't have gone through this unless I was right.''

He criticized Caesars' attorneys, who filed court documents suggesting Dangerfield abused alcohol and drugs. The resort attorneys tried to blame the accident on the alleged substance abuse.

The comic consistently maintained that the allegations were untrue.

#90270u2056 09/27/1990 ~United Press International

NEW YORK (SEPT. 27) UPI - The Federal Reserve Board said Thursday that the basic U.S. money supply, known as M1, was unchanged in the latest reporting week. The broader monetary aggregate M2 decreased by $1.6 billion, and the broadest measure of all, M3, declined by $3.9 billion.

M1, including cash, checking accounts and NOW accounts - money available for immediate spending - stood at a seasonally adjusted average of $820.7 billion in the week ended Sept. 10. It was a revised $820 billion the week before.

Over the past 13 weeks, M1 averaged $814.2 billion, up 3.9 percent from where it stood over the previous 13-week period, the central bank said.

The more broadly defined M2 averaged an estimated $3,316.1 billion in the latest week, off from a revised $3,317.7 billion. M2 includes M1 plus passbook savings, small time deposits such as money market deposit accounts, consumer

money market mutual funds and other short-term assets.

M3, defined as M2 plus large time deposits, securities repurchase agreements longer than one day at banks and thrifts, and institutional money market funds averaged $4,093.7 billion in the latest week, down from a revised $4,097.6 billion, the Fed said.

#90270u2140 09/27/1990 ~United Press International

SEATTLE (SEPT. 27) UPI - A rising incidence of red tide and paralytic shellfish toxin in Puget Sound - including the recall this week of Washington oysters from restaurants and stores across the country - has hurt sales by the state's shellfish industry, officials said Thursday.

''I would say there's no question there's been an impact on sales,'' said Bill Dewey of Seattle-based Coast Oyster Co., the state's largest harvester and packer of oysters. ''I'm not sure how to put a dollar figure on it.''

State officials said some shellfish companies reported sales drops of up to 30 percent in the days immediately after the recall was announced and news accounts publicized red tide in Liberty Bay near Poulsbo.

''A 30 percent drop in a month like this, when sales are fairly minimal, doesn't have that much of an impact. But if it had happened in November, when people are getting ready for the holidays, it could have really hurt,'' Dewey said.

Oyster companies harvested and packed more than 8.9 million pounds of bivalves worth more than $231 million, in 1989, according to Tim Smith, spokesman for the Pacific Coast Shellfish Growers Association. Another 4.25 million pounds of clams were harvested, worth about $9.6 million.

Bivalves such as oysters, clams and mussles develop a paralytic toxin after straining seawater containing the blooming algae that creates a red tide.

Smith said the state's shellfish industry continues to expand despite the increasing frequency of red tide in Puget Sound waters. But he conceded that active algae blooms and, worse, the forced recall of shellfish contaminated by paralytic toxin drives sales down in the short term.

''It seems to happen more often, but the market drops don't seem to last as long,'' he said. ''I don't know why for sure, but people stop eating shellfish after a scare, but they start again much more quickly than they used to.''

Terry Walker, field operations supervisor for the state Health Department's shellfish program, offered an opinion that shellfish markets recover more quickly than previously after red tide alerts or shellfish recalls because of better consumer education efforts.

''People are more aware that only shellfish in certain water bodies are affected at a given time and that red tide is not all over the Sound,'' he

said.

The algae blooms that give rise to red tide have moved slowly southward since the first serious bloom appeared in the north sound in 1978, Walker said. Both the number of blooms and the expanse of red tide into previously clear bays and inlets has adversely affected the shellfish industry, he said.

''What it means for the industry is that it is more important than ever to submit shellfish samples for testing,'' he said.

Walker said Coast Oyster Co. harvested and shipped oysters for two weeks or more without submitting a test sample to the Health Department. When a test was taken, it revealed paralytic shellfish toxin - initiating a recall of oysters shipped to outlets in Washington and 17 other states.

''They didn't submit a sample to the lab,'' Walker said of Coast Oyster Co. ''I don't know why; they just didn't.''

John Petrie, president of Coast Oyster, was in his Seattle office Thursday but was ''not available to talk'' to a reporter, a secretary said.

Walker said red tide and shellfish poisoning are more often reported these days, because consumers are better educated and because the state and shellfish companies have stepped up monitoring of potential areas of red tide.

#90270u2304 09/27/1990 ~United Press International

(SEPT. 27) UPI - The University of California says classes will continue as usual, despite a bizarre hostage drama that left one student dead and others sexually abused. Police say the gunman who caused the seven hours of terror for 33 hostages at a bar near the university campus was wanted by San Francisco police on grand theft charges. Police stormed the bar early today, killing the heavily armed gunman.

The Pentagon says an American warship in the Red Sea today fired warning shots across the bow of an Iraqi oil tanker that would NOT stop for inspection. A spokesman says Navy and Coast Guard officials boarded the tanker but allowed it to continue on its way when NO cargo was found. It was the fourth time a U-S warship has fired warning shots near ships in Middle East waters.

New Hampshire judge David Souter says he's ''gratified'' that the Senate Judiciary Committee today voted to endorse his nomination to the Supreme Court. Souter was in New Hampshire at the time of the vote. He would become the 105th member of the high court if the full Senate votes in favor of his nomination, possibly next week. Democrats called Souter ''about the best we can expect'' from President Bush.

Neil Bush says he never felt any conflict of interest while serving as a director of the failed Silverado Banking, Savings and Loan. President Bush's son testified today in Denver in the first public hearing by the Office of

Thrift Supervision into the collapse of a savings and loan. The agency is reviewing allegations that the younger Bush acted improperly during his term as director of the S-and-L.

(SEPT. 27) UPI - Investigators in Jacksonville, Florida, say a Navy wife arrested on charges of buying a baby for three-thousand dollars may have been conducting the illegal trade for a while. Police say Nellie Cutright is suspecting of buying and selling as many as 10 children from her home. The woman is being held on 50-thousand-dollar bond.

Researchers say an experimental drug may prevent the hair loss many cancer patients experience when they undergo chemotherapy. A research team from Florida and Colorado report successful results from their tests on young rats. The researchers say it's NOT yet known if the drug will work on humans.

The House has passed and sent to President Bush a bill to compensate hundreds of Americans who became UNwitting victims of the nation's nuclear weapons build-up during the Cold War. The measure sets aside a 100-Million-dollar trust fund to pay damage claims to cancer victims whose disease can be traced to radiation exposure... either from fallout from atomic weapons tests in Nevada or to their work mining uranium for nuclear bombs.

The nation's Health and Human Services secretary addressed one of the nation's larger medical concerns at an international conference today in Atlanta. Louis Sullivan warns that the terrible effect of AIDS on minorities and children is enough to justify the three-and-a-half- BILLION dollars requested for AIDS programs by the White House in 1991. In Sullivan's words- ''we are losing the next generation of leaders.''

-30- 1670

(SEPT. 27) UPI - The Senate Judiciary Committee today endorsed David Souter's nomination to the Supreme Court with a 13 Biden of Delaware called the New Hampshire jurist ''about the best we can expect'' from President Bush. Biden joined with seven other Democrats in approving the nomination. The full Senate is expected to confirm Souter, possibly next week.

The State Department says Iraq now says it did NOT intend to threaten foreign diplomats in Baghdad in an earlier warning note. The department says Iraqi officials made the denial to the U-S charge d'affaires in Baghdad. The denial follows an angry response from Western nations reacting to Iraq's warning to diplomats that hiding foreigners could be punishable by death.

Police in Berkeley, California, say the gunman who killed one person and

wounded six others during a seven-hour hostage seige was ''undergoing some kind of psychotic episode.'' Officials say Merdhad Dashti apparently was angry at the U-S government for NOT giving him financial aid to attend the university. Police fatally shot the gunman this morning when they stormed the hotel bar where he was terrorizing 33 hostages.

Washington, D-C, Mayor Marion Barry met with protesting students today at the University of the District of Columbia... where 100 demonstrators are holding a sit-in. Barry says he'll ask 11 Board of Trustees members and one student board member to resign in response to student demands. The students have 20 demands- including the resignations of the board of trustee members.

(SEPT. 27) UPI - A jury of four men and four women will decide whether a Cincinnati art gallery and its director violated obscenity laws by showing photographs by the late Robert Mapplethorpe. The jury was seated today following four days of cross-questioning by defense and prosecution lawyers. The Ohio case marks the first time an arts institution has been charged with obscenity.

A judge in Santa Ana, California, today extended the temporary custody of an eight-day-old baby boy to his genetic parents. The judge also reduced the visitation rights for the infant's surrogate mother to reduce the child's ''stress.'' The UNprecedented case centers on whether a surrogate mother has any parental right to a child with whom she shares NO genetic link. NO final decision was made during today's hearing.

The Navy says it has recovered the bottom half of a cargo door that fell to the Pacific Ocean floor after tearing off a United Airlines jet last year. The door section was found last night by a deep-sea submarine crew prowling waters off Honolulu. Federal investigators will examine the door to make a final determination of the cause of the accident that killed nine people.

If you're anxious to kick the nicotine habit, you may want to consider life in Montana or Minnesota. Federal health officials say quitting smoking appears to come easiest to people in those two states. On the other side of the coin, the habit dies hardest in Kentucky and the nation's capital. The report is based on figures from the U-S Centers for Disease Control in Atlanta.

(SEPT. 27) UPI - A Los Angeles-bound Midway Airlines plane was forced to return to Chicago's Midway Airport after the jetliner lost cabin pressure at 30- thousand feet. 12 of the 83 passengers were treated at hospitals for ear and sinus problems.

Police in Kingston, Massachusetts, are preparing to dig up the back yard of a church deacon charged with killing a 13-year-old neighbor girl and burying her body in his basement. Authorities suspect that 52-year- old Henry Meinholz may have buried more bodies in the yard. He has pleaded innocent to the slaying.

An eight-year-old Soviet boy who was critically burned in an accident last week arrived at the Shriners Hospitals in Galveston, Texas, today. The boy's medical evacuation was a first from Soviet Far East to the United States.

A Los Angeles judge today issued an arrest warrant for actor Corey Feldman, who failed to appear in court for one of his two heroin cases. The lawyer for the 19-year-old Feldman says his client did NOT show up for the pre-trial hearing because he has enrolled in a live-in drug rehabilitation program.

A convicted drug dealer is back in jail after taking possibly the longest lunch break in Houston's history. 24-year-old Eduardo Onofre vanished September 10th after the judge let him go to lunch. He was re- arrested Tuesday. In his absence, Onofre was sentenced to 45 years in prison.

A researcher at the University of Warwick in Coventry, England, says British naturalist Charles Darwin... the father of the evolutionary theory... may have suffered from the ''yuppie flu.'' Darwin suffered from a debilitating illness in his 20's that has been the subject of much speculation.

#90270u2810 09/27/1990 ~United Press International
(SEPT. 27) UPI - .

Officials say the United States and the Soviet Union are close to an agreement on limiting conventional forces in Europe. Secretary of State Baker and Soviet Foreign Minister Shevardnadze both described their meeting in New York today as ''good progress.'' The treaty would limit European-based personnel, aircraft, helicopters and armored vehicles by about 50 percent in each category.

The State Department says another U-S citizen has been rounded up in Kuwait, bringing to 101 the number of detained Americans in Iraq and Kuwait. A department spokesman says Iraq has ignored repeated requests for information about the detainees. But the spokesman says eight Americans held by Iraq- including one with medical problems- have been spotted at a hotel in Baghdad.

Bi-partisan budget negotiators are expected to burn the midnight oil again tonight in an effort to come up with a still-elusive budget agreement. Sources say Democrats came up with a new proposal today that would limit the amount of federal deductions wealthy Americans could claim. It's NOT clear how the Republicans reacted. The deadline for reaching an agreement is Monday, the

first day of fiscal year 1991.

A church deacon in Kingston, Massachusetts... charged with killing a young neighbor and burying her in his basement... has been ordered to undergo psychiatric testing. And police are preparing to dig up the yard of Henry Meinholz to search for more bodies. The 52-year-old book-keeper was arrested yesterday in the death of 13-year-old Melissa Benoit, who disappeared September 15th while going to visit her father's grave.

-30- 1794
#90270u2828 09/27/1990 ~United Press International
(SEPT. 27) UPI - The National Football League says it will appoint a counsel to investigate allegations by a reporter that she was sexually harassed in the locker room of the New England Patriots. Boston Herald sports writer Lisa Olson says during the September 17th incident, receiver Zeke Mowatt suggested she perform oral sex on him. According to Olson, the naked Mowatt came up close to her as she sat on a bench and made the suggestion.

Comedian Rodney Dangerfield got some respect today. A federal court in Las Vegas awarded Dangerfield 725-thousand dollars in damages for eye injuries he suffered in a steam bath accident at Caesars Palace. Dangerfield was seeking five-Million dollars. The panel heard two-and- one-half weeks of testimony and deliberated for less than one day before deciding in the comedian's favor.

In an interview that will air this weekend in Britain, Salman Rushdie says his life has been hell since he went into hiding 19 months ago. The Indian-born British author says he did NOT intend to insult or abuse people in writing ''The Satanic Verses.'' The novel resulted in a Iran's late spiritual leader issuing a death decree against the novelist.

#90271b0012 09/28/1990 ~Business Wire
CAMPBELL, CA (SEPT. 28) BUSINESS WIRE - Touch Communications, the leading Silicon Valley-based pioneer in OSI networking, Friday announced that it will begin concentrated sales and marketing efforts in the European OSI market.

This announcement follows the signing of remarketing agreements with six key partners: Datakom in Germany and Austria, Interdata in France, Industrade in Switzerland, Integralis in United Kingdom, Cidisa in Spain and Portugal, and Primeur in Italy.

''In signing these partners Touch was looking for highly skilled companies with a high potential for growth,'' said Col Rada, director of international sales and marketing.

''These are sophisticated resellers with a variety of strengths in the areas

of network management, messaging, LANs and WANs. Our relationships with these partners will be a multi-stage effort resulting in the establishment of Touch subsidiaries in Europe to handle marketing, sales and technical support for our partners.''

''Companies interested in doing OSI business worldwide must have strong technology and development partners as well as sales channels,'' said Rada. ''Touch began its international OSI efforts by first establishing strategic joint OSI technology development agreements with Marben Produit, France and DCL, Japan.''

With the Europe of 1992 in sight, Touch Communications and its European Remarketers are introducing a new product distribution marketing concept, The International Referral Program.

Under this program, all Touch's LAN e-mail partners, every European distributor of messaging products, systems integrators, as well as VARs can participate with Touch's Remarketers in the Worldtalk 400 marketing program.

The purpose of this program is to provide partners with complete messaging solution offerings and create strategic positioning with the heads of the MIS departments of multi-national corporations.

Worldtalk 400 allows all of these ''Referral Partners'' to offer an integrated enterprise-wide messaging solution to their customers. Touch Communications' Remarketers will offer the Worldtalk 400 products, services and support either directly, or via the Referring Partners to their customers.

Touch's Remarketers will also provide full local marketing, sales, technical support and maintenance.

NEWPORT BEACH, Calif. (SEPT. 28) BUSINESS WIRE - Nationwide Health Properties Inc. (NYSE:NHP) announced Friday the acquisition of 12 long-term care facilities in Texas for $22 million.

Concurrent with the purchase, the company entered into a lease agreement with ARA Living Centers of Texas Inc. to operate the facilities.

''We are pleased with this transaction,'' said R. Bruce Andrews, president and chief executive officer. ''These are good properties and ARA, the largest privately owned operator of long-term care facilities, will be an excellent tenant. In addition, this transaction will immediately add to Nationwide's

earnings and cash flow.''

The health care facilities are located throughout Texas and contain 1300 beds. ARA has been operating the facilities for approximately 10 years under previous agreements with the former, individual owners of the properties. ARA operates over 200 long-term care facilities in the United States including over 100 in the state of Texas.

Nationwide Health Properties Inc. is a real estate investment trust that invests in health care facilities. The company currently owns 94 facilities in 23 states.

SALT LAKE CITY (SEPT. 28) BUSINESS WIRE - The possible purchase of the Robinson Mining District near Ely, Nev. moved closer Friday when Alta Gold Co. (NASDAQ:ALTA) and Magma Copper Co. (AMEX:MCU) signed an agreement as follow-up to a letter of intent which was signed by the companies last month.

Under terms of the agreement, Magma purchased $4 million of restricted Alta Gold stock at $3.29 per share. With the $1.5 million of Alta's restricted stock purchased on Aug. 27 from treasury, Magma now holds 1,671,180 shares, representing six percent of the outstanding shares of Alta Gold.

The original letter of intent called for Magma to purchase an undivided 15 percent interest in gold operations at the Robinson District from Alta Gold for $4 million. However, that aspect was amended in the agreement in lieu of the stock purchase in the same amount.

Should the two parties proceed with the eventual purchase of the 12,000-acre Robinson District from Kennecott Corp. by Dec. 14, the stock purchased by Magma for $1.5 million will be redeemed by Alta at no cost, and the additional $4 million Magma has invested in Alta's stock may be applied to Magma's acquisition of an interest in the Robinson gold operations.

Dan S. Bushnell, Alta Gold chairman and chief executive officer, said, ''We are very pleased that solid progress is being made with Magma Copper Co. as we jointly pursue the purchase of the Robinson District.''

Magma, the major copper producer headquartered in San Manuel, Ariz., has one of the most modern copper smelters in the nation and sees the Robinson copper reserves as important to future operations.

Magma is continuing with its exhaustive feasibility study of the Robinson

District, and has recently completed its drilling program. It is anticipated that testing and analysis will be completed by the end of October as Magma prepares its final decision on whether to proceed with the purchase option by Nov. 15.

NEW YORK (SEPT. 28) BUSINESS WIRE - Short-Term Investments Co. - Treasury Taxadvantage Portfolio money market fund is rated triple-'Am-G' by S&P, based on the fund's sound management and the high credit quality parameters placed on its investment portfolio.

The fund invests exclusively in direct U.S. Treasury obligations.

Shares were initially offered in August.

The portfolio is managed AIM Advisors Inc. of Houston.

The triple-'Am' rating on the shares of a money market fund indicates that the fund has a superior capacity to maintain principal value and limit exposure to

loss. The 'G' designation indicates that the fund invests exclusively in direct U.S. Treasury obligations.

When rating a money market fund, S&P reviews portfolio credit quality, liquidity, and management practices and policies.

SALT LAKE CITY (SEPT. 28) BUSINESS WIRE - Research Industries Corp. (NASDAQ:REIC) Friday announced that it has just closed September with record revenues for the month.

This record high monthly performance, in conjunction with greater than anticipated sales in July and August, have generated an all-time high first quarter sales performance for the corporation. ''On the basis of this strong revenue performance, we should see a first quarter earnings increase in the range of 50 percent to 60 percent over the same quarter last year, which is in line with or perhaps may exceed our earlier expectations,'' said Gary L. Crocker, president.

The company expects to report its complete quarterly financial results during the third week of October.

Research Industries Corp. is a diversified biomedical firm specializing in the development, manufacture and sale of hospital disposable products for open-heart surgery and specialty pharmaceuticals. Research Industries' common stock is traded over the counter, NASDAQ, National Market System, with the symbol REIC.

CARLSBAD, Calif.--(BUSINESS WIRE)--International Totalizator Systems Inc. (NASDAQ:ITSI) is taking this opportunity to address its shareholders and members of the investment community regarding market valuation and confidence.

James Walters, chairman, chief executive officer and president, said: ''The current market price of ITS common stock does not reflect the long-term growth prospects of the company. Clearly, confidence in the market has been shaken for many reasons, the majority of which we feel are not accurately related to the condition or activities of the company.

''Historically, the wagering industry has been insensitive to economic distress such as inflation or recession.''

Based on several sets of criteria, the current issue of California Business Magazine identifies ITS as number 37 out of the 100 best small companies in the state. The magazine calculated the three-year annual sales growth rate for ITS as over 46 percent. The widely noted Dow Theory Forecasts' Low Priced Stock Survey includes ITS as one of the small cap companies it recommends as a best buy.

And while the financial community is looking for companies to broaden their base to other parts of the world as a means of diversification and hedge on the dollar, ITS has been a dominant factor in its international markets for some time.

Additionally, ITS is positioning itself as a product innovator in the newly emerging market segment for airline satellite ticket printers and by continued development of its existing product lines.

In summary, the management of International Totalizator Systems Inc. continues to devote its full efforts and resources to the enhancement of long-term company growth and increased market valuation, thereby maximizing the return on investment for ITS shareholders.

FALLS CHURCH, VA (SEPT. 28) BUSINESS WIRE - The U.S. Army has awarded Computer Sciences Corp. (NYSE: CSC) a $15.3 million contract to develop and demonstrate its version of a reserve component automation system (RCAS).

The award is the first phase of a three-phase competitive run-off for a contract with a potential value of $1 billion.

RCAS will provide the Army an important capability as it adjusts its active component manpower downward to fit lower budgets. It will enable the rapid mobilization of the Army National Guard and Army Reserve in reponse to national emergencies, and also serve the peacetime functions of these organizations.

CSC heads one of two teams competing for the contract. The total program calls for developing the system design and necessary custom software, furnishing the commercial hardware and software required, and deploying the complete information system to some 5,000 sites.

In the first phase, lasting approximately a year, the teams will develop and demonstrate their system designs. In phase two, the Army expects to select one prime contractor to develop and field the critical mobilization and logistics elements of RCAS to all the sites over a three-year period.

In the third phase, spanning eight years, that contractor will expand RCAS with a number of additional administrative functions. CSC estimates the value of the program at about $1 billion over the 12-year period.

CSC's Integrated Systems Division will lead the company's work through its Moorestown, N.J., headquarters. Its team members are American Management Systems Inc. and Systems Research and Applications Corp., both of Arlington, Va., and Data General Corp. of Westboro, Mass.

With revenues of $1.5 billion and more than 21,000 employees, CSC is the largest independent professional services company in the computer industry. It is a major supplier of computer and communications systems and services to government and industry.

COLORADO SPRINGS, COLO. (SEPT. 28) BUSINESS WIRE - Federal Electric Corp., a subsidiary of ITT and a division of ITT Defense, Friday announced relocation and selection of new headquarters facilities in Colorado Springs.

FEC, a multi-national corporation, is a 45-year leader in providing worldwide technical and support services to government and private industry.

Effective immediately, the company will be known as ITT Federal Services Corp. In February 1990, the company announced the move of its headquarters from Paramus, N.J., to Colorado Springs, where it has consolidated operations with FELEC Services Inc., one of its operating subsidiaries.

John R. Spearing, ITT Federal Services president, said, ''We have undertaken this action to increase our operational efficiency and to be strategically located and competitively postured to respond to future service industry

growth opportunities.''

The decision to move from the east coast after 45 years was an integral part of the company's goal to streamline operations, to enhance key customer relationships and to pursue new business opportunities. ITT Federal Services employs more than 5,000 people globally. One of the company's customers in the Colorado Springs area is the U.S. Air Force Space Command.

ITT Federal Services Corp. is a unit of ITT Defense, which has its headquarters in Arlington, Va. ITT Defense is a leading supplier of high technology command control and communications, electronic defense, electro-optical and surveillance systems and related services for the United States and allied nations.

The ITT Corp. is a diversified, multinational company that manufactures and sells automotive, electronic components, fluid technology, defense, space and natural resources products, and provides and sells insurance, hotel, financial communication, information and community development services. The company also has a 30 percent interest in the world's largest telecommunications manufacturing company, Alcatel, N.V.

SAN FRANCISCO (SEPT. 28) BUSINESS WIRE - AT&E Corp. (ASE:ATW) Friday announced that its initial market trial of the RECEPTOR Personal Communications System (PCS) in the Portland, Ore. area has successfully demonstrated both the system's technical viability and its market acceptance among current paging subscribers as well as first time users.

The Portland market trial is the first commercial test of the RECEPTOR PCS following independent and favorable evaluation of AT&E's proprietary technology and market research by multinational companies, including Seiko Corp., Bell Atlantic Corp., Cincinnati Bell Inc. and Groupe France Telecom. These multinational companies subsequently made significant equity investments in AT&E.

As a result of the completion of its initial technology and product development, and as part of its new strategy, AT&E henceforth will direct its efforts towards entering into joint ventures, partnerships, technology and license agreements and other forms of regional collaboration with leading operating companies in the communications industry.

AT&E will benefit from such strategic alliances as its partners devote their broad range of resources to operating the RECEPTOR PCS and to building and

serving the system's subscriber base in specified regions.

Extensive testing and demonstration of the RECEPTOR PCS in certain European and Asian countries have already been concluded while testing of the system in markets outside Portland will continue throughout the remainder of 1990.

As the Portland market trial continues to progress, AT&E expects that the RECEPTOR Personal Messaging Service will begin to be commercially introduced in other domestic markets during 1991 upon the establishment of operating or financial alliances. Discussions and negotiations continue to progress with potential U.S. and foreign partners that have expressed interest in participating in the RECEPTOR project.

Pursuant to its new strategic direction, AT&E has implemented a plan, effective Oct. 1, that will streamline the corporate organization and significantly lower operating and marketing expenses. Under the plan, which is aimed at heightening efficiencies, AT&E will consolidate its Financial Services, Accounting, MIS and Planning functions as well as its Legal, Administrative and Human Resources departments.

GLENDALE, Calif. (SEPT 28) BUSINESS WIRE - Pollution Research and Control Corp. (NASDAQ:PRCC) reported Friday a loss of $1.25 million, or 43 cents per share, on revenues of $5.4 million, compared with net income of $443,000, or 24 cents per share, on revenues of $4.6 million for the 1989 fiscal year.

Albert E. Gosselin Jr., president and chief executive officer grimaces, ''It's a war out there,'' he said. ''For the past 20 years we have survived and outlasted eight out of 10 larger competitors. we did it by superior technology -- even though some of them were 50-to-100 times larger than we.

''This past year,'' Gosselin claims, ''was a little like the 'Battle of the Bulge' and proved that the best products, temporarily, are not a match for well financed, not to say unethical, tactics of two remaining competitors.'' Gosselin relaxes and smiles. ''After all,'' he points out, ''it has long been known that a dumb dollar will outbuy a smart dime most of the time.

''Still,'' he said, ''we'll keep spending our smart dimes. A better day is coming.''

Pollution Research and Control, under the trade name Dasibi Environmental designs, manufactures and markets, internationally, air-pollution monitoring instruments. Gosselin, who has been referred to as ''the General Patton of

small business executives,'' said, ''We have regrouped, cut our losses and, personally, I intend to show the industry what a little Yankee know-how can do.''

#90271b0144 09/28/1990 ~Business Wire

BEDFORD HEIGHTS, OH (SEPT. 28) BUSINESS WIRE - Riser Foods Inc. (ASE:RSR) Monday announced its fourth-quarter and fiscal 1990 results, which showed the continued strong trend of improved earnings over last year as previously reported.

Riser's results for its fourth quarter of fiscal 1990, a twelve (12)-week quarter which ended June 30, 1990, showed net income of $2.4 million, or 30 cents per common share, on sales of $237.7 million, as compared to a loss of $5.3 million, or 67 cents per common share, on sales of $248.8 million last year.

Riser reported net income of $8.3 million, or $1.02 per common share, on sales of $1.1 billion for the fiscal year ended June 30, 1990, as compared to a net loss of $12.7 million, or $1.62 per common share, on sales of $1.1 billion for the fiscal year ended July 1, 1989.

Riser's current year's results include an extraordinary income item of $1.1 million, or 15 cents per share, for the fourth quarter and $2.7 million, or 34 cents per share, for the fiscal year, which represented the utilization of a portion of the company's federal income tax net operating loss carryforward.

These extraordinary items partially offset Riser's income tax provisions for each period, which amounted to $1.6 million and $4.2 million, respectively. No credit provision for income taxes was recorded in the prior year due to limitations on the carryback of fiscal 1989 losses.

The company also noted that the 1989 fourth-quarter and fiscal year results were negatively impacted by an extraordinary item totalling $5.7 million, or 72 cents per share, which was due to a litigation settlement.

Riser attributed its improved earnings to management's diligence in reducing administrative overhead and controlling operating expenditures, coupled with better management of operating margins. Riser noted that much of the pressures and problems associated with last year's merger contributed significantly to the prior year's losses.

Riser was created with the combination of successful privately held companies (Rini supermarkets, Rego supermarkets and American Seaway Foods) and publicly

held, financially troubled Fisher Foods.

Riser operates 50 supermarkets in Northeastern Ohio under the Rini-Rego Stop-N-Shop and Carl's format, one deep discount store, a wholesale distribution business (American Seaway Foods), a food service division (Seaway Food Services) and an ice cream manufacturing operation (Eagle Ice Cream).

BELLEVUE, WA (SEPT. 28) BUSINESS WIRE - Thousand Trails Inc. (OTC:TRLS) Friday announced that it has filed a Notification of Late Filing for its annual report on Form 10-K for the year ended June 30, 1990.

The company's independent accountants have not completed their audit of the financial statements for the current year, because they have not had adequate time to evaluate the effects of certain subsequent events occurring after the completion of their field work. Therefore, the accountants have not yet issued their auditors report. Preliminary results are set forth below:

Net earnings for the year ended June 30, 1990, were $2 million, or 8 cents per share, on total revenues of $100.1 million. This compares to net earnings of $9.9 million, or 41 cents per share, on total revenues of $94.3 million for the year ended June 30, 1989.

Earnings declined in the current year because of an increase in the company's provision for doubtful accounts, higher general and administrative costs, and lower margins from resort operations and membership sales. The earnings in fiscal 1990 included an extraordinary gain of $2.4 million, or 10 cents per share, resulting from extinguishment of debt in connection with a settlement between San Jacinto Savings Association and Southmark Corp. arising out of Southmark's bankruptcy reorganization. San Jacinto is the company's majority shareholder and is a wholly owned subsidiary of Southmark.

The earnings in 1989 included an extraordinary gain from the utilization of tax loss carryforwards of $2.9 million, or 12 cents per share. All tax loss carryforwards for financial statement purposes were fully utilized at June 30, 1989.

The company expects to file its annual report on Form 10-K on or before Oct. 15, 1990.

Thousand Trails Inc. operates one of the largest membership-based destination campground resort systems in the United States. The company owns, operates and sells memberships in a network of 39 campground resorts in 15 states and in British Columbia, Canada. Over 100,000 families are members.

WEST HOLLYWOOD, CA (SEPT. 29) BUSINESS WIRE - Sherman L. Andelson, chairman of the board of BKLA Bancorp, Friday announced the appointment of Mark E. Buchman as a director of the company and its subsidiary, Bank of Los Angeles, at a board meeting held Sept. 27.

Buchman, who was named as president and chief executive officer of the West Hollywood, Calif.-based bank in August, also serves in that capacity for the

parent company.

''President Buchman brings new energy to the bank's senior management team and a high level of motivation for his direct involvement as a member of the board of directors,'' Andelson said.

Buchman comes to Bank of Los Angeles with over 26 years of banking experience, and most recently served as president of the Government National Mortgage Association (Ginnie Mae) during the second term of the Reagan administration.

Founded in 1982, Bank of Los Angeles markets business and retail financial products from its regional offices in West Hollywood, Beverly Hills and Hollywood.

BKLA Bancorp common stock, symbol BKLA, is traded on the NASDAQ National Market System and on the Western OTC.

PHOENIX (SEPT. 29) BUSINESS WIRE - BankAmerica Corporation Friday announced that it has agreed to acquire the Arizona retail branch system and certain assets and liabilities of MeraBank Federal Savings Bank from the Resolution Trust Corporation (RTC) and will begin operating them on Monday, October 1, as part of Bank of America Arizona.

Headquartered in Phoenix, MeraBank has 66 branches in Arizona. It is the largest savings and loan in Arizona, and the state's third largest financial institution.

Services to MeraBank's customers will continue without interruption when offices open as Bank of America Arizona on Monday, October 1. ''This move underscores our expectation that Arizona will play an increasingly important role in the economy of the western United States,'' said BankAmerica Chairman and Chief Executive Officer Richard M. Rosenberg. ''We're pleased to be strengthening our presence throughout the state, as a natural extension of the service we began when we acquired Western Savings' branches in June.''

Under the terms of the transaction, Bank of America Arizona will acquire approximately $3.5 billion in deposits and about $470 million in consumer loans. It has the option to return the loans to the RTC within a certain timeframe. MeraBank's other loans and subsidiaries were not included in the transaction.

The Resolution Trust Corporation accepted a bid from Bank of America Arizona

of a $92 million premium.

Bank of America Arizona began operations on June 1, 1990, when it acquired the retail network of Western Savings and Loan Association. Currently, it has 61 branches in Arizona and one in Utah. ''We're rapidly becoming a significant part of the Arizona community,'' said David Hanna, president of Bank of America Arizona. ''This acquisition allows us to fill out our branch network within the Phoenix area and broaden our reach beyond Maricopa County. It's good for us and for our customers.''

Bank of America Arizona is a subsidiary of BankAmerica Corporation and reports to Vice Chairman Thomas E. Peterson, head of the Consumer Banking Group.

BankAmerica also currently has 855 branches in California, 200 in Washington, 66 in Oregon, 16 in Nevada, nine in Idaho and two in Utah, and 59 branches and representative offices in 41 countries.

BankAmerica Corporation is the nation's second largest bank holding company and, in 1989, posted record earnings of $1.1 billion. As of the end of the second quarter of 1990, BankAmerica had the highest common equity capital ratio of the ten largest U.S. banking companies and had assets of $104 billion, deposits of $86 billion, and loans of $80.6 billion.

HOUSTON (SEPT. 28) BUSINESS WIRE - Medical Innovations Inc. (NASDAQ:MIXX), common stock, (NASDAQ:MIXXW), class A warrants and (NASDAQ:MIXXZ), class B warrants, Friday announced extension of the exercise period for the company's class A warrants through April 30, 1991.

The warrants were formerly due to expire Sept. 30.

The class A warrants were first issued for trading in the over-the-counter market Nov. 30, 1988, separately and as units with shares of common stock and class B warrants, and were admitted on the NASDAQ Exchange June 23, 1989.

Each class A warrant entitles the holder to purchase one share of Medical Innovations Inc. common stock for $1.50. The class B warrants expire on Sept. 30, 1991 and carry an exercise price of $2.25. Neither the class A nor class B warrants are currently exercisable.

Medical Innovations Inc. specializes in providing Home Infusion Care

(intravenous therapies) especially for immunosuppressed patients (i.e. cancer and AIDS), and through innovation has become one of the leaders in developing care protocols for these patients. Company operations are located in Houston; Livingston, N.J. (the New York metropolitan area); and Richmond, Va.

MILPITAS, CALIF. (SEPT. 28) BUSINESS WIRE - Qume Corp., Friday announced that the proposed acquisition by David S. Lee, the company's chairman and chief executive officer, Wearne Brothers Ltd. and related entities, and certain other stockholders and investors (the ''Buying Group'') had been approved by its stockholders but was not expected to close.

According to preliminary results, the vote on the proposal was 7,616,047 votes in favor (of which 5,535,310 votes consisted of votes of stockholders other than the Buying Group), 77,323 votes against and 36,565 votes abstaining. The required vote for approval was the affirmative vote of at least 5,643,188 shares and the affirmative vote of at least 5,302,892 shares held by stockholders other than members of the Buying Group.

However, before the meeting the company was again advised that certain members of the Buying Group had determined that New Qume would proceed with the acquisition only if Qume met all of the conditions of closing and closing occurred on or before Sept. 30. It was further advised that as of the end of trading in Taipei on Sept. 27 (which it was further advised was the last trading day in Taipei in September), the Taiwan Stock Exchange Stock Index had closed at a level more than 50 percent below the Index value on the date of the merger agreement and that because of the failure of this closing condition to be fulfilled, members of the Buying Group would cause New Qume Corp. to terminate the merger agreement on Oct. 1. No negotiations are being conducted between the Buying Group and the Special Committee.

Qume Corp. (NASDAQ:QUME) manufactures and markets page and daisywheel printers display products and computer supplies and accessories. In addition, the company's Data Technology Division offers disk drive controller boards, chip sets and high-capacity flexible disk drives and subsystems. Qume's products are marketed worldwide through a variety of distribution channels and OEMs.

SAN ANTONIO, TEXAS (SEPT. 28) BUSINESS WIRE - BUILDERS EXPRESS, INC. (NASDAQ Symbols: BLDXA, BLDXW, BLDXU) Thursday announced it has leased a site in Topeka, Kansas for its third ''Builders Express'' building supply warehouse.

The warehouse, a former Sears store, will occupy an anchor position in the White Lakes Mall in Topeka and will encompass over 81,000 square feet of interior space and an additional 5,000 square feet of outside space for the store's lawn and garden center. It is anticipated the store will open in the first quarter of calendar 1991.

Sean F. Lee, president and chief executive officer of BUILDERS EXPRESS, INC., said, ''This is the third lease the company has signed since June of this year. The first 'Builders Express' building supply warehouse opened on September 20 in Longview, Texas. The store opened on schedule and the turnout for the grand opening was excellent. It is expected that the company's second store will open on schedule in Clarkesville, Tennessee in late November.''

Lee continued, ''Topeka is typical of the markets the company will continue to concentrate on. It's the state capitol, has low unemployment, and meets the company's criteria for population and home improvement sales. Additionally, this market has yet to be tapped by other home improvement warehouse chains. The White Lakes Mall location is perfect for BUILDERS EXPRESS because it is the second busiest intersection in Topeka and is convenient to every point in the market.''

Lee also noted that the store's landlord will spend approximately $750,000 to completely renovate the facility to BUILDERS EXPRESS' specifications.

BUILDERS EXPRESS, INC. was organized in January 1990 for the purpose of opening warehouse-type retail home improvement supply stores providing a wide selection of quality, brandname products at discount prices mainly to homeowners and specialty contractors.

TEMPE, ARIZ. (SEPT. 28) BUSINESS WIRE - The MicroAge Inc. board of directors is pleased to announce the recent promotions of three officers: William Keiper John H. Andrews and J. Daniel Shaver.

Keiper was promoted to executive vice president and chief operating officer of MicroAge Inc. Formerly, he was senior vice president and chief marketing officer for MicroAge Inc. Keiper also serves as president of MicroAge Computer Centers Inc. (MCCI), MicroAge Inc.'s largest subsidiary. Keiper has been at MicroAge since 1986.

Andrews was promoted to vice president and chief financial officer of MicroAge Inc. Previously, he was vice president and controller. Andrews has worked for MicroAge since 1984.

Shaver was appointed vice president of marketing of MicroAge Inc. He recently joined the company and retains the same title at MCCI.

MicroAge Inc. Chief Executive Officer Jeffrey D. McKeever said, ''We're very pleased with these promotions. All three gentlemen are very capable and will be instrumental in the company's future.''

MicroAge markets and distributes information technology products and services through an international network of more than 700 franchised, affiliate and company-owned locations.

#90271b0628 09/28/1990 ~Business Wire

NIAGARA FALLS, NY (SEPT. 28) BUSINESS WIRE - Olin Corp. announced Friday that it is ceasing operation of its chlor-alkali unit at its plant in Niagara Falls by the end of the year.

The facility, one of the first to produce electrochemicals in this country, dates back to 1897.

The unit now produces chlorine, caustic soda, and potassium hydroxide (KOH), and it will be closed along with a sodium methylate unit that uses companion production equipment. About 150 of the plant's 224 employees will ultimately be affected by this action. Other facilities at this site, including sodium chlorite, will continue to operate.

''This decision is based on several factors, including the unit's high operating costs, which are the result of its being the oldest and smallest of Olin's chlor-alkali facilities. This facility represents less than 7 percent of the company's system-wide chlor-alkali capacity'' said an Olin spokesman. Other factors include the rising cost of waste disposal stemming from Federal environmental regulations uniquely affecting this location.

Olin said the costs associated with this decision have already been provided for and will not affect third quarter or future earnings.

''Olin customers will see no disruption in chlor-alkali supply. They will be served from the Olin-DuPont Niachlor plant in Niagara Falls and from Olin's plants in Charleston, Tennessee; McIntosh, Alabama; and Augusta, Georgia,'' the spokesman said. ''Moreover, the company remains committed to its potassium business and customers, and we are evaluating several manufacturing options regarding this business. Olin has entered into resale agreements to bridge the transition period in its potassium business.''

The spokesman also said the company hasn't altered plans to expand sodium chlorite production at Niagara Falls by another 3.5 million pounds a year. This will bring annual sodium chlorite production at the plant to 17 million pounds. The Niagara Falls plant site will continue to serve as a terminal for caustic soda and a major warehousing point for the company.

#90271b0631 09/28/1990 ~Business Wire

VAN NUYS, Calif.(SEPT. 28) BUSINESS WIRE - Martin Lawrence Limited Editions Inc. (NASDAQ:MLLE) announced Friday that between July 2, 1990, the date the company announced that its board of directors had authorized the repurchase of up to 1 million shares, and Sept. 26, 1990, it had repurchased all 1 million shares at prices per share ranging from $2.88 to $4.63.

The repurchase of these shares, when combined with the 500,000 shares repurchased between April 30 and June 29, 1990, totals 1.5 million shares repurchased by the company.

The company also announced that its board of directors has authorized the repurchase of up to an additional 1 million shares of its common stock. The company will repurchase any additional shares from time to time through open market and privately negotiated transactions over the next 12 months at prices deemed appropriate by management.

The company said it will use both cash on hand and borrowings under its existing line of credit to fund the repurchase.

As of Sept. 27, 1990, Martin Lawrence Limited Editions had 6,849,648 shares outstanding.

In making the announcement, Allen A. Baron, the company's chief financial

officer, stated, ''The company believes that repurchase of the company's common stock, which is currently trading at approximately one-half of the company's book value, represents an attractive investment opportunity.''

The company went on to announce that it estimated its net sales for the third quarter ending Sept. 30, 1990, will be approximately 1-6 percent higher than net sales in the same quarter last year.

The company anticipates that its earnings for the quarter will be in the range of 12 cents to 16 cents per share, compared with 23 cents in the same quarter last year.

Same-store sales for the company's 26 galleries that were open as of July 1, 1989, are expected to be down 35-40 percent. This decrease is due, in part, to a substantial decrease in the sales of more expensive works of art, compared with the same period last year.

Martin Lawrence Limited Editions is an integrated publisher, retailer and wholesaler of limited edition serigraphs, lithographs, sculpture and other works of fine art created by internationally renowned and emerging artists. The company also purchases, for resale, original works of art as well as limited edition works by recognized artists not published by the company.

DALLAS (SEPT. 28) BUSINESS WIRE - National Heritage Inc. (NYSE:NHR) reported

Friday that it has reached a settlement of disputes with LPIMC Inc. over the management of nursing home and retirement center properties owned by LPIMC-controlled partnerships.

As previously announced, these partnerships delivered to National Heritage notices purporting to terminate management contracts and to declare defaults under leases held by National Heritage relating to properties owned by these partnerships.

Robert M. Galecke, National Heritage President and Chief Operating Officer, commented, ''While we contest the appropriateness of the purported terminations, we concluded that prolonged litigation to enforce our rights as manager would be costly and counterproductive to the best interests of the company and the residents it serves.''

Under the terms of the settlement, National Heritage will continue to manage thirteen (13) properties pursuant to incentive-based management fee contracts expiring Dec. 31, 1991, subject to certain renewal options, in most cases for an additional eighteen-month period.

In connection with the settlement, National Heritage has agreed to terminate leases and management contracts relating to an additional twenty-nine (29) nursing homes and retirement center properties owned by LPIMC-controlled partnerships.

National Heritage will continue to manage thirteen (13) of these properties under interim contracts expiring over the next several months. Following the expiration of these interim contracts, National Heritage expects to provide services to 84 nursing homes and 24 retirement centers at calendar year-end.

Negotiations with LPIMC continue regarding the resolution of a dispute regarding one additional retirement center property currently leased and operated by National Heritage.

The nursing home and retirement center properties involved are among those owned by thirty-three (33) limited partnerships for which LPIMC serves as managing general partner.

LPIMC recently gained control of these partnerships by soliciting the consent of the limited partners to remove the former managing general partners, affiliates of Southmark Corp.

National Heritage is one of the nation's leading manager/operators of long-term care facilities.

#90271b0650 09/28/1990 ~Business Wire

PARAMUS, NJ (SEPT. 28) BUSINESS WIRE - TSS Ltd. (NASDAQ:TSSL) Friday announced that it has signed an agreement with Ralphs Grocery Co. of Compton, Calif., for a regional test of a new method of utilizing the The Savings Spot, the company's automated instore coupon distribution system and services.

The agreement provides a test for use of The Savings Spot as the focus of an integrated instore product promotion program in partnership with supermarket chains on a regional basis. Manufacturers will get an enhanced version of The Savings Spot program in which Ralphs provides a complete promotional package supporting the featured products.

The six to eight week pilot program, scheduled for 23 Ralphs stores in the San Diego area, will test the feasibility of installing and operating TSS terminals under the new approach in up to 150 Ralphs supermarkets in San Diego, Los Angeles and five other southern California counties.

Stephen A. Collins, president and CEO of TSS Ltd. said, ''This agreement launches a program to establish promotional partnerships with Ralphs and other leading quality retailers in other regions which will maximize product movement for participating manufacturers.

''The significant increase in product movement provided by The Savings Spot programs as previously confirmed by independently run statistical surveys,'' he continued, ''will translate into product sales increases which are immediately measurable on a regional basis by participating manufacturers. Finally, Ralphs will provide product exclusivity to the participating manufacturers and significant savings to Ralphs' shoppers with The Savings Spot dispensing coupons for even lower prices on popular brands.''

According to Collins, a specialist in regional couponing, the advantages of The Savings Spot program translates into greater coupon redemption rates due to the convenience to traditional coupon users and its attraction to non-users. This contrasts with conventional coupon delivery systems where coupons must be clipped, saved and stashed away for a subsequent trip to the store, then re-sorted according to shopping plans and carted into the store.

TSS Ltd. has contracted for the installation of its coupon dispensing terminals in 474 supermarkets in the southeast including 219 terminals currently operating in supermarkets owned by Kroger, Big Star (Grand Union), Cub Foods and BI-LO. Installations are scheduled for A&P stores in October.

TSS Ltd.'s shares, warrants and units are traded on NASDAQ under the symbols TSSL, TSSLW, and TSSLU respectively.

NEW YORK (SEPT. 28) BUSINESS WIRE - Nantucket Industries, Inc. (ASE:NAN) Friday announced results for the second quarter and six months ended September 1, 1990.

For the thirteen weeks ended September 1, 1990, net sales decreased 25% to $7,293,172 from $9,724,362 for the thirteen weeks ended August 26, 1989. Second quarter net income of $59,532 or $.02 per share compared with $359,584 or $.15 per share for the same period in the prior year.

For the twenty-six weeks ended September 1, 1990, net sales were $17,076,722, down approximately 22% from $21,870,694 for the comparable period in the prior year. Net income for the first half of fiscal 1991 was $331,915 or $.13 per share versus $975,213 or $.40 per share in the prior year's first half.

The decrease in sales for the second quarter and six month periods is in great part related to the August 1989 completion of a low margin, men's white underwear program, which generated revenues of approximately $1,500,000 and $3,500,000 in last year's second quarter and first half, respectively. The Company also attributed the sales decrease to significant reductions in its customers' inventory levels in response to the economic uncertainties stemming from fear of a recession and the crisis in the Persian Gulf. This reduction was partially offset by a $453,000 increase in second quarter sales at the women's sock division.

Commenting, George J. Gold, Chairman, stated, ''Considering general economic conditions and the retail environment specifically, we are not dissatisfied by Nantucket's performance. It is especially gratifying to note that we were able to maintain strong gross profit margin percentages of 24.9% for the quarter, thanks to efficiencies from our new plant expansion as well as the success of our cost containment programs.''

Gold continued, ''Our balance sheet remains especially strong. At the close of the second quarter, working capital stood at $15,409,174 and our current ratio was 5.7:1.

''Barring the unforeseen, we continue to expect a much stronger second half. Starting in the fourth quarter, we will begin to generate new, high margin, sales with shipments of our newest licensed brands, McGregor undergarments for men, Danskin socks for women, and Thermos brand thermal underwear for women.''

Nantucket Industries, Inc. manufactures and sells men's, ladies' and children's undergarments and women's socks.

VANCOUVER, BRITISH COLUMBIA (SEPT. 28) BUSINESS WIRE - The Directors of U.S. Precious Metals Inc. (NASDAQ:USPMF, TSE:USP) and Centurion Gold Ltd. (NASDAQ:CEUMF, TSE/VSE: CEU) announced Friday that the two companies have agreed in principle to consolidate into one company.

The business consolidation would require obtaining shareholder and regulatory approval and the receipt of satisfactory fairness opinions and would be on the basis of one new consolidated company share for each share of USPM and Centurion. USPM and Centurion intend to settle on the final terms of the consolidation within 90 days.

The business strengths of the companies are complementary, as USPM is currently seeking additional development opportunities, and Centurion has several significant mineral properties which it is currently seeking to develop.

The companies currently have common management and the consolidation will

result in considerable administrative efficiencies, as it will no longer be necessary to conduct separate audits, meetings and filings.

In addition, the greater asset base and operational ability of the combined companies should make it easier to obtain financing when needed and negotiate new opportunities.

USPM's primary asset is a 40 percent interest in the Mother Lode Mine near Beatty, Nevada. The Mother Lode Mine produced 16,480 ounces of gold during the first half of 1990 and is currently 30 percent ahead of scheduled production on second half production. Production costs for 1990 have averaged under $200 U.S. per ounce.

Centurion's primary assets are interests in 14 mineral properties located in the Western United States. Centurion receives royalty income from operations on some of the properties which should total over $600,000 U.S. in 1990. 1989 revenues from royalties were over $500,000 U.S.

In addition, Centurion has recently completed a feasibility study on the Gray Eagle Project in Northern California which shows that at $400.00 U.S. per ounce gold and $1.00 U.S. per pound copper on the open pit mining project which would yield an annual pre-tax income of over 5 million dollars.

Because of the complementary nature of the two companies, the directors of both companies feel that the proposed business consolidation would greatly enhance shareholder value and cost effectiveness.

MURFREESBORO, TN (SEPT. 28) BUSINESS WIRE - National HealthCorp L.P. (ASE:NHC), one of the nation's largest long-term health care chains, has opened its 24th center in Florida and begun construction on two centers in South Carolina.

The Florida center is 120-bed Ocoee Health Care Center in Ocoee, Fla., and will be managed by NHC. The $9.5 million South Carolina construction projects include an 88-bed center in North Augusta and a 132-bed center in Greenville.

''America's population is aging and the need for our services is substantial '' NHC President Andy Adams said. ''We are pleased to have the opportunity to provide quality health care at these new locations.''

NHC, a publicly traded limited partnership, now operates 74 long-term health

care centers with a total of 8,887 beds. The company's other services for the nation's elderly include Alzheimer's units, homecare programs and retirement apartments.

MOONACHIE, NJ (SEPT. 28) BUSINESS WIRE - Bob Lieberman has joined Matchbox Toys (USA) Ltd. as Vice President of Marketing, effective Oct. 1, it was announced Friday by Ken Bloom, executive vice president and general manager of the Moonachie based toy company.

In this senior marketing position, Lieberman will be responsible for the North and South American markets as well as coordinating the company's global marketing effort.

Lieberman brings an 18 year background in children's products to his new post. Prior to joining Matchbox, he was vice president of Sicommerce Inc., a wholly owned subsidiary of BBC Brown Boveri, the well-known Swiss multi-national whose charter is to introduce innovate consumer products to the American markets.

During his tenure at Sicommerce, Lieberman created and launched MAGNETIC DIMENSIONS, the No. 1 selling game at FAO Schwarz during the Christmas '89 season. Lieberman joined Sicommerce from The Topps Co., Inc., best known for their Baseball Cards and BAZOOKA bubble gum, where he was Director of Marketing.

Lieberman, 38, resides in Ocean, N.J. with his wife and their two daughters.

FORT WORTH, TX (SEPT. 28) BUSINESS WIRE - Burlington Northern Railroad (BN) (NYSE:BNI) Friday announced a special leave policy for employees in the military reserves or National Guard who are called to active duty.

Gerald Grinstein, president and chief executive officer, said, ''Burlington Northern will make up the difference in both pay and benefits between what employees receive while on active duty and what they would have received had they continued in the active employement of BN. It is our hope that this will ease at least some of the difficulty and uncertainty that our military-reserve employees and their families will face in coming months.''

The new policy applies to all Burlington Northern employees.

Reservists on active duty ordinarily are not compensated beyond what the government pays them, although federal law guarantees them their job or a comparable one when they return.

BN employees, in addition to having their income level maintained, will continue to receive the same level of benefits from the company as long as there is no duplication of the government's benefits.

NORTH BERGEN, NJ (SEPT. 28) BUSINESS WIRE - EMERSON RADIO CORP. (NYSE:EME) Friday announced that it has entered into an agreement with Tomei Industrial (Holdings) Ltd., which, among other matters, provides for the sale of approximately 2,000,000 shares of Emerson's Common Stock to Tomei at a price of $3.75 per share, or an aggregate of approximately $7.5 million.

In addition, Tomei was granted an option to buy an approximate like number of additional shares at $4.00 per share through August 1991 and a designee of Tomei has agreed to serve upon Emerson's Board of Directors.

Tomei has further agreed with the Company that for a period of three years, it will vote its shares of Emerson Common Stock in favor of both the Board's designees of Fidenas Investment Limited, the Company's largest shareholder, and the remaining Emerson management nominees. Tomei will continue to maintain its right to designate one member of Emerson's Board of Directors subsequent to September 1991 and through September 1993 provided that Tomei shall have acquired at least a 10% equity interest in Emerson prior to September 1991 and shall have continuously held at least 7-1/2% of Emerson's Common Stock throughout.

Tomei, a public company whose ordinary shares are traded on the Hong Kong stock exchange, is one of the largest electronics groups in Hong Kong. Tomei, together with its affiliates, are engaged in the marketing and production of electronics components, a full range of audio-video and electronic products, toys and magnetic tapes, with operations in China, Indonesia and Malaysia employing approximately 20,000 persons. Tomei has stated that the combined revenues of Tomei and its affiliates are expected to reach $350 million during calendar 1990.

Emerson Radio Corp. designs and markets a full line of popularly priced consumer electronics products. The range of the Company's products includes televisions, video cassette recorders, portable compact disc players, radios, stereo systems, tape players and recorders, microwave ovens, compact refrigerators, telephones, answering machines and fax machines. NASHVILLE, TN (SEPT. 28) BUSINESS WIRE - DeVlieg-Bullard Inc. (NASDAQ/NMS:DVLG) Friday announced that it has completed the purchase of certain assets of New Britain Machine, a division of Litton Industries, Inc. (NYSE:LIT).

The value of the transaction was approximately $8 million, in line with the amount indicated last month when the contract was initially announced.

As earlier reported, Laurence DeFrance, chief executive officer of DeVlieg-Bullard, said the operations of New Britain Machine are expected to contribute close to $10 million to the company's annual revenues. For its fiscal year ended July 31, 1990, DeVlieg-Bullard reported net sales of $77.2

million.

DeFrance said that the acquisition will significantly expand the market for the maintenance, repair and remanufacturing services which DeVlieg-Bullard provides for machine tools.

He remarked, ''New Britain Machine has shipped more than 40,000 machine tools since its founding in 1895. Through this transaction we are effectively adding the nationwide base of New Britain users to our customer base.

''We are pleased with completing the acquisition of this universally recognized trade name and are excited about the opportunity to meet the operating requirements of the large number of New Britain tools now in service.''

DeVlieg-Bullard is a diversified industrial concern specializing in servicing, upgrading, automating and remanufacturing precision engineered machine tools. The Company also manufactures sophisticated original and replacement tooling products used in industrial machine tools.

NORTH BERGEN, NJ (SEPT. 28) BUSINESS WIRE - Emerson Radio Corp. (NYSE:EME) Friday announced that Stephen L. Lane, its president and chief executive officer, had resigned as both an officer and director, effective immediately.

Stephen L. Lane stated that his resignation was prompted by his desire to avoid further adverse publicity to Emerson stemming from recent media articles concerning his personal life which Lane believes were erroneously reported. William W. Lane, Emerson's chairman, has assumed the office of president and chief executive officer, effective immediately.

Stephen L. Lane has agreed to make his services available to Emerson as a consultant to the company's board of directors and management for a period of three years to the extent requested. Commenting upon Stephen L. Lane's resignation, William W. Lane stated, ''We are profoundly sorry that after 30 years of invaluable service to Emerson, Stephen L. Lane has resigned from all of his executive positions with Emerson for what he believes to be the best interests of Emerson. He will be sorely missed. We are delighted that Steve has agreed to serve as a consultant so that we will continue to be able to draw upon his vast experience in the consumer electronics industry over the next several years to augment the future growth and development of Emerson.''

WHITE PLAINS, N.Y. (SEPT. 28) BUSINESS WIRE - NYNEX Corporation Friday announced the creation of NYNEX Network Systems Company to focus on opportunities to provide communications networks outside the United States.

NYNEX Network Systems Company is a subsidiary of NYNEX's Worldwide Information and Cellular Services Group and will be headquartered in Brussels, Belgium.

Charles J. Many, who has been president - NYNEX Mobile Communications Company, has been named president of the new company. Alfred F. Boschulte, NYNEX vice president - Marketing and Planning, has been elected president at NYNEX Mobile Communications.

NYNEX Network Systems Company's mission is to pursue privatization contracts now available in many European and Pacific rim countries and to seek opportunities for cable franchises, private network construction, and cellular and other wirefree licenses in selected countries.

''We are very serious about our international ventures,'' said Ivan G. Seidenberg, NYNEX executive vice president and president of Worldwide Information and Cellular Services Group. ''The new company will deliver world class management and networking expertise to the contracts we've already won while aggressively pursuing other opportunities. NYNEX Network Systems Company is the action organization that will attract new business to NYNEX in the international marketplace.

According to Many, ''NYNEX has the technical expertise many countries overseas need and want. It's our job to show them and convince them that we have the commitment and the ability to assist them.''

NYNEX is already involved in several international network projects. In Gibraltar, the United Kingdom and the Philippines, NYNEX has earned contracts to provide network services, cable franchises and coin phone service.

NYNEX Corporation is a worldwide family of communications and information systems companies, providing voice and data communications, wireless communications networks, computers and software and publishing services. Its telecommunications sector provides voice and data communications services for the northeastern United States. Its Worldwide Information and Cellular Services sector provides network services and information systems in the United States and in 37 countries around the globe.

SAN ANTONIO, TEXAS (SEPT. 28) BUSINESS WIRE - La Quinta Motor Inns Inc. (NYSE: LQM) announced Friday that it has entered into an agreement, subject to approval by Mexican government authorities, with Desarrollos Turisticos Vanguardia S.A. de C.V. for the expansion of its chain into the Mexican States of Nuevo Leon and Coahuila.

Major cities in those states include Monterrey and Saltillo. In announcing the new development program, Sam Barshop, chairman and chief executive officer stated: ''Expansion into Mexico represents a natural growth opportunity for the company. A need exists for value priced, limited service lodging within the country of Mexico.

''With La Quinta Inns in all states bordering Mexico, both U.S. and Mexican travelers will benefit from the expansion of the La Quinta system into Mexico. The La Quinta system will benefit from broader exposure to the expanding Mexican market.'' Under the new program, Desarrollos Turisticos Vanguardia S.A. de C.V., a Saltillo based company, will construct and own each of the inns pursuant to a license from La Quinta. Initially, La Quinta will manage each of the inns under a separate management agreement.

Exclusive development rights for the two Mexican states have been awarded Desarrollos subject to the satisfaction of quota requirements. All inns to be located in Mexico will offer the product type, quality and consistency experienced by La Quinta guests in the United States.

La Quinta will approve all locations and have the right to review all aspects of the design and construction of each facility. Representatives of both La Quinta and Desarrollos hope to have several locations under development within six to eight months.

La Quinta Motor Inns Inc. develops, owns, and operates or licenses limited

services lodging facilities. As of Sept. 28, La Quinta operated 208 inns in 29 states.

WHITE PLAINS, N.Y. (SEPT. 28) BUSINESS WIRE - IBM Friday announced it will donate more than $600,000 in computer equipment, software products and engineering support to the University of Maine to automate the school's computer integrated manufacturing (CIM) teaching and research center, the Pulp and Paper Pilot Plant.

CIM is the process by which manufacturers link their departments -- from design and engineering to production, business planning, marketing and distribution -- using information systems technology.

In addition to IBM, Heuristics, Inc., an IBM Business Partner which develops software for industrial process manufacturing customers will contribute to the project.

''It is crucial that today's engineering students receive the technical experience and advanced training necessary to meet our current industrial challenges,'' says Edward J. Kfoury, president of IBM's Industrial Sector Division. ''The University of Maine's world-class pilot plant is an excellent example of how the combination of education and technology can provide students with the tools to excel in a highly competitive marketplace.''

The Pulp and Paper Pilot Plant is a $6 million complex which demonstrates the operations of a modern pulp and paper mill. Supporting the plant is a comprehensive paper testing facility and a new computer laboratory, established as part of the automation project. These facilities are available to students, faculty, industry-sponsored researchers and the University of Maine Pulp and Paper Foundation members.

The capabilities of CIM enable users of these facilities, for example, to collect information generated in both the plant and laboratory environments for immediate analysis, thereby increasing research productivity and knowledge of the paper making process.

The integration of technology systems, managed by IBM's Forest Products Industry Center, will take place over the next several years and will include IBM equipment such as Personal System/2(a) (PS/2)(a) workstations, Industrial Computers designed for harsh environments and an Application System/400(a) (AS/400)(a) computer, serving as the information network manager and business support system.

AKRON, OH (SEPT. 28) BUSINESS WIRE - Samir F.S. (Sam) Gibara, president and chief executive officer, Goodyear Canada Inc., has been appointed vice president, Goodyear's European operations effective Dec. 1, replacing Max Zimmermann.

Zimmermann, 62, for personal reasons has requested early retirement effective Jan. 1, 1991.

Gibara will report to Jack R. Sardas, president and chief operating officer of the Tire Division.

Succeeding Gibara in Canada is Barry Robbins, formerly vice president, sales and marketing for Goodyear subsidiary Kelly-Springfield. Robbins' move is effective Nov. 1. He will report to Gene Culler, executive vice president, North American Tire Division.

Named to replace Robbins at Kelly-Springfield effective Oct. 1 is Don Salyers, formerly vice president consumer products for Goodyear. Salyers will report to John F. Fiedler, president and CEO, The Kelly-Springfield Tire Co.

Gibara, 51, joined Goodyear in 1964 as a management trainee in France. He ws named president and managing director of Goodyear France in 1976, and vice president, Europe, in 1981.

Following a brief absence from the company, Gibara returned as managing director of Goodyear France in 1983. In August of 1989, he was elected president and CEO of Goodyear Canada Inc.

A native of Switzerland, Zimmermann joined Goodyear in 1949 as a trainee in Akron. He was elected a vice president of Goodyear International Corp. in January of 1985.

#90271b0707 09/28/1990 ~Business Wire
BOSTON (SEPT. 28) BUSINESS WIRE - When is diamond not a precious stone?

When it is a technology which will synthesize diamond, a material likely to revolutionize industry around the world and rival the impact of the silicon computer chip.

The October issue of New England Business magazine reveals that the Norton Co. of Worcester is a major player in developing the new technology and expects sales of $400,000,000 by the end of 1994 in an emerging field for a company whose 1989 revenues were $1.5 billion. Kim Bigelow, Norton's director of technology, feels that Norton can become the fastest commercializer of diamond and told the magazine that a new kind of diamond film developed by Norton was the chief reason behind the company's acquisition last April by the Companie de Saint-Gobain of France.

Norton's new proprietary process advances a relatively new technology known as chemical vapor deposition, or CVD, which is likely to make diamond more readily available. Increased availability combined with diamond's unique physical properties --- absolute hardness, superb heat conductivity and an ability to provide an almost frictionless surface --- will, theoretically at least, have widespread applicability in everything from automobile engines to computers to missile systems, says the magazine.

CVD diamond requires a source of liquid carbon ranging from sake in Japan, to whiskey, to peanut butter. Methane gas, however, is a more easily managed carbon source. The CVD process converts the various source materials of carbon to diamond, and ways have been found to make it 99.9 percent pure.

Norton is not the only player, according to New England Business. General Electric Co. first duplicated nature's way of making diamonds in the 1960s and

this past July introduced gem-quality diamonds purer than anything in nature. Raytheon Co., the Lexington, Mass.-based manufacturer closely associated with the defense industry, describes diamond as ''one of the larger free-standing'' research programs at the company.

New England Business is a regional business monthly magazine published in Boston.

NEWARK, N.J. (SEPT. 28) BUSINESS WIRE - THT Inc. (NASDAQ:TXHI) announced Friday the consummation of a stock purchase agreement with Jackburn Mfg. Inc., Girard, Pa., pursuant to which, a newly formed, wholly owned subsidiary of THT Inc., purchased 100 percent of the stock of Jackburn Mfg. Inc. for approximately $8 million.

Jackburn Mfg. Inc. has been in business for approximately 30 years and is engaged in the manufacture of steel grids used as cooking surfaces for gas stoves.

Jackburn Mfg. Inc. estimates revenues of approximately $8 million for their year ended Sept. 30 and estimates operating income before taxes and nonrecurring expenses of approximately $1.7 million.

THT Inc. is engaged in the sale of consumer electronics and, through its wholly owned subsidiary, in the manufacture of rolled paper sticks used principally in confection and sanitary health related products.

DEERFIELD, Ill.(SEPT. 28) BUSINESS WIRE - Baxter Healthcare Corp. announced Friday the signing of multi-year, multi-million-dollar supply and sales agreements with Saint Barnabas Medical Center in Livingston, N.J., and Vanderbilt University Hospital in Nashville, Tenn.

Under the agreements, Baxter will manage most of the inventory required to service the hospitals' needs and provide daily deliveries of medical supplies in ready-to-use packaging.

The agreement with Saint Barnabas is expected to result in about $56 million in sales for Baxter and more than $7 million in savings for Saint Barnabas over six years. The contract with Vanderbilt represents an expansion of an existing distribution relationship with

Baxter during which the hospital reduced inventory costs by $3 million. The new agreement, which is effective through 1993, is expected to generate approximately $52 million in sales to Baxter over the course of the contract.

Baxter's stockless/just-in-time distribution program, called ValueLink, can reduce or eliminate the need for hospitals to warehouse products by using Baxter's distribution services to deliver supplies as they are needed in quantities that are ready to use.

Stockless delivery represents a departure from the way hospitals typically receive and handle supplies. Most hospitals receive medical products in bulk quantities delivered by numerous vendors. The large cases must then be broken down into small units and sent to the various hospital departments.

''Our program streamlines the process of handling medical supplies, cuts inventory and, as a result, can offer hospitals tremendous savings,'' said Anthony Kesman, vice president and general manager of Baxter's ValueLink business center.

''Our studies show hospitals generally spend a third or more of their budgets on the purchase price of supplies and the logistics activities associated with purchasing and moving them from warehouses and storerooms to the patients, where they are ultimately used. The longer products are held in inventory,

the more it costs hospitals.''

''We were faced with the need to build a warehouse to store and distribute medical/surgical supplies,'' explained Joseph E. Barry, senior vice president at Saint Barnabas. ''Under the arrangement, Baxter will warehouse the supplies destined for Saint Barnabas and will deliver them as they are needed. Saint Barnabas will not have to invest the money and management staff needed to secure and operate a warehouse facility.''

''The dollar savings from all facets of the stockless program are impressive '' said David Jones, director of purchasing at Vanderbilt. ''We reduced our investment in in-house inventory by $3 million during the past two years of our stockless program.''

Stockless programs also enable hospitals to convert old storage areas into revenue-producing space, such as new operating rooms or diagnostic laboratories. Vanderbilt plans to offer ancillary patient-care services in its former inventory space. Saint Barnabas plans to convert its space into classrooms and other training facilities.

Vanderbilt University Hospital is a major referral center and the teaching and research institution for Vanderbilt University Medical School. It has 661 inpatient beds and handles more than 240,000 clinical visits annually.

Saint Barnabas Medical Center is a 620-bed facility with 35,000 inpatients, 28,000 emergency visits and 200,000 outpatient visits each year. It is the largest and oldest hospital in New Jersey and a major referral center as well as a teaching and research institution. Baxter Healthcare Corp. is the principal domestic operating subsidiary of Baxter International Inc. Based in Deerfield, Baxter is the leading worldwide manufacturer and marketer of health-care products, systems and services. It offers 120,000 products to health-care providers in 100 countries.

CAROL STREAM, IL (SEPT. 28) BUSINESS WIRE - MicroENERGY Inc. (NASDAQ:MCRE), designer and and manufacturer of custom switching power supplies announced Friday its results for the fiscal year ended June 30.

MicroENERGY Inc.
Statement of Earnings

	(audited) Years Ending 6/30/90	6/30/89
Revenues	$10,461,354	$5,585,986
Profit/(Loss) after tax	602,058	(687,049)
Earnings per share	$0.005	($0.008)

The company, which was recognized in the Inc. Magazine as one of the 100 fastest growing companies in the country for the last five years, had a revenue increase of 87 percent on a year-to-year basis.

The increased revenues are a result of increased shipments to existing customers and substantial shipments of new products to an expanded customer base. The profitability increase was a direct result of the increased revenues and controlling the cost growth below the revenue growth rate.

FARMINGDALE, NY (SEPT. 28) BUSINESS WIRE - Cleopatra Kohlique Inc. (NASDAQ:CLEO) announced Friday that Anthony McCready purchased from London Financial Trust Ltd. (''LFT''), the company's controlling stockholder, 4,471,663 shares of common stock (34.4 percent), 75 shares of Class A stock, representing all of the issued and outstanding stock of that class, options to purchase 1.5 million shares of the company's common stock and Promissory Notes aggregating $116,667 issued by the company, and secured by substantially all of its assets.

The interests purchased by McCready are being held in escrow pending McCready's payment of the purchase price which is due in four installments through Dec. 31. During that period, McCready will be entitled to vote the shares he acquired provided he makes timely payments to LFT, and he will be in a position to effectively control the company.

McCready, the company's chief operating officer, and formerly the president of the International Division at Pavion, Ltd., had previously acquired an 8.5 percent equity interest in the company in Dec., 1989.

LFT retained ownership of 1,086,432 shares (7.8 percent) of the company's common stock.

The company's two current directors, Pravin D. Jatania and Bharat D. Jatania, affiliates of LFT, resigned as directors of the company, effective in October. Pravin D. Jatania resigned as chief executive officer, effective immediately. The board of directors of the company appointed Anthony McCready, effective

immediately, to fill one of the existing vacancies on the board.

It is anticipated that McCready will designate one or more individuals to fill the vacancies created by the resignation of Bharat and Pravin Jatania. In addition, McCready was elected to serve as president and chief executive officer.

The company distributes the Cleopatra Kohlique and Montaj lines of cosmetic products to mass market retail stores and chains.

BURBANK, CA (SEPT. 28) BUSINESS WIRE - dick clark productions inc. (NASDAQ:DCPI) reported that revenues for the fiscal year ended June 30 rose to $30,263,000, a gain of 18 percent over revenues of $25,613,000 for fiscal 1989.

Net income for fiscal 1990 was $1,352,000, or 16 cents per share, compared with $2,623,000, or 32 cents per share, for fiscal 1989.

Revenues for the fourth quarter ended June 30 were $7,727,000, compared with $5,395,000 for the comparable quarter of fiscal 1989. Net income for the period was $522,000, or 6 cents per share, compared with $1,019,000, or 12 cents per share, for the same period last year.

As of June 30, the balance sheet showed cash and cash equivalents of $20,253,000 equalling $2.45 per share, with no debt.

The increase in revenues in fiscal 1990 compared with fiscal 1989 is primarily attributable to an increase in the number of television specials produced during the year as well as the delivery of a movie for television during fiscal 1990. The decrease in fiscal 1990 net income is primarily due to a decline in the profitability of the series programming produced during the year. This was somewhat offset by an increase in net income generated by a greater number of specials produced in fiscal 1990, compared with fiscal 1989.

Not reflected in the 1990 financial results are two five-day-per-week game show series produced by the company, which debuted in fiscal 1991. THE CHALLENGERS is in first-run syndication in 82 percent of U.S television households and LET'S MAKE A DEAL airs daytime on NBC.

During the fiscal 1990 year, the company produced 19 entertainment and awards specials. Thirteen specials were annual or recurring, four were new programs and two were series pilots which aired as specials. The company also produced the highest rated two-hour movie for television of the 1989-90 television

season.

In addition, the company has obtained 100 percent ownership of the first AMERICAN BANDSTAND GRILL located in Miami, and rights to control the future development of the restaurant concept. Its wholly owned talent booking subsidiary, the dick clark agency inc. completed its first full year of operations in fiscal 1990 and is currently coordinating a series of 10 concerts in Japan under the banner of the company's AMERICAN MUSIC AWARDS trademark.

The company began to further exploit the value of its AMERICAN MUSIC AWARDS trademark by licensing it for use at the AMERICAN MUSIC AWARDS HALL OF FAME, which is being developed in Memphis, Tenn.

Dick clark productions, which has been publicly traded since 1987, develops and produces a wide range of television programming including entertainment specials, variety series, movies and game shows. Recently the company has been developing additional emerging businesses to capitalize on the value of its trademarks and other assets. Its new businesses include the recently opened AMERICAN BANDSTAND GRILL restaurant and THE DICK CLARK AGENCY INC., a talent booking agency.

MILWAUKEE (SEPT. 28) BUSINESS WIRE - Republic Capital Group Inc. (NASDAQ:RSLA) Friday announced the declaration of the first quarter fiscal year 1991 cash dividend of 30 cents per share, payable Oct. 26, to shareholders of record Oct. 12.

''The three insured institutions that make up Republic Capital Group Inc. all meet their fully phased-in capital requirements, and as such qualify as the highest ranked institutions under the new regulations that govern dividend payments,'' reported Robert L. Desmond, president. ''These new regulations superseded our previous dividend limitation agreements and will greatly support our ability to maintain the generous dividend policy we have established.''

Desmond added: ''Republic Capital Group is a well capitalized, profitable company doing business in a troubled industry. Our 30 offices, located in Wisconsin and Illinois, areas known for their strong, stable economies, provide low cost deposits and are excellent sources for one-to-four family

residential and consumer loans, the mainstay of our business.

''The next several years will present many new regulatory and accounting challenges. We believe Republic Capital Group will have the capital and management skills to meet these challenges facing our industry.''

Headquartered in Milwaukee, Republic Capital Group Inc. is a multi-financial institution holding company. As of June 30, Republic Capital Group's net worth was $49,619,000 with assets totaling approximately $958 million. Republic Capital Group Inc. is the fifth largest financial institution organization headquartered in Wisconsin.

NEW ORLEANS (SEPT. 28) BUSINESS WIRE - The first platform to the Main Pass Project was launched Friday in ceremonies at the McDermott Marine Construction fabrication yard near Morgan City, La.

The Main Pass deposit contains the largest existing Frasch sulphur reserve in North America and one of the largest reserves of oil and natural gas in the Gulf of Mexico.

Main Pass lies 17 miles east of Venice in the Gulf of Mexico. When completed in 1992, the complex will be the largest structure in the Gulf, encompassing some 300,000 square feet of deck area, or 6.9 acres. It will stretch 1.1 miles from one end to the other.

Among those participating in the ceremonies were Gov. Buddy Roemer and Freeport-McMoRan Chairman and Chief Executive Officer James R. Moffett. They each broke a bottle of Gulf of Mexico water across the platform to start it on its two-day journey down Bayou Boeuf to the open Gulf.

The Main Pass Project is a joint venture of Freeport-McMoRan Resource Partners 58.3 percent ownership; IMC Fertilizer Inc. 25 percent, and Felmont Oil Corp. 16.7 percent. Freeport-McMoRan, a natural resource company headquartered in New Orleans, owns 62 percent of Freeport-McMoRan Resource Partners, Limited Partnership.

The 67 million ton sulphur reserve gives Main Pass a life of 30 to 35 years at a design production rate of approximately 2 million tons a year. Sulphur production is scheduled to begin in mid-1992.

The estimated recoverable oil reserves are 35 to 50 million barrels with a production life of 10 to 15 years. Oil and natural gas production will begin

in late 1991.

The platform that was launched today weighs 2,632 tons. The Main Pass platforms will stand 28 stories high from the ocean floor.

The $804 million project -- $554 million for sulphur construction and $250 million for oil and gas acquisitions and construction -- will have a major economic impact on Louisiana.

The impact on the Louisiana economy over the life-of-the-mine is estimated to be $31 billion. The total impact of these construction and acquisitions costs is $1.5 billion with total employment due to construction at 21,274 workers.

Payroll generated over the life-of-the-mine will be in excess of $1.5 billion. The project will provide estimated tax revenues of more than $800 million to state and local government and over $1.3 billion to the federal government over the life-of-the-mine.

Three Louisiana engineering companies are the major contractors: McDermott Inc., is designing, fabricating and installing the structures; Waldemar S. Nelson & Co. Inc., is designing the power plant and sulphur facilities; and Walk, Haydel & Associates, is providing project management. There are 117 Louisiana sub-constructors and vendors also directly participating in the project and many more businesses indirectly benefitting.

Much of the sulphur mined at Main Pass will serve as a raw material at Freeport-McMoRan Resource Partner's three plants upriver from New Orleans to produce fertilizer. Freeport-McMoRan Resource Partners is the largest producer of phosphate fertilizer in the nation.

When completed, the six platforms that comprise the sulphur mining giant will include two production drilling units, power plant and facilities platforms, a 24,000 ton liquid sulphur storage platform, and living quarters for 163 employees.

Freeport-McMoRan Resource Partners currently has three operating sulphur mines Garden Island Bay at the mouth of the Mississippi River and Grand Isle and Caminada offshore from Louisiana.

The company uses the Frasch method in producing sulphur. This involves injection of superheated water into the sulphur bearing zones. The solid sulphur, which melts at 240 degrees, is transformed into a liquid and lifted to the surface through the use of compressed air. The sulphur is maintained in a liquid form throughout shipment, storage and delivery to customers.

The system of handling liquid sulphur from the mine to the customer was pioneered by Freeport-McMoRan in the early 1960s. The system as currently used provides the latest state of the art environmental equipment.

BURBANK, CALIF. (SEPT. 28) BUSINESS WIRE - dick clark productions inc. (NASDAQ:DCPI) reported that revenues for the fiscal year ended June 30 rose to $30,263,000, a gain of 18 percent over revenues of $25,613,000 for fiscal 1989.

Net income for fiscal 1990 was $1,352,000, or 16 cents per share, compared with $2,623,000, or 32 cents per share, for fiscal 1989.

Revenues for the fourth quarter ended June 30 were $7,727,000, compared with $5,395,000 for the comparable quarter of fiscal 1989. Net income for the period was $522,000, or 6 cents per share, compared with $1,019,000, or 12 cents per share, for the same period last year.

As of June 30, the balance sheet showed cash and cash equivalents of $20,253,000 equalling $2.45 per share, with no debt.

The increase in revenues in fiscal 1990 compared with fiscal 1989 is primarily attributable to an increase in the number of television specials produced during the year as well as the delivery of a movie for television during fiscal 1990. The decrease in fiscal 1990 net income is primarily due to a decline in the profitability of the series programming produced during the year. This was somewhat offset by an increase in net income generated by a greater number of specials produced in fiscal 1990, compared with fiscal 1989.

Not reflected in the 1990 financial results are two five-day-per-week game show series produced by the company, which debuted in fiscal 1991. THE CHALLENGERS is in first-run syndication in 82 percent of U.S television households and LET'S MAKE A DEAL airs daytime on NBC.

During the fiscal 1990 year, the company produced 19 entertainment and awards specials. Thirteen specials were annual or recurring, four were new programs and two were series pilots which aired as specials. The company also produced the highest rated two-hour movie for television of the 1989-90 television season.

In commenting on the year, Francis C. La Maina, president and chief operating officer, said, ''While we are pleased with our performance in fiscal 1990, we view the past year as one in which we laid the foundation for our future growth. In addition to the specials, series, pilots and other programming in fiscal 1990, the company was able to launch a new game show strategy and as a result has two game show series now on the air,'' he said.

In addition, the company has obtained 100 percent ownership of the first AMERICAN BANDSTAND GRILL located in Miami, and rights to control the future development of the restaurant concept. Its wholly owned talent booking subsidiary, the dick clark agency inc. completed its first full year of operations in fiscal 1990 and is currently coordinating a series of 10 concerts in Japan under the banner of the company's AMERICAN MUSIC AWARDS trademark.

The company began to further exploit the value of its AMERICAN MUSIC AWARDS trademark by licensing it for use at the AMERICAN MUSIC AWARDS HALL OF FAME, which is being developed in Memphis, Tenn.

''There is a great deal of excitement at dick clark productions as we continue to shape our company in the 90s,'' La Maina said.

dick clark productions, which has been publicly traded since 1987, develops and produces a wide range of television programming including entertainment specials, variety series, movies and game shows. Recently the company has been developing additional emerging businesses to capitalize on the value of its trademarks and other assets. NEW YORK (SEPT. 28) BUSINESS WIRE - In an exclusive report based on months of investigation, Aviation Week & Space Technology reveals in its latest edition that advanced, secret aircraft developed at highly classified government facilities in the Nevada desert over the last decade are now demonstrating and validating new technologies for the nation's future fighters, bombers and reconnaissance platforms.

The number and sophistication of new aircraft appear to have increased sharply in recent years, when substantial funding was made available for ''deep black'' projects. Vehicles now flying include both manned and unmanned hypersonic-capable aircraft designed to perform strategic reconnaissance and other, less conventionally defined missions. Several vehicles appear to incorporate technologies that outstrip those now employed by engineers charged with developing current-generation aircraft.

Aviation Week & Space Technology, published weekly by McGraw-Hill, is the leading journal for the worldwide aviation, aerospace and defense industries.

McGraw-Hill's Aviation Week Group markets a comprehensive network of publications, electronic and video services for the multibillion dollar aviation/aerospace/defense market.

SHAWNEE, OK (SEPT. 28) BUSINESS WIRE - Barton Industries Inc., announced at the Society of Petroleum Engineers (SPE) conference in New Orleans, of Barton's technological advances in product development for the oil and gas industry.

C. W. Earl Johnson, chairman of the board and chief executive officer, stated that at a time when the United States is 50 percent dependent on imported oil, energy companies could relieve a large portion of this dependency by utilizing Barton's automated Reservoir Management Systems in the United States.

According to Johnson, Barton's Pump Off Plus advancement has a unique optimization feature not offered by competitive units which allows existing oil wells the enhancement feature of increasing oil production from 10 percent to 30 percent.

These increases are achieved through a combination of a significant reduction in well downtime coupled with a pure improvement in production due to the more efficient operation of the well. In addition, companies also enjoy significantly reduced expenses in the areas of maintenance and utility costs.

These savings are achieved by extending the life of the equipment through a reduction in the run time of the unit by 50-60 percent while still providing the increased production previously mentioned. The advancements generated by Barton systems will allow our country to automate the some 300,000 plus wells in the United States, generating production increases here at home, thus alleviating our dependence on the Middle East.

Major oil and gas companies are now field testing, evaluating and placing orders for Barton's family of automation products including Gas Flow Measurement, On-Line BTU Analyzer and Pump-Off Plus. Barton's Integrated Technology Systems Division looks forward to a very active and prosperous year in 1991.

PARAMUS, N.J. (SEPT. 28) BUSINESS WIRE - Drivefone Inc. (NASDAQ:DFON) announced that the company has signed a definitive joint venture agreement with OTRON Corp. of Seoul, Korea.

OTRON is a 30-year-old manufacturer of telecommunications equipment and computer peripherals with revenues in excess of $100 million annually. The joint venture company intends to develop Advanced Digital Wireless Personal Communications systems to be marketed on a worldwide basis.

Drivefone is awaiting approval from the Federal Communications Commission (FCC) for experimental licenses to test Personal Communications Networks (PCNs) in the cities of New York, Philadelphia and Boston. These cities will be utilized to test various transmission techniques in the 900 MHz band in order to develop systems and products for eventual commercial application.

Other projects initially planned include development of AMPS compatible digital/analog cellular phones.

For the interim, the joint venture will operate from Drivefone's corporate offices in Paramus, N.J. A core staff will be assembled shortly in the areas of design, engineering, administration and marketing. The joint venture will utilize the resources of the two partners, as well as an outside consulting staff.

Drivefone Inc. has over six years of experience in the cellular communications business as a distributor, carrier agent and manufacturer. The company is a national distributor of cellular telephones, accessories and pagers.

Additionally, Drivefone Inc. is a national activator of cellular numbers, and manufactures and distributes the LuxCel line of transportable phones, antennas and accessories.

Headquarterd in Paramus, N.J., Drivefone Inc. has branch offices in Norwalk, Conn. and Waltham, Mass.

MONTGOMERY, AL (SEPT. 28) BUSINESS WIRE - Blount Inc. (ASE:BLT.A) Friday announced it is negotiating with Ogden Projects Inc., for the sale of Blount's waste-to-energy subsidiary, Blount Energy Resource Corp. (BERC), to Ogden.

Terms of the discussions were not disclosed. Blount is hopeful that the execution of a definitive agreement and the consummation of the transaction

will occur prior to the end of the calendar year.

R. William Van Sant, Blount Inc. president and chief operating officer, said, ''The discussions with Ogden are the result of Blount's previously announced decision to find a qualified buyer or significant joint venture partner for BERC. This supports our long-term strategy to focus on our core manufacturing and construction businesses.''

BERC currently operates waste-to-energy facilities in Warren County, N.J., and Hennepin County, Minn., and has been selected to build and operate a facility in Quonset Point, R.I. Blount Inc. is an international manufacturing and construction company headquartered in Montgomery.

Ogden Projects Inc., through its wholly owned subsidiary Ogden Martin Systems Inc., is the nation's leading builder and operator of waste-to-energy facilities serving counties and municipalities. Ogden currently operates 15 waste-to-energy facilites, is constructing five and has been awarded an additional seven projects. HOUSTON (SEPT. 28) BUSINESS WIRE - Powell Industries Inc. (NASDAQ:POWL) reported that at a regularly scheduled meeting of its board of directors held Friday, the board rejected all offers received to purchase its wholly-owned subsidiary, Powell-Process Systems Inc. (PSI).

According to Thomas W. Powell, chairman and chief executive officer of Powell Industries Inc., ''Although we received several bona fide purchase offers, none of those offers reflected the positive turn-around which we have been able to achieve in PSI operations during the past year.

''From a significant pre-tax loss in fiscal 1989, PSI is now operating slightly above break even and we are confident further significant improvements can be made. For this reason, we are withdrawing it from the market and will shortly announce a reorganization of the management of PSI which should further enhance its prospects for future success.''

In the third quarter of fiscal 1989, a formal plan for the sale of PSI was adopted and this business segment has subsequently been accounted for as ''Discontinued Operations.'' The decision not to sell the subsidiary will require a restatement of prior earnings to eliminate the ''discontinued'' designation.

However, according to J.F. Ahart, vice president and chief financial officer, ''the effect of the restatement on current fiscal year results will not be material, in fact, quite insignificant.''

Powell-Process Systems Inc. designs, manufactures and sells microprocessor-based distributed control equipment under the trade name MICON. MICON Systems are used for control of boilers, compressors, columns and other industrial processes.

Powell Industries Inc. designs, manufactures and packages electrical generation, control and distribution equipment.

BRANFORD, CT. (SEPT. 28) BUSINESS WIRE - Echlin Inc. (NYSE: ECH), for its fourth quarter ended August 31, 1990, reported earnings per share of $0.25, compared with $0.06 earned in the fourth quarter last year. Frederick J. Mancheski, Chairman and Chief Executive Officer, announced the results.

For the entire fiscal year, Echlin's earnings amounted to $0.85 per share, up 6 percent from last year's $0.80 per share. Fourth Quarter Results

Net sales in the fourth quarter totaled $427.7 million, a 15 percent increase

from sales of $373.1 million reported in the same period last year. Approximately one-third of the increase was from comparable operations (those which were part of Echlin in both fiscal years).

The remainder was due to sales from acquired businesses, principally Hobourn Group Ltd., a U.K. manufacturer of fuel system products and water, oil, and power steering pumps, and Vera Imported Parts Corp., a U.S. importer/distributor of replacement parts for imported vehicles. Unit sales of comparable operations were down about 3 percent this quarter.

Net income after tax in the fourth quarter this year was $13.5 million, compared with $3.2 million in last year's fourth quarter.

This year's profits were reduced by $5.3 million due to a one-time charge related to closing a Canadian forging operation. Last year's fourth quarter profits were reduced by $6.2 million before taxes relating to the writedown of an investment and a litigation settlement, offset by a gain of $3.7 million before taxes associated with the sale of idle facilities.

Excluding the non-recurring adjustments in both years, fourth-quarter earnings per share would have been $0.35 in 1990 compared with $0.10 in 1989.

For the 12 months ended August 31, 1990, net sales totaled $1.601 billion, up 10 percent from last year's $1.454 billion. Approximately 3 of the 10 percent increase was due to comparable operations, while 7 percent was from acquired businesses' sales. Unit volume for comparable operations declined about 2 percent for the entire year.

Net income in fiscal 1990 totaled $47.2 million, up 6 percent from the previous year's $44.4 million. A combination of unit sales declines, costs of raw material, labor and services rising faster than sales price increases, higher currency translation expense, and plant closure costs contributed to squeeze Echlin's net profit margin.

''We believe the motor vehicle parts aftermarket will begin to turn around and start growing again in 1991,'' Mr. Mancheski said. ''We are continuing to grow in high growth markets outside the U.S., including Europe, Latin and South America. Net income will benefit both from unit sales increases, and from ongoing improvements in operations.''

BRANFORD, CT (SEPT. 28) BUSINESS WIRE - The Board of Directors of Echlin Inc. has elected C. Scott Greer president, following the resignation of Roger H.

Storey.

The Board also elected Frank R. O'Keefe Jr. a director, to fill the vacancy created by Mr. Storey's departure. Echlin's Chairman, Frederick J. Mancheski, made the announcements responsibility for most of Echlin's operations.

O'Keefe was formerly chairman and chief executive officer of Armtek Corporation, an automotive parts, component and systems manufacturer. Before that, he was president of Robert Bosch Corporation, and held executive positions at General Electric Company.

''Scott Greer has shown an exceptional ability to build our business units' sales and profits, and we look forward to his overall leadership,'' Mancheski said. ''Frank O'Keefe's addition to our Board will bring to Echlin many years of experience in our industry, which we feel is invaluable.''

Echlin is a worldwide manufacturer and distributor of motor vehicle replacement parts, with annual sales of $1.6 billion.

NEW YORK (SEPT. 28) BUSINESS WIRE - Wolf Financial Group Inc., New York, (NASDAQ:WOFG) Friday announced results of operations for its fiscal year ended June 30, 1990.

The company had net income of $587,667 or 9 cents per share compared to net income of $1,865,812, or 29 cents per share (including a 2 cents per share extraordinary item relating to the tax benefit resulting from a capital loss carry forward) for fiscal 1989.

Income before taxes and extraordinary item was $601,422 and $3,085,181 for fiscal 1990 and 1989, respectively. Revenues for the fiscal year ended June 30, 1990 were $29,096,747 compared to $30,291,539 for fiscal 1989.

The weighted average number of shares outstanding was 5,558,957 during fiscal 1990 and 5,529,203 during fiscal 1989. The company said that its first quarter ending Sept. 30, 1990 is expected to be impacted by adverse market conditions.

The company also announced the appointment of James H. Petrantis as executive vice president and treasurer. Petrantis, who has served as the corporation's controller since 1983, will also be chief financial officer.

Wolf Financial Group is engaged, through its wholly-owned subsidiary, F.N. Wolf & Co. Inc., in securities trading, investment banking and brokerage activities.

OSHKOSH, WI (SEPT. 28) BUSINESS WIRE - Oshkosh Truck Corp. (NASDAQ:OTRKB) announced that the government approval process for the Army's $1.1 billion order for Palletized Load System trucks was completed Friday with the signing of the contract.

In July, the Army announced that Oshkosh Truck Corp.'s vehicle was selected as their choice in the competition for its new generation heavy duty cargo hauling truck. First year funding for this 5-year contract is $31 million for 79 vehicles.

The contract calls for a total of 2,626 Palletized Load System vehicles and associated equipment and contains an option for the purchase of additional units. Production is scheduled to begin during November 1991, and end during August 1995. The prime mission for the 500 horsepower, five axle, 10 wheel drive truck is the transporting of ammunition and other heavy cargo on pallets that can be automatically loaded and unloaded off the back of the truck. The cost-saving Palletized Load System permits the army to maximize cargo movement while minimizing the number of vehicles and personnel.

#90271b0820 09/28/1990 ~Business Wire

EATONTOWN, NJ (SEPT. 28) BUSINESS WIRE - Roberts Pharmaceutical Corp. (NASDAQ: RPCX, BSE: RPC) Friday announced its results for the fiscal year ended June 30.

Revenues were $1,687,500 compared to $5,832,400 in fiscal 1989. The net loss for the year was $4,713,100, or 85 cents per share, compared to net income of $130,800 representing less than 1 cent per share in the prior year.

In making the announcement, Dr. Robert A. Vukovich, chairman and president, said, ''The results for 1990 are in line with management's expectations and reflect the company's continuing research activities, particularly direct expenditures of more than $3.2 million on development for the company's clinical and pre-clinical stage products, primarily Radinyl, the company's radiosensitizer being developed to enhance the anticancer effects of radiation therapy; Somagard, a drug used in treating central precocious puberty, and Maxivent, a novel bronchodilator to be used in the treatment of asthma.''

He added, ''The results are not comparable to 1989 which included the benefit of greater revenues from license fees and one-time research funding from the company's 50 percent owned joint venture company.''

Vukovich also pointed to an increase in the company's total assets reflecting the proceeds of more than $14 million from the sale of the company's common stock in a private placement in November 1989, and the successful completion of an initial public offering of 2.3 million common shares in January and February 1990. At year-end, Roberts Pharmaceutical had more than $11.7 million in cash and marketable securities.

In another development, Roberts and the Upjohn Co. (NYSE:UPJ) jointly announced the conclusion of an agreement whereby Upjohn sold all rights in the United States, Canada, United Kingdom and the Republic of Ireland to Roberts for several professionally promoted proprietary brands.

The companies also concluded agreements whereby Upjohn would continue to manufacture and distribute the products on Roberts' behalf in the near-term. Roberts has announced that it will assume the marketing and promotion of these products at once. Upon conclusion of the manufacturing and distribution agreements with Upjohn, Roberts will assume full responsibilities for these functions as well.

While the terms of the agreement were not announced, the transaction includes the purchase of current inventory, trademarks, sales data, marketing material and other intagible assets.

Spokesmen for both companies announced that they were very pleased with the arrangements and that they looked forward to a mutually beneficial relationship.
